This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

**Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

**About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

June 7th, 1915.

The Prest-O-Lite Co., Inc.,
2104 Broadway,
New York, N. Y.

Dear Sirs:

What has happened to the 1,000 PREST-O-LITES we purchased from you last season? They are doing duty on 1,000 motorcycles in and around New York, so far as we know.

If we ever had any doubts about the increasing popularity of PREST-O-LITE, last season's motorcycle business has permanently dispelled them.

The experienced rider knows that acetylene gas gives a brilliant light and that with a PREST-O-LITE tank, all trouble in connection with generation is eliminated. You have undoubtedly solved the lighting question for use on motorcycles.

Yours faithfully,

NEW YORK SPORTING GOODS CO.

Powhatan Robinson

President.

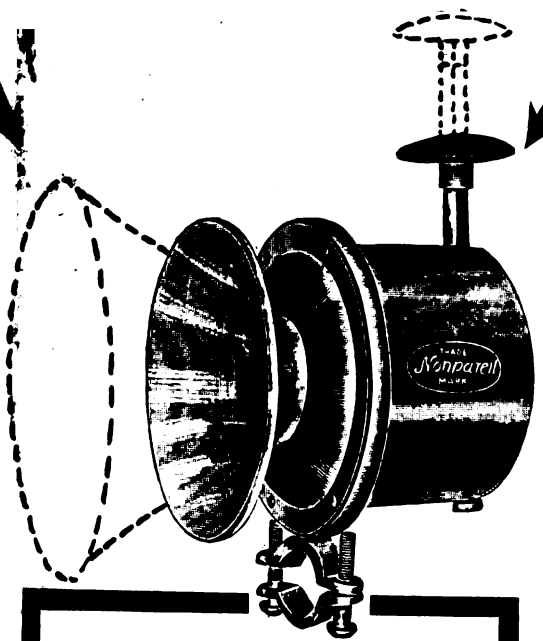
# The "BEE JAY" is Built Specially for the Motorcycle and Bicycle—It is NOT an Automobile Horn Cut Down

Most horn manufacturers try to palm off a made-over automobile horn, with the bell cut down from the original size, as a bona fide motorcycle horn. This is very easy to do.

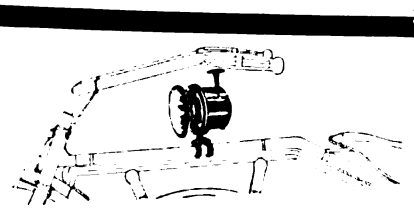
But the "BEE JAY" is really a motorcycle horn, as is proven by the short plunger bar, which causes the mechanism to operate at the slightest finger touch, whereas the cut-down auto horns retain their long plungers and are consequently much harder to operate.



Think, riders, of the startling price this horn is sold at, think of its light weight, only 21 ounces, of its compactness, its simplicity, and then ask yourselves if here, at last, is not the horn you have been waiting and hoping for. We are horn-makers exclusively, manufacturing in huge quantities, hence the unprecedented low price.

**$2.50**

**FIRST AND LAST COST**



**WITH TOP BAR BRACKET**

**$2.75**

Dealers — stock the "BEE JAY." Get in your order quickly, for every day you are without a stock of these little wonders you're losing real business. Your customers have long been looking for horn satisfaction. Sell it to them in the "BEE JAY."

***Write us today for prices, etc.***

Manchester, (in the mountains)
N. H., June 1, 1915.

The Pope Mfg. Co.,
Westfield, Mass.

Dear Sirs:

Here is a good item for you. I have been 135 miles without stopping. My Twin did not even skip once. I sailed along like a bird, over all kinds of roads. Some places I had to go through sand and mud 3 inches deep, and I did not get off at all; just think of it. It can not be done on any other motorcycle, and I know it.

Here is another: Manchester, N. H., to Worcester, Mass., and return—a distance of 128 miles, and I got a little better than 46 miles to a gallon of gas.

Another: I rode 10 miles in a race and came out first. I rode the 10 miles in 9 minutes, 39 seconds; this was the fastest ride I ever had.

Yours very truly,
(Signed) DAVID L. MOYNIHAN

## THE "X" ANNEXED

### The Material Evidence of Supremacy at Readville, June 19th

**Traveling 300 miles at an average speed of 68⅕ miles per hour is sure going some.**

If track and other conditions were such that the entire field could make or approach the same speed, the superiority of one machine might not be so strongly marked, but when the EXCELSIOR team literally ran away from all of their competitors, defeating the nearest team by 25 miles and the 3rd time by twice that much, there is no room for argument.

We have been too busy filling orders for 1915 models to spare any of the new 15 motors for racing, and this is the first race in which the new 15 "X" motors have been used, and they amply upheld our claims that this is the fastest and most powerful motorcycle engine ever built.

BEAR IN MIND, we build no motors of special design and every EXCELSIOR MOTOR used in this or any other races is exactly like every other EXCELSIOR MOTOR. Even the ported motors having only such changes as could be made by any skilled repairman in a well-equipped shop.

# Dealers— Why Postpone?

Competition in the bicycle business is keen today. Success and profits come to dealers who apply the greatest selling pressure.

Make every bicycle you sell bring you in new customers. Most bicycles now are well built. They entice trade on appearances.

The test is in the *tires*. Poor tires make the best bike helpless.

Keep your bicycles and customers "sold." See that the machines you sell give continuous pleasure. That will bring you new business quicker than anything we know of.

Tires almost ruined the bicycle business once. But they never will again.

Goodyear-Akron Bicycle Tires now stand at the top—in mileage, comfort and reliability. They have made the bicycle *safe and sure* for business, distance, or for pleasure.

136,082,830 Goodyear-Akron Bicycle Tire advertisements are being published this year in the great magazines and papers. People now know of this new tire sensation.

Think of what such publicity must do for dealers who follow up the advantage.

Learn more about this Goodyear Dealer Co-operation. Write for our brilliant sales-making plans.

We offer this service to all dealers FREE. Write today, else you may forget. Address Dept. 227

# A Scenic Tour Through New York's Mountain and Lake Region

## Motorcyclists Who Attend Saratoga Rally Will Find Themselves at Threshold of a District in Which Perfect Roads and Strikingly Picturesque Scenery Hold Out Unparalleled Inducements to the Motor Tourist

By CHARLES W. BUCKNALL

***This Tour has been mapped especially for those riders who wish to combine a jaunt through the Adirondacks with their visit to Saratoga, and the excellence of the roads is vouched for.—Ed.***

Few other portions of this country offer to the tourist a greater wealth of natural beauty, unfolded in mile after mile of panoramic splendor, than that afforded upon a tour of the Adirondack Mountains. The Adirondacks are the highest mountains in New York and are covered with tall, stately pine and spruce which fill the air with an invigorating odor, while interspersed here and there are countless lakes on whose surfaces are reflected the darkened, graceful shadows of the mountain slopes. The recently built new state roads pushing their way into the interior of this wonderful region have made it possible to enjoy the beauties of the scenery. As a rule good scenery and good roads are not found together, but on the trip described herewith excellent roads are encountered through regions possessed of rare beauty. Recently has recently been completed a new state road through the Champlain valley, making it possible to go the entire distance from New York to Montreal on good state macadam highways.

Those attending the Saratoga convention should not miss the splendid opportunity of taking at least a one-day trip on the route described.

### How to Start the Tour from Saratoga

Starting from the Post Office at Saratoga go west on Church street and over the scenic route via Corinth and Luzerne to Lake George. The views that are unfolded, especially from the crossing of the Hudson River at Hadley, past Lake Luzerne to Lake George are wonderful. Lake George, queen of American lakes, is undoubtedly the most picturesque resort in the United States. It possesses a picturesque charm and delicacy of outline that win the admiration and wonder. It is queenly in its majesty, peerless in beauty and decorated with a wealth of historic facts and legendary lore. The lake is 32 miles in length, and with its 365 islands that seem to float on its glassy blue surface, its fairylike nooks, and the picturesque contour of its mountains, it is surely the peer of

A Beautiful Vista Near Lake Champlain

Digitized by Google

American lakes. After passing Lake George village, take the left fork to Warrensburg (the right fork leads up the west shore of the lake for about 9 miles).

Speeding onward, Chestertown is reached, where a left turn is made to Loon Lake; at this point one turns to Pottersville and past Schroon Lake, another beautiful sheet of water 10 miles long, and continues straight north to Elizabethtown. The nature of the country traversed does not change perceptibly until the motorcyclist reaches Euba Mills, simply a fork of the roads in a wildly beautiful section of the Adirondacks. Just beyond, swing right and then left through a great cut in the rock wall high above Split Rock Falls, and the eye is met by the full beauty of the view down Pleasant Valley, in which Elizabethtown is located. The setting of Elizabethtown is idyllic. At one side, along the level bed of Pleasant Valley, meanders the peaceful little Bouquet River, while in all directions rise the peaks of the encircling mountains. At the Deer's Head Inn, turn left to Keene.

### Some Wonderful Views

From Elizabethtown to Keene Center is one of the most magnificent views in the Adirondacks, just where the highway swings to the left down Spruce Hill to Holt's Corners. Straight ahead across the valley looms a great, seemingly impassable mountain wall, the varied beauties of which rival those to be found in Switzerland or any other part of the world. There is another pretty view before the descent to Keene Center, after passing the three corners and climbing the hill with cemetery on the right.

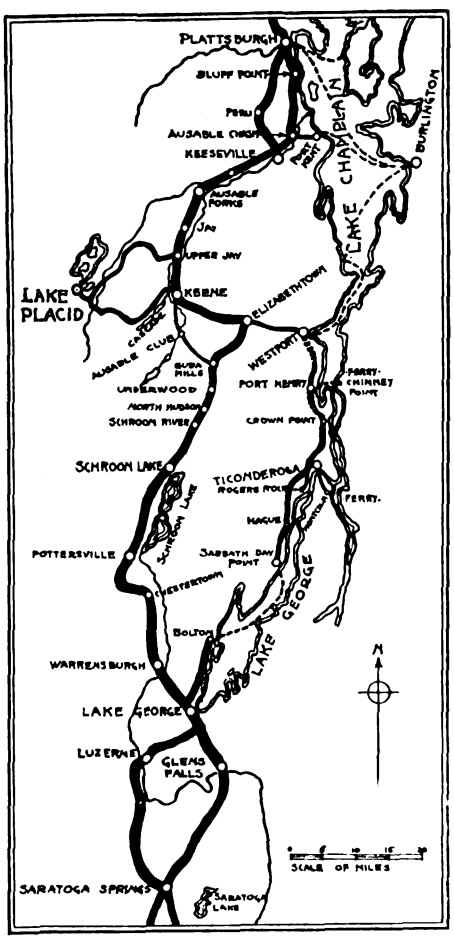
One should not miss a side trip from the Owl's Head Hotel in Keene, and going south on a good gravel road through the Keene Valley to St. Hubert's and ascending the hill to the Ausable Club, from which there is one of the finest views in America. Keene Valley is widely noted for its beauty, which is a striking combination of the pastoral with the wild. Scattered up and down the fertile valley are many attractive summer homes. The mountains on either side rise steeply from the valley floor and the entire distance from Keene Center is a panorama of unusual beauty. The beauty of the Upper and Lower Ausable Lakes, near the Ausable Club, rivals that of the lakes of Switzerland. The Lower Ausable Lake is two miles long, and is situated 2,000 feet above sea level, with the mountains towering nearly 2,000 feet above. The Indian Head looks out over the water, and stands guard while Nature sleeps. A mile distant by trail is the Upper Ausable Lake, which, with its companion, are second to none for their picturesque scenery.

### Side Trip to Lake Placid

A few days spent around Keene would be well repaid. It is here that the road to Lake Placid (16 miles) is taken, but as it is a bad dirt road, it should only be attempted by the more seasoned riders, although the hardship is well repaid by the wonderful views which are to be seen, especially by the grandeur of Cascade Pass. Towering one thousand feet in the air are the rock ledges of Long Pond Mountain on the south, and of Pitchoff Mountain on the north, while nestled at the bottom of the narrow ravine are the twin Cascade Lakes. Nearing Placid we pass John Brown's farm, with Old Glory waving in the mountain breeze above the spot where the body of the martyr to the cause of slavery "lies a-mould'ring in the grave." A new state road has just been started from the village of Jay through the Wilmington Notch and this road should be completed by next season.

Starting from Keene we go North along the east branch of the Ausable River, through a fertile farming country, to Ausable Fork and Keenville, and on to the Ausable Chasm, one of the natural wonders of the East.

Ausable Chasm is the most interesting rock formations east of the Rocky Mountains, and was formed by the mad rush of the Ausable River from the mountains to Lake Champlain, a few miles distant. At the head of the Chasm is Rainbow Falls, where the river drops 70 feet before tearing at express speed down through the chasm itself, the sides of which rise in places to a height of over 100 feet. The total length of the canyon is nearly two miles, and after the trip through the greater portion of it by means of protected walks along rock ledges and across iron bridges, an exhilarating finish is given the trip by the dash down through the Flume in stout rowboats. The admission to the Chasm is $1.25 (including the boat ride and the drive back).



**Map of the Scenic Tour From Saratoga to Plattsburgh**

Remounting our faithful steed we ride on through the woods, and come out along the shore of Lake Champlain. The country now assumes a level and rolling aspect. This lake of magnificent distances, and rare historic association, is about 110 miles in length, and varies from one to thirteen miles in width. The road skirts the lake for a few miles, and looking out across the water one sees the Green Mountains of Vermont piercing the skies. Passing the State Barracks, Plattsburg is soon reached, where our glorious trip makes its turning point. We retrace our way over the same route, and admire the glorious scenery from another viewpoint. As one sits back and hears the rhythmic purr of his motor speeding onward over the perfect roads, he cannot help but feel that this is the finest trip in the Empire State.

# GALE'S OUTFIT IN BISON CITY

## Schickel Rider Tows Schooner Through New York on First Leg of Trip to Coast

BUFFALO, N. Y., June 23.—M. E. Gale, with his prairie schooner towed by a Schickel "Big Six," arrived here yesterday, having ridden in from Rochester via Batavia. Gale was accompanied by his two boys riding side by side on a lightweight model. He intends to leave for Erie, Pa., shortly.

Gale left Stamford, Conn., the home of the Schickel machine, on June 2, and drove to New York. He then started on his transcontinental trip, reaching Poughkeepsie on June 4. He reports having to make two detours on the way up the Hudson river and passed through one bad place. Hudson, was reached on the following night and on Sunday night the Gale party camped outside of Albany, having ridden 42½ miles that day.

At noon on June 6 a start was made for Schenectady, and calls were made on several dealers by Gale when the outfit reached that city. The night camp was made just outside of Amsterdam, but progress in the morning was delayed by a heavy rain and a strong wind. The weather clearing up later, the road was again taken and the party came to Little Falls, having made a run of 43.6 miles since morning. Herkimer and Ilion were passed through the next day and the night halt was made in Utica.

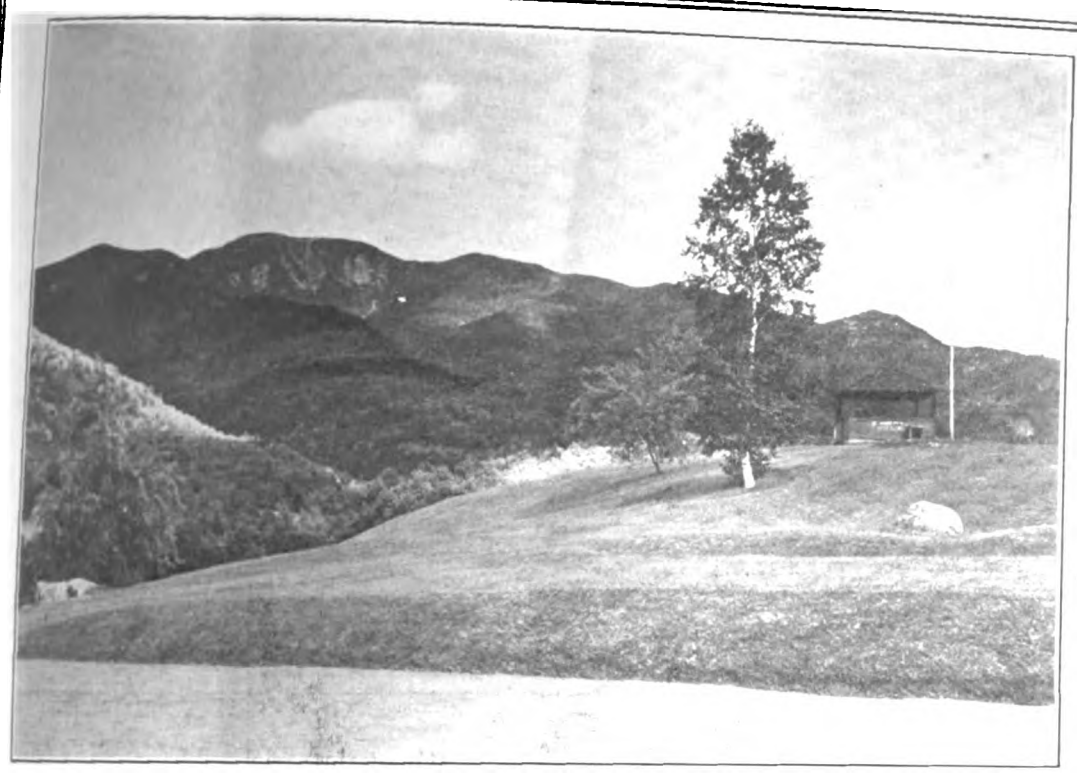
Another storm was encountered at Syracuse, reached via Oneida on the day after reaching Utica. The next camping place was Canandaigua, which was reached through Auburn, Seneca Falls and Geneva, after 58 miles of rough roads. On reaching Rochester the next noon, Gale had a stuck piston ring, but righted this by taking off the cylinder, putting in another ring and going on after clamping the cylinder in place again.

### MISS HOTCHKISS IN COLORADO

Miss Effie Hotchkiss, of Brooklyn, N. Y., who recently left New York City accompanied by her mother, for a sidecar trip to the coast, has arrived at Colorado Springs, Colo. She reports that they are enjoying themselves and expect to be at the fair in a short time. "Our Harley-Davidson machine," writes Miss Hotchkiss, "is running like a top."

Digitized by Google

# Typical Views On The Scenic Tour



*It is the ideal combination of mountains and lakes, scenic vistas of unparalleled beauty and almost uniformly good roads, that places the tour described on the opposite page in a class by itself. One of the most picturesque districts is that around St. Hubert's, of which the view above is typical. The picture shows part of the grounds of the St. Hubert's Golf Club. The photograph below presents a lake scene which is characteristic of the country along the upper reaches of the Scenic Route described in the accompanying article. The motorcycle tourist on this route will do well to carry a camera.*

Digitized by Google

# Touring No Lonely Sport

## Two Fair Riders Royally Entertained

"THE man who said motorcycling wasn't a lonely sport sure did know what he was talking about," remarked Miss Fay Hildabrand to the Milwaukee correspondent of **Motor Cycle Illustrated,** when she and her mother, who were en route for Tulsa, Okla., from their home in Washington, Pa., left their sidecar outfit at the curb last week and mounted the steps of the Milwaukee Motorcycle Club's house. They were being entertained by Hugh Sharp, Frank B. Rodger and Miss Lillian Hauerwas, representing the club.

"From the day we started out on this vacation trip," continued Miss Fay, after the quintet had entered the cozy reception room, "we were greeted in almost every town we passed through by the local contingent of motorcycle riders. Why at Marion, Ohio, they knew mother and I were coming; and no sooner did we enter the town, than the Marion club members overwhelmed us with their cordial greetings and led us out to the picnic grounds, where a great crowd of riders were gathered. The picnic was wonderful—simply wonderful! It made us feel good to think that we were members of that great genial order of motorcyclists.

"From Marion to Logansport the trip was continued under the escort of the Marionites. Continuous sheets of rain were pouring down upon us and made us all look like a bedraggled lot of tourists. But that didn't daunt the enthusiasm of our friends, who saw us to one of the Logansport hotels. Going into Valparaiso, Ind., we were met by Mr. E. H. Mead, the local Harley-Davidson dealer. It would certainly be hard to beat Mr. Mead as a host, for he not only entertained us royally while in his town, but insisted upon guiding us into Chicago.

**Bad Roads Were Frequently Encountered on the Trip**

"Now, people are inclined to think," smiled Miss Fay, disdainfully, evidently deprecating the idea she had in mind, "that folks in the Windy City assume an utterly bored and blase attitude toward tourists. But, believe me, they've got another guess coming. Why, you ought to have seen the traffic police. If mamma and I had been related to the King of England they couldn't have shown us more gentlemanly attention. They doffed their caps at the sight of us, and gave us the right of way through the heart of the city. And then the reception given us by Mr. Lang, the Chicago dealer—it was splendid."

Miss Fay had been doing most of the talking, but not without a great deal of urging, for neither the fair young rider nor her mother are at all given to publicity. But Mrs. Hildabrand evidently had something to say.

**Miss Fay Drives the Machine, While Her Mother Enjoys Sidecar Comforts**

"You mustn't forget, Fay," she said, "how good the Rockford, Ill., riders were to us. You know, they rode all the way to Geneva to fetch us to their town. And now, here's this hospitable reception of the Milwaukee club. It is certainly easy to cross the country on a sidecar outfit, when everywhere you go there's someone to greet and assist you."

"Will you make Tulsa, Okla., the end of your trip?" Miss Fay was asked.

"Oh, no. We're game to go further than that. About a week, or so, will be spent there, and then our sidecar journey will continue to the Panama-Pacific Exposition. You see, I have an uncle out in Tulsa who owns a big ranch, and we're just going to stop with him and see some real Western life. After we tire of riding broncho ponies, we'll take a jaunt to Denver and then make a bee line to San Francisco. Then for the Fair! We intend to feast our eyes on all the interesting things that are on exhibition.

**Miss Fay and Mrs. Hildabrand After Their Arrival in Milwaukee**

Wouldn't you like to be with us right now?"

The interviewer, catching the unbounded spirit of enthusiasm which radiated from Miss Fay, had to admit that nothing would be more suited to his tastes than to take a happy trip out to the Fair in a sidecar outfit.

"Speaking of sidecar outfits," continued Miss Fay earnestly, "do you know that we spend a lot of time and thought in determining whether we would travel by automobile or motorcycle. We didn't toss up a coin to decide which we had better use. No, sir! Some men say that we women can't reason. Well, that's wrong. Ma and I reasoned out pretty well that the sidecar outfit is vastly superior for a transcontinental trip; and our experience proved the accuracy of our contention.

"All last winter we used a motorcycle, when the weather frightened most folks indoors and the roads were either hard frozen ruts or ways of mud and slush caused by the sun's rays beating down upon the snow. We used an automobile, too. And, as a result, we came to the conclusion that the four-wheeler really made walking a pleasure—and we didn't intend to walk across the continent!"

Mrs. Hildabrand emphasized the fact that they were not after "Cannon Ball" Baker's scalp. Their's is simply a sensible and enjoyable tour—one which will finish unmarred by accidents and replete with the many invigorating pleasures of living outdoors. Seldom does the Hildabrand's speedometer register more than twenty-five miles an hour.

Athletic Miss Fay is acting as chauffeur on the trip, while her mother is by no means a passive sidecar passenger. To her lot falls the paying of bills, arranging for hotel accommodations and keeping a diary. Before reaching Milwaukee, most of the overnight stops were made at hotels; but, in the expectation of passing through sparsely settled districts, a tent and cooking utensils were added to the equipment carried, thus placing another burden on the strong shoulders of Mother Hildabrand, for it will be she who will pitch the tent each night and prepare the meals, while Fay grooms her mount.

# Apply Safety First Policy in Handling Fuel

## A Moment's Carelessness May Cause a Gasoline Blaze

By GOSLIN

IN all probability a large proportion of those who ride motorcycles do not realize the highly inflammable qualities of gasoline; or, knowing of them, take chances when using it outside of the fuel tank. About one year ago I had the realization of how powerful and dangerous a gasoline fire could be brought home to me in a very forcible manner, and it has made me very respectful of gasoline ever since.

### A Personal Experience

After cleaning the machine with gasoline and a rag and brush, the idea came to me to clean the drive chains with the little left in the can. Accordingly, I jumped into the saddle and pedaled her over. Like a flash the fuel beneath the machine took fire. I managed to vacate that saddle in record time, and began to pull the machine away from the flames, fortunately upsetting it clear. A few welts with my cap and the flames on the machine was extinguished.

In the excitement, however, some one knocked over the can, and we all saw the flames lick through the air and run along the concrete floor. The fire soon burned itself out, and I came through the episode with only a scorched toolbox and chain guard. Also, I learned a lesson which I have never forgotten.

Twice this spring friends of mine have taken gasoline at night and had their lights burning when the filling process was going on. It goes without saying that the results were disastrous in each case. In one the machine was a total loss, but the rider was fortunate enough to be fully compensated as he ran into the garage with his lights going, and the garage man did not tell him to put them out.

The other rider took on gas at the curb, and when the garage man pumped vigorously the fuel gushed out all over the machine, and there was the most beautiful blaze imaginable. Before the extinguishers were got on it the flame had damaged the machine to the extent of $50, and the owner had a badly-scorched hand.

The very next night another rider in the same neighborhood burned his coat-sleeve and gloves in the same manner, with no damage to the machine.

### Buy Before Sunset

Now my advice is to avoid buying gasoline after sunset, but if you have to, put your lights out. A fraction of a second's work may save you many hard-earned dollars. When a chap tells you that gasoline isn't so dangerous and proves it by dropping a lighted match into a can of fuel and the match goes out, be thankful that you saw the stunt done. Do not try to pass it along, however, as you may not have the same luck. Gasoline is treacherous stuff, so why go out of your way to play with it?

The general practice of smoking when bending over gasoline in open cans frequently leads to accidents. There is no call to take any extra risks in connection with a quickly-combustible liquid, so keep the flame and the fuel far apart.

# Saratoga, in Gay Carnival Dress, Eagerly Awaits Arrival of Rally Riders

SARATOGA SPRINGS, N. Y., June 29.—This city is talking nothing else but the Motorcycle Rally. In fact, not only this city but the entire surrounding territory from Albany to Lake George. Things began to look a bit dubious last week and the members of the Saratoga Motor Carnival Association began to think they did not have much pull with the weather man, for each day the rain managed to come down some time or other, but the week started out yestedday with ideal weather; in fact, it could not be more perfect for motorcycle touring. With the cessation of the rain the spirits of the Saratogans mounted and the carnival spirit began to prevail with the result that decorators began to get busy and a carnival atmosphere prevails throughout the entire town. From one end to the other neatly-printed signs are being displayed, which read:

"Saratoga Springs
"WELCOMES
"The Motorcyclists.

"The proprietor of this place is a member of the Saratoga Motor Carnival Association and invites the patronage of the visiting motorcyclists.

"MEET US AT SARATOGA IN 1916
"For the
"National F. A. M. Meet."

Every member of the Carnival Association, which has co-operated with **Motor Cycle Illustrated** in making this year's Rally possible, is prominently displaying this card. The fact is that the motorcyclists created such a splendid impression here last year and the people of this territory enjoyed the races so much that the natives are looking forward to the Rally with as much anticipation of pleasure as the riders themselves, who, by the time this reaches the readers, will either be on their way to the Spa or about ready to start. To those who have not even yet made up their minds to spend the holidays with the boys at Saratoga and enjoy one of the jolliest times they have ever had there is time yet to make up your mind NOW, get on the job and "Meet Us at Saratoga." We can take just as good care of three thousand or two thousand as we can of one thousand, and we can assure you of a good time at a minimum cost. There are any number of rooms to rent here at fifty and seventy-five cents a night, allowing you to spend just what you want to for meals, or you can go to the regular hotels, which have made special rates for the three-day Rally, but which, of course, charge higher prices for the greater conveniences.

The famous Saratoga race track, which is a beauty spot in itself, is being rolled constantly and even now is in excellent shape for the three cards of racing which have been arranged. The track itself is known as one of the fastest in the country, and with some of the best racing men entered, it would not be at all surprising if some of the present records were shattered. The one-hundred-mile race scheduled for Monday morning is, of course, attracting wide attention, and it is certain that a fine field of riders will face Referee George Wagner when he lines them up for the start.

Mr. Wagner has selected the following officials to aid him in the races:

Judges—Worden W. Kelly, president Saratoga Motor Carnival Association; John Henry, ex-sheriff of Buffalo; H. Benner, New York State Federal Tire manager.

Timers—Hal H. Noyes, State representative Hendee Mfg. Co. and F. A. M. Commissioner; Jes Campbell, New England manager. Harley-Davidson Motor Co. and F. A. M. Director; J. O. E. Dieterich, Brooklyn F. A. M. Commissioner.

Scorers—B. Longthorn, Albany branch, Federal Tire Co.; Edward Clague, Rochester; M. C. Van Buren, Rochester.

Clerk of Course—Arthur Strobel, Rochester.

A very attractive and interesting feature which has been arranged during the past week is a Hill Climb to take place on Mount McGregor, a short distance out of Saratoga. Those who know state that the hill is a very excellent test for any motorcycle or automobile. It is about two miles in length and has about a thirty-five per cent. grade. Entries for this event may be secured at headquarters in Saratoga. It is probable that there will be both an amateur and professional event.

A large store has been secured in the Y. M. C. A. Building, on Broadway, for headquarters, and this place will be open constantly during the entire three days of the Rally. The tourists will proceed there immediately upon arrival at Saratoga, register and secure their souvenir watch fobs, tickets admitting them to the races and other social events, etc. The social program as finally completed is as follows:

Friday, July 2, 6:30 P. M. Tourists arrive in Saratoga and register at headquarters. Y. M. C. A. Building.

Saturday, July 3, 2:30 P. M. Championship Races. Saratoga Race Track.

8:30 P. M. Dance in Convention Hall.

Sunday, July 4. Hill Climb, Mt. McGregor, or tour to Lake George, as preferred by the riders.

8:30 P. M. F. A. M. Conventions, North Atlantic District, New England District and New York State. Election of officers and other important business. Convention Hall.

9:30 P. M. Meeting of Dealers for purpose of forming association. Convention Hall.

Monday, July 5, 10:30 A. M. One Hundred Mile Race. Saratoga Race Track.

1:30 P. M. Motor Peace Pageant. Motorcycles and Automobiles, to form four abreast at Broadway and Van Dam street. Reviewed by the Secretary of State and other officials.

2:30 P. M. Championship Races. Saratoga Race Track.

7:45 P. M. Fourth of July Celebration. Convention Hall. Presentation of prizes and address by Secretary of State and others. Followed by dancing.

And then—Meet us at Saratoga for the F. A. M. National Meet in 1916.

For those in or near the metropolitan district who have not been able to arrange to get away from business in time for the tours it will be possible to take the night boats of the Manhattan Line, which leave Pier 39, at the foot of West Houston street, at 5:30 Friday evening and Saturday, or from the foot of West 131st street at six o'clock. These boats arrive at Albany about six o'clock the next morning.

F. A. M. Commissioner J. O. E. Dieterich, who is in charge of the tours from New York, has also arranged for a late division to leave Columbus Circle at seven o'clock tomorrow (Friday morning), an hour later than the main tour. This is the last call and we hope you will all

MEET US AT SARATOGA.

## ARROW SOCIABILITY RUN

Hoboken, N. J.—The first sociability run of the Arrow M. C. was held on Sunday, June 27, the designation being Greenwood Lake. About 25 members and guests participated, going to the lake on nine solo mounts, two tandem-rigged machines and four sidecar combinations. A chicken dinner was enjoyed at the lake and the return was made in the late afternoon. The pleasure of the affair was somewhat marred by heavy rainstorms in the afternoon.

# I. F. Jacobs New Head of Ohio F. A. M.

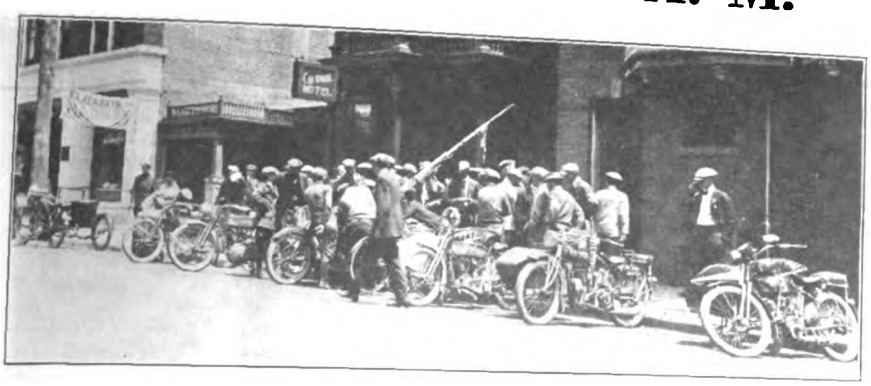
LIMA, O., June 28.—The annual convention and tours of the Ohio State F. A. M. were added to the roll of history on Friday, Saturday and Sunday just passed and much glory accrued to the Lima Motorcycle Club thereby. For the city turned out to welcome the riders. The Lima club had all preparations made and the keys of the city were handed over to the motorcycle men.

The tourists rode in late in the afternoon Friday, found quarters reserved and ready for them at the big hotels, and a smoker and reception at the Lima Motorcycle Club rooms on the program for the evening.

Saturday morning the annual meeting of the Ohio F. A. M. was held at the auditorium, with State Commissioner Jes Cappel presiding, and C. E. Barr as secretary. The minutes of last year's meeting were read by Barr, and then the real work of the session started. First came election of a state commissioner for the coming year.

Four men were nominated for the office—Charles Cleveland, president of the Lima M. C. who has shown himself a resourceful wire and capable man for such work; C. W. Shroeder, Harley-Davidson dealer, C. W. Waughop, Dayton traveler, and I. F. Jacobs, Indian traveler and endurance rider.

When the ballots were counted Jacobs was found the choice of the assembly, and heads the Ohio organization for the coming year. With his long experience in state F. A. M. affairs and in the conducting of endurance runs and tours, he is sure to have a successful administration and to do his full share toward keeping the state in its present place at the top of the column in federation affairs. C. E. Barr, of Columbus, was re-elected secretary.



**First Contingent of Tourists to Convention Arriving at Colonial Hotel, Official Headquarters, on Friday Afternoon, June 25—Tourmaster Jacobs is in Center**

With a fine record for efficient handling of all competitive events and for keeping the contest branch of the sport running smoothly, R. S. McConnell, of Cleveland, was unanimously re-elected state referee. Charles Cleveland, of Lima, was chosen chairman of the publicity committee. For legal action work, Carl Cappel was unanimously named chairman, and takes his new office on the first of next month.

It was decided that the road men of the various factories should constitute the membership committee, as their travels give them opportunity to get around over the state and boost the ranks of the F. A. M. more thoroughly than could be done by any other method; so H. D. Capron, of the Yale; I. W. Shroeder, of the Harley-Davidson; Ed. Rischel, of the Pope, and C. W. Waughop, of the Dayton, were named for this committee. Charles Quetschke, of Toledo, was made chairman of the highway committee.

The assembly unanimously endorsed A. B. Coffman for re-election as president of the national organization.

A vote of thanks was passed to be sent to Jes Campbell, now in Boston, in appreciation of his work in the past in building up the state organization, and another vote to the retiring commissioner, Carl Cappel.

# Creviston Takes Lima 50-Mile Race

LIMA, O., June 26.—An unusually interesting set of races in the F. A. M. afternoon program here today was marred by an accident which resulted in the death of one rider and possibly fatal injuries to another. In the second lap of the second race Rosen (Harley-Davidson) skidded into the fence and his machine rebounded in the path of Harry Smith, another Harley-Davidson rider. Smith was thrown headlong into the fence and killed. Rosen's injuries are serious.

Creviston, Goudy, Pineau, Amos, Meyers and Ellis furnished the chief thrills and technics at the meet.

In the first event, at 5 miles, Marks (Thor) and Morrison (Excelsior) had a hard duel, the event being nip and tuck. On the final round Marks nursed a bit of extra speed out of his mount and won by a yard. Meyers was third.

The second race brought together the high speed combination, Creviston, Goudy and Pineau. Goudy took a hop on his rivals at the start, with Crevy well up and Pineau going strong. But Creviston soon settled down the lead and by wide-open throttle and an utter absence of regard for the future pushed ahead in the last mile, winning by an eyelash. His time was the fastest of the day—5:58⅗.

The 10-mile open event began as another desperate battle between Goudy (Cyclone) and Creviston, on his four-valve. Goudy appeared to be drawing away and Crevvy threw his mount wide open, turns and all. As a result he came into the homestretch in one grand skid, slip and slide. There was no damage, but Crevvy was out of the race. Goudy won, with Morrison (Excelsior) second.

Amos and his Merkel galloped away with the 5-mile consolation; Ellis (Indian), second, and Wilkins (Harley-Davidson) third.

Smith, piloting a Pope, won the sidecar race, beating out Dolan (Harley-Davidson) and Gardner (Harley-Davidson).

Next came the 50-mile open event. Two preliminary heats were run off, owing to the narrowness of the track for the large number of entrants. Ten riders survived the trials. Goudy took the first heat, with Pineau second, and Creviston won the next, with Amos as runner-up.

In the big event itself Creviston took a jump at the start, with Goudy and his Cyclone hot in his wake. Close behind came Pineau and Marks—Merkel and Thor. In the fourth mile Marks fell and retired.

Amos hung up a moment in the sixth for an adjustment, and in the seventh the jinx got a strangle-hold on Goudy. A broken exhaust valve left him high and dry on the backstretch, thus closing his story for the day. At the tenth mile it was Creviston, Pineau and Morrison, with the time 12:15¼.

At 15 miles Amos had worked up to third place, with Crevvy and Pineau still in the van. Amos halted once more in the 16th and Morrison stopped in the 17th. The latter had considerable trouble in getting under way again. Meyers moved his Indian up to third place at 20 miles.

At 30 miles Pineau had Crevvy guessing hard. Crevvy saw the orange jersey coming up on his beam and opened out another spurt. Pineau stayed with him, and at 40 miles was crowding up close again. The 40th saw this order: Creviston, Pineau and Meyers. Time for the distance, 49:29¼.

Then in the 41st mile Pineau got his man. Crevvy jammed on speed so desperately that he pulled a chain in two and coasted up to the pits. Jumping aboard his other four-valve he was off again like a shot.

Crevvy threw everything wide open and rode the turns like a demon. Each turn was simply a hair-raising slide. Slowly he cut down Pineau's lead and near the finish again went into the lead. Creviston won by a length, with Pineau second and Meyers third. Time, 62:04⅘

# Dealers Give Picnic to Illinois Riders

CHICAGO, Ill., June 28.—The Harley-Davidson dealers in and around the Windy City gave their fourth annual picnic to the members of the various clubs in their territories, on Sunday, June 27, at the county fair grounds outside of Wheaton, Ill. It was the best attended and most enjoyable picnic that was ever held by motorcyclists in this vicinity.

Groups of riders began to arrive at the grounds as early as nine o'clock in the morning. Chicago, as usual, turned out the largest number of enthusiasts. The "Dolezal Boys," hailing from the Northwest Side, mustered together an army of one hundred and twenty-five motorcyclists, all of whom were provided with white outing caps, bearing the name "Dolezal Bros." Next came the North Shore Touring Club with sixty odd members, while from Aurora the local club was well represented with twenty-five riders.

By twelve o'clock nearly every one of the picnickers had arrived. The dealers had provided the "eats" at the clubhouse on the fair grounds. It is stated on good authority that more than nine thousand sandwiches were needed to appease the keen appetites of the motorcyclists, while five thousand bottles of good thirst-quenching drinks were on tap.

When all the good "eats" had disappeared from sight, the racing program was launched. Five events were run off without a hitch and not an acident marred the day. The county championship race was the big feature of the afternoon. It turned out to be a three-cornered fight between C. H. Baron, F. Northup and E. F. Sour. The distance was five miles. Baron made the crowd quiver every time he negotiated the west turn of the dirt track by riding close to the rail. He took the lead early in the race and flashed across the finish line first. His time was six minutes flat.

The first event of the afternoon was a five-mile novice race in which four riders participated. George Anderson, from Chicago, had things his own way throughout the race and completed the five miles fifty yards ahead of the field. His time was 5:35. The abrupt turns made fast riding impossible in the three-mile sidecar event. W. Neilson and O. Meeker both rode a dandy race and were close to each other in the entire distance. Neilson, however, was able to negotiate the turns better than his competitors and finished first in 4:05. O. Meeker was second and W. Haugh came in third.

The pursuit race brought out a winner other than a Harley-Davidson rider, when W. Kropp, of Chicago, astride an Excelsior, caught and passed W. Neilson, also of the Windy City, who had a half-mile lead in the sixth mile. The time was seven minutes flat. A five-mile professional race was the last event on the program. Neilson again came in the winner, finishing in 5:04. He jumped into the lead in the second mile and gradually increased the gap between him and the rest of the field. Neilson was over one hundred yards ahead of W. Cropp, while H. Ford acounted for third place.

After the races were over, the picnickers were invited to the clubhouse, where the Wheaton military band gave a concert. There was dancing and then some more "eats." The dealers who were responsible for the success of the picnic were: Carl Lang, Hanke, Lowenstein, Swartz, Chipp, Sauer, Dolezal Bros., Vesley, Hall, Graff and Ransof, all Harley-Davidson dealers of Chicago; while the out-of-town dealers were Crosby, of Aurora, Henderloin, of Crownpoint, and Beck of Joliet. The clubs that turned out were the Dolezal Boys, the North Shore Touring Club, Crown Point M. C., Humboldt M. C., Pitus Boys, Vesleys Boys, Riding Club, Wheaton M. C., Lincoln C. C., Joliet M. C., Elgin M. C., Aurora M. C. and the Chicago M. C.

# STARS ENTERED FOR DODGE CITY

## Score of Crack Speedsters to Ride in Big Speedway Classic on July 3

DODGE CITY, June 28.—That the 300-mile race on the Speedway will be contested by the country's best riders is amply evidenced by the entry list to date. There are no less than 24 "cracks" on the list and many of them have been in former Dodge City contests. Erwin Kellar will referee the contest, which assures the best of treatment for all hands.

The Harley-Davidson contingent in the long-distance contest on July 3 will include the redoubtable Joe Wolter, Bill Brier, Al. Stratton, Paul Gott, the Peoria speedster, Ray Weishaar and Earl Cooper of Kansas fame, as well as Otto Walker, the Venice victor, and Harry Crandall, of Phoenix. The Indian camp will include "Slivers" Boyd, 1914 Dodge City winner, Morty Graves, Lee Taylor, the Savannah victor, "Speck" Warner, Don Klark, Harry Glenn, Roy Good and A. Sargent.

From the Excelsior forces will come Carl Goudy and Bob Perry with Glenn Stokes, as well as a less-known rider in the person of Floyd Clymer. Bill Goudy will ride a Cyclone in the event, while the Flying Merkel contingent will consist of French, Pineau and A. J. Patterson. The other camps had not made their announcements at this writing.

### BRAVES FEAST AT FT. COLLINS

Fort Collins, Colo.—Indian riders of this city and vicinity were the guests of the Lloyd & Mayer Auto Company, local wigwam representative, on June 20 at a chicken dinner given at the Northern Hotel. The affair opened with a speech by the mayor of this city, after which the crowd fell to and enjoyed the "eats." A photograph was taken following the dinner, and the entire party then proceeded to Poudre Canyon.

WHEN CLUBSTERS COMPETED AT WHEATON FAIR GROUNDS ON JUNE 27

**Line Up in Five Mile Novice Race Ready for Starter's Gun—There Were Five Events on the Card at this Picnic Given by Chicago Dealers to Over a Thousand Members of Various Clubs—Item Above**

# Surmounting Virginia's Highest Peak

**Left, the Party in the Foot-Hills Near Elliott's Knob—Taylor is Third From the Left; Right, Where the Going Was Good—Loose Stones and a Trough-Shaped Road Forced the Rider to Keep in Center of the Path**

STAUNTON, Va.—T. C. Taylor, of this city, recently rode to the summit of Elliott's Knob, the highest mountain in Virginia, 5,000 feet above the surrounding country. He left Staunton in company with E. H. Robertson, traveling representative for the Hendee Mfg. Co., O. E. Smith, Indian dealer in Staunton, and three others. The party accompanied Taylor about half-way up the [illegible] but did not attempt to ride the remaining distance to the summit.

The way to the peak led through typical Virginia Mountain country. Dirt roads with deep ruts and much sand led to the foot-hills at the base of the peak. The climb up the regular "road" was undertaken by all, but as the paths narrowed and became interspersed with boulders and loose slate it was thought wiser to refrain from finishing the climb. At one place, a way had to be cut through the brush and briars before any progress at all could be made.

Taylor, however, kept on riding after the rest of the party had stopped and ploughed his way over the loose slates and through the heavy dirt. At one place he had to lift his mount over a two-foot ledge of rock which projected across the path. The summit was finally gained, and Taylor rested himself while enjoying the magnificent view.

The descent was ticklish in spots, on account of the steepness of the way and the nature of the surfaces. Taylor soon reached the rest of the party, and all rode back into Staunton late in the afternoon. Taylor's Indian is said to be the first vehicle to reach the top of the Knob, and very few pedestrians have ascended since the Civil War.

## WELLS AND CURTIS STAR AT JOLIET

Joliet, Mont., June 22.—After having been postponed four times in as many days because of poor weather, races were run off on the local track on Sunday, June 20, before a crowd of 1,100 people. Nelson Wells, Excelsior, won the 25-mile pro. and split first money with Pat Curtis, Harley-Davidson, in the 10-mile. Wells' time for the latter event was 29:15, and both Curtis and Wells covered the 10 miles in 13:10. Curtis carried off the two-mile pro. event, in 2:35, with Wells close at his heels.

In the five-mile amateur event, Horace Noyes, Excelsior, won over John Thomas, Indian, in 7:12. The five-mile sidecar race went to Frank Boyd, with H. Rawls as passenger, his time being 8:14. The summaries:

Two-mile, professional—Pat Curtis, Harley-Davidson, first; Nelson Wells, Excelsior, second; Ed Freeman, Indian, third. Time, 2:35.

Ten-mile, professional—Wells and Curtis split first money, E. J. Robb, Harley-Davidson, third. Time 13:10.

Twenty-five mile, professional—Wells, first; B. Turner, Harley-Davidson, second; Martin Curtis, Harley-Davidson, third. Time, 29:15.

Five-mile, amateur—Horace Noyes, Excelsior, first; John Thomas, Indian, second; Red Rawls, Harley-Davidson, third. Time, 7:12.

Five-mile, sidecar—Frank Boyd and H. Rawls, Harley-Davidson, first; Harry Williams and H. F. Curtis, Harley-Davidson, second. Time, 8:14.

## TWO ROAD RACES FOR ARIZONA

Tucson, Ariz., June.—Two important road races will be held in Southern Arizona July 4. One will be from *Tucson* to Nogales and return, a total distance of 136 miles; the other is to be from Douglas to Naco, 34.4 miles, and will be the principal event of a big celebration being arranged by the people of Naco. Of the two courses the one from Tucson to Nogales is somewhat the better. It is over a broad mesa with just a few sand washes and no grades of any consequence.

## WHEN SPEEDSTERS STROVE AT LA GRANDE, ORE.

Digitized by Google

# When Joe Wolter Took to Aviating

## Winner of La Grande Race Tells How He Did It

BY HUGH SHARP

Joe Wolter

"I SEE by **Motor Cycle Illustrated** that Wells B. Tompkins is advocating the holding of reliability trials in this country as the next step forward in motorcycle competition. He should have been with us at La Grande, Ore., and seen the course that they had laid out for us in the 204-mile so-called race."

The speaker was Joe Wolter, spending a few fretful hours in Chicago, where he was forced to lay over just long enough to miss out on the Milwaukee races. "Here I nearly broke my neck making the Overland Limited so as to get into this city and then make a quick change to Milwaukee, only to find it Sunday and a poor day for train connections."

Despite his disappointment, Joe was far from being in a despondent mood. Why should he be? A couple of hundred bones at Phoenix added to $500, the first prize at La Grande, is not conducive to despondency. Wolter has cleaned up enough of late to insure the elimination of all worry over the taxes on his Chicago property for several years to come.

### Joe Is Superstitious

Joe's uncanny superstitious beliefs are well known to his rider friends. The earnestness with which he recites the doings of a certain black cat down in Savannah previous to the Thanksgiving race—doings that he claims were directly responsible for the accidents to Brier and Gardner, the deaths of Sloop and Kelly and the narrow escape from injury to Verrill on account of a tire blowout—almost leads one to the conviction that there is something in the jinx stuff after all.

At La Grande, Ore., it was an innocent little spider that helped make history in the 204-mile race, as Joe states it. On the morning of the race, Wolter was about to clamber aboard his gray battleship for a few practice spins before the start when he espied an ugly-looking spider doing a marathon around the tire of his front wheel. Joe was just about to brush the little tire inspector off with his glove when the thought struck him—the spider was his mascot! So he calmly delayed practice until Mr. Spider ambled off and got out of harm's way.

Just about the same time Otto Walker was eating a chicken sandwich when his teeth came down on something hard. He investigated and found it to be a "wishbone—or part of one.

"Come on, Joe, let's wish," chirped Otto.

They pulled and Joe got the long end.

"H-m-m-m, I'll bet I can guess what you wished all right," was all Walker could say.

Joe took the long end of the "wishbone" and stuck it into the tape holding his saddle stay and it remained there all through the race.

But to get back to the La Grande course. According to Wolter the riders in that race aviated, shot the shoots, roller coasted and did everything but loop the loop. Some of the sharp up and down hill hairpin turns came about as close to looping the loop as Joe cared to go, at that.

"It was a series of hill-climbing contests," said Wolter. "They advertised it as the Glen boulevard course. Well—that's what they called it. It reminded me of motorcycle travel on some of Iowa's famed gumbo roads in dry weather.

"We started out up a grade of 150 feet to a mile and then shot along a level stretch for about three-quarters of a mile. Then there was another rise of 175 feet in about a quarter of a mile. Near the scoreboard there was a sudden drop of, say, 60 feet in 75! Then you shot up about 50 feet, then down about 50 feet right into a sand pocket. Then came another slow climb of a quarter of a mile with an elevation of about 75 feet, followed by a nice straightaway.

### Negotiating the "Hairpins"

"There was what was called the mountain road and the valley road. To get from the mountain to the valley one had to negotiate the cleverest little sharp hairpin turn imaginable. First you climbed a stiff hill, made the next turn, then dropped down into the valley and onto a seven-eighths of a mile straightaway. It was on this straightaway that I had to practice aviating. I think after some of the stunts we pulled off there the gang is entitled to full-fledged flying licenses. There was a culvert hump that did the trick. When we hit it wide open, the machines would shoot along through space for about 50 feet and about four feet in the air!

"Walker and I rode a neck and neck race for 102 miles. Then I stopped for oil and lost two miles. Walker stopped shortly afterward for oil but it seems that I got away from the pits sooner than Otto did.

"It was in trying to catch up with me that Walker brought unto himself a lot of tire trouble. He would hit the bumps hard and aviate, and when the spinning rear wheel hit the ground again it would chew a chunk out of the tire. Otto blew a tire in his 130th mile, and then again in his next to the last lap. The fact that he finished second to me shows that he did some riding to make up for the lost time.

### Dodging Cows Added to Excitement

"The country out that way is all adobe roads. They had not had any rain for three weeks before the race, and the automobiles and wagons had worked deep ruts into the course. You had to ride between the tracks I have ridden in Colorado endurance runs, and thought those roads were about the worst I ever rode, but those Oregon trails certainly had it on anything I ever traveled over.

"The farmers along the course did not take their cows off the road until two hours before the race, and in practice the dodging of cows added another hazardous factor. One big-horned brute had a knack of standing alongside the fence until we came along. Then he would amble across the road with the greatest unconcern. One farmer kept his gate open all through the race so that if one of us missed the turn in front of his place we could shoot into his yard instead of going through the fence.

### Promoters Were Good Sportsmen

"You must give the La Grande promoters credit for being a fine bunch of sports They spent a pile of money in promoting the event and did everything possible to make our stay in La Grande a pleasant one. Next year they have promised to have ready for motorcycle competition a two-mile speedway, and are making the plans for it already."

Between them, Wolter and Walker on their Harley-Davidsons cleaned up $700 by taking first and second places at La Grande. Wolter now is living in Milwaukee, and the Dodge City race will decide whether or not Joe is going to ask his landlord what the price of the flat now occupied by the Wolter family is held at.

### HOW THE PRIZES WENT AT LA GRANDE JUNE 18

LA GRANDE prix champion, Joe Wolter, of Milwaukee, Wis., on a Harley-Davidson. Prize $500. Time, 3:36:58.

Second—Otto Walker, Harley Davidson, $200. Time, 3:44:51.

Third—H. L. Campbell, Walla Walla, Indian. Time, 4:13:30. Won $100.

Fourth—Joe Rinard, of Baker, Indian. Time, 4:16:02.

Also won $50 for being the first Eastern Oregon rider to finish.

Fifth—D. Swarts, Harley-Davidson, Walla Walla. Time, 4:19:05. Purse $25.

Sixth—Red Williams, La Grande. Indian, won second purse of $25 for being second Eastern Oregon rider to finish.

Hard Luck Purse of $50 to Harry Brandt, of Portland, on a Thor.

### $200 FOR CORTLAND MEET

Cortland, N. Y., June 26.—The fifth annual racemeet of the Cortland Motorcycle Club will be held on the local track on Monday, July 5. There will be seven big events, for which $200 has been hung up. The affair will be run under the sanction of the F. A. M. The dirt track is in better condition this year than it ever was before, due to the activity of the horse racing association which has taken charge of the track this season. Entries have come up to the expectations of the promoters.

# Verrill is King at Toledo Meet

TOLEDO, O., June 27.—An unusual gathering of fast machines and riders put the "pep" aplenty into the Interstate Racing Association meet here on the half-mile track today.

C. F. Pineau (Merkel) grabbed the first qualifying heat at 5 miles in 5:51, Maldwyn Jones romped off with the second heat, also in 5:51, and Ray Creviston put his Indian over the tape first in the third heat, his time being 6:10.

Maldwyn Jones took a jump on his Merkel in the 10-mile final, with Pineau and Creviston well up. In the third mile Crevvy took the lead, with Jones at his rear wheel and K. H. Verrill (Harley-Davidson) in third place. They finished in that order. Time, 11:24½.

Carl Goudy made a strong start in the consolation event, but the jinx got him. When Goudy went out Verrill slid into the lead and held it. Stohan (Yale) finished second and Temple (Excelsior) was third. Time, 5:57½.

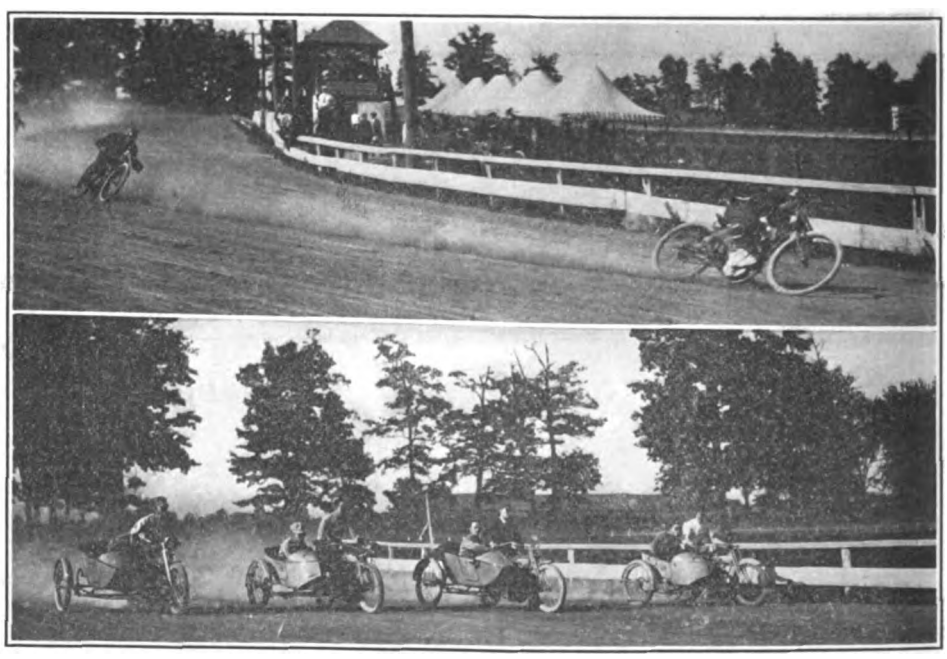
The match race between Jones (Merkel) and Creviston (Indian) went to Crevvy. Jones gave him an excellent fight for it, but the Wigwam boy's daring work on the turns gave him a safe margin.

Then came the 25-mile free-for-all. It was an air-tight struggle. Jones streaked into the lead at the getaway, with Pineau, Verrill, Meyers and Stohan hot after him. Verrill got Jones in the third mile, but Jones repassed him in the fourth. Crevvy had worked up to third position and in the fourth mile streaked into the lead. Verrill at this juncture took his Harley-Davidson into second place.

At the fifth mile it was Creviston, Verrill and Jones. Temple dropped out in the eighth mile. In the ninth Crevvy changed machines at the pits, losing a quarter of a lap.

Jones' motor developed a miss in the fourteenth mile and he retired, Pineau going into third place. The rest was a battle royal between Verrill, Creviston and Pineau. Verrill, whose specialty is the sprint, began to tire about the twentieth mile Crevvy saw what looked like a chance and shot up alongside, going a bit into the lead. But Verrill had some ginger left and in the last 20 yards of the battle flashed into the lead, winning by a wheel. Time, 28:58 for the 25 miles. The grandstand went wild.

The sidecar race went to Bill Lister, who came over from Cleveland with his fast Harley-Davidson outfit. Second—"Bubbles" Bailey (Yale).



**Top, Pineau (Merkel) Taking First Turn at Speed in First Five-Mile Heat; Bottom, Contestants in Sidecar Race Coming Into Stretch for Flying Start**

### SECOND MILWAUKEE RACE MEET

Milwaukee, Wis.—The second race meet of the season under the auspices of the Milwaukee Motorcycle Club will be held July 25 on the state fair track. A 100-mile event will be the feature with $150 as first prize. The curtain raisers will be a 5-mile and 10-mile event. The entire program will be non-port races. The club will hang up close to $500 in prizes for this race.

As evidence of the popularity of motorcycle racing as against other kinds of sport the local club has been asked by the state fair board to stage an exclusive motorcycle race program for the opening day of the fair, September 13. The program is undecided. Entry blanks for the July meet can be obtained from Hugh Sharp, secretary, 199 Thirty-fifth street.

### TRI-CITY RACES PLANNED

Freeport, Ill.—The Freeport M. C. is planning to hold a meet at Taylor's Park, in this city, some time during August or September. This meet will be known as the Tri-City Races, and the entries will be limited to riders from Freeport, Rockford and Beloit. The tentative programme includes a 20-mile, a 10-mile and a 5-mile event.

# SANDERS HIGH IN YONKERS RUN

## Worcester Rider, Scoring 998 Wins Gold Medal—H-D Pros. Get Team Prize

YONKERS, N. Y., June 25.—Revised scores in the Yonkers M. T. C. run, held on June 20, show the gold medal winner to be Kenneth E. Sanders, of Worcester, Mass., who rode a Harley-Davidson, his score being 998. August Charton, of Jersey City, N. J., Harley-Davidson, also scored 998, but on corrections for consistency had a lower figure than Sanders. He gets a silver medal, therefore. Sanders, Charton and Ralph Donaldson, of Hoboken, N. J., constituting the Harley-Davidson professional team, scored 2,943 points, and have been awarded the team prize.

The club trophy, for the organization obtaining the most medal winners from representatives entered, goes to the Hale-des M. C. John Steele and Orrie Steele, representing this club, both obtained silver medals and carried off the trophy accordingly. No other club finished its full quota of entrants. The special prize offered for the highest Yonkers M. T. C. member goes to E. W. Brusie, Indian, who scored 999 points.

Particular interest is attached to Sanders' win owing to the conditions under which he rode. He came down from Worcester the night before the run, entered the next morning and rode well until nearing Carmel. On one of the sodden roads he suffered a spill, driving the handlebar along his neck and digging out much skin in the process. Although painful, the injuries did not cripple him sufficiently to prevent him from making a fine showing.

Following is a list of those who finished, and who are entitled to consistency prizes: Carl Currie, Harley-Davidson, 932; George Ellis, Indian, 924; C. M. Andres, Indian, 998; E. W. Brusie, Indian, 990; L. W. Wintsch, Indian, 996 (silver medal); W. Von Lehn, Indian, 960; K. E. Sanders, Harley-Davidson (gold medal and team prize); J. Cobban, Jr., Henderson, 935; E. J. Mills, Indian, 943; O. B. Harkins, Indian, 940; Arthur Hall, Indian, 928; Fred Frank, Indian, 827; John J. McNally, Indian, 870; Carl Netter, Indian, 855; Samuel Elkin, Harley-Davidson, 889; Harold Turner, Indian, 871; August Charton, Harley-Davidson, 998 (silver medal and team prize); John W. Plaza, Indian, 908; Ralph Donaldson, Harley-Davidson, 947 (team prize); J. W. Reherman, Indian, 811; E. H. Raymond, 858; Thos. W. Lyons, Jr., 985 (silver medal); J. A. Kichner, Harley-Davidson, 952; C. A. McCracken, Harley-Davidson, 952; H. Raoul, Indian sidecar, 889; John Steele, Indian, 995 (silver medal and club prize); Orrie Steele, Indian, 994½ (silver medal and club prize).

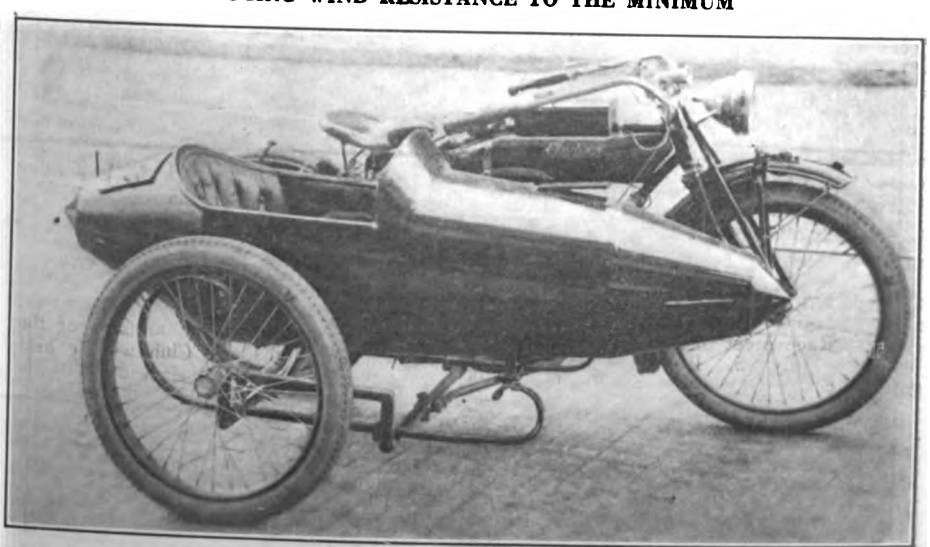
# INDIAN GIVEN FOR FIRST PRIZE

## Novel 200-Mile Run to be Staged by New Jersey Club With Twin Model as Award

NEWARK, N. J.—The latest contest to be staged by the New Jersey M. C. of this city is to be a 200-mile boulevard run for a $225 model Indian twin as first prize. This run is slated for August 1, or the first clear Sunday thereafter, should it rain on the date originally set. It is an innovation in motorcycle contests.

The route is from Newark to Morristown via Springfield, turning north toward Morris Plains and coming back to Newark via Montclair. The course approximates

REDUCING WIND RESISTANCE TO THE MINIMUM



Sidecar Designed by V. F. Connor, of Albany, N. Y., Along Torpedo Lines. Its Form Enables Higher Speed to Be Attained Than with Regular Body

Digitized by Google

50 miles and will have to be covered four times by the contestants. There is not a hill worthy of the name in the circuit and the whole run is over improved surfaces. The run is designed to gove the owner of an old single cylinder mount the same choice as the possessor of a modern three-speed twin.

The system to be used in scoring will be to penalize each rider one point per minute early or late at the two checking stations. The schedule will be determined after the completion of the run by placing five slips with 18 to 22 marked on them in a hat and withdrawing them one at a time. Each slip will be the basis of time for one round. The contestant who comes closest to the times will be the winner.

The entry fee will be $3.50 for each contestant, no matter whether he enters a solo machine, a sidecar combination, tandem-fitted mount, or Smith motor wheel. The rules will apply to all, regardless of machine used. The club will not make any medal awards, but will offer in addition to the machine a number of accessory prizes. Entry blanks can be obtained from the club at 847 Broad street, Newark, in person or by mail.

### ESCORTED AUTOMOBILISTS

Denver, Colo., June 24.—Ten motorcyclists played a prominent part in the Denver Motor Club's tour of eight hundred automobiles through the municipal mountain parks last Sunday. They were all Harley-Davidson riders selected by Walter W. Whiting to police the procession of autos as extra protection against accidents due to any blockading or careless driving of any kind on the winding boulevards through the foothills.

### GOING TO DODGE CITY

Denver, Colo.—Colorado motorcyclists are showing a lively interest in the big race to be held at Dodge City, Kansas, July 3. Fifteen to twenty Denver riders are planning to make the trip on their machines this week, and the first of next eight or ten expect to ride through from Colorado Springs and about thirty-five from Pueblo.

### ARDENT MOTORCYCLISTE

**Miss Frances Loeb, of Bronx, N. Y., Who Has Many Endurance Runs to Her Credit**

### TOUR TO 'FRISCO WITH TRAILER

Washington, N. C.—William P. Hobbs, an Excelsior rider of this city, is planning to make a transcontinental trip to San Francisco, taking in the larger Atlantic cities and summer resorts on the way. He will leave Morehead City, 100 miles south of this place on August 1, and on reaching New York will traverse the route laid out as the Lincoln Highway across to San Francisco.

Hobbs will equip his Excelsior twin with a novel trailer device, whose two wheels will be parallel to the rear wheel of the machine. The trailer will have a top which will extend over the saddle of the machine and protect the rider from sun and rain. In this trailer he will carry his luggage and other personal effects.

### REACH FT. COLLINS ON COAST TRIP

Fort Collins, Colo.—Bud Baker and Dick O'Brien, the high school boys who are riding their Indians across the continent from Washington, D. C., arrived here recently. They are not hurrying along their route by any means, as they stay two or three days in any city that strikes their fancy, they state. They expect to land in San Francisco in a week or two. Baker and his chum have started another pair, Ray Reike and Lehman Lykon, of Sterling, to make a trip of the same kind, and the two latter are now on their way to the Pacific coast.

### WORK STARTED ON SPEEDWAY

Philadelphia, Pa.—Operations have been started on what is proposed to be the fastest speedway in the world, on the property of the Philadelphia Motor Speedway Association near Willow Grove. While the work of construction has but just commenced, the association feels confident that motorcycle and automobile races will be held on the track within a year.

The track, which is to be two miles in circuit, will be located sixteen miles from the heart of this city, and will be constructed on 406 acres of land. It will be of brick and concrete, 60 feet wide on the straightaways and 75 feet wide on the curves. Grandstands are to be located around the course to accommodate nearly 100,000 persons. Ample parking space is being provided for on the inside of the track, this being reached by tunnels at either end.

### BISONITES ON OUTING

Buffalo, N. Y., June 27.—One score and ten of the Buffalo M. C. riders, friends and ladies, left the club rooms this morning for a social run and outing to Grand Island. A stop was made at the Bedell House for dinner. After dinner the enthusiasts played a game of baseball and later proceeded to circle the island.

### FOUR CLUBS AFFILIATE

Four clubs have affiliated with the F. A. M. during the week ending June 26. They are the Delaware Valley, of New Hope, Pa.; the Consolidated, of Indianapolis, Ind.; the Brattleboro, of Brattleboro, Vt., and the Rubber City, of Akron, Ohio.

### GIVES RIDERS THEIR PHOTOS

Erwin Keller, State Referee for the F. A. M. in Kansas, and Harley-Davidson dealer at Topeka, has scored a hit with the Topeka riders by presenting all the Harley boys with pictures showing each rider in action.

### THREE INDIANS FOR POLICE

Portland, Ore., June 26.—The Portland Police Department last week purchased three 1915 Indian machines. These will be used in catching speeding motorists.

### THROUGH SAND AND SWAMP TO ATLANTA, GA.

## MEDALS GIVEN AT FRISCO FAIR

### High Tributes Are Paid Motorcycle and Bicycle Exhibits by the Jury of Awards

SAN FRANCISCO, Cal.—The Jury of Awards of the Panama-Pacific Exposition has announced its awards in connection with the motorcycle and bicycle exhibits and highly favorable comments marked the decisions of the judges. Foremost was as the Medal of Honor went to the display of the Hendee Mfg. Co. Exhibits of the Excelsior Motor and Supply Co., and the Harley-Davidson Motor Co., were each given a gold medal, while a gold medal was awarded for the Dayton bicycle display of the Dayton Sewing Machine Co. The latter company also received silver medals for its Dayton fire-fighting apparatus and Dayton motorcycles. The companies mentioned were the only ones exhibiting motorcycles and bicycles there.

The Hendee display is in charge of George B. Sherman, of the Sales Promotion Department, and consists of eleven 1915 Indian models, with the Indian Maid sidecar and sectional parts, the latter displayed in six plate-glass showcases.

The Harley-Davidson display is in charge of Export Manager H. C. Garner and comprises a representative lineup of the company's pleasure models as well as the sidecar and commercial types.

The Dayton exhibit is under the direction of Messrs. W. E. and W. H. Jackson, and owing to the fact that the fire apparatus and bicycles are included with the motorcycles the display is an unusually comprehensive one.

Attention is called by the Hendee company to the fact that the award just received at San Francisco is the second of the kind to be given to Indian motorcycles, the first Medal of Honor having been obtained at the St. Louis Exposition in 1904.

## RUBBER IMPORTS HEAVY

Imports of crude rubber continue to be heavy, the figures for the month of April, 1915, showing 20,425,334 pounds. During the month of March, 1915, the total pounds imported was 26,025,791. April, 1914, showed a total of 16,642,211 pounds. A large proportion of the month's shipments comes from the United Kingdom, which is credited with 10,204,246 pounds, or half of the entire imports.

## EXCHANGE JOBS FOR MONTH

Buffalo, N. Y., June 28.—A. Kellner, local manager of the Haverford Cycle Company, leaves here on July first for Cleveland, where he will have charge of the Cleveland branch for a month while his brother, L. J. Kellner, the Cleveland manager, will come to Buffalo for the same period. The Kellner Brothers exchange places for a month each year.

## UNIT FLEXIBLE SHAFT

Ball-bearing flexible shafts constructed as a series of one-piece units are made by the Cooper Flexible Transmission Company, Inc., of Eighth avenue and Eighteenth street, Brooklyn, N. Y. Each shaft unit has a male and female end forming corresponding members of a special ball-and-socket joint, the shaft being made in any length required as the coupling up of the units is very readily done. The male end of each unit is a grooved ball fitting in the projections in the female end of the succeeding one, and being burnished in position. Shanks and ends are case-hardened and are guaranteed to give the full power as stated by the makers.

The shafts are used for throttle or spark control, speedometer drive and the like. They range from 5/64-inch shank diameter giving ⅛ of a horsepower, to 5/16 inch shank diameter giving 2 horsepower. Prices range from $1 per foot to $2 in any length.

## NOVEL HUB MOUNTING

In order to allow of quick removal of a motorcycle wheel without disturbing the transmission, brake rigging and controls, Durbin Vanlaw, of Bishop, Cal., has invented the Vanlaw Wheel Mounting. It consists of an aligning ring incorporating a tapering aperture and recesses which engage forked ends in the frame. Roller bearings are fitted in the aperture, resting on and carrying a tapered axle extension formed with a bolt. The sprocket wheel is mounted on this bolt and has an extending rib on the righthand side.

The bolt runs the full length of the mounting and carries a roller bearing in an aperture on the righthand side the same as that just described, but has a brake drum fitted in place of the sprocket. The hub includes spoke flanges as well as recesses to take the extensions sideways from the sprocket and brake drum. The wheel is removed by loosening the nuts on the bolt ends and withdrawing the screws which hold the hub to the sprocket and brake drum, after which the hub and wheel fall out.

## MOTOR WHEELS IN CALIFORNIA

Milwaukee, Wis.—Sales of Smith motor wheels in the State of California have so far totaled 489, according to a statement coming from the makers, the A. O. Smith Company, of this city. Of this number of attachments, the Pacific Motor Supply Co., of Los Angeles, has taken 143; the Kimball-Upson firm of Sacramento has taken 93, and Branch's, Inc., of Stockton, has accounted for 68. The balance of the machines are divided in smaller lots among dealers in all parts of the State.

L. C. Schwab, Smith traveler in California, has been working the State since April 10 only, and says that previous to that date there were no motor wheel dealers there.

## INFRINGEMENT SUIT DISMISSED

Newark, N. J.—Judge Anderson, of the United States District Court, has ordered dismissed the complaint lodged by the Splitdorf Electrical Company, of Newark, N. J., against the Eisemann Magneto Company, of Brooklyn, N. Y., for alleged infringement of the Brackett patent. The suit was brought shortly before the Splitdorf firm purchased the patent rights of Dinkins and Hays, No. 1,074,416, covering broadly the "duplex" or boosted type of magneto, but the decision was only obtained recently. The Brackett patent is No. 1,102,385. Judge Anderson did not give a written opinion on the suit, simply dismissing the case with costs.

## FIRESTONES IN BUFFALO M. C. RUN

As proof that Firestone tires are built to withstand the terrific tests of endurance runs, the Firestone Tire & Rubber Company, of Akron, O., cites the performances of its product on the course between Buffalo and Erie, Pa., during the week of June 14. Horace Peters and George Haier, on Harley-Davidsons shod with Firestone non-skids, won first and second place in the run, while F. Schefler, similarly equipped, came in fourth. The tires at the end of the grind were found to be in perfect condition, the riders stated.

## A BIG WEEK'S PRODUCTION

Akron, O.—The Goodyear Tire & Rubber Company, of this city, states that during the week of June 14, a new tire production record was made in the local and Canadian factories. There were 14,394 tire casings and over 13,000 inner tubes turned out of the Akron works during the period mentioned, while the Canadian factory produced 1,053 casings. The total output of casings for the six days was therefore 15,447.

In April, 1914, Goodyear turned out 11,032 automobile tires in a single day from the Akron factory. This was considered a record in production by the firm and the June 14 week is likewise stated by Goodyear men to be a larger output than any other tire company has ever achieved. When the new buildings are completed, the Goodyear company expects to maintain a 15,000 a day output regularly, and to have a rated capacity of 20,000 tires per day if required.

## TO HOLD FISHING CONTEST

Springfield, Mass.—The Indian Outing Club, composed of factory and office employees of the Hendee Mfg. Co., will hold its annual fishing contest at Congamond Lakes about July 10. Teams have been selected, each of 25 men, with J. Howard O'Brien on one side, and W. Parker on the other as captains. Much interest is being taken in the contest.

## FOREIGN POPE ORDERS

Westfield, Mass.—Those in charge at the Pope plant express themselves as much pleased at the favor with which Pope machines are being received in foreign countries, and cite as evidence the orders that have been coming in regularly. During the last week in June, orders from England, Australia, India, Italy, Spain, Portugal and Argentine Republic have been received for motorcycles of this make, and in all cases immediate shipments of the mounts was urged.

## NEW SPARK PLUG COMPANY

La Porte, Ind.—The Spoon Spark Plug Company has been organized here for the purpose of marketing a new spark plug, the points of which, it is claimed, are made of a special metal. The composition of this metal is said to render the points more effective than platinum. The company has been incorporated under the laws of the state of Indiana, the incorporators being Dr. R. R. Carson and W. M. Warren.

## GOODYEAR TRAVELER PLEASED

Louisville, Ky.—A. W. Ellis, Louisville representative of the Goodyear Tire & Rubber Company, has just returned from a trip to Owensboro, Ky., and other points in Western Kentucky. He reports a steady improvement this season in business.

# A Progressive Lot of Dealers

BUFFALO, N. Y., June 28.—The dealers in this city, the Tonawandas and Niagara Falls are nearly all reporting a more brisk season this year than last. To cope with an increasing business, several of them have made additions to their establishments. With few exceptions the motorcycle dealers have added bicycles to their lines and are making attractive combination displays in their windows.

The agencies shown in the layout below are among the most progressive in this section of the State of New York. Picture number one shows the store of the Gloucester Cycle Co., which handles the Thor in Niagara Falls; number two is the live-wire agency of the Henderson in Niagara Falls, owned by Featherly & Pattison; in number three is seen the attractive window of Seeber & Hofheins, the Buffalo Emblem and Henderson dealers; number four gives a glimpse of the corner of the new building occupied by Poppenberg Bros., Buffalo Pope, Iver Johnson and Flying Merkel agents; in picture number five appears a window of Neal, Clark and Neal, Buffalo Indian agents; number six shows the Henderson agency at Tonawanda, while the establishment of H. L. Peters, Bison City Harley-Davidson dealer, is seen in the last picture.

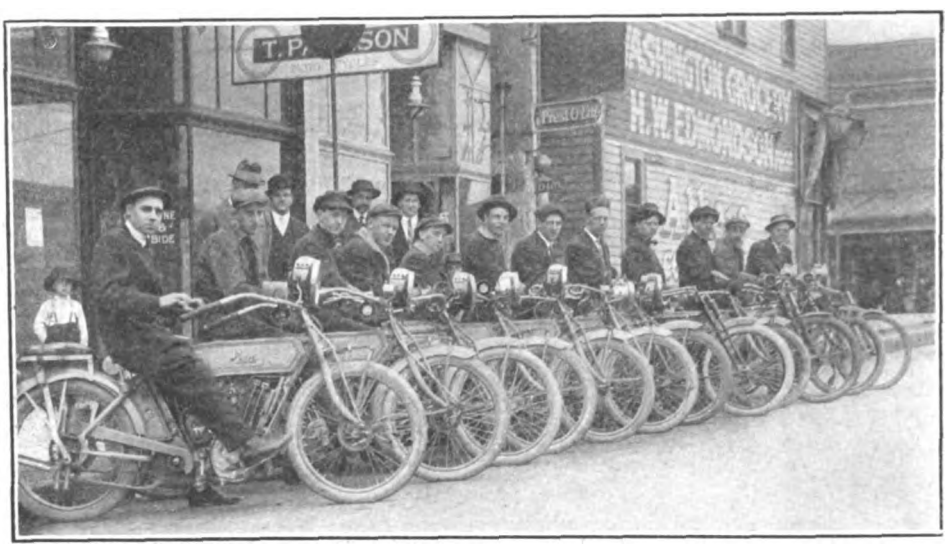
## WALPOLE DOING WELL

Sikeston, Mo. — Beechie Walpole, who represents the Harley-Davidson in this city, is busy giving demonstrations these days, and has closed up several sales for harvest - time delivery. The southwest Missourians purchase their motorcycles after the harvest is disposed of each season, so Walpole's season is not yet thoroughly opened. Three-speed models are mostly in demand, says Agent Walpole.



Patrons of Paulsen Brothers, Who Distribute the Thor in Tacoma, Wash., Ready to Enjoy a Week-End Spin Over Pierce and King County Highways

## FIND POSTERS EFFECTIVE

Louisville, Ky.—Kline Brothers are now using fifteen sign boards placed in various parts of the city to advertise the Harley-Davidson motorcycle. The manufacturers furnish the posters and the local concern has only to pay for the advertising space and the posting. Herb Kline, a member of the firm, said that in his opinion this form of advertising was one of the best possible for a local concern, and that it was bringing them business.

## CYR SOLD THREE OUT OF SIX IN USE

Keegan, Maine.—Dona P. Cyr, who represents the Iver Johnson line in town, has sold three machines so far, and has prospects of disposing of four or five more. He considers that this is a record for Keegan, as there are only 450 people in the town and only six motorcycles are in use here at present.

## MOTOR WHEELS IN DAWSON

S. J. Gibson, Smith Motor Wheel dealer at Dawson, Yukon Territory, in a recent letter to the A. O. Smith Company, of Milwaukee, Wis., states that gasoline is now only 80 cents per gallon in his city. Owing to the duty and war tax, Canadian dealers are obliged to add $45 to the list price of the little attachment, yet Gibson has already disposed of five. An order for an additional five Motor Wheels accompanied the letter.

## FAIR WEATHER INCREASES BUSINESS

Louisville, Ky.—N. Sandmann, the Excelsior dealer of Louisville, now has seven 1915 models on the streets. Bad weather in May held business back considerably, but conditions have improved considerably since June 1.

## SWENSON'S ANNUAL PICNIC

Providence, R. I., June 21.—The annual Swenson picnic, of Indian day, will be held this year on July 25 at Palace Garden, the scene of last year's successful program. The picnic will begin in the morning and last all day. There will be athletic events for both sexes, dancing and plenty of "eats." "The plans are bigger than ever," says Chieftain Swenson—and he ought to know. Mr. Swenson extends an invitation to all riders of Indian motorcycles to take part in the festivities, and expects over 1,500 to attend from his own territory.

### BERRYMAN IS POPE AGENT

Washington, D. C., June 28.—A change in ... agency for the Pope motorcycles ... place, by which John S. Berryman ... agent for the Pope lines in place ... Mudd, Jr. Pope headquarters in ... are now located at 1013 9th ... N. W., where Berryman will main... station in connection with the ... repair shop which he has main... that location for several months. ... full line of Pope motorcycles and ... will be carried. Berryman will special... the lightweight models, which have ... very popular in this city.

... Mudd, Jr., who for many years has ... the Reading-Standard in Wash... and handled the Pope line for about ... year will in the future confine his atten... to the sale of bicycles and sundries. ... sale of motorcycle supplies and gen... repair work will be continued.

Both Berryman and Mudd are among the oldest motorcycle dealers in Washington, having been connected with the trade since the beginning. In the days when the Reading-Standard was taking an active part in the racing game, Mudd was a well-known figure in all track and road events in this vicinity. He surrendered the Reading-Standard agency several months ago in favor of the Columbia Auto Supply Co., who were newcomers in the local motorcycle business. Berryman handled the sale of Harley-Davidson motorcycles in this city for several years, retiring about one year ago in favor of August Zimmerman.

### MITCHELL SOLD TWENTY

Yonkers, N. Y.—S. Mitchell, Harley-Davidson and Pope agent in this city, reports the sale of his twentieth machine so far, and has orders booked for a number of others. He received a great deal of credit in the recent Yonkers M. T. C. run, by reason of his handling of the winning Harley-Davidson pro. team, as well as catering for individual riders who entered the event. Mitchell's shop is at 232 South Broadway, about four blocks below Getty Square and right on the main route through the city.

### AURICH IN NEW STORE

Carl Aurich, the Harley-Davidson dealer at Billings, Mont., has recently moved into new quarters. He has added an expert vulcanizer to his staff, and is now prepared to meet any emergency. The new quarters are appreciated by the Harley fans as much as by Aurich, for with the addition of a comfortable "speed bench" the place is rapidly becoming a popular hangout for the boys. Aurich says that inasmuch as the boys have brought him lots of business this year (he has delivered fifty machines so far) he intends to do all that he can for their comfort. In order to show the fellows that he means it, he has arranged for a Dutch lunch for July 3.

### RIDDER SUFFERS FROM FIRE

Quincy, Ill.—Fire gutted the storage department of John C. Ridder's establishment at 842 Broadway recently, and caused the total loss of three motorcycles and 14 bicycles. The storage room is located two doors west of the main Ridder store, but, fortunately, the fire was confined to the room alone. The loss is figured at $700. Ridder is agent for the Excelsior.

### BRISK MONTH FOR HENDERSON

Los Angeles, Cal., June 26.—"The recognition we are getting for our short coupled machine has made June business good," said Hugh Fargo, sales manager of the Henderson Motorcycle Co., when seen at the office of the southern California distributors, the A. M. Kupfer Corp. "The last week of the month we made a special drive which was a grand finale in the month's business," he continued. "Special inducements in equipment were made by Kupfer, while newspaper classified and display advertising and special sidecar advertising featured the Henderson."

### BUYS INTEREST IN AGENCY

Louisville, Ky., June 26.—Harry G. Ray, formerly a member of the firm of Ray Brothers, of this city, has just purchased an interest in the Dayton Motorcycle Sales Company. This concern was recently organized by his brother, Charles Ray, who has quit the motorcycle game.

Paterson, N. J.—Charles B. Vaughan, local Thor representative, has added the Miami power bicycle to his line for the 1915 season.

# Of a Personal Flavor

T. M. Custer, general purchasing agent for the A. O. Smith Company, Milwaukee, Wis., makers of the Smith Motor Wheel, died in Milwaukee on June 17 of peritonitis. He was an expert metallurgist, and entered the employ of the Smith company in 1909 as a steel expert. He was named chief purchasing agent shortly after his connection with the Smith firm.

Roswell H. Patterson, formerly foreman of the enameling department of the Hendee Mfg. Co., resigned recently to take charge of the paint shop of the Hale & Kilburn Co., at Philadelphia. On his leaving the Indian plant, the department employes presented him with a traveling bag and a meerschaum pipe.

George H. Squier has left the Herman Bumiller Company, in Cleveland, O., in order to take a vacation before affiliating himself with an accessory concern as traveling representative. He has not yet announced his future connection. Squier was formerly a traveler for the Consolidated Mfg. Co., of Toledo, O.

Chicago, Ill.—H. N. Kirk, sales manager for the Aurora Automatic Machinery Company, of this city, recently returned from a successful ten-day trip through the East. He states that while weather conditions have somewhat affected the big spring demand for Thors, a steady, healthy business is looked forward to by all dealers in June and July. Thor business to June 1 was, in fact, better than that up to the same date in 1914, says Mr. Kirk.

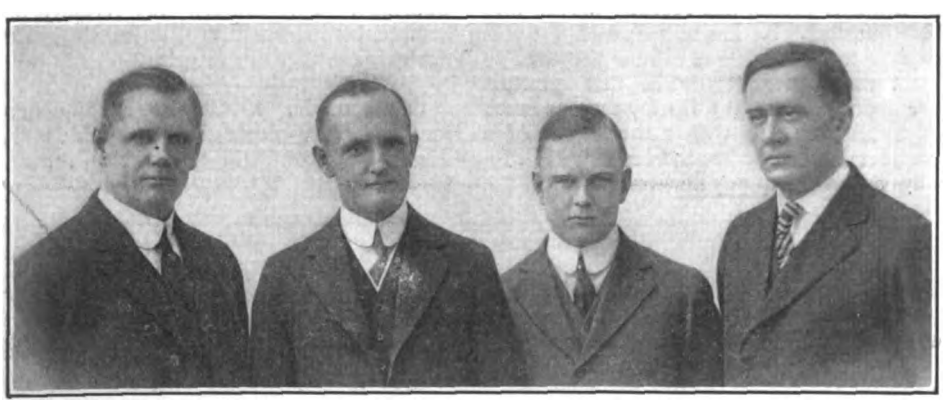
Irving Beck, New York traveler for the Fentress-Newton specialties, has just returned from a successful business trip through the central part of the State.

P. W. Senour has been appointed manager of the Salt Lake City branch of the Goodyear Tire & Rubber Company. He managed the El Paso branch until recently.

H. W. L. Kidder has been appointed branch manager for the B. F. Goodrich Company in Toledo, O. He succeeds C. W. Wacker, who has been transferred to the head of the Cleveland branch.

San Francisco, June 24.—Earl Armstrong, well known in motorcycle race circles throughout the United States, has been appointed shop foreman for the Hendee Manufacturing Sales Company, of San Francisco, distributors in this territory for Indian motorcycles.

**THE PERSISTENT CAMERAMAN FINNALLY CORNERED THEM**



**Left to Right, William A. Davidson, Works Manager; Walter Davidson, President and General Manager; Arthur Davidson, Vice-President and Sales Manager, and William S. Harley, Secretary-Treasurer and Chief Engineer**

"FOR more than three years I have hounded the four general officers of the company for a group photograph," writes Frank Rodger, of the Harley-Davidson Motor Co., in referring to the photo which is reproduced herewith, "owing to the fact that we have had numerous requests for such a picture, and I am naturally proud of the fact that the seemingly impossible has at last been accomplished. Just before President Walter Davidson left for the Pacific Coast a few days ago on the first vacation he has taken since the organization of the Harley-Davidson company, we managed to get the four officers into the studio and have them remain passive long enough for the cameraman to snap them."

More than ordinary interest attaches to the accompanying picture because of the fact that the only other one in existence showing the four Harley-Davidson officials in a group is one which was taken years ago in front of one of the company's early factories.

# NO INJUNCTION AGAINST R-S CO.

## Court Refuses Preliminary Stay in Hartford Shock Absorber Infringement Suit

PHILADELPHIA, Pa.—On Monday, June 21, Judge Dickinson in the United States District Court for the Eastern District of Pennsylvania, filed an opinion refusing the preliminary injunction of the Hartford Suspension Co., against the Reading-Standard Co., of Reading, Pa.

In its application the plantiffs alleged infringement on a United States patent, granted in January, 1906, to J. M. M. Truffault, of Paris, France, on a "friction retarding means for spring vehicles"; or, in other words, a shock absorber. The patent is now owned by the Hartford Suspension Co., and has been the subject of much litigation in the past. The patent was originally granted in 1900, but was later consigned, first in part, then in whole, to Edward V. Hartford and George H. Hartford.

The decision of Judge Dickinson in the matter was based on technical points, and the plea of the plaintiffs to enjoin the motorcycle manufacturer from making the article was refused on condition that the defendant file a bond to the extent of $3,500 in favor of the plaintiffs should a final decree be issued to them. Counsel for both parties are left free to reopen the case under this provision.

It was the contention of Edmund J. Wilson, superintendent of the Reading-Standard Co., after explaining the workings of the device, that early in May the pivoted link connection was changed on all motorcycles so as to prevent avoidable friction in the connection, and that in the present construction different links are being exclusively employed, having frame connecting ends of the same size as seat-post ends, like the links used in the similar front fork construction of the machines. He further stated that the pivoted-link connections have been continuously used on motorcycles made by the Reading-Standard Co. since 1911, and that his first knowledge of any claim of infringement was after April of this year. The original complaint was filed on May 14 of this year.

### PROMOTING CO. INCORPORATED

Dover, Del.—For the purpose of conducting motorcycle and other race meets, including aviation, the Pittsburgh Speedway Association was chartered at $1,100,000 under the laws of this state. The incorporators are: Herbert E. Latter and Norman E. Coffin of Wilmington, Del., and Clement M. Egner, of Elkton, Md.

### NEW LONDON GETS FAST MOUNT

New London, Conn.—The police department of this city has purchased an Indian two-speed twin for use in controlling traffic and reducing speeding. The department called for a machine which could run to 72 miles per hour, in order that the fastest road traffic could be overhauled.

## WORTHY OF YOUR SUPPORT

SINCE the induction of that human dynamo, A. B. Coffman, into the office of the president of the Federation of American Motorcyclists, the National Association has taken on more than a mere semblance of health and power. With a competent, cool-headed and aggressive administrative head; with a Competition Committee in the man who knows how to administer the affairs of that difficult office with both discretion and firmness; with a Legal Action chairman whose marked ability in defeating adverse and defending favorable legislation, has been repeatedly demonstrated during the past year, the Federation of American Motorcyclists bids fair to become a well-welded organization, more representative of the real importance of the motorcycle sport and trade than ever before.

### Still Room for Improvement

But the last word has not been said on the score of the increased number of memberships, despite the fact that hundreds of delinquent Federation members have been whipped into line. Notwithstanding the general heightening of the entire tone of the association, there is still room for improvement.

### Membership Should Be 100,000

If motorcycle riders would only realize that in the support of the Federation lies the universal solving of all! controversive disputes; if every one of the two hundred and thousand motorcycle riders in the United States were awake to a proper understanding of the aims of the Federation of American Motorcyclists, the sixteen thousand membership would be swelled to the hundred thousand mark in a very short time.

### What Other Organizations Are Doing

It has but to point to the national athletic and automobile associations to realize what overwhelming strength is wielded by an organization when well administered and with a large active membership. The automobile associations have been influential in promoting more good roads bills than one can count. They have placed the competitive end of the automobile game on a solid basis. They have a Competition Committee whose word is absolute law.

### F. A. M. Has a Big Opportunity

There is no reason why the Federation of American Motorcyclists cannot in due time become proportionately just as powerful, just as effective in promoting favorable opinion and favorable legislation as the automobile organizations. We have the officers; we have the proper by-laws; all we need is sheer numerical strength.

### Some of the Benefits of Membership

If the motives here explained are not sufficient to move you to joining the Federation, there are more direct benefits, of which perhaps you do not know. As a member of the Federation of American Motorcyclists you have access to a most exhaustive fund of touring information—authentic details on condition of roads, with maps, etc. If adverse legislation is proposed in your city or State the Legal Action Committee will do all in its power to bring about its defeat. Should your machine be stolen, the Federation of American Motorcyclists offers a reward of twenty-five dollars for its return, and publishes that offer in the nationally circulated trade papers.

### Now is the Time to Join

There are innumerable other direct advantages accruing from a membership in the F. A. M. You can get full data by signing the coupon below and sending it to Secretary Gibson at Westboro, Mass. The initiation fee is only one dollar, and the yearly dues the same. Just sign and mail the coupon now.

# To Take Movies of Short Grass Tour

DODGE CITY, Ia.—Arrangements have just been completed with the Bailey Motion Picture Company to go with the Short Grass tourists on their trip this year, in order to take motion pictures of the scenes and incidents connected with the tour, including the Dodge City races on July 3. Claude M. Stone, president of the touring club, has written a motorcycle motion picture play, which will be staged during the trip.

The tourists are all keyed up to a high pitch of expectation in looking forward to their great annual event. They have been digging into all sorts of guides and colored booklets to get an advance glimpse of the many wonders of nature which they will see along the route, that will take them from Dodge City, on July 4, into the State of Colorado, and thence to Colorado Springs.

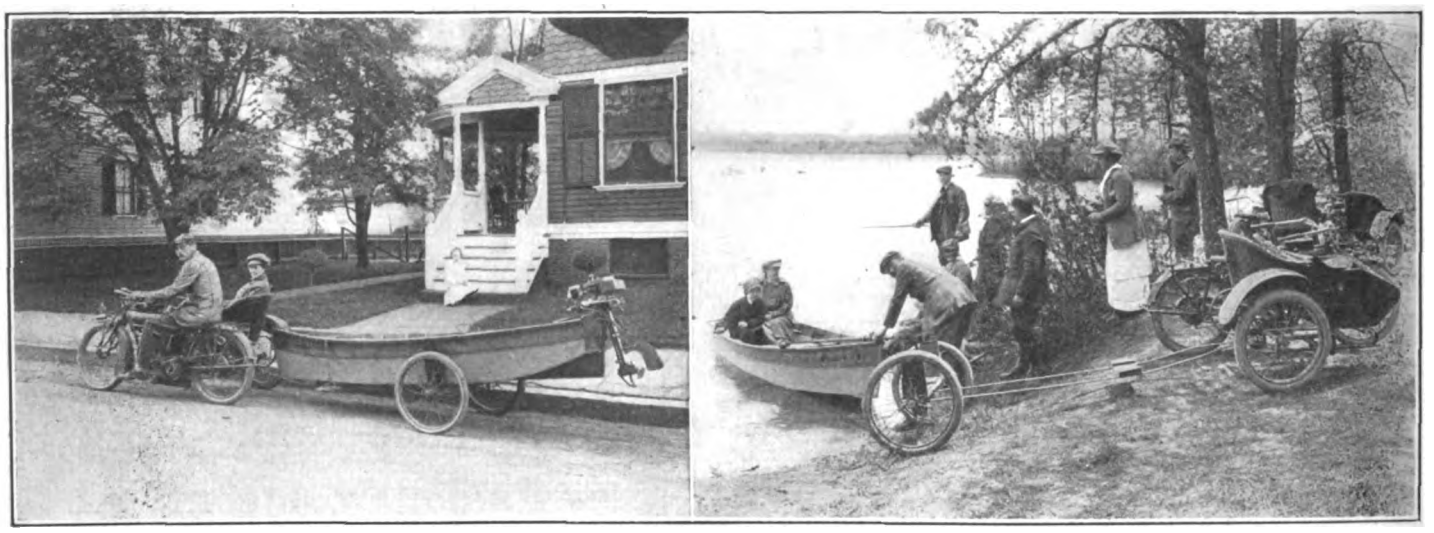
The different distances for each day's run will be as follows: Dodge City to Holly, Colo., 123 miles; Holly to Las Animas, 68 miles; Las Animas to Pueblo, 88 miles; Pueblo to Canon City, 45 miles; Canon City to Colorado Springs, 45 miles.

Some of the largest sugar mills in the world will be inspected in Garden City and Holly, Colo. On the run to Las Animas, the riders will pass through an orchard and beet country. Near Las Animas is a naval station located on the site of old Fort Lyons, a spot made historical by Kit Carson. At Pueblo, "The Pittsburgh of the West," the Mineral Palace will be visited, which contains many thousands of mineral specimens.

A drive will be taken through the canon proper about Canon City, where the tourists will find themselves going through a host of tunnels and up a road that is cut from solid rock on the side of the mountain. The famous natatorium there, which is supplied from a well 1,900 feet deep with water that emerges at a temperature of 106 degrees Fahrenheit, is one of the best pools in the country, containing mineral properties for many diseases. All of the tourists will ascend the top of Royal Gorge, on the morning after they reach Canon City. This is the deepest gorge in the world that is traversed by a railroad and constitutes a wonderful sight. A ride over Sky Line Drive will be taken, which is one hundred feet above the surrounding country and is the only place in the world where one can ride in a car and not see the ground on either side.

Canon City will be left behind early on the morning of July 9, and the tourists will then proceed toward Colorado Springs, past prairies and up along canon walls. Lunch will be cooked by the riders in Dead Man's Gulch. Arriving at Colorado Springs on the evening of the 9th the tourists will stop over to visit the surrounding country which is replete with endless sights of the strange works of nature and beautiful scenery.

# Swenson's Ideal Angling Combination



**Left, the Boat on its Carriage Leaving the Swenson Home for the Lake, with Sidecar Combination Doing the Towing; Right, Launching the Skiff—Note Construction of Cradle and Running-Gear, Also Coupling Device**

ONE of the most curious mediums of transportation in these days of getting-back-to-nature vehicles is that devised by B. A. Swenson, motorcyclist and all-round sportsman of Providence, R. I. By "hitching" his motorcycle to the bow of a small dory mounted upon a two-wheeled carriage in much the same way that the Deacon's rattailed, ewe-necked bay was attached to the famous one-hoss shay, Mr. Swenson and his family hie away to the most distant parts of the State for an afternoon off with the fish without ever stopping to inquire beforehand whether the pond or lake selected lies close to the car line or whether there may be boats to let to chance fishermen and other pleasure seekers.

By means of his Indian and sidecar, Swenson a long time ago solved the problem of taking his family on an occasional outing without depending upon the less flexible trolley and steam railroads, but found that the pleasure of many a day's outing was marred by his inability to procure a boat.

After having several experiences in which he was prevented from enjoying his favorite sport after reaching the shores of lakes, last summer the climax was reached one day when he and Mrs. Swenson had journeyed into the far western part of Rhode Island, when he was compelled to spend half the afternoon in bailing out a submerged skiff and nearly all the rest of the time in scooping out the water that leaked in.

He then and there declared to Mrs. Swenson that rather than put in another such an afternoon he would discontinue fishing altogether, or would bring a boat with him, so that he might fish when and where he pleased.

Borrowing his idea from house painters who trail their ladders through the streets upon two-wheeled carriages, Mr. Swenson attached two regulation motorcycle wheels to an axle. Upon these he placed a light frame equipped with shock absorbers and carrying a cradle for a skiff. Last Winter from his own designs he had a light boat built. The craft is 12 feet long by nearly 4 feet wide amidship and is sufficiently roomy to provide accommodations for the entire family.

The boat is equipped with a small portable motor and propeller mounted upon the stern. This mechanism has sufficient power to send the skiff along at 12 miles an hour. While being dragged over the highways a temporary frame is attached to the bow and by a swivel joint to the frame of the sidecar.

Mr. Swenson estimates the weight of the boat itself at about 100 pounds and as the propeller and its motor may be lifted easily, thus making a very handy rig.

# The Dealer and Low-Priced Bicycle

## The Results of a Short-Sighted Sales-Policy

By S. R. BUGBEE
Assistant Sales Mgr., Iver Johnson Arms & Cycle Wks.

SOME time ago while visiting an Illinois dealer, the latter boasted laughingly that he was out to "get" his competitors. "I'm going to carry in stock a line of bicycles that will sell completely equipped for $16. I will sell for spot cash only, and will wash my hands of every sale the moment the bicycle leaves my store. If it breaks down before the customer has ridden a block—that's his look-out, not mine. I'll warn him that I'm selling something at a price, not a bicycle, and it will make my competitors crawl into cyclone cellars and stay there."

### How It Worked Out

He was a progressive dealer, with an attractive store and an enviable local standing. Yet I wondered how a man of his reputed ability could expect to get away with such a campaign unscathed. I didn't know where he bought the bicycles and I didn't care, but to me it seemed that the manufacturer and the dealer were alike engaging in tactics subversive of their own best interests. Let us see how it worked out.

When I called on that dealer again he was less enthusiastic. In answer to repeated proddings he said, "Yes, I tried that stunt, and everything went as I expected for a while. The wheels sold like hot cakes and my competitors just threw up their hands and called for help. But I found that I couldn't shake the responsibility of those sales. Every time a bicycle went to pieces I had to stand for a lot of personal abuse and usually finished up by making free replacements to protect my own reputation. There was no profit in the sales anyway, and when I piled on a lot of free service and repairs it meant a net loss. Then there were a number of those purchasers who quit the bicycle entirely, so you see I was a loser in several ways. Never again."

This incident illustrates a fact of serious importance to dealers the country over. Taken as a whole the bicycle business is in pretty sound condition. It is necessary that the dealer should co-operate to keep it sound. The day of the wheel as a fad is past. The day of the bicycle as a commercial utility has arrived. The industry is dependent for its continued vitality upon the demand for the bicycle for hard everyday use by business houses and by men going to and from their work. The bicycles sold for distinctively pleasure purposes are no long in the majority.

Assistant Sales Manager Bugbee as the Artist Saw Him in Action

*In the accompanying article Mr. Bugbee makes a strong plea for commonsense methods as applied to both manufacturing and selling, takes a whack at the extremely low-priced machine and discusses the growing commercial demand for the bicycle.*

And right here we come into conflict with the "cheap wheel." The bicycle to be a commercial success must be durable in structure. You can dispense with the gilt edge finish and equipment but you cannot afford to skimp the tubing, the connections, the crank and the bearings. Now, in all candor, who would pretend that the thousands of cheap bicycles at present flooding the market are not skimped in the essentials? Who would pretend that they are calculated to promote the welfare of the bicycle business? May we go even further and suggest that their sale is forced by an unwise price appeal, and by the use of standard equipment to hide the fundamental defects of construction?

### The Danger of Price-Cutting

The dealers know that such machines are unsuited to hard use; that they are wanting in the materials and workmanship essential to good bicycles; that they are not what their customers *really* want; and that every such sale reacts harmfully upon the bicycle business. The cheap wheel finds a market as the result of a general demand for bicycles. That demand has been created not by the "cheap wheel" itself, but by the manufacturers of high-grade bicycles who have been working hard and consistently for the upbuilding of bicycling among all classes. There would be no objection by these manufacturers to competition conducted on similarly constructive principles. I, for one, however, desire to register a kick against the unhealthy price cutting mania which, if continued, must work untold damage to the entire bicycle cause.

### To the Dealer's Best Interests

It is for the dealers to decide whether the quality bicycle or the "sold-at-a-price bicycle" shall predominate. He is the salesman to whom the purchaser looks for advice and he is the agency for selling the manufacturers' product. I do not fear what his decision will be, so long as he keeps in mind that to properly build up and increase his business each sale must be a recommendation to other customers and an evidence of the dealer's personal reliability. The danger is that he will even temporarily forget that fact and be misled by unscrupulous competition into pushing for sales regardless of whether those sales work to his ultimate advantage. I do not

Digitized by Google

...handle ...should be kept subordinate ...high-grade line, and that the dealer's sales talk should be quality and not price. There is a mutual obligation on the part of both manufacturer and the dealer to boost the bicycle game; and the first essential to such boosting is a good bicycle.

### Right Way to Approach Prospect

Lest it be urged that competition makes it necessary to give preference to the cheap line, let me cite another experience. I was in what I believe to be the finest bicycle store in the East. A prospect stepped in and the salesman instead of handing him the usual formula, "about how much do you want to pay?" asked: "Wouldn't you like to own the finest bicycle in the world?" With that he wheeled out a trim, beautiful road-racer listed at $55. The salesman drove home the advantages of such a bicycle, made the prospect get astride it, and ended by collecting his money. The store disposes annually, at retail, of some 700 bicycles. Most of their sales are of high-grade bicycles selling at $30 and upwards. If a customer wants a cheap machine he has to ask for it, otherwise nothing but quality bicycles are mentioned.

### Prosperity in a Slogan

Now you can't sell a $55 bicycle to every prospect, but I contend that the dealers can add greatly to bicycle prosperity by adopting the "best bicycle in-the-world" slogan as opposed to the cry of "how much do-you-want-to-pay?" Price competition is destructive. Quality competition is constructive. The former can always be met by the latter. You may doubt it; but have you made the attempt? How far have you experimented with the high-grade bicycle? Have you given it a real chance, or have you kept only two or three in stock and devoted the rest of your floor space to wheels whose only appeal is—price? Do you reflect that you can never in the end get the price advantage over such powerful adversaries as the catalog house and the department store, but that you *can* if you will, beat them on quality?

### Loss in Long Run

Put yourself in the place of the man who buys a cheap wheel. How long would you stand for the repair bills? Or even if the upkeep should not prove expensive, how long would you submit to the manual labor of pedalling such a mount? Bicycling under such conditions is not the ideal recreation that it should be. For hard commercial use such a vehicle is a joke. And the pity is that the customer, instead of blaming his own short-sightedness, in many cases condemns bicycles as a whole, and will have nothing further to do with them.

Let us all—manufacturers, dealers and bicycle enthusiasts—get together to make the bicycle game bigger, better and more profitable than it has ever been. Surely no dealer wants a numerous body of knockers in his territory. There is one sure way of creating knockers, and that is by pushing the sale of inferior machines. There is an equally sure way of winning friends, and that is by advertising and giving prominence to a quality line.

## COVERS MOTOR-WHEEL FIELD

Fully explanatory of the use, construction and advantages of the Smith Motor Wheel is the recently-issued publication of the A. O. Smith Company, of Milwaukee, Wis., entitled "Motor Wheeling." It consists of 24 pages of matter very pertinent to the subject, beginning with the advantages accruing from the use of the little motive attachment. This is followed by a description of what the device really is, showing the wheel in its component parts with clear explanation of each. Photographs show how the Motor Wheel adapts itself to varying road conditions, on corners, etc., and two pages are devoted to a description of the component parts. Well-illustrated pages show the variety of services.

## SIGNALING FOR BICYCLE COPS

Fort Worth, Texas, June 26.—A powerful searchlight has been placed on top of the South Side police station by Chief of Police Baily, to be used as a signal in connection with the bicycle squad installed in the local department a few weeks ago.

A system of telephone boxes has been placed throughout the residence districts, through which the bicycle squad patrols, and each man reports his location to headquarters every thirty minutes. When an emergency call comes into the police station, the bicycle policeman nearest the scene of disturbance will be signalled by the searchlight at night. He will ride to the nearest telephone box and receive instructions as to the place where he is needed. Under this system, it is possible to get one or more of the bicycle men at the point where they are wanted within a few minutes after the distress call is sent in.

## HARPER'S UNUSUAL FEAT

V. G. Harper, traveling representative for the Motor Wheel Division of the A. O. Smith Company, of Milwaukee, Wis., recently performed an unusual feat in salesmanship, according to a report from the firm. Harper was sent to Kansas on May to close up the remaining open territory in that State, and in 17 days he visited 21 towns, securing a dealer in each town visited. His total contracts for the 21 towns amounted to 650 motor wheels, says the company.

# Talking Parts Will Increase Sales

## Bicycle's Construction Should Be Shown to Prospects

By FRED L. BROWN
Sales Manager, Pierce Cycle Works

"Talk Parts," Says Sales Manager Brown, "and Watch Your Patrons Develop Interest in the Bicycle"

BACK in the old days when bicycles were selling for $75 and $100 around beautiful stores, we arranged with a corps of salesmen who had been instructed in selling the lines which they represented favorably when you went into one of these stores, the first thing that caught your eye was a long table, covered with all kinds of parts, showing construction work from the raw material to the finished product. In addition you usually found several badly bent frames and forks each with a story about how it had been run over by a car or a wagon and still had come through the accident without a break.

### Practical Information

In going over this parts table with a prospective customer a most liberal education as to how the parts were made; whether they were stampings or castings and whether or not they would stand the racket of hard road use. By the time the prospect reached the point of looking over the finished bicycle, he had become interested in its construction and had practically decided to make the purchase. Therefore the salesman, after explaining the care taken in the construction of the parts which went to make up the whole machine, had obtained the customer's interest, attention, and desire, and after getting him to look over the complete bicycle, the salesman found it an easy matter to land the sale.

Customers, today, are the same as they were a few years ago. When they want to buy anything, they desire to know something of the merits of the product and whether or not it meets with their requirements. They like to see the parts before they are assembled and decide for themselves if the construction is good. Some of the many bicycle dealers today take the trouble to explain to their prospective customers all about the little things which go to make up the bicycle they are looking at.

### Sensible Arguments Needed

And a great many of the dealers stand back and say to a prospect, "There is the best bicycle made." But they forget to tell the customer why it is the best. If they would just use a little judgment, and realize that the customer is buying a thing he does not know very much about and is anxious to learn of the construction, it would be an easy matter to get him to buy a much better wheel than he figured on when he entered the store. The dealer must bear in mind that a satisfied customer is the best advertisement obtainable, and selling a man the best bicycle means not only a good profit on the first sale, but also an increased business. If this man is absolutely convinced he has the finest, he will call out from the house tops and incidentally bring in others to purchase the same make of machine.

A great many of our agents say, "Where am I going to get these parts to show?" It is not necessary for a factory to send out a lot of parts, for, if the agent will just look around his store, he will find plenty of things to put on his table, which are now back on the shelves, all covered with dust. Just dig around among your old scrap and you will find a bent frame, a pair of damaged forks, some cups and cones that you can use for replacement work. Clean these up, lay them on the table, along with catalogs and advertising matter, and when your customer comes in, don't stand around with your hands in your pocket, but show parts, talk parts, tell him all about how the bicycle is made and *why* it is the best. Then see how quickly he catches your enthusiasm!

### Customers Want Information

Some dealers with whom I have spoken about this matter claim that their customers don't want to talk bicycle parts. These dealers are wrong. The prospect does want to know that the bicycle will stand up and "deliver the goods." How, then, are you going to prove it in advance if you don't show him?

When I send a salesman on the road he carries at least a complete frame fork and hanger and has a different type of fork and hanger in reserve, with which he can convert his sample frame to another model. Most salesmen say this is too much of a load to pack around; but you will find our men return with a book full of orders and all of them for good, high-priced bicycles.

### Sample Lines Are Helpful

The dealers like our idea of carrying a sample frame into their stores and in a great many instances try to borrow the sample. They realize that if the use of the frame in presenting a sales argument is effective in persuading them to lay in a stock of machines, it ought also be a sales maker with reference to retail customers. Still, these very same dealers will not go to the trouble of getting up a sample line of their own—a thing which they could very easily do without going outside of their shops.

One jobber said to me: "If I could get our salesmen to talk parts like you do, there would be no limit to our sales of high-grade bicycles." I replied: "Fire your salesmen if they don't carry samples of parts and talk them." If they were my salesmen, you can stake your bottom dollar that they'd be put on the toboggan.

### How to Obtain Live Results

Now, Mr. Dealer, just try this stunt: get out parts. If necessary, take down one of the wheels you have for sale and use it to talk from. Take the hanger apart and take out the fork. Show the construction work on the frame and bearings and weave your arguments around these important points. Show the difference between a high grade and a cheap product. If you will only do this, you will be surprised at how much your sales will increase and the resulting better grade of business.

Talk high-grade, high-priced bicycles and thus make satisfied customers.

---

## LANTINBERG IS ACQUITTED

Newark, N. J., June 25.—The jury trying the case of David Lantinberg, who was charged with manslaughter for killing Floyd MacFarland, the late manager of the Newark Velodrome, turned in a verdict of not guilty. Lantinberg was a concessionaire at the local track, and on April 17 got into an altercation with MacFarland about the placing of signs, which resulted in the latter's death. Lantinberg put in a plea of self-defense.

# On the Annual

Above, Stopping at a Spring Near Louisiana. At Right, the St. Louis Cyclists on Board the Kentucky

THE shrieking whistle of the ancient steamer *Kentucky*, which was tied up at her pier in St. Louis, gave her last warning blast. At that signal two score and twelve cyclists who were gathered about the gang plank hastily rolled their trim, shining mounts aboard the old Mississippi paddle boat. They were an animated group of enthusiasts—everyone of them happy in the expectation of two days of solid sport ahead. For this was the occasion of the Annual Pike County Tour of the St. Louis Cycling Club, which started on the afternoon of June 19.

"Hurry up, you fellows!" merrily chirped a voice from the upper deck to the last few riders who were eagerly pushing their machines up the plank. "She'll be off before you get on. It's great up here—breezy as a live-wire traveling man—chairs for everybody—lots of room. Come on, hustle!"

### The Tour Begins

The captain ceremoniously ordered the plank raised; "ding-ding" went the bell down the engine room, and slowly the clumsy paddle wheels began to churn the water. The rousing cheers and hurrahs from the decks bade a "glad-to-get-rid-of-you" farewell to St. Louis. They were off!

The annual tour to Pike county is the most popular event of the season among the cyclists of the Missouri metroplis. Each year the members of the St. Louis club take a boat ride to Clarksville, about one hundred miles north of their home town, and then pedal through a country rich in scenic beauty.

The sight-seeing from the hurricane decks of the *Kentucky* was the principal attraction for the riders as they gathered in groups about the steamer's rail. They saw with interest the ever-changing landscape along the shore, the muddy Missouri sweep into the Mississippi, and historic points made famous by the French missionaries who were the first white men to explore the heart of America.

### Evening Entertainment

At seven in the evening, the negro steward announced supper and the crowd of merry St. Louisans went into the dining room and soon disposed of the typical "boat meals" set before them. Corn bread was the best part of the supper, for no one is as skilled as the darky in making wholesome corn bread. Night had settled over the river when the excursionists had left the tables, and, with a spirit of good fellowship prevailing, they followed their respective inclinations by dancing, playing cards or assembling in groups to try their vocal talents. The "glee club" entertained with grand opera, old Dutch and Irish folk songs, and popular rag-time.

The novices on the trip—and there were many, for each year the Pike county tour attracts a larger number of riders—seemed glued to the decks. For them the landings of the "Mississippi flat-bottomed scow" were a source of great curiosity. The landing places were found most unpretentious, consisting generally of little shanties or just stock corrals. By day the boat is signaled to shore by gesture of the hand, while at night a common lamp is used. The captain was always seen to be on the alert for these signals.

### Sport With "Roustabouts"

At each landing when the boat is securely tied, twenty to thirty "roustabouts" tumble off the edge of the gang plank and scurry into the freight sheds on shore, bringing out on their shoulders a crate or a sack. When the boat resumes its journey, the "roustabouts" gather on the fore part of the main deck. It is then that someone seizes the opportunity to create excitement by dropping a coin in their midst from the upper deck. The darkies tumble and scuffle for the coin, like a lot of boys "hobble-scrobbling" for marbles. Sometimes ten negroes are bunched on top of the fellow nearest the coin; but if the "under-dog" succeeds in getting the money, he assumes an "I should worry" attitude toward his torture.

It was approaching midnight when the St. Louis votaries of the silent steed broke up their social card parties, quit the saengerfests and whatever other amusements they were enjoying. They were a tired lot

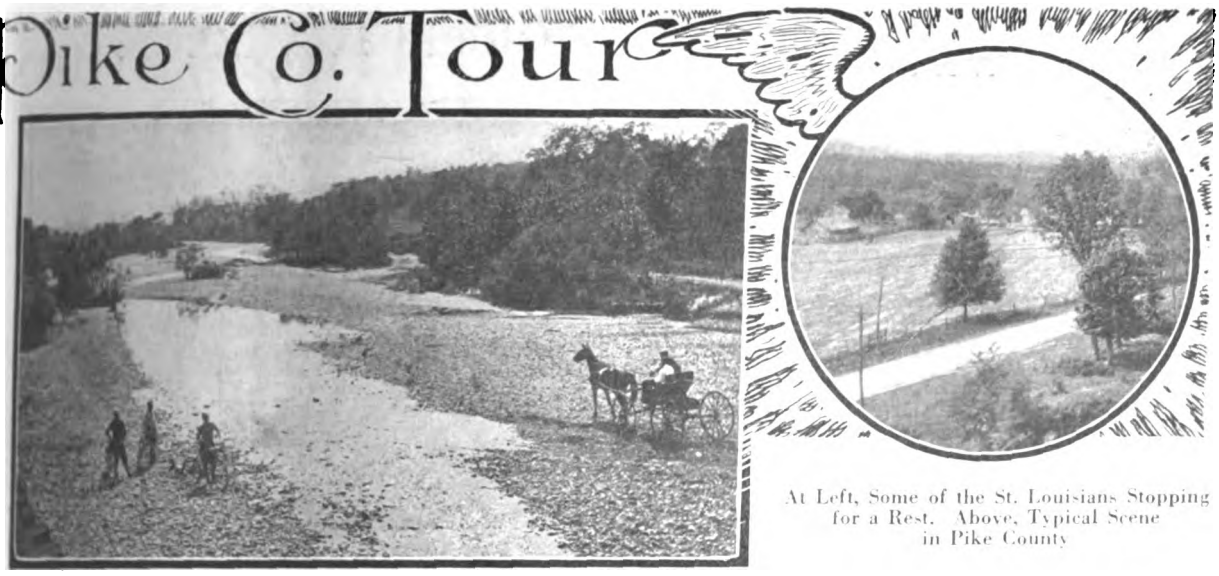
# Pike Co. Tour



At Left, Some of the St. Louisians Stopping for a Rest. Above, Typical Scene in Pike County

...ed a good rest for the next day's ... Pike county. Berths had been ... for in advance.

### Landing at Clarksville

... the call for breakfast was heard ... morning, the rickety boat was still ... Clarksville. With the numerous ... by the thirty odd stops which ... along the river, the tourists' ... was not reached until eleven ... the next morning—four hours be... schedule time.

... odd hours spent in slowly ... the "Father of Waters" had ... succeeded in putting a sharp edge ... of the St. Louisans for a brisk ... through Pike county. At ... the party broke up into groups ... riders who followed various ... through the district, each of which ... Bowling Green, the dinner stop. ... the cyclists took the macadam ... Dover and Louisiana, a distance ... miles, while the majority ... an equally good highway going ... Turpin, Aberdeen and Siren, ... twenty-five miles to Bowling ...

... through which the routes ... was more beautiful than ever in its ... foliage, extensive and well-kept ... prosperous looking farm houses. ... folks were seen along the ... were surprisingly neatly dressed and, in several cases, rode about in bright looking buggies drawn by well-groomed horses. The roads were in their usually good condition, for it had rained the night before and the water had washed the highways clean and settled all the dust. A charming characteristic of the roads through Pike county is the manner in which they wind in and out of shady nooks and then suddenly break out on a straightaway sometimes five miles in length—smooth and level as a speedway.

### Dinner at Bowling Green

No trouble was encountered by the tourists, who thoroughly enjoyed the jaunt, and with few exceptions they reached Bowling Green at two o'clock, hungry as bears. At the dinner stop arrangements had already been made with a lady, whose cooking has for years been considered the most important feature of the Pipe county tour, to appease fifty-two appetites, rendered keen by a "forced march" to Bowling Green and three indifferent meals on the *Kentucky*, which had been largely a repetition of pork chops, corn bread and pork sausages.

The many delicacies of the dinner were served at long tables placed under a grove of huge, shady honey locust trees, adjacent to the farm house of the well liked cook. The riders had little to say during the meal; they just ate as though they were preparing for a long fast.

A short rest was taken after dinner, when the tourists continued their trip. In pedalling through Bowling Green, they came upon the home of Speaker Champ Clark. It was a pretty, unpretentious frame house, covered with a bower of roses and cosily located in a beautiful little ravine. At this house will be held during the current week the wedding of the speaker's daughter, Genevieve Clark.

The ride of nearly twenty-eight miles back to Clarksville was made in quick time and without accident. The old paddle boat *Kentucky* arrived at seven o'clock, and, with the fifty-two cyclists aboard, slowly continued her journey to St. Louis.

### Thunder Storm Breaks

The fellows were comfortably seated in steamer chairs, smoking, chatting and swapping stories, when all of a sudden a terrific gust of wind swept over the deck, followed by a drizzle. Then the rain came pelting down in torrents and everybody outside took refuge in the cabin. Ragged streaks of lightning illuminated and pierced the black, inky clouds; incessant thunder roared like Krupp guns belching forth deadly shells.

From within the cabin the St. Louisans could discern the erstwhile calm surface of the Mississippi convulsed into a heaving and threatening confusion of water. The order was heard from the captain to make

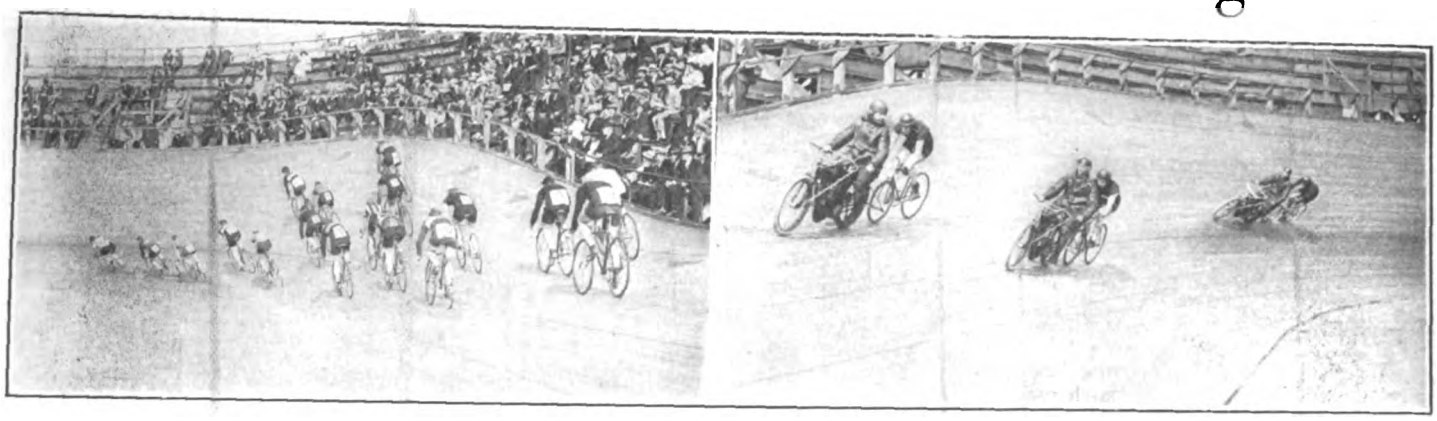
# Snappy Card of Races at Chicago



**At Left, Field Taking Curve in 3-Mile Open on Sunday, June 20. At Right, Root Leading in Motor-Paced Race**

CHICAGO, June 28.—Eddie Root, the Boston pace rider, in defeating Peter Drobach in the deciding heat of a five-mile paced match at the Riverview Velodrome last night, shattered the track record for the distance when he covered the ground in 7:19. This is four seconds under the old mark held by Percy Lawrence. Drobach had won the first heat by a small margin and Root took the second by ten yards, but the battle in the third heat was the best seen at the track this season.

**Verri Avenges Defeat**

Francesco Verri, the fast Italian, came home in front of Iver Lawson, in two straight heats of a match race at two-thirds-mile. Verri came out on Lawson in the first heat on the back stretch and managed to just beat the latter before the turn. In the second heat, Verri rode from the front and stalled Lawson until the home stretch was reached, when he put on all speed and managed to ward off Lawson's rush, winning by a foot.

Frank Cavanagh, who is known as the "Big Train from Newark," came home a winner in the half-mile open for the professionals, beating Charlie Piercey, the Australian; Iver Lawson, and John Bedell, the Long Islander, by riding from the front and stalling the efforts of the other riders until he let out full speed ahead on the bell lap. Cavanagh's victory was a popular one. The professional handicap, at two miles, was won by Gordon Walker, the Australian, who started from the 30-yard mark. Charlie Piercey finished second from the 20-yard mark; Lloyd Thomas, San Francisco, 45 yards, finished third, and John Bedell, 85 yards, ran fourth.

The amateur races furnished plenty of fast finishes. The one-third-mile handicap resulted in a win for Bert Nelson, a Riverview Cycling Club member, who had had 65 yards, and the unknown distance race for the same class saw Ernest Kockler, another Riverview man, finish ahead of his clubmate, Charles Minnetti. Willie Wohlrah, Jersey City, ran third.

**The Summaries:**

One-third-mile handicap (amateur)—Won by Bert Nelson, Riverview C. C. (65 yards); second, Charles Stuckle, unattached (85 yards); third, Q. Chiostri, Italo-Am. C. C. (70 yards); fourth, Roy McWhirter, N. W. S. C. (40 yards). Time, 36⅗ seconds.

Unknown distance race (amateur)—Won by Ernest Kockler, Riverview C. C.; second, Charles Minnetti, Riverview C. C.; third, Willie Wohlrab, Jersey City; fourth, Fred Samlow, unattached. Time, 6:53. Distance, 3½ miles.

Two-thirds-mile match race (professional)—Won by Francesco Verri, Italy, in straight heats; second, Iver Lawson, Chicago. Times, 2:14 and 2:10.

Half-mile open (professional)—Won by Frank Cavanagh, Newark; second, Charlie Piercey, Australia; third, Iver Lawson, Chicago; fourth, John Bedell, Long Island. Time, 1:02⅘.

Two-mile handicap (professional)—Won by Gordon Walker, Australia (30 yards); second, Charlie Piercey, Australia (20 yards); third, Lloyd Thomas, San Francisco (45 yards); fourth, John Bedell, Long Island (85 yards). Time, 3:49⅕.

Five-mile motor-paced match (professional) (Peter Drobach, South Boston, vs. Eddie Root, Boston)—Root won second and third heats. Times, 7:25, 7:27 and 7:19.

Chicago, June 27.—Francesco Verri, the speedy Italian sprinter, met Frank Cavanagh, the Newarker, in a match race at two-thirds-mile on Saturday night at the Riverview Velodrome, and the Italian came home the victor, but it took three heats to do the trick. Verri won the first heat, the second heat was so close that the judges decided it was a dead heat, and the third heat went to Verri by a foot or more.

**Lawson Defeats Verri**

Iver Lawson, the local Swede, accounted for the unknown distance race for the professionals from Francesco Verri, John Bedell, the Long Islander, and Charles Piercey, the Australian. The distance was two miles and five laps, and the time was 5:57. The finish was very close for second, third and fourth and to many it looked as though Piercey had finished second, but the judges placed both Verri and Bedell ahead of him. The long-mark men took good advantage of their handicaps in the one-third-mile professional handicap, and as a result the back-markers finished in the ruck. Bob Diefenbacher, the San Jose rider, broke the ice, so to speak, and won a race by taking the event from the 60-yard mark, beating Ned Young, Salt Lake City, 50 yards; Floyd Krebs, Newark, 45 yards, and Bobby McLean, Chicago, 60 yards, in the order named. The time was 34⅗ seconds.

The best motor-paced match seen at the local track was on tap when Peter Drobach, the South Boston German, met Martin Ryan, the Newark Irishman, in a five-mile, best two out of three heat match. Drobach won the first heat by a length; the second went to Ryan by twenty yards, and the third was taken by Drobach by ten yards.

**Kockler Stars in Amateur Races**

Ernest Kockler, the Riverview Cycling Club rider, won both the two-thirds-mile handicap and the three-mile open for the amateurs. In the latter race, Egisto Davini and William Kell came to blows and were suspended for three days each by the referee. Summaries:

Two-third-mile handicap (amateur)—Won by Ernest Kockler, Riverview C. C. (scratch); second, Louis Kuehl, Chicago C. C. (50 yards); third, Roy McWhirter, N. W. S. C. (60 yards); fourth, G. Klasen, D. A. A. C. Time, 1:20.

Three-mile open (amateur)—Won by Ernest Kockler, Riverview C. C.; second, Charles Minnetti, Riverview C. C.; third, E. Davini, Italo-Am. C. C.; fourth, Roy McWhirter, N. W. S. C. Time, 6:32. Lap prize winner, L. Kuehl.

One-third-mile handicap (professional)—Won by Bob Diefenbacher, San Jones (60 yards); second, Ned Young, Salt Lake City (50 yards); third, Floyd Krebs, Newark (45 yards); fourth, Bobby McLean, Chicago (60 yards). Time, 34⅗s.

Unknown distance (professional)—Won by Iver Lawson, Chicago; second, Francesco Verri, Italy; third, John Bedell, Long Island; fourth, Charles Piercey, Australia. Time, 5:57. Distance, 2 miles 5 laps (2½ miles).

Two-third-mile match race (professional) (Francesco Verri, Italy, vs. Frank Cavanagh, Newark)—Verri won first and third heats; second heat a tie. Times, 2:07⅘, 2:30 and 2:05.

Five-mile motor-paced race (Peter Drobach, South Boston, vs. Martin Ryan, Newark)—Won by Drobach by taking the first and third heats. Times, 7:41, 7:38⅖s and 7:19.

**"Ad" Men at Velodrome**

Last Wednesday night was Ad Men's night at the Riverview Velodrome, and in honor of the delegates who were attending the eleventh annual convention of the Advertising Clubs of the World, the races were named after the delegates, the clubs and the occasion.

The meet started off with the "Convention Dash," a two-third-mile point race for the amateurs, which was won by Ernest Kockler, the Riverview Cycling Club star, from Earl Adams, East Orange; E. Davini, Italo-American C. C., and George Klasen, of the Danish-American A. C. The time was 1:20, and Kockler scored 14 points to 11 for Adams; four for Davini and one for Klasen. In the "miss and out" amateur race, named the "Chicago Ad Club Stakes," Kockler again came home in front of Adams, while Charles Minnetti, a Riverview C. C. rider, finished third and Davini fourth. The time was 4:33 and distance was two miles, one lap.

**Many "Ad" Features**

The "Ad Men's Stakes," a one-mile open for the professionals, was won by Iver Lawson from Frank Cavanagh, the Newarker; Charles Piercey, Australia, and Gordon Walker, Australia. The time was 2:08⅘. The Brassard race, in which Floyd Krebs, Newark, met Albert Crebs, Salt Lake City, was named "William Woodhead Derby," in honor of the president of the advertising clubs.

# McNAMARA AGAIN TAKES BRASSARD

## Australian Wins Brassard Match for Fifth Time; Rain Interferes With Other Newark Event

Newark, N. J., June 27.—A wind and rain storm called a halt to the bicycle racing here today just as they were growing exciting. An excellent card of events was on tap. Frank Kramer, the veteran champion, and Alfred Goullet, the young Australian, were opposing each other in two-thirds of a mile match race, the best two out of three heats to win. Kramer won the first heat from "Goullie," when it started to rain.

Reggie McNamara, the hard working Australian, captured the Brassard race, a one-mile match, for the fifth time in succession. He defeated Caesar Moretti, the Italian sprinter. McNamara has won, in succession, Marcel Dupuy, Harry Kaiser, Alfred Goullet and Thorwald Ellegaard. It was a close race before McNamara defeated Moretti. The riders were on the last lap of the race when McNamara switched in front of the Italian as the latter was trying to go around him. Moretti put up his hand in protest and the race was run again. The second time McNamara defeated him in a similar manner.

The heat of a one-mile tandem match race was ridden with Alf Grenda and Fred Hill easily defeating Joe Fogler and Reggie McNamara. The other team in the race, Thorwald Ellegaard and Caesar Moretti, finished a poor third. Jake Magin, a Newark "pro," won the one-third mile handicap race. He had an allowance of thirty yards and won rather easily. William Morton, of Kearny, with forty-five yards, was the second rider over the line. Third place went to Ernest Ohrt, of San Francisco, who had thirty yards allowance.

It was the first Sunday in a long while that Ernest Ohrt, the San Francisco amateur, did not win a race and the only reason he did not come through was for the simple fact that there were no amateur races to ride, the rain coming before they really got started. The summaries follow:

Half-mile novice (amateur)—Won by Nat Horvath, Newark; Edward O'Mara, Newark, second. Time, 1m. 6s.

The Brassard race, at one mile (Reggie McNamara, Australia, vs. Caesar Moretti, Italy)—Won by McNamara, Moretti second. Time, 3m. 11⅘s.; last eighth mile, 12⅖s.

One-third-mile handicap (professional)—Won by Jacob Magin, Newark (30 yards); William Morton, Kearny (45 yards), second; Ernest Ohrt, San Francisco (30 yards), third; Larry Corbett, Australia (60 yards), fourth; John Schlee, Newark (30 yards), fifth. Time, 36s.

Two-thirds-mile match race (Frank L. Kramer, East Orange, vs. Alfred Goullet, Australia)—First heat won by Kramer; Goullet second. Time, 1m. 47⅘s. Last eighth mile, 12⅘s.

One-mile tandem match race (professional) (Alfred Grenda, Australia, and Fred Hill, Boston; Reggie McNamara, Australia, and Joseph Fogler, Brooklyn; Thorwald Ellegaard, Denmark, and Caesar Moretti, Italy)—First heat won by Grenda and Hill; McNamara and Fogler, second; Ellegaard and Moretti, third. Time 2m. 8s. Last eighth-mile, 11⅘s.

### SANBORN LOWERS A RECORD

Fred. M. Sanborn, the long distance performer of the Crescent Bicycle Club, added another record to his list on Saturday, June 26, when he hung up a new mark for the ride from Baltimore to Philadelphia, covering the distance of 108 miles in 8 hours and 6 minutes. Sanborn's task was made more difficult by the fact that about twenty-five miles of his course has been freshly tarred and covered with loose stones, thus making the going extremely heavy. But despite this obstacle he was able to clip 37 minutes off the old record of eight hours and forty-three minutes. One of the most interesting trips ever planned by the Crescents is scheduled to take place next week when the members leave Baltimore Sunday morning, for a three-days trip through the beautiful Shenandoah Valley of Virginia.

### NEW BICYCLE TRACK AT BUFFALO

Buffalo, N. Y., June 26.—It is reported that the Bison City is to have another bicycle track. A number of bicycle enthusiasts have organized a company to finance a new track at Pine Hill. According to plans now being considered this track will be similar to the Newark Velodrome. The Pine Hill plant will be devoted exclusively to bicycle events and all motorcycle affairs will be barred, though there might be motor-paced events. The present Buffalo track, although the scene of a few bicycle races, is in reality a motordrome. There is no exclusive bicycle track in Buffalo at present.

# RECORD BEATEN IN PACED RACE

## Seres, of France, Covered Ten Miles in 13:17 1-5, Beating Record Made by Carman

SHEEPSHEAD BAY, N. Y., June 25.—To decide the winner of the motor-paced race at the Sheepshead Bay Velodrome on Thursday night, June 24, George Seres, of France, and George Wiley of Syracuse, had to ride in an extra five-mile heat, in which the former turned out to be the victor. Seres established a new record when he covered ten miles of the first heat in 13:17⅕. The former record was 14:35⅘, made by Clarence Carman. The last heat was full of thrills and the strenuous attempts of the American cyclists to overtake the Frenchman had spectators on their feet most of the time.

Hans Ohrt, the Californian comet, accounted for two races. He captured the three-quarter mile amateur and the one-mile open. In the first race ten riders started in the final heat. The Californian shot into the lead in the third lap, with Thomas Grimm only inches behind him. The two riders held these positions for the remainder of the race. Ohrt won in 1:28⅘; Grimm was second and Eddie Kane, of the New York A. C., accounted for third position, with a handicap of thirty yards. There were also ten starters in the final of the one-mile open, Ohrt winning by inches in 2:10⅘ from A. Taylor. Al. Krushel, of Buffalo, was third and Tomm Grimm a close fourth.

Jerry Nunziata of the Empire City Wheelmen won the two-mile amateur race, open to riders living in New York City and Long Island, in 4:26⅗. Tom Bello, a club mate of the winner, finished second, Franklin Fisher of Brooklyn third, and William Ferris of Inwood fourth.

Jackie Clark and Robert E. Spears, both of Australia, divided first honors in the one-mile alternance race when each man scored 13 points under the new French system of scoring. Each man took two firsts and a second in their heats. Freddie Hill, of Boston, was third, with 7 points, two seconds and a third.

# WELL FILLED FOR AN AFTERNOON OF HIG

### THAT CYCLE PARTS BIKE RACE

The committee in charge of the bicycle race event of the Cycle Parts convention in Atlantic City predict that it will be one of the best and largest amateur races that have been promoted in some time. And this statement seems to bear all the earmarks of truth, for Chairman Max Sladkin, president of the Haverford Cycle Company, has a great reputation for dynamic energy, originality and executive ability which was clearly proven in the manner in which he pulled off "Excelsior Day" last summer. Max is very much in earnest about having this bicycle event a humdinger from the word go, and his plans are receiving the hearty and enthusiastic endorsement of the manufacturers. The race will be a free-for-all 25-mile road race, held on August 6—the course being the Atlantic City boulevard.

Everybody is eligible except drunks, cripples and blind men, and everybody will be given attractive souvenirs furnished by the manufacturers, and the prizes will be as plentiful as flies about a honey-pot. Through the generosity of the manufacturers, $1,500 worth of merchandise has been offered for prizes, some prizes approaching $100 in value. Everybody has a good chance of winning some prize from this plentiful supply, so that it is worth while for every rider of a bicycle to get into the race. In addition to the fine line of prizes the manufacturers are going to serve a luncheon to every participant in the race.

Entry blanks can be obtained from the Haverford Cycle Company, 825-27 Arch street, Philadelphia, and the following Haverford branches: 827-29 Arch street, Philadelphia, Pa.; 411 and 329 Market street, Philadelphia, Pa.; 427 Tenth street, N. W., Washington, D. C.; 763 Main street, Buffalo, N. Y.; 1309-11 Atlantic avenue, Atlantic City, N. J.; 289 Woodward avenue, Detroit, Mich.; 235 Superior avenue, Cleveland, Ohio; 430 Grandby, Norfolk, Va.; also from C. A. Van Dorn, 1731 Atlantic avenue, Atlantic City, N. J., and Geo. W. Robb, 914 Arch street, Philadelphia, Pa. Prize donors will be announced later.

## GRENDA LEADS IN CHAMPION SERIES

### Kramer and Goullet Fail to be Placed; Moretti Manages to Defeat Kaiser

NEWARK, N. J., June 25.—Frank Kramer and Alfred Goullet, who are looked upon as the only real contenders for the national sprint cycling title, both failed to be placed in the five-mile championship race which was staged at the local velodrome on Thursday night. They rode in the rear during the entire race and did not seem to have the speed to get to the front in the last lap. Alfred Grenda, the tall Australian, was the winner in the fast time of nine minutes and forty-five seconds, which is three and one-fifth seconds outside of the world's record.

**Donald McDougall**

By annexing the race Grenda takes first place in the battle for the championship. Goullet is second with thirteen points and Kramer third with twelve points. Going into the last lap of the race, Grenda was the leader, followed by McNamara. Goullet was riding in the third place on the outside. Spears, Egg and Kramer were all closely bunched with Kramer at the pole. Grenda kept plugging away and shot around the last turn into the home stretch leading. It looked for a while as though McNamara would nip him at the tape, but the lanky Tasmanian flashed across the finish line first.

There was a close finish in the race between Moretti and Kaiser. The first was a dead heat, while in the second heat a bad spill resulted which brought both riders crashing to the wooden saucer. Another heat was put on to decide the winner and the Italian won by just a hair's breadth. Hans Ohrt, the San Francisco boy, accounted for the half-mile amateur championship race, beating out Fred Taylor, of Newark. The handicap for the backmarkers was again declared to be too great in the half-mile race for professionals. Goullet, Spears, Clark and Dupuy were shut out in their heats, while McNamara and Grenda managed to get only fourth and fifth places in the final. Donald McDougall, with sixty yards, was declared the winner. The summaries:

Half-mile national championship (amateur)—Won by Hans Ohrt, San Francisco; second, Fred Taylor, Newark; third, Tommy Grimm, Irvington; fourth, Harry Cordes, New York. Time, 1m. 24s. Last eighth mile, 12⅕s.

First semi-final—Won by Ohrt; second, Taylor. Time, 1m. 7s. Second semi-final, won by Grimm; second, Cordes. Time, 1m. 7⅘s.

Standing of riders—Ohrt, 5 points; Sullivan, 5 points; Taylor, 3 points; Flanagan, 3 points; Grimm, 2 points; Horan, 2 points; Cordes, 1 point; Lang, 1 point.

Half-mile handicap (professional)—Won by Donald McDougall, Newark (60 yards); second, Fred Weber, Newark (70 yards); third, William Morton, Kearny (90 yards); fourth, Reggie McNamara, Australia (20 yards); fifth, Alfred Grenda, Australia (scratch). Time, 52⅘s.

Miss-and-out invitation (professional)—Won by Raymond Eaton, Elizabeth; second, George Cameron, New York; third, Jacob Magin, Newark; fourth, William Hanley, San Francisco; fifth, Norman Hansen, Denmark. Distance, 2 miles 4 laps. Time, 5m. 39⅗s.

Two-thirds-mile match race (professional) (Harry Kaiser, Bronx, vs. Caesar Moretti, Italy)—Won by Caesar Moretti, Italy; second, Harry Kaiser, Bronx. Time, 2m. 2s. Time last eighth-mile, 12⅕s.

## CARMAN FIRST IN SHEEPSHEAD RACE

### Goullet Annexes the Alternance at One Mile; Ohrt Again Accounts for Two Events

SHEEPSHEAD BAY, N. Y., June 28.—Riding at a steady pace in the two ten-mile heats of the motor-paced race, Clarence Carman, the American motor-paced champion, captured the feature event of the Sheepshead Bay Velodrome meet last Saturday night, winning easily from George

**Clarence Carman**

Seres, of France, and Jimmy Moran, of Chelsea, Mass. In each heat the champion defeated the Frenchman by about three-quarters of a lap, while Moran was entirely outclassed, completing the first heat eight laps behind the winner and the second, seven laps in the rear. Carman maintained a steady and terrific speed throughout the race.

The alternance race at mile went to Alf Goullet, the blond Australian, who had fifteen points to his credit. Reggie McNamara was second with eleven points, while Jackie Clark, with seven points, sailed in third. The fourth heat of the race furnished the greatest excitement of the evening. Goullet, Egg and Clark each took turns at setting the pace. Egg had a big lead and was traveling like mad, when Goullet and Clark shot out after him, and passed the Swiss a few feet from the tape, Goullet winning from Clark by inches.

Hans Ohrt, who had been forming the habit of capturing two races a night, again repeated the performance. From a field of twenty-two starters, he annexed the two-mile amateur open in 4:27⅖; Al Krushel, of Buffalo, accounted for second position, while Henry Werner, of Newark, was third.

The Californian again showed his superiority when he finished in front in the one-mile handicap, after a speedy spurt of a lap and a half. The San Francisco comet started from scratch with a field of eleven riders against him, all with liberal handicaps, one of which was one hundred and seventy yards. For six and one-half laps Ohrt trailed the other riders, and with little more than a lap to go, the Californian shot down from the upper edge of the track and started out to overhaul the leaders. Ohrt traveled rapidly and passed man after man, finishing a bare half wheel length ahead of Henry Werner, of Newark, who had a handicap of fifty yards. Al Krushel, of Buffalo, was third, with a fifty-yard handicap, and Jerry Nunziata, of the Empire City Wheelmen, fourth, from the eighty-yard mark. Ohrt's time was 1:56⅕.

N. N. Johnson and Harry Glotzer, both of the Century Road Club Association, accounted for first and second places respectively in the one-mile novice races. Johnson's time was 2:52⅗.

### ST. LOUIS CYCLISTS ON RUNS

St. Louis, Mo.—On Saturday, June 26, the members of the St. Louis Cycling Club held a run to Graysummit, while on the following morning they pedalled out to Ballwin.

Belgian Bicycle Corps Passing the Dragoons on Their Way Through Walhaem

## SANBORN LEADS MILEAGE CONTEST

The first published list of the standing of the contestants in the annual century and mileage competition of the Century Road Club Association, as listed below, shows Fred M. Sanborn, of Baltimore, Md., in first position, followed by William Winquist, of Richmond Hill, L. I., and George Steppello, of Long Island City.

Sanborn won this competition in 1914, after riding over 8,000 miles and 50 centuries. Leading as he does up to June 15, when this list was compiled, gives him a fair chance of repeating this performance. The standing on June 15 was as follows:

1—Fred M. Sanborn, Baltimore, Md.
2—William Winquist, Richmond Hill, L. I., N. Y.
3—George Steppello, Long Island City, N. Y.
4—Sylvain Segal, New York, N. Y.
5—Charles F. Hansen, Jersey City, N. J.
6—Adolf Weiner, New York, N. Y.
7—Louis Zemo, Elberon, N. J.
8—Howard V. Carroll, New York, N. Y.
9—Adolph R. Jacobson, New York, N. Y.
10—Joseph S. Caldwell, Brooklyn, N. Y.
11—Ray Caldwell, Brooklyn, N. Y.
12—George H. Segal, New York, N. Y.
13—Robert Wolfson, New York, N. Y.
14—Duane W. Moore, Bayonne, N. J.
15—Ralph W. Zarr, New York, N. Y.
16—Alfred Knipling, New York, N. Y.
17—John M. Mitchell, Greenwich, Conn.
18—William F. Thompson, New York, N. Y.
19—A. S. Thomson, New York, N. Y.
20—George Harvey, Brooklyn, N. Y.
21—Andrew N. Segal, New York, N. Y.

## AMATEUR CHAMP RACE AT BAY

Sheepshead Bay, June 28.—A ten-mile Australian pursuit race will be staged at the Sheepshead Bay Velodrome to decide the championship among teams of two riders each, representing the eight clubs of the Inter-Club Amateur Cycle Road Racing League of New York. It is expected that the first of the preliminaries will be run on July 10, and following up closely will be the semi-finals and finals.

## POPULAR PRICES AT CHICAGO TRACK

Chicago, Ill., June 26.—Since last Wednesday night the prices of admission to the Chicago Velodrome have been reduced. Grand stand seats, which formerly sold for seventy-five cents, are now fifty. Other sections have been reduced in proportion. A considerable increase in attendance has been noticed since the new popular prices have been in effect.

# REVERE FEATURE WON BY LINART

## Belgian First in Motor-Paced Race; Carman Lowers Record for Thirty Mile Event

BOSTON, June 26.—This has been a good week in the bicycle game at Revere Cycle Track. Wednesday night Clarence Carman, of Jamaica, N. Y., put up a new record for 30 miles, doing the distance in 41 minutes ⅗ seconds. Tonight Victor Linart, the Belgian, won the 25-mile motor-paced race, continuing his winning streak.

The Wednesday races were stirring. In the 30-mile motor-paced event, Carman came into his record only half a lap ahead of Elmer Collins. George Wiley, who has been having his share of bad luck lately, was overtaken by the motor-trouble jinx in the sixth mile, and before he could change motors, his opponents had gained five laps. He showed himself to be in the top form after that by gaining 1½ laps on the field after the new motor had gotten onto the track.

Some of the fastest work ever seen here took place from the 16th to the 20th mile, Wiley and Collins alternately trying to pass the champ. It was not until the 20th mile that Wiley, with a tremendous burst of speed, was able to pass Carman, who never lost his pace throughout. On the sixth lap of the last mile Collins took the bank in a try for the lead, and for a lap held on tightly, losing out, however, as Carman put on the last burst of speed. The summary:

Half-mile amateur handicap race—Won by Fred McKenzie, Revere (80 yards); John Barry, Cambridge (70 yards), second; Edward Harrison, Orient Heights (95 yards), third; J. B. Rollins, Everett (55 yards), fourth. Time, 57⅘s.

Mile professional handicap race—Won by Harold Rollins, Everett (25 yards); Alvin Loftes, Providence (15 yards), second; Frank Drobach, South Boston (50 yards), third; Hugh McPartland, Boston (65 yards), fourth. Time, 2m. 6⅕s.

One and one-half mile tandem amateur race—Won by John Fardig, Orient Heights, and Edward Harrison, Orient Heights (150 yards); Tom Connolly, Everett, and Fred Herbert, Fall River (50 yards), second; L. C. Rollins and J. B. Rollins, Everett (scratch), third; Willie Turville, Revere, and Elmer Duncan, Everett (120 yards), fourth. Time, 3m. 1⅕s.

Mile amateur invitation race—Won by Kenneth Plummer, Revere, three laps; Charles J. Cardio, Boston, two laps; Patsy Antonucci, Boston; Michael Barber, Brighton, and Charles Barron, Malden, one lap each. Time, 2m. 20⅗s.

Five-mile open amateur race—Won by L. C. Rollins, Everett; Tom Connolly, Everett, second; Willie Turville, Revere, third; Fred Herbert, Fall River, fourth. Time, 11m. 23⅕s. Lorimer Winslow, Providence, winner of most laps.

Three-mile open professional race—Won by Pat Logan, South Boston; Harold Rollins, Everett, second; Dennis Connolly, Everett, third; Alvin Loftes, Providence, fourth. Time, 6m. 45⅘s.

30-mile motor-paced race—Won by Clarence Carman, Jamaica, N. Y.; Elmer Collins, Lynn, second; George Wiley, Syracuse, third. Time, 41m. ⅗s.

In the motor-paced 25-mile event tonight, won by Linart, Wiley's jinx still pursued him, and he was forced to withdraw in the 12th mile after he had had a puncture and had broken the chains on two wheels. Linart's victory over Elmer Collins was a good, clean win. Things were good and close up to the 15th mile, when the Lynn man lost his pace, and from that time on the Belgian was never headed, having a lead of 1½ laps at the finish.

In the mile professional, Harold Rollins, of Everett, from scratch, beat Hugh McPartland, of South Boston, by a fair margin. Logan and Loftes failed to get within the money. In the half-mile amateur handicap, Tom Connolly sprinted ahead of Willie Turville for a win. Bert Jones, in the five-mile open amateur, showed some real racing headwork when with four laps to go he caught the fast men napping, jumped into the lead and won by a quarter of a lap. The summary:

Mile professional handicap race—Won by Harold Rollins, Everett (scratch); Hugh MacPartland, Boston (75 yards), second; Saxon Williams, Buffalo (90 yards), third; Warren Holbrook, South Boston (80 yards), fourth. Time, 2m. ⅘s.

Half-mile amateur handicap race—won by Tom Connolly, Everett (15 yards); Willie Turville, Revere (30 yards), second; Fred Hansen, Revere (90 yards), third; John Fardig, Orient Heights (75 yards), fourth. Time, 57⅘s.

Miss-and-out professional race—Won by Pat Logan, South Boston; Dennis Connolly, Everett, second; Alvin Loftes, Providence, third; Harold Rollins, Everett, fourth. Distance, 1 mile 3 laps. Time, 3m. 3⅗s.

25-mile motor-paced race—Won by Victor Linart, Antwerp; Elmer Collins, Lynn, second. George Wiley did not finish. Time, 33m. 59⅗s.

Five-mile open amateur—Won by Bert M. Jones, Revere; L. C. Rollins, Everett, second; Willie Turville, Revere, third; Ned Chandler, Boston, fourth. Time, 11m. 31⅗s. Lorimer Winslow winner of most laps.

One and one-half mile professional tandem handicap race—Won by Dennis Connolly, Everett, and Frank Drobach, South Boston (100 yards); J. S.

Digitized by Google

Grant, Lynn, and Ray Jones, Revere (140 yards), second; Harold Rollins, Everett, and Hugh MacFarland, South Boston (30 yards), third; Hardy Jaisen, Revere, and Saxon Williams, Buffalo (170 yards), fourth. Time, 2m. 52⅘s.

### BICYCLE BOY SCOUT TROOP

Dallas, Tex., June 26.—Plans for a bicycle troop have been definitely decided upon by the boy scouts of this city, under the direction of Scout Commissioner Glidewell. Before being admitted to the troop, scouts must pass a competitive examination. The candidate must have a bicycle and be well versed in bicycle tactics as outlined in the bicycle manual of drills and must have a full understanding of bicycle construction and methods of quickly repairing machines. The troop is the first of its kind in the state.

### N. E. W. POINTS RACES

The New England Wheelmen, of New York City, resumed their point races over the Eastern Boulevard on Sunday, June 27, twenty riders taking part in a five-mile handicap which provided a thrilling finish. The first six men were closely bunched as they approached the line, but C. Eiler managed to force his wheel slightly to the front as the finish was crossed. C. H. J. Tonjes was second. The time for the distance was 15:20⅕.

### MARQUART IN C. R. C. A. WEEKLY

The final of the series of spring weekly point bicycle races, of the New York Division of the Century Road Club Association was held Sunday, June 27, over the Fordham road course, Bronx, N. Y. This course is one and a quarter miles to the lap, making a total of five laps to the distance of six and a quarter miles, the length of the race.

From the field of twelve riders, J. J. Marquart took first place. Owing to the great speed attained by the riders who started from the 1 minute 30 seconds mark, Joseph Naphtal, the only scratch man, dropped out after he had ridden two and a half miles, and, a little later on, George Steppello also dropped out, being unable to keep the pace. The others were closely bunched up, and remained in this position until the finish was approached. Then Marquart suddenly sprinted and kept the lead over the finish line, leading Ray Coldwell by a wheel's length.

The order of finish was as follows: First, J. J. Marquart, time 15:02⅘; second, Ray Caldwell, 15:03; third, Joseph Caldwell, 15:03⅕; fourth, Edwin Jensen, 15:03⅗; fifth, Jackie Welton, 15:04⅕; sixth, George Marback, 15:04⅗; seventh, Harry Whiteman, 15:05; eighth, Charles Hyland, 15:05⅗. All the entrants were handicapped 1 minute 30 seconds but Jackie Welton, who left the 1 minute mark.

### VETERAN CROSSES IN 35 DAYS

Arriving in New York on Monday, June 21, from San Francisco, Carles Atwood won a wager by completing the transcontinental trip of 3,800 miles in thirty-five days, on his Selkirk-Yale bicycle.

The wager on which he took the trip was made by Gen. Otis, owner of the *Los Angeles Times*, who bet $10,000, it is said, with a bicycle concern, that Atwood could not make the trip in thirty-five days. Atwood, it is claimed, is having all of his expenses paid and receives forty per cent. of the money won. He is a cousin of Harry Atwood, the aviator. Atwood is fifty-five years of age and made the trip on an eighty-two gear bicycle.

### SPOKANE GREETS BOB LAWSON

Spokane, Wash., June 21.—Bob Lawson, the transcontinental bicyclist, who has been travelling up the Pacific coast from Mexico, arrived in this city today. He has covered 16,872 miles in ten and one-half months. After he finishes his trip on the Pacific coast he will pedal his way to Idaho and return south and then toward new York.

## BICYCLE RENDERS EFFICIENT SERVICE IN GUARDING BRITAIN'S COAST

THAT the bicycle is an invaluable aid in all war-operations has been amply proven by its general adoption in all of the contending armies. For general field service, the Continental forces make use of folding models of machine, but the British service has found a rigid frame model of excellent value. In the English volunteer work of guarding the coasts, heavy-framed machines with rather high saddle position, and an all-weatherproof finish are employed, each mount having rifle clips as well as panniers or packs for the rider's kit. The larger photograph shows a "stable" of Rudge-Whitworth and B. S. A. machines at one of the volunteer headquarters on the Sussex Coast.

### ON THE ANNUAL PIKE COUNTY TOUR

(*Continued from page 43.*)

for the shore. Cautiously the Kentucky neared the bank and tied up alongside a cornfield. Here the old boat remained for five hours.

Long before the engines again resumed their steady pulsations, the tired but happy St. Louis tourists were sound asleep in their berths. When they awoke at seven o'clock the next morning, the cornfield was not to be seen. From berth room windows, blinking eyes, momentarily dazed by the sunlight, were astonished to behold the familiar sight of the city of St. Louis.

The Pike County Tour, in spite of the storm and the rickety old Kentucky, was unanimously declared by two score and twelve cyclists, who briskly pushed their dust-covered machines down the gang plank, to have been the year's classic.

### NEW POPE CATALOGUES

Westfield, Mass.—Attractive catalogues are being issued by the Pope Mfg. Co., describing part of their comprehensive line of bicycles. One booklet goes into the details of the construction of the Rambler, another tells some very interesting facts about the Imperial bicycles, while the third is devoted to a careful description of the Fay juvenile machines.

### BICYCLE BOYS IN CAMP

Cleburne, Tex., June 26.—The first annual encampment of the Bicycle Boys' Athletic Club, of this city, was held last week on the Nolan river. The camp was pitched near a spring at a point on the river where the fishing and swimming were good. A. J. Habermacher was at the head of the affair.

### NOVEL MACHINE AT PICNIC

Cleveland, Ohio.—Thos. Lister, a local bicycle dealer, gives a picnic to his rider-friends each year and this season he got up the novel machine shown in the accompanying illustration and had the ladies ride it. A close look at the machine in the reproduction gives a good idea of its construction.

### TEXAS CHAMPIONS

Fort Worth, Tex.—This city has the honor of having within its limits the championship bicycle team of the State. It is composed of Hanway Anderson

and Dobel Anderson, both of whom are shown in the accompanying illustration, Hanway being in the saddle. These riders are members of the active Panther City Cycle Club, and captured the championship for ten, fifteen and twenty miles last year.

### ATHERTON BRAKE FOLDER

The Buffalo Metal Goods Company is again boosting the bicycle in an attractive little folder gotten up especially for boy scouts. They call attention to the health building qualities of the bicycle, which makes a boy eager for the open country, as well as the reliability of the Atherton coaster brake.

### BICYCLISTS CONQUER MOUNT

Los Angeles, June 26.—The Southern California Wheelmen had a small turnout in their club run last Sunday. This is explained by the character of the run, laid out through Griffith Park and up the scenic drive that winds around Mt. Hollywood, reaching an elevation of about 1,200 feet. Earl Miller enjoys the distinction of making the whole climb in the saddle. The coast down into Hollywood was one long happy slide for seven miles.

**Cleveland Girl Bicyclists on Thomas Lister's Novel Machine**

### NEW REPAIR SHOP IN PHILADELPHIA

Philadelphia, Pa.—Louis Spararo has engaged the store at the southwest corner of Twenty-first and Orleans street, this city, and will conduct a bicycle and motorcycle repair shop. Spararo, who has had considerable experience in the repair line, will also carry a complete line of bicycles and accessories.

### "PIERCE NEWS" OUT AGAIN

The Pierce Cycle Company, of Buffalo, N. Y., has just issued the second number of its house organ, *Pierce Bicycle News*.

The four-page paper, while of small size, is filled with material which Pierce dealers are finding very interesting, and the Pierce Company is receiving many favorable comments on its new enterprise.

### COMING BICYCLE EVENTS

July 4, New York City.—Pleasure run Arrow Wheelmen (rain date, July 5).

July 4, Wichita, Kan.—Fifth annual 25-mile road race, C. B. Hamilton, manager.

July 5, Toledo, O.—20-mile handicap road race, Toledo Bicycle Club, open to all N. C. A. registered amateurs.

July 11, New York City.—Pleasure run. New York Division Century Road Club of America (rain date, July 18).

July 25, New York City.—Picnic and carnival of sports, Inter-Club Amateur Cycle Road Racing League rail date. August 1).

August 3, 4, 5, San Francisco, Cal.—Panama-Pacific Exposition bicycle championships, under sanction of National Cycling Association.

August 8,—Pleasure run, New Jersey Division Century Road Club of America (rain date, August 15).

August 22, New York City.—Cycling carnival, New York Division Century Road Club Association (rain date, August 29).

September 5, Floral Park, L. I.—Road race, Acme Wheelmen (rain date, September 6).

September 6, Toledo, O.—Labor Day 25-mile handicap road race, Toledo Bicycle Club, open to all N. C. A. registered riders.

September 12, Floral Park, L. I.—15-mile handicap road race, New England Wheelmen of New York (rain date, September 19).

September 26.—Tri-State century run, New Jersey Division Century Road Club of America (rain date, October 3).

October 10, 17, 24, New York City.—Annual championships, Inter-Club Amateur Cycle Road Racing League.

Allentown, Pa.—The Lehigh County Commissioners in connection with the Lehigh Valley Transit Company and the Pennsylvania State Highway Department will build a model concrete road between this city and Easton, a distance of about 15 miles.

### NINE PERFECT IN WHEELING RUN

Wheeling, W. Va., June 22.—Nine riders finished the endurance run of the Wheeling M. C. last night, with perfect scores, after riding for nearly three days. Ten others finished the course, but were penalized for lateness at various controls. Of the nine riders obtaining 1,000 points, two drove sidecar combinations. The perfect score list is as follows: Harry Immel, Henderson; R. J. Immel, Henderson; Charles Caldwell, Harley-Davidson; Ivan Jacobs, Indian; Harvey Bernard, Indian; J. P. Wasmuth, Indian; E. R. Durkee, Harley-Davidson sidecar; Wesley House, Indian; Earl Braunlich, Harley-Davidson sidecar. All will get gold medals.

Wasmuth, Indian, will be awarded the silver cup for the highest individual consistency score. Bernard and Jacobs, Indians, had the highest team score in consistency. The highest sidecar score was made by Durkee, Harley-Davidson.

Following is a list of finishers who did not get perfect scores: C. L. Cheshire, Harley-Davidson, 998; A. C. Davis, Indian, 998; A. M. North, Harley-Davidson, 996; W. Phillips, Excelsior, 984; Carl Sells, Harley-Davidson, 924; Joe Dumuth and Fred Grubber, both on Harley-Davidsons, each 742; D. Mikels, Thor, 726; E. B. Berisford, Pope, 652.

### MADISON RIDERS ORGANIZE

Madison, Wis.—After a series of unsuccessful attempts at organizing a motorcycle club the riders of this city have gotten together in what is considered the first real Madison Motorcycle Club with a charter membership of thirty. M. J. Morressey was elected president. The other officers are: Vice-president, A. Koch; secretary, A. Pfahler; treasurer, D. Heick; road captain, E. Hanson; first lieutenant, S. Brockman; second lieutenant, V. German, and trustees, all of the motorcycle dealers of the city.

Goodfellowship will be the prevailing spirit of the new organization. Numerous sociability runs and cross country tours are being arranged for riders in the vicinity of Madison. The club is negotiating for club rooms to be opened in the near future.

### READY FOR RACINE TOUR

Racine, Wis.—Arrangements are being completed for the first annual Goodfellowship Tour to be held under the auspices of the Racine Motorcycle Club, July 4 and 5, to Lake Mills, Wis. The local club took an active part in the celebration in connection with the homecoming anniversary of its sister city, Kenosha. Nearly 100 riders of the city went to Kenosha to take part in the big parade. A big party of the boys rode to Milwaukee to see the first race meet in that city.

### REVISED WORCESTER TEAM SCORES

Worcester, Mass., June 26.—The scores of teams entered in the Worcester Endurance, as given last week by the official referee, have again been changed. The following are the revised team scores: Boston Henderson solo team, 4,000; Hendee Indian sidecar team, 3,990; Harley-Davidson solo team, 3,000; Worcester Indian solo team, 3,000; Providence Indian solo team, 3,000; Providence Indian sidecar team, 3,000; Harley-Davidson sidecar team, 2,987; Boston Excelsior team, 2,978; Worcester Excelsior team, 2,935; Detroit Henderson team, 1,994; Hendee India solo team, 1,974; Pope sidecar team, 1,000. The individual scores are now reported as being correct as they appeared in last week's issue.

### PARADE FOR BUFFALO M. C.

Buffalo, N. Y., June 25.—On Sunday night, July 11, the Buffalo M. C. will stage a mammoth motorcycle parade in Buffalo. Every rider in Buffalo and vicinity has been invited to decorate his mount and take part. The paraders will ride on a number of the principal downtown streets and then proceed to the Buffalo Velodrome races in a body.

### SPRINGFIELD'S DECISION

Springfield, Mass., June 30.—A fine point of law involving the perplexing question whether a bicycle to which is attached one of the new motor attachments, constitutes a motorcycle, occupied the attention of Inspector George H. Norris, Traffic Officer A. L. J. Letendre, and several other police officials yesterday, and was settled finally by Major A. F. Foote and Clerk of Court George Leonard, who opined that such an attachment would make a common bicycle a motorcycle and quoted a newly-enacted law to prove their point. The law reads as follows:

"The term motorcycle shall apply only to motor vehicles having only two wheels in contact with the ground, and a saddle on which the driver sits astride . . ." and as amended continues ". . . and to bicycles having a motor attached thereto a driving wheels, or wheels, in contact with the ground in addition to the bycycle itself."

# Our Canadian Letter

## McNeal on the Hop at Toronto

TORONTO, Ont.—The fastest racing ever witnessed in Canada was seen on the Toronto board track when J. A. McNeal of Omaha, riding an Excelsior, ran away from Brownie Carslake of Australia, in a special four-mile match race which was the feature of a big mixed meet on Saturday night, June 26. Incidentally, McNeal covered a mile in an exhibition trial in 38⅘ seconds, or at the rate of 95 9/10 miles per hour. Later, in a ten-mile handicap, McNeal, who started on scratch, reeled off the quarter-mile laps in 9⅕ seconds, or at 98 miles per hour. Carslake's eight-valve Indian could not be used on account of magneto trouble, and accordingly, McNeal had little difficulty in winning the two heats of the four-mile match in 2:45⅘ and 2:42 respectively. His victory was decidedly a popular one.

Art Spencer, the Canadian bicycle star, added another scalp to his string of great victories when he sprinted the whole way from scratch in a three-quarter-mile bicycle handicap and grabbed the lead about five feet from the tape. The crowd of 5,000 wildly enthusiastic spectators screamed with delight at Spencer's sterling performance. Bounsall, with a sixty-yard start, had a sleigh-ride behind Spencer and took second prize, while Wilson, starting at 150 yards, was a close third.

A sensational incident occurred when Henikman rode the last mile of the 5-mile invitation motorcycle race to victory with half of his handlebar broken off. Burtschaell of Atlanta, chased him hard but secured only second money. Time for the five miles, 3:33. Burtschaell turned the tables on his rival, however, by winning out in the ten-mile handicap in which McNeal did not finish on account of a broken chain.

George Wright, the king-pin of Canadian pace-followers, again demonstrated his extraordinary ability in the motor-pace bicycle race for the amateurs when he captured the two three-mile heats in 4:22 and 4:25⅕ from Norm Webster, the Riverside youngster.

His Worship Mayor Church was the starter of the match feature and George Kraemer, last year's manager of the track, was back again for the first time to superintend the motorcycle racing.

### KENNEDY GETS A MEDAL

Toronto, Ont.—According to an official announcement by the War Office, Corporal Bert Edgar Kennedy of the Divisional Signal Corps, First Canadian Contingent, has been awarded the Distinguished Conduct Medal for gallantry in action during the battle of Langemarck in France. Before the war, Kennedy was a motorcycle repairer employed in Toronto. It is understood, from private advices, that he earned the distinction by speeding on his motorcycle with important despatches under heavy fire.

### A GROUCH ON THE BENCH

Woodstock, Ont.—Magistrate Ball, head of the Woodstock police court, did all in his power to place a damper on future relay rides or cross-country races when he had Ernie McIntosh and Tommy Smith brought from Toronto under police guard to answer to the charge of exceeding the speed limit when they dashed through the town of Woodstock on the military relay ride across Ontario on June 5. Ernie McIntosh was treated like an ordinary criminal by being forced to spend the night in the cells. The fine, with costs, imposed on McIntosh amounted to $28, while Smith had to pay $13 altogether. The efforts of His Worship, Mayor Church of Toronto, to secure their release were unavailing and the riders are indignant over the unsportsmanlike attitude of Magistrate Ball.

### WHAT'S DOING IN MONTREAL

Montreal, Que.—Motorcycle enthusiasts of a number of Canadian cities are expected to make the trip to Saratoga Springs, N. Y., for the Motorcycle Rally, July 3-4-5, which has been arranged by MOTOR CYCLE ILLUSTRATED. A general invitation from J. A. Hall of Brooklyn, New York, State F. A. M. commissioner, to Canadian riders to attend the rally was published in Canadian papers with the result that a number are preparing to go. From Montreal, R. A. Radmore, M. Michaels, and others will make the tour, it is expected, while Ed Buffum, manager of the Canadian Hendee factory, Herb Kipp, the Indian rider, Fred Johnston, the C. M. A. official, and others, are planning to go.

Alderman Louis Rubenstein, for many years president of the Canadian Wheelmen's Association, appeared before the Board of Control here recently to press demands for the establishment of a motorcycle police squad to assist in the regulation of traffic on Montreal's crowded streets. Montreal, the largest city in Canada, has yet to see a motorcycle cop.

### TORONTO DEALERS PLAN PICNIC

Toronto, Ont.—The Toronto Motorcycle and Bicycle Dealers' Association have decided to hold a joint motorcycle and bicycle picnic at some convenient spot near the city within the next few weeks. The officers have also begun to make arangements for a big bicycle road race of twenty or thirty miles. This event will be unique in that handicaps will be arranged to enable cyclists without racing wheels and boy riders a chance to win. The type of bicycle to be used by an entrant will be considered in arranging the time allowances.

There are now over one hundred licensed racing bicyclists in Toronto, according to the register of the Canadian Wheelmen's Association.

### WINNIPEG RACES JULY 8

Winnipeg, Man.—Four hundred dollars in prize money will be distributed to the winners at the motorcycle race meet to be held on the Exhibition half-mile track in connection with Winnipeg's Patriotic Carnival during the first part of July. The motorcycle whirls are to be staged on July 8. A number of outside riders are to be brought here for the meet.

On Tuesday, July 6, a feature of the Carnival is to be a decorated motorcycle parade for which a number of prizes have been hung up. The riders will also be busy in other events during the joy-period.

About twenty members of the Winnipeg Motorcycle Club held their annual run to Selkirk on a recent Sunday. The riders halted at a convenient and secluded spot to enjoy forbidden fruit, namely a baseball game on the Sabbath.

### TRAINING FOR WAR SERVICE

The Vancouver Cycling Club has now become practically merged in the Vancouver Cycle Corps, organized by the government for home defence in case of war necessity. Although officially recognized by the Canadian Government, uniforms have not yet been supplied. The corps has an enrolment of forty, and the boys have riding drill twice weekly at the old drill hall on Richards street; N. C. O. drill is added once a week, with gun drill and outings on Sunday, when all the boys turn out.

### SARNIA BOYS ARE BUSY

Sarnia, Ont.—The members of the recently organized Sarnia Motorcycle Club decided to assist Major MacVicar, the local recruiting officer, by distributing the printed notices calling for men for the new 29th Battery, Canadian Field Artillery, in all parts of Lambton county, which constitutes his district. The riders dashed in every direction throughout the county and posted the notices in the prescribed places in less than a day. Without the motorcyclists' aid, it would have taken three or four days to do the same work.

### DOCTORS ENJOY RIDES

Washington, D. C., June 28.—There has been much excitement about the Casualty Hospital in this city for the past six weeks. A Washington motorcyclist had the misfortune to meet with an accident in which he received a broken leg, and became a patient in the Northeast "repair shop." Then followed busy times for the doctors in the institution. A never-ending succession of friends of the injured rider called on the patient each day, and soon the doctors discovered that the visiting riders were not at all averse to taking out a passenger on the tandem for a spin through the parks. One rider especially, whose machine is fitted with a sideseat, was a welcome visitor. With an interne on each side and the rider perched in the middle, this outfit furnished much welcome recreation to the hard-working hospital staff. One friend of the injured rider was so smitten with the charms of a nurse in the hospital that after a few brief weeks of courtship she resigned her position to enter the state of matrimony.

When the injured rider's broken leg had mended sufficiently he was removed from the hospital and taken to his home in a sidecar. Now the Casualty Hospital doctors are hoping that the next motorcycle accident case is brought to their institution.

### COURT BANS SPEEDING

Detroit, Mich.—Judge Connolly of Detroit, has issued an order to owners of motorcycles that speeding must be stopped. Last week six motorcyclists were brought before him. The court ordered their machines placed in the custody of one of the bailiffs for a month. In this connection, William E. Vanderveer, Harley-Davidson dealer in Detroit, says: "No dealer should encourage speeding or fast riding. On the other hand, we should discourage it, for every time a motorcyclist gets mixed up in an accident or is arrested for speeding, the motorcycle industry gets a black eye. People get in the habit of thinking that the only way a motorcycle can be ridden is fast."

### WHERE ALL FORMS OF TREAD WERE SHOWN IN PITTSBURGH

**Left Hand Window of United States Tire Branch in Pennsylvania City, with Different Patterns Exhibited on Machines as Well as Separate During National Cycle Week**

### MISS CREWE IN PORTO RICO

Ponce, P. R.—Miss Della Crewe, who is touring the world with her Harley-Davidson sidecar combination, arrived here a short time ago for a tour of the island of Porto Rico. She has already visited the cities of Guayama, Humacao and San Juan, as well as Mayaguez, and will take boat to Jamaica, British West Indies, for a tour of that island. She expects to cover the entire West Indies, with the possible exception of Hayti, owing to the disturbances in the latter country.

Miss Crewe is enthusiastic over her tour in Porto Rico, especially as regards the growing interest in motorcycles and touring. She relates different experiences in the hills, in which the climbing abilities of her combination were commented upon by automobilists with much admiration.

### TRI-COLOR SCHEME ATTRACTED AT SIOUX CITY, IOWA

**Red, White and Blue Decorations Formed Effective Background for United States Tire Products in Local Branch Show Window During National Motorcycle Week**

### LIGHTING RULES IN JACKSON

Jackson, Mich.—This city has a new traffic ordinance which became effective June 18. Lights on motorcycles must be kept burning in front and rear during the time city lights an streets are required to be lighted. Motorcycles left standing must have rear lights burning when street lights are required to be lighted; and the same applies to bicycles.

### STATE NOW SUPPLIES TAGS

Pueblo, Colo.—Owing to the fact that motorcycle riders have in the past been obliged to furnish their own license tags, after paying an annual fee of two dollars, it has been found that the diversity in the tags displayed has caused no end of confusion. This year the state is supplying the tags and distributing them through the county clerks. It is now an offense for riders to show any tag but those furnished by the state, and arrests will be made for all violations.

### 3 PERFECT IN PORTSMOUTH RUN

Portsmouth, N. H.—Returns from the recent endurance run of the Portsmouth Motorcycle Club, indicate that there are three who scored perfect, out of eight contestants. The holders of the perfect scores are: H. W. Call, Thor; A. N. Page, Indian, and E. Gorman, Excelsior.

## DISPLAY THAT DREW CROWDS IN DETROIT DURING CYCLE WEEK

**Show Window of United States Tire Company's Branch in Motor Metropolis During National Sales Week—Four Different Makes of Machines Were Represented**

### READING RUN TO MT. HOPE

Reading, Pa., June 26.—About forty-two motorcyclists took part in the run staged by the local club last Sunday to Mt. Hope, Pa. They covered the three counties of Berks, Lebanon and Lancaster. The roads in all of the counties were found in good condition, except a stretch of highway between Schaefferstown and Cornwall, which was covered with gravel. All of the riders succeeded in climbing the mountain slope to Hull's tavern, where dinner was served. Captain Rhodes, of the Reading M. C., is getting the members together for a run to Baltimore and return on July 4.

### DETROIT USES 30 MACHINES

Detroit, Mich.—The taxpayers of Detroit are mighty good to their public servants. They have purchased and turned over to them no less than 30 motorcycles, which are used by the waterworks, department of public works, public lighting commission and police departments.

### MOTORCYCLE BANDITS ACTIVE

Cleveland, O., June 26.—Five hold-ups, one private house burglary and robberies at three business places are laid to motorcycle bandits who operated on the West Side late Thursday night and early Friday morning of this week. The men are reported as riding two machines fitted with tandem attachments. Part of their loot was motion picture films of $1,000 value. At the present writing the police have not run down the bandits.

### DALLAS SOCIAL RUN

Dallas, Tex., June 26.—Twenty-five couples of motorcyclists, of this city, participated in a sociability run on Sunday, June 20, from Dallas to Ft. Worth and Cleburne, returning home in moonlight on Sunday night, after having covered two hundred miles. The party was headed by Leslie Lincoln, Excelsior demonstrator of the Charles Ott agency, while William Gillette, Harley-Davidson demonstrator, brought up the rear as trouble scout.

### THE "KINK" SAYS "HOWDY!"

Old King Paduke on his marble pedestal in the public square at Paducah, Kentucky, the town which was named for the ancient Indian chieftain, looked down the other day with amazement as the first cop ever to be commissioned a motorcycle emissary rode off on a machine from the Hendee factory. "And they call that an Indian!" he was heard to remark to himself. He did not know at first whether to be wholly pleased at having one of a later generation near his throne, but reflected that "the times do move," and concluded to give his official sanction.

### PURINTON IS OPTIMISTIC

Detroit, Mich.—H. D. Purinton, of the W. E. Metzger Co., Indian agents, says: "We hope to sell over 300 motorcycles this year. We are making more sales than we did at this time last year, but the cash is hard to get right now. It isn't because Detroit people haven't the money. They have lots of it. The savings deposits at banks were never greater. The difficulty is that young men are buying homes and trying to get them paid for as fast as possible. They take their time about the other things which they buy.

"Bicycle business is big—much better than last year. We sell 100 ladies' wheels every year. In fact, our store has always been popular with the ladies, as we have made it a point to take special pains in selling them. We find that there isn't a man with money who won't let his boy have a bicycle."

## SMALL MOTOR SQUAD MAKES GOOD SHOWING

PROBABLY the most thankless job in motorcycling, yet one which carries great responsibility, is that of deputy sheriff in a county that harbors a metropolitan city. Take the county of Milwaukee, Wis., for example. The sheriff makes his headquarters in the county jail in the heart of the city of Milwaukee. There are six members to the sheriff's motorcycle squad which has for its special duty the enforcement of speed and traffic laws in the county.

Most of the violations of the law occur on the roads leading out of the city. There are thirteen important highways that need watching so it can be seen that the sheriff's little half dozen minute men have some task set out for them.

The motorcycle squad is in charge of Under Sheriff Alfred Loose, and his instructions to his men are to chase every speeder on the county roads even though it be necessary to follow him to the state line.

So great has been the success of the motorcycle squad in the sheriff's office that the county board has authorized the purchase of two more motorcycles. The members of the squad are on duty from 5 a. m. to 6 p. m. with one working on a night shift, from 11 p. m. to 4 a. m.

"AERIO"

Prevents Fatigue

A constant jarring and jolting at the base of the spine exhausts vital energy and soon produces fatigue. Haven't you noticed when riding that soon you became tired much sooner than you thought possible? The incessant shocks are responsible.

"Aerio" Absorbs All Recoil

The rollers act on the adjustable leaf spring with a freedom which does not allow even the slightest jar or stiffness of action. As you will readily see by the line drawing, they also shorten and thereby stiffen the spring according to the severity of the shock. In a like manner, they curb that back breaking recoil, for, as you know, all springs rebound to the normal position altogether too quickly for comfort.

"Aerio" also gives you a lower saddle position.

"Aerio" nickel plated and highly polished $10.00

Get This Horn

$5.00

It blows low or loud with a musical sound like a pipe organ. Clears the road but does not frighten. No up-keep cost. Cannot clog. Nothing to wear out. Easy to put on. Guaranteed. See your dealer. Folder on request.

THE FULTON CO.
722-724 National Ave. Milwaukee, Wis.

The AERMORE Exhaust Horn

*More Mileage and Less Tire Trouble*

# PEERLESS

ROAD KING MOTORCYCLE TIRES

By actual comparison the PEERLESS has the heaviest, thickest, longest-wearing tread of any motorcycle tire made. This accounts for its extraordinary long mileage and freedom from tire trouble.

We have handled tires for a great many years and know what the motorcycle requires.

Note the safety tread. The clean-cut studs grip the road and "stop the skid before it starts."

Write for our big new catalog.

HUB CYCLE CO., 14 Portland St. Boston, Mass.

Berling The Big Little Magneto

You can be sure of the utmost power and speed if you insist that your motorcycle be equipped with a

Berling Magneto

FULL SPARK ON RETARD.

*Write for free illustrated Booklet*

Ericsson Manufacturing Co.
1115 Military Road Buffalo, N. Y.

# Jones Valve Wings

are to take the place of the ordinary hexagonal nut furnished on the valve stem of motorcycle tires. The two wings make it easy for the rider to lock the valve stem firmly in place with his fingers, instead of using a monkey wrench or pliers. Should the nut become rounded the tools are practically useless.

## Time Savers

They aid in pulling or pushing the valve through the rim. A convenience that will not be overlooked by the veteran motorcyclist. Riders are always losing valve nuts. Are you prepared to furnish them with a real convenience. "The Jones Valve Wing"? They are fastened on cards (24 wings to the card) which are specially made for counter display.

*Order from your Jobber or write to*

JONES & NOYES, 227-29-31 W. Austin Ave. CHICAGO.

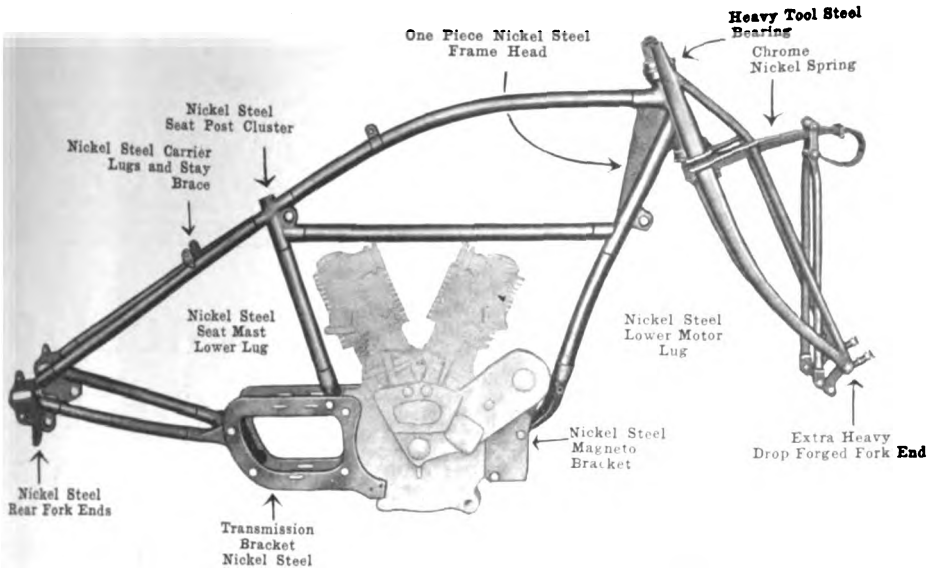
# The Seat of Power



The effective strength of any motor, no matter how great the power developed thereby, is absolutely dependent upon the stability of its foundation and the perfect alignment of the transmitting mechanism.

When we perfected the Model 15 "X" Motor, we immediately developed a frame of enormous strength to prevent springing or disalignment of the transmitting mechanism and to meet the terrific strain to which a motorcycle of such power and speed would be subjected and insure not only perfect power transmission but the life and safety of the rider.

To do this, we built a frame of Nickel Steel Drop Forgings and the best Heavy Gauge Seamless Nickel Steel Tubing throughout.

## HERE ARE THE DETAILS:

HEAD. A one piece nickel steel drop forging providing connection for the upper, middle and lower frame tubes with a vertical web that gives the greatest possible strength.

SEAT POST CLUSTER. A one piece nickel steel drop forging engaging the upper and middle frame tubes, seat mast and rear stays.

REAR FORK ENDS. One piece nickel steel drop forgings comprising axle slot, carrier and stand lugs.

REAR STAY BRACE. Nickel steel drop forging with lugs for carrier.

MOTOR AND TRANSMISSION BRACKETS. Heavy pressed nickel steel plates.

SIDE CAR CONNECTIONS. An integral part of the head, seat cluster and rear end forgings. The only mechanically correct method of side car attachment, eliminating cumbersome and unreliable fittings.

FRONT FORK. The familiar EXCELSIOR cradle spring fork with extension fork sides, heavy nickel steel drop forged crown, extra heavy nickel steel fork ends. Five leaf Chrome Nickel steel springs, and three-point handle bar connection.

HEAD BEARINGS. Extra heavy, tool steel, turned from bar stock, flush type. Cups pressed into seats in head forging.

Such a frame means 100% efficiency and absolute safety, a point of such vital importance that you cannot afford to buy a motorcycle without first carefully studying and testing the frame construction.

Compare the EXCELSIOR frame with any other ever built or get the opinion of experienced engineers. They will tell you the EXCELSIOR frame stands pre-eminent as the strongest motorcycle ever built, and you can see for yourself that this strength is coupled with handsome appearance and graceful lines.

It is just one of the many details of

# A CLEAN-UP

## FOR SCHEBLER CARBURETERS

### AT DODGE CITY

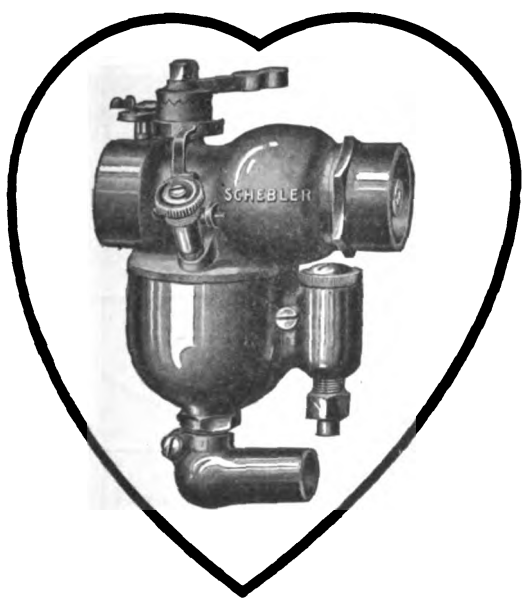
**All Six Prize-Winners Rode Machines Equipped With Scheblers, and Never Has A Motorcycle Carbureter Given A Better Account of Itself.**

## ALL 300-MILE RECORDS SMASHED

FIRST — Walker, Harley-Davidson, Schebler equipped; time, 3:55:45.

SECOND — Harry Crandall, Harley-Davidson, Schebler equipped; time, 3:58:29.

THIRD — Carl Goudy, Excelsior, Schebler equipped; time, 4:07:02.



FOURTH — Joe Wolter, Harley-Davidson, Schebler equipped; time, 4:07:30.

FIFTH — "Red" Parkhurst, Harley-Davidson, Schebler equipped; time, 4:07:39.

SIXTH — Al Stratton, Harley Davidson, Schebler equipped; time, 4:11:05.

## WINNER'S AVERAGE SPEED, MORE THAN SEVENTY-SIX MILES AN HOUR

**This is easily the most overwhelming victory ever won in a motorcycle race, and it proves beyond all question the vast superiority of the Schebler carbureter, the carbureter for all uses — always absolutely dependable.**

**Have a Schebler on your machine — the best of all trouble cures.**

## WHEELER & SCHEBLER

## A *Tested* Guarantee

Every Goodyear Bicycle Tire is inspected eight times before it leaves our factory.

It is filled with air and kept under observation for one whole week.

That's why they are really guaranteed for material and workmanship. Should any fail the dealer makes good to the owner and we make good to the dealer.

But such adjustments are rarely known. We make *sure* the tire is right from the start.

We believe no other maker uses the caution that we do to give you a perfect tire.

# Dealers—
# Why Postpone?

Competition in the bicycle business is keen today. Success and profits come to dealers who apply the greatest selling pressure.

Make every bicycle you sell bring you in new customers. Most bicycles now are well built. They entice trade on appearances.

The test is in the *tires*. Poor tires make the best bike helpless.

Keep your bicycles and customers "sold." See that the machines you sell give continuous pleasure. That will bring you new business quicker than anything we know of.

Tires almost ruined the bicycle business once. But they never will again.

Goodyear-Akron Bicycle Tires now stand at the top—in mileage, comfort and reliability. They have made the bicycle *safe and sure* for business, distance, or for pleasure.

136,082,830 Goodyear-Akron Bicycle Tire advertisements are being published this year in the great magazines and papers. People now know of this new tire sensation.

Think of what such publicity must do for dealers who follow up the advantage.

# United States Motorcycle Tires

# ALWAYS WIN

## In Long Endurance Runs and Road Races

Joe Wolter, on a Harley-Davidson, equipped with United States Tires, won the 200-mile race at La Grande, Oregon, June 17th, *without a tire change.* Time: 3:36:58. This is perhaps the most wonderful record ever made by any motorcycle tire, as the entire distance of the course is an ordinary country road. It is conceded to be the roughest road over which a meet of this kind was ever held.

Jim Davis broke the World's 100-Mile Dirt Track Record with an Indian, equipped with United States Tires, at Detroit, June 13th. Time: 88:06 2/5.

# Walker Wins Dodge City Triple-Century at Pace That Sets New Records

First Actual Photograph of the Dodge City Classic; Excelsior Riders Opening Up on Getting Flag from Referee Donovan's Automobile (at Left) Which Led Field for Flying Start. Indian Riders Headed by Perry Just About to Cross Tape

DODGE CITY, Kan., July 3.—Flattened against the broad tank of his Harley-Davidson and blarneying every last bit of "pep" out of the motor which purred him consistently from the start, Otto Walker, Los Angeles laurel-browed from a dozen brilliant wins in fast company, carried off the 300-mile speedway race here today. His time was 3:55:45.

Ray Crandall, astride another Harley-Davidson, finished good second, his time being 3:58:29. Then came Goudy and his Excelsior. Goudy was the only contender to break into the continuous performance, which seemingly had been arranged for the first seven places for the Harley-Davidson camp. He finished third—and behind him came four more representatives of the Milwaukee factory.

### Times Made by the Others

The Excelsior reeled off the triple century in fourth place, Joe Wolter, Harley-Davidson, chased him across the tape in 4:08:30. Fifth place went to Leslie Parkhurst, Harley-Davidson, in 4:08:39, and Al Grant, hunting another Gray Fellow, went over the line in 4:09:10. Ralph Cooper, also hailing from the Harley camp, was in seventh place.

These are the cold facts as set forth in the official returns, but in plain justice it should be stated at this juncture that Morty Graves and his Indian deserve a share of the limelight, which is now being turned upon the winners. Graves was leading the field and getting over the ground in a manner to shame the far-famed jackrabbit until his gasoline tank burst its seams in the 150th lap—the final dash for the tape—and left him out of the running. Graves had only about one mile to ride when the trouble occurred.

### With a Rolling Start

Twenty-nine riders, the pick of the various racing camps, went off to a rolling start at 11:30 a. m., when Competition Chairman John L. Donovan, of the F. A. M., led them around the track in an automobile. They made one circuit of the two-mile speedway in this fashion, and then flashed across the tape on the triple-century journey. The weather conditions had been threatening, but today they were well-nigh ideal, and it was freely predicted that more than one record would fall before the volleying motors of the speed squad. Nor did this prediction fail.

Taylor and his Indian showed the way on the opening lap, but on the second circuit of the course Don Johns jockeyed his Cyclone into first place, with Taylor running second. The third lap found Johns still setting the

Harry Crandall, Second

Carl Goudy, Third

pace, with Taylor second and Glen Stokes, Excelsior in third place. At this stage Clarence Johnson, Indian, who had dropped his goggles and been delayed at the start got back into the running and made a game effort to cut down the handicap of three laps.

**Johns Stops for Fuel and Oil**

Johns continued to show the way and his performance was of championship caliber all the way to the sixteenth lap, when he made a stop for gasoline and oil. In the fourth and fifth laps Taylor struggled gamely to inch up on the flying Indian rider, but did not succeed in doing more than catching up with his rear wheel. There he hung with bull-dog tenacity.

Don Klark, of the Indian camp, stopped at the pits in the eighth lap, and "Speck" Warner, also mounting an Indian, had been retired in the third lap with a broken valve-lift. Roy Good, Indian, was halted by a fouled spark plug in the seventh lap. Taylor gradually fell off in his pace at this stage of the race and Glen Stokes began to trail Johns in second place, with Bob Perry, Excelsior, riding third.

When Don Johns stopped to replenish his tanks in the 16th lap Stokes was left in the lead with Perry not far in his rear. Perry jumped into the lead in the 18th lap, but gave way to Stokes again in the 19th. Don Johns had returned to the fray and was making a desperate effort to cut down the handicap of six laps which he had to put up with as a result of his stop for fuel. Johns' work was nothing short of spectacular and it was generally understood that he was gaiting himself for a new 100-mile record.

**Bob Perry in the Lead**

The 22d lap found Bob Perry in the lead, with the first division speed-boys all going great guns in an effort to get a jump on

# Record-Chasers and Trade Boosters As They Appeared On the Dodge City Firing Line

**At Top, the Cyclone Team, with Chairman Donovan at the Right. Second Picture, the Score Board, Where All Eyes Were Focused to See the Riders' Progress. Third Picture, Harry Crandall and Otto Walker Just Before the Start of the Race. Fourth Picture, the United States Tire Representatives**

the field. Stokes was in second place and well up in the 22d and in the next lap he again wrested the premier position from Perry. At this juncture Don Johns and his Cyclone whirled into first place again, and the 24th lap found him setting a terrific pace and looking for all the world like a winner. Perry was second, Stokes third and Carl Goudy fourth. Johns held his position in the 25th lap and was still showing the way in the 29th circuit when Bob Perry stopped to change a tire.

Clymer, of the Excelsior squad, had dropped out, and Sargent, of the Indian camp, made a stop for oil and gas in the 25th lap. The 23rd lap put Pineau, the Merkelite, out of the running with a broken piston.

Johns had not been displaced as leader in the 35th lap, and Stokes was still in second place with Goudy third and Taylor fourth. Morty Graves had come up into fifth place and was giving promise of great things. Goudy was in front in the 40th lap, with Taylor second and this order was maintained for several circuits.

### Thought Scorers Had Dropped a Lap

It was argued in some quarters that the scorers had not kept up with Johns while he was hitting up his best pace in the earlier laps, and that he was really entitled to one lap more than the scoreboard showed. Some of the fans continued to regard him as the leader as late as the 40th lap. Harry Glenn, Indian, had stopped in the 34th lap for oil and gas, and Good, Indian, was delayed with carbureter trouble. Don Johns stopped again for gasoline and oil in the 41st lap.

The best time for the hundred miles was made by Carl Goudy, Excelsior. He was clocked at 1:14:10, which was officially regarded as a new dirt track record for the distance. Competition Chairman Donovan announced that the distance covered by Goudy in the first hour was 80 miles. For setting the new record Goudy won a special prize of $100 in addition to the prize of $150 which he carried off for finishing in third place.

It was the 45th lap that left Don Johns high and dry. The gas tank of his Cyclone was damaged and he was forced to quit. Dave Kenny, the other Cyclone entrant, had been eliminated with a broken frame earlier in the race. Carl Goudy continued to ride consistently until the 55th lap when he was forced to change a tire.

### Glen Boyd Makes a Jump

Glen Boyd got a hop out of his mount in the 57th that enabled him to assume the lead. Graves was in second place and Harry Crandall had brought his Harley-Davidson mount into third position. At this time Otto Walker was riding fourth and Joe Wolter was trailing him.

Lee Taylor tried his hand at pushing in the 49th lap when a leaky tank caused him to run short of gas unexpectedly. He trundled his machine up to the pits. The 48th lap was featured by a blaze in which Patterson's Flying Merkel was destroyed. At this point in the big grind the following had been eliminated: Pineau, Patterson, Clymer, Don Johns, "Speck" Warner, Casner and Dave Kenny.

"Slivers" Boyd set the pace for the boys for a time after the 60-mile mark had been passed. Morty Graves was well up at the

### DODGE CITY PERSONALS

John Donovan, chairman of the F. A. M. competition committee, was on the job to see that everything was being run according to rules. Donovan tried his best to have this race run off without any arguments springing up later and it looks as if he had succeeded.

Although there were no accidents during the race, there surely was enough of them before. Frank Rodger, publicity manager of Harley-Davidson, took a big chunk of flesh out of his heel while riding out to the track on a tandem by getting it caught in the spokes. Glen Stokes sprained his ankle during practice several days before the race and was carried to town to be fixed up by the doctor. He bought some crutches but when he thought of the prize money, away went the crutches and Stokes was in the race. No one dreamed that he was riding with a sprained ankle.

The first party to congratulate Frank Rodger on the winning of the race was no other than Frank Weschler of the Hendee Manufacturing Company, which certainly shows the true sportsmanship in the motorcycle industry. Others of the Hendee company present were: Howard O'Brien, from the factory; Al Crocker, manager of the Kansas City branch; Seidell and Strong, also of the Kansas City branch.

The Goodyear Tire Company were to have a lot of souvenirs at the track but Falor received a wire that they were shipped to Dodge City, Iowa. As there is no such city there were no souvenirs to distribute.

In the elimination trials Dave Kennie made the fastest lap, doing the trick in 1:22, but this was beaten by Don Johns, also on a Cyclone in the race itself, Don doing it in 1:20 or at 90 miles per hour.

Among the dealers who were present were E. B. Sauffley, Excelsior distributor at Kansas City; Walter Whiting, Harley-Davidson distributor at Denver, and Ed. Mead, Excelsior distributor at Denver. O. K. Newby, Merkel distributor at Kansas City, was also there and was very active in the pits. C. B. Hull, Pope traveler, was very much in evidence with his camera.

Donovan stated that the Chicago Speedway Corporation has offered to put on a Motorcycle race and the prize money to be $5,000.

### NEW ATTORNEY

Washington, D. C., July 5.—Confirmation of the appointment of J. S. G. Gallagher as F. A. M. attorney for this city has just been received from Chairman Johnson of the Legal Action Committee. Mr. Gallagher is a young attorney who recently began practice in Washington, and is just the type of lawyer recommended by Chairman Johnson on a recent visit to this city.

*ET—Eastern Time; CT—Central Time; MT—Mountain Time; PT—Pacific Time.

## IMPORTANT

After this issue had gone to press, Chairman Donovan wired that the special rider from Washington would leave that city at 10 A. M. instead of 6 A. M., on Monday, July 19th, so that President Wilson could personally give the message. As a result of this change, four hours should be added to the time given in the above schedule. Chapple will reach New York at 4:30 P. M. Buffalo will be reached at 4:15 A. M. Tuesday, Victor at 7:15 A. M. Wednesday, Cheyenne at 7:15 A. M. Thursday, Kelton at 4:45 A. M. Friday, and San Francisco at 5 A. M. Saturday.

### DISCUSSING RELAY IN PHILADELPHIA

Philadelphia, Pa.—Chris Feiler, Flying Merkel agent, and John Daniels, Baltimore, Henderson agent, are working together on plans for the second and third parts of the great transcontinental motorcycle relay dispatch. Both will try to have the speed laws of the sections through which they are to travel temporarily suspended. Daniels will enter Philadelphia accompanied by Herbert Gibbs and another man to be furnished by the factory. Arthur Chapple, who will ride the Flying Merkel out of Philadelphia, will be accompanied by I. Dick and Robert Kennet. It is thought that the best plan would be to exchange the dispatch at the City Hall. Dick says the trip can be made to Trenton in 35 minutes. Daniels made a trial trip from Baltimore to this city last Sunday, leaving the center of the city and arriving at 15th street and Girard avenue here, in three hours and fifty minutes. As this time can be beaten, it is not at all unlikely that the start from Philadelphia will be made at 5 o'clock p. m., July 18.

# SHORT GRASSERS HIT THE TRAIL

## Small Party Leaves Dodge City But Delegations Will Be Picked Up Along the Route

DODGE CITY, Kan., July 4.—Heavy rains delayed the start of the annual Short Grass tour until 2:30 this afternoon, but enthusiasm was not lacking when the riders finally got under way. Dr. B. J. Patterson, in the official pilot car, led the tourists out of Dodge city and predicted that with clear weather the party would soon reach the proportions of those which have made Short Grass journeys such marked successes in the past. Moving pictures were taken as the party left Dodge City. There were twenty-five riders in line. First stop—Garden City.

Las Animas, Colo.—The Short Grass tourists reached Deerfield, Kan., Sunday night at 8 p. m. after covering 80 miles in six hours. Numerous delays were caused by the bad road conditions. In some places the highways were being repaired and in others they were full of chuck-holes.

The start on the second day from Deerfield was made at 7 a. m. A. M. Huttons and Miss Inez Patterson, riding two-speed Indians, broke down en route and shipped their mounts to Las Animas. The tourists had dinner at Holly, the first "wet" spot discovered in Colorado, and then raced fifteen miles with a storm near Hasty.

Anderson went out at Syracuse owing to the fact that his sidecar connections were damaged, but has made arrangements to rejoin the party here. An irrigation ditch gave way near Holly, and the riders were forced to make a tedious detour through heavy sand.

The tourists leave Las Animas at 8 a. m. tomorrow. They will enjoy a cherry pie dinner at Manzanola and make the night stop at Pueblo.

# F. A. M. ASSEMBLY FOR WISCONSIN

## Commissioner Lantry Plans First State Convention for Milwaukee, July 31-August 1

MILWAUKEE, Wis., July 4.—In the effort to boost the F. A. M. in Wisconsin and place the national organization in position throughout the State where it will better protect the interests of every member, J. J. Lantry, newly appointed State Commissioner, is arranging for the first Wisconsin F. A. M. assembly to be held July 31 and August 1 in Milwaukee. The Milwaukee M. C. is co-operating with him to this end.

"Wisconsin is a rich motorcycle community and can be made productive of great things for the betterment of the sport f motorcycling if it were only organized," said Commissioner Lantry to the **Motor Cycle Illustrated** representative. "When I stepped into office as State Commissioner I was amazed to note the manner in which the F. A. M. is losing its membership and its standing in the State.

"If Wisconsin is a criterion it can easily be seen why the F. A. M. does not grow. Local work is not pushed strongly enough. Now that Milwaukee has a good strong and live club we have the nucleus for a fine State organization that will awaken interest in the F. A. M. and be an influence for good through the whole country."

Mr. Lantry, Arthur Davidson, August Schneider and Lacy Colius, together with the officers of the club have been appointed a committee to promote the first State convention. The tentative program makes Saturday morning, July 31, the time for registration of out-of-town delegates at the club house, Thirty-fifth and Wells street.

In the afternoon the first business session will be held. Permanent organization will be effected first and it is probable that State Commissioner Lantry will have the honor of serving as the first head of the new Wisconsin F. A. M. At the opening meeting, as many county commissioners as is practicable will be chosen.

Saturday evening has been set aside for a monster reception in the local club rooms. The committee has for its greatest work the solution of a possible encampment plan to allow the out-of-town visitors to have the use of tents, and if the plans can be worked out the committee will also see that meals are served to the out-of-towners during their stay at the meeting.

On Sunday morning there will be another short business session to finish up the details of the State organization and then the gathering will be lined up for a panorama picture. In the afternoon the visitors will be the guests of the Milwaukee club at its second race meet on the State fair grounds.

### MOONLIGHT RIDE FOR READINGITES

Reading, Pa.—Led by Captain Alfred Dunkle, the Reading M. C. of this city to the number of 30 rode to Mohrsville and return on June 27, by moonlight. A supper was served at the hotel in Mohrsville.

# In the Racing Realm

## Baltimore, Md.

GEORGE GEBHARDT, Excelsior, carried off the two-mile and five-mile pro. events on the card at the Gentlemen's Driving Park on July 5, the races being held under the auspices of the Maryland M. C. His times were 2:36 and 6:29⅘, respectively. Frank Chenowith, Harley-Davidson, won the two-mile amateur event in 3:55⅗. The sidecar race, for two miles, was run in heats, the first being won by Carey Mears, Indian, and the second by Gus Heinz, Harley-Davidson. In the final, Heinz won over Mears in 2:59. Following are the summaries:

Two-Mile Amateur Race—Frank Chenowith, Harley-Davidson, first; Millard Taylor, Flying Merkel, second. Time, 3:55⅗.

Five-Mile Professional Race—George Gebhardt, Excelsior, first; Carey Mears, Indian, second. Time, 6:29⅘.

Two-Mile Pofessional Race — Gebhardt, first; Mears, second. Time, 2:36.

Two-Mile Sidecar Race—First Heat—Carey Mears, Indian, first. Time, 3:02⅗. Second Heat—Gus Heinz, Harley-Davidson, first. Time, 3:04⅘. Final Heat—Heinz, first; Mears, second. Time, 2:59.

Two-Mile Moto-Bike Race—Clayton Sandruck and Millard Taylor tied. In the half-mile run-off, Sandruck won by a close margin in 1:02⅗.

The race meet was preceded by a parade through the streets of Baltimore, over 200 machines being in line. The tandem-seated and side-seated rigs were occupied by members of the fair sex, who were specially costumed for the occasion. The parade finally reached the Driving Park, where the meet was held.

Delagations from Harrisburg and Philadelphia, Pa., from Wilmington, Del., and Frederick and Hagerstown, Md., were in line. George W. Goggins was in charge of the parade.

Winners in the various classes in the parade were: Miss Theresa Lowrey for being the prettiest girl in line; Dick Dougherty, Joe. Hannibal and Edward McDonald, as negroes, for forming the most comical group; Mr. and Mrs. Howard Toomey for the best decorated machine; Mr. and Mrs. Charles Herring, as George and Martha Washington, for the best character costumes. The Hagerstown contingent carried off the prize for the most members in line, there being 54 from that city present.

## Galesburg, Ill.

JOE WOLTER and Bill Brier, both on Harley-Davidsons, took first and second places in the hundred-mile feature event on July 5 in this city. Wolter's time was 97:03⅗. George Filker, Indian, of Farmington, Ill., came third and Lewis Hadfield, Harley-Davidson, of Milwaukee, was fourth.

Carl Goudy, Excelsior, see-sawed with Bob Perry, Excelsior, for the lead up to the 57th mile, but had to drop out at the finish of that distance. Perry retained the lead for two miles more, with Brier coming on faster and faster, but mechanical trouble forced the Excelsiorite to then retire, leaving the contest for first place to Brier and Joe Wolter. Brier lost two laps by tire trouble with some ten miles to go, and Wolter finished first, with Brier a close second.

In the ten-mile race Goudy had an easy victory. Perry took second place and Brier third. The time was 9:08⅗. The five-mile novice went to Kenneth Albert, Indian, of Galesburg, with Leo Masters, Indian, Burlington, second, and Edwin Johnson, Galesburg, Thor, third. The races were refereed by Commissioner Yates, of Illinois, with Competition Committee Chairman Donovan as starter. A record crowd of 8,000 witnessed the races.

## Philadelphia, Pa.

PHILADELPHIA, Pa., July 5.—The track record of the Belmont Driving Park was reduced during one of the most exciting race meets ever held in this city, last Saturday, July 3. The meet was run by the Philadelphia Motorcycle Trades Association and was the first held by that organization since its formation some few months ago.

Hollenbach, on his Pope, did some of his finest work, and nearly won first place in three events. He took first place in the ten-mile professional event, reducing the track record for the ten miles to 8:4 sec. flat

The ten-mile amateur was hard fought and was won by Jack Mullen, on an Indian. He was protested on some technicality but later had the protest withdrawn. The time here was 9:59 seconds.

**Jack Mullen Receiving First Prize from Goodyear Representative in Ten-Mile Amateur Race**

The fifteen-mile professional proved exciting and was won by Klebes Indian. Hollenbach was doing good work until he broke his rocker arm and quit. There were but two entries in the five-mile amateur sidecar event, both being Harley-Davidsons.

Griffith, on an Indian, won the second ten-mile professional race, while J. Keenan, Harley-Davidson, finished second, followed by J. L. Miller, Excelsior, who was lapped once by Griffith. The twenty-five mile professional event proved the most thrilling feature. It was one of the hardest fought event ever contested at Belmont, and kept the grandstand on edge throughout. Klebes, Indian, and Hollenbach, Pope, were alternately leading, while the latter had mechanical trouble and quit. Klebes won, while Craddock, Harley-Davidson, was second. The summaries:

5-mile novice: Besock Bessinger, Harley-Davidson; second, Ernest DeSimone, Indian. Time 5:14 3-5 sec.

10-mile professional stripped stock: won by E. T. Hollenbach, Pope; second, Harry Klebes, Indian; third, John Empfield, Excelsior; fourth, Herbert Banks, Indian. Time 8:4 sec. flat.

10-mile amateur: won by Jack Mullen, Indian; second, Besock Bessinger, Harley-Davidson; third, John Muntz, Indian. Time, 9:59 sec. flat.

15-mile professional: won by Harry Klebes, Indian; second, Herbert Banks, Indian; third, John Empfield, Excelsior. Time 13:12 2-5 sec.

5-mile amateur sidecar: won by John Seifert, Harley-Davidson; second, Paul Tyson, Harley-Davidson. Time 6:1 sec. flat.

5-mile amateur bucket seats: won by J. Kaiser, Excelsior; second, William Armstrong, Excelsior. Time 6:31 sec. flat.

10-mile professional: won by Nathan Griffith, Indian; second, J. Keenan, Harley-Davidson; third, J. L. Miller, Excelsior. Time 9:13 sec. flat.

25-mile professional: won by Harry Klebes, Indian; second, Frank S. Craddock, Harley-Davidson; third, John Empfield, Excelsior; fourth, J. L. Miller, Excelsior. Time 22:38 sec. flat.

## Springfield, O.

WILKINS, on his Harley-Davidson, took the lion's share of the winnings in the meet held in this city on July 5. He came first in the five mile open, the three and the ten mile professional, as well as carrying off the West Side Motorcycle championship, and taking second place in the twenty-five mile and ten mile events. Forbes, on a Pope won the long distance race, while Remetter, Excelsior, came first in the ten

### July 4 Results at Columbus

... Davis, the Columbus rider who re... jumped into the limelight by winning ... mile race at Detroit in record time, ... shining light at the July 4 racing at the Columbus Driving Park meet. He won every race in which he was entered and in the five-mile consolation loaned his machine to Walker, who came in first.

The feature of the first day's racing was the hour race, which was won by Davis in the record distance of 67¾ miles. He was followed by Myers on an Indian, who was second with 66¼ miles to his credit. Miller, Indian, was third with 57 miles. Davis took the lead from the start and held it. Morrison was second for a time, but he dropped back and the second position was taken by Myers, who held it. For the final twenty minutes Davis was approximately one and a half miles ahead of Myers. Summary for July 4 events:

Five-Mile Professional (Open)—Davis, Indian, first; Myers, Indian, second, and Sims, Harley-Davidson, third. Time, 4:25⅘.

Two-Mile Match Race—Davis, Indian, first; Myers, Indian, second and Morrison, Excelsior, third. Time, 1:44.

Ten-Mile Stripped Stock—Davis, Indian, first; Sims, Harley-Davidson, second; Miller, Indian, third, and Kemp, Indian, fourth. Time, 9:04⅘.

Ten-Mile Professional (Open)—Davis, Indian, first; Morrison, Excelsior, second, and Suduth, Excelsior, third. Time, 8:50⅘.

Five-Mile Consolation—Walker, Indian, first; Phillips, Indian, second; Woodland, Pope, third, Time, 4:31⅗.

One-Hour Race—Davis, Indian, first, 67¾ miles; Myers, Indian, second, 66¼ miles; Miller, Indian, third, 57 miles.

## San Angelo, Tex.

BAILEY and Bishop, Harley-Davidson riders, took first honors on July 5 in the races in this city. Bailey captured the fifty mile pro. in 48:20⅘, while Bishop was victor in the ten-mile amateur race, his time being 9:21. There were nine starters in the long pro. event and seven in the amateur race.

Smith on an Indian was a close second in the pro. event, while Falbre, Harley-Davidson and Murray on a machine of the same make took third and fourth places. Second to Bishop in the amateur event came Murray with Falbre third, this making it one-two-three for the Silent Gray fellows. A large crowd viewed the two races.

## Algona, Iowa

J. NICHOLS, on his Harley-Davidson, carried off the ten and the 15-mile races held in this city on July 3, while A. Dehnert, Indian, took the 20-mile flying start event. Dehnert also was second in the ten-mile, while Nichols came in a similar position in the long distance event. Seven riders competed in all. Following are the summaries:

Ten-Mile Race—Nichols, Harley-Davidson, first; Dehnert, Indian, second; Oble, Indian, third. Time, 11:30.

Fifteen-Mile Race—Nichols, first; Oble, second; Dehnert, third. Time, 17:40.

Twenty-Mile Flying Start—Dehnert, first; Nichols, second; Oble, third. Time, 23:12.

### TEUBNER SETS NEW CLIMB FIGURE

Dayton, O.—W. J. Teubner, on his Indian, set a new record for Germantown Hill on June 27, when he ascended it in 25 4-5 in the stripped stock class at the third annual climb of the Dayton M. C. Frank Tobias, 12 h.p. Thor, climbed in 28 seconds in the second event, thus also bettering the former figure of 30 seconds. A tandem climb was won by Mel Mumma, Indian. A bicycle ascent was the last feature of the program.

In the stripped stock event, which Teubner won, Tobias, Thor, came second and Mumma, Indian, third. In the second climb Mumma got second place, with Earl Howick, Cyclone, as third man. The tandem climb saw Tobias as second man. A crowd of about 1,600 witnessed the affair.

### AUGUST MADISON MEET

Madison, Wis., July 5.—The next race meet of the Madison Motorcycle Club will be held at the fair grounds on August 1. There will be three events as follows: Ten mile for local professionals, first prize, $10, second, 5; fifteen-mile professional, first prize $20, second $10, and third $5; one hundred-mile professional race, first prize $150, second prize $75, third prize $40, fourth prize $25 and fifth prize $10.

# FOUR CLASSES FOR F. A. M. RUN

## Club and Pro. Teams and Sidecars Separately Organized For Two-Day Indiana Affair

INDIANAPOLIS, Ind., July 3.—Entry blanks have been issued for the two-day endurance run of the Indiana Division of the F. A. M. on August 7 and 8. These blanks have been posted to every affiliated club in the State and to all the motorcycle factories. Entries will close on July 20, after which date any applications may have to be refused by reason of the size of the field.

There are to be four classes in the run, to the end that fairer competition shall be promoted. Class A is for professionals riding in a team from some factory. Class B is for a team of three riders representing some Indiana F. A. M. club, and entrants will compete for the club championship of the State. A loving cup is offered as a prize for this class. This class is expected to be a feature of the run, as entries from every club in Indiana are expected to come in. The cup must be won three times in succession to become the property of any organization.

Class C will take care of any amateurs or pros. who are not attached to any club or factory team. Class D will be for sidecar, tandem and side-seat entrants.

The schedule calls for an average of 22.21 miles per hour for the first day, in Classes A, B and C, with a slightly slower one for Class D. On the second day, the average has been worked out at 23.49 miles per hour, and this will be over the worst section of the course, with plenty of hills and sand.

Marion will be the first night's stop, the local club taking care of the contestants. The new Consolidated M. C. will handle both the start and the finish. The course will be Indianapolis—Richmond, Winchester (noon control)—Fort Wayne, Marion (Night stop) — Lafayette — Crawfordsville (noon control, August 8)—Rockville—Terre Haute—Indianapolis (finish). The total distance will be 457 miles and every kind of roads will be encountered.

### WATER DEPARTMENT GETS MACHINE

Newark, N. J., July 3.—The local water department has just placed a new Harley-Davidson three-speed model in service for patrol duty on the watershed. The department has been using a motorcycle for the past year and the efficient service rendered by the powered two-wheeler has made a very favorable impression with the water department officials.

### ENFORCE ANTI-GLARE LAW

Camden, N. J.—Word has reached the motorcycle dealers of this city that State Commissioner of Motor Vehicles William L. Dill intends to enforce rigorously the law regarding glaring headlights, which he says has been disregarded by automobilists and motorcyclists. Should motorcyclists fail to eliminate the glare on their headlights, they stand in danger of having their licenses revoked.

### WILL TOUR TO CLEVELAND

Newark, N. J., July 3.—Chester Webb, with his Harley-Davidson combination, and Chas. Weiland, Jr., on his Indian outfit, will tour to Cleveland, via Albany and Buffalo, leaving this city on July 15. The return will be made by way of Pittsburgh and Philadelphia. The sidecars will be used to carry baggage.

### NEW CLUB FOR CHICAGO

Chicago, Ill.—A meeting was held in the Jackson Boulevard store of R. C. Crist on June 19 for the purpose of organizing a motorcycle club to be composed of Excelsior riders exclusively. Quite a large number of Excelsiorites attended and the initial gathering was a great success. The club, which has not yet been given a name, will meet every Tuesday night hereafter, and on July 13 officers will be elected. The club will be named on that evening, it is hoped.

Crist and his followers hope to have the new organization the largest of its kind in the United States. He states that there is a huge field of "X" riders to work on, and that practically all Excelsiorites are boosters for the new organization.

### BRONX ASSN. PICNIC ON JULY 18

Bronx, N. Y.—The Bronx Motorcyclists' Association will have an outing to Oakland Beach, near Rye, on Sunday, July 18. A general invitation is extended to riders in the vicinity to participate in the affair. The start will be made from the Concourse at Burnside avenue, at 8 a. m. The morning at the Beach will be given over to swimming, while in the afternoon a short ride is planned.

### A ONE-LEGGED RIDER

Unique among motorcyclists in New York City is David Kamis, a one-legged enthusiast, who handles his two-speed Indian with ease. Kamis, shown in the accompanying illustration, has been riding since 1911. Two years later he met with an accident which necessitated the amputation of his left leg. But that did not prevent him from returning to the powered

two-wheeler, and immediately after leaving the hospital, Kamis fixed up his machine so that he could operate both clutch and brake the right side. Last summer Kamis covered 5,000 miles on his Indian.

# MUD CUTS SCORE OF MANY RIDERS

## Poor Going Reduces Figures in New Haven M. C. Run—Four Get Perfect Scores

NEW HAVEN, Conn.—Four entrants in the endurance run of the New Haven M. C. on July 4 received perfect scores, while only 13 out of the 31 who started finished the course. Much rain and mud eliminated many in the last 40 miles of the circuit. The perfect score men are: Shelton Sturges and Richard Veazey, Indian three-speed machines, Clayton Becker and F. S. Brown, Harley-Davidson two-speed mounts.

The run was from New Haven to Winsted via Saybrook, Middletown, Hartford and New Hartford, then onward through Torrington, Litchfield, New Preston, New Milford, Southville, Zoar Bridge and Derby to New Haven, totaling 175 miles in all. Roads to New Milford were generally good, but from there to New Haven the rain made things lively for all hands. Spills cut the scores of several of the finishers as well as putting several other contestants hopelessly out of the running. Following is a list of those who finished, with their scores:

Shelton Sturges, Indian three-speed, 1,000 (gold medal); Clayton Becker, Harley-Davidson two-speed, 1,000 (gold medal); F. E. Brown, Harley-Davidson two-speed, 1,000 (gold medal); Richard Veazey, Indian three-speed, 1,000 (gold medal; J. S. Cowan, Harley-Davidson, 999 (silver medal); John Paulocci, Harley-Davidson, 994 (silver medal); W. F. Thompson, Indian three-speed, 993 (silver medal); F. L. Humiston, Indian two-speed, 991 (silver medal); Joe Holwegger, Indian two-speed, 988 (silver medal); Albert Carocci, Indian two-speed, 980 (silver medal); Birdsey Lattin, Indian three-speed sidecar, 976 (silver medal); Peter Cox, Excelsior, 967 (bronze medal), and William Scoville, Indian three-speed, 948 (bronze medal).

### OSHKOSH TOUR ABANDONED

Milwaukee, Wis., July 4.—Rain prevented the holding of the two-day trip to Oshkosh and return of the Milwaukee Motorcycle Club, which was to start today. The club is making arrangements to conduct another big tour this year on Labor Day, a three-day affair up through the Fox River Valley district. This is a part of the state that has never been visited by the local entourage before. The tentative dates selected are September 4, 5 and 6.

### PICNIC RUN TO NATURAL BRIDGE

Roanoke, Va., July 3.—Ten members of the Dixie M. C., of this city, took a run, in company with members of the fair sex as tandemites, to Natural Bridge, Va., on Sunday, June 27. The party had luncheon at the well-known scenic resort and returned late in the afternoon to this city. In spite of rough roads and steep sandy grades there were no spills.

# RAIN HURTS SARATOGA PROGRAM

## Races Postponed On Account of Wet Track—100 Mile and National Championship Will Be Run Saturday

T[illegible] it's rather personal, let it be said by way of introduction that a number of gray hairs are to be found on the head of the publisher of **Motor Cycle Illustrated**, which were not there when he left New York for Saratoga last Friday. And here's the reason why:

Between seventeen hundred and eighteen hundred riders, answering the call of **Motor Cycle Illustrated**, were in Saratoga Monday morning prepared to witness a double program on the Saratoga track. A wet track on Saturday had made a postponement necessary. A perfect Sunday and a beautiful Sunday night had put the track in fine condition, even thought it had been saturated by weeks of constant rain in the eastern states. Then at six o'clock Monday morning a sudden cloudening was followed by another three-hour downpour, followed by clearing and sunshine by noon. But the track was in no condition to ride on. A special inspection was made as late as two o'clock, at which time there was still hope that at least part of the program might be pulled off late in the afternoon. A positive report from the track owners was later modified to permission if conditions would permit. In the meantime, the publishers of **Motor Cycle Illustrated** persuaded the writer to drive around the track in a side-car and look it over once more. He found a dangerous condition. The riders, true sports, would have ridden, although they admitted that they would be taking risks. The surface was nearly dry, but just below the crust there were innumerable mud-holes. Then, to cap the climax, Corley Fredericks sustained a bad fall, with thousands of people waiting at the gates for admission, with the sun shining in an almost cloudless sky, the races simply had to be called off. There was nothing else to do.

The reasons in a nutshell, why eighteen hundred riders had to return to their homes disappointed. More than thirty entries had been received, and some of the crack racing men were on the ground to compete in the hundred-mile and the professional and amateur championships. The promoters of the Rally had done all in their power to make the program even more interesting than last year. But in 1914 there was one day of good racing, but nothing to compensate this year for the fact that the races had to be called off, thanks to the unbelievable perversity of the weather. For it rained just when it should not, late at night and in the morning, while the sun shone about six hours too late both on Saturday and Monday. The Saratoga track dries as quickly as any dirt track in the country but there are limits to the speed at which even the best constructed track can dry.

But what's the use? It rained, and rain spoiled everything. No one could be more disappointed than we were. With all preparations made for a record-breaking meet, it is worth exasperating to have one's plans succumb to the uncontrollable elements.

After it became certain that no races could be held on Monday, it was decided to postpone them until Saturday, July 10, at two o'clock in the afternoon. All the riders whose entries had been received have agreed to ride on Saturday, and a fine program will be put on, as follows:

Event No. 1—Five-Mile Professional Saratoga Sweepstakes. Prizes, $25, $15 and $10.

Event No. 2—Five-Mile Professional National Championship. Prizes, F. A. M. Championship medals.

Event No. 3—Ten-Mile Professional. Prizes, $35, $20 and $10.

Event No. 4—Fifteen-Mile Professional. Prizes, $50, $25 and $10.

Event No. 5—One Hundred-Mile Professional. Prizes, $100, $50, $25 and $10.

Twenty-five dollars will also be given to the rider who is ahead at the end of 25 miles, also 50 and 75 miles. D. R. Walls, of the Splitdorf company, announced on Monday that his company would also give a prize worth $25 to the winner if his machine is equipped with a Splitdorf-Dixie magneto.

There will be at least fifteen and possibly twenty-five entries in the 100-mile race, and, assuming that the weather will be clear, those who can possibly arrange to go to Saratoga on Saturday will find it worth their while.

### Ball Game on Saturday

WHEN it became certain that races could not be held Saturday afternoon, it was decided to hold a baseball game between teams representing the various makes of machines. Within a short time after the announcement, the Indian and Harley-Davidson riders announced that they had gotten teams together and were prepared to fight for the baseball championship of the rally. Later on, the Excelsior team was also made up and it was decided that the Harley-Davidson and Indian teams play five innings and the winner play five innings with the Excelsior team. But instead of five innings, the two nines were so closely matched that they had to play eight innings to break a tie, and it was then too late to play the game scheduled with the Excelsior boys. The Harley-Davidson team won by a score of 6-5.

The Harley-Davidson team consisted of the following players: Lewis, ss. and p.; Day, c.; Parsons, lf.; Harrington, cf.; Frederich, 1b.; Janke, 3b.; Lawrence, ss. (after 3rd inning); Verbeck, p. (after 3rd inning); Toulon, 2b.

The Indian team: Bishop, c.; Winn, p.; Williams, lf.; Rykman, cf.; Cordes, 1b.; Kip, 3b.; Constant, ss.; Rogers, rf.; Noyes, 2b.

The score by innings:

Harley-Davidson .2 0 1 1 1 0 0 1—6
Indian .....2 0 3 0 0 0 0 0—5

It was generally thought that the game would be a sort of a farce comedy, but errors were not so many as might be supposed, and the pitching was excellent. In fact, the Indian team did not score after the third inning, while the Harley-Davidson team, after tieing their opponents in the 5th, were not able to send over the winning run until the 8th.

Base hits were made by Day, Parson and Toulon, of the Harley-Davidson team, and by Bishop, Williams, Cordes, Constant and Rogers, of the Indian team. Many of the boys played really clever ball, and the game was thoroughly enjoyed by 500 riders and helped at least a little bit to make them forget their disappointment for the postponement of the races.

### Strong Trade Representation

DAN R. WALLS, Michael E. Toepel, and Messrs. Wilson, Neis and Coakley gave the Splitdorf Electrical Company high-class representation at the Rally. Upon Mr. Walls' arrival, he announced that the Splitdorf company would give a special prize in the hundred mile race scheduled for Manday afternoon, and, when the race had to be postponed, he announced that his offer would stand for Saturday.

Among the Indian boosters at Saratoga were E. M. Jackson, P. L. Harriman, John O'Connor, Ed Buffum, Canadian Manager, and scores of Indian dealers from the New England and Atlantic States.

As usual, the Rochester crowd, led by Referee George J. Wagner and "Sunny Jim Rochow," were out in force and helped to make things pleasant for all with whom they came in contact.

New Jersey was very well represented. There were probably more than two hundred from that state. All the members of the Jersey Club, of Newark, wore neckties showing the club colors. The Rochester crowd wore nifty red and white caps. The members of the Yonkers Motorcycle Club wore purple jerseys and headgear with the Hollywood emblem; the Utica Motorcycle Club "old Heine" hats; members of the Schenectady Motorcycle Club orange and purple decorations.

What would undoubtedly have been an interesting feature of the Meet was a motor wheel race arranged by Lou Guterman, who had co-operated enthusiastically with this journal to help make the Meet a success, and there were nearly thirty entries for the motor wheel race.

Among the ladies who drove their machines to Saratoga were the following: Miss Van Buren, of New York (Harley-Davidson); Miss Frances Loeb,, of New York (Indian); Mrs. Filliare, of Springfield, Mass., (Indian); Mrs. Peterson, Waterbury, Ct. (Indian side car); Mrs. Hillyer, Brooklyn, N. Y., who rode her Excelsior twin two hundred and two miles in nine hours.

Digitized by Google

Flxible sidecar demonstrations were given by L. E. Fowler, district distributor, while the Schickel light weight was demonstrated by Frank Albert, former bicycle champion, who reported having lined up a lot of new agents on a recent trip through Long Island.

Among the trade representatives, not mentioned elsewhere, were Augustus C. Rice, of the Eclipse Machine Company; H. Krackowizer, of Westfield, Mass., and C. A. Leander, of Chicago, representing the Pope; E. R. Durkee, from the Harley-Davidson factory at Milwaukee; George W. Shapcott and B. E. Longthon, of the Federal Rubber Company, and J. J. Hanse, of the United States Tire Company.

Among those who came long distances to attend the Rally were Arthur H. a Mrs. Ross, of Montreal; Ed Buffum, W. Kipp and W. G. Self, vice-president the C. M. A., all of Toronto; H. A. Slac Leroy Smith and C. N. Silsby, of Littl ton, N. H.; Elmer M. Bliss, of Washing ton; F. Noble, of Moundsville, W. Va. I. F. Jacobs and his delegation of ten from Ohio, and Miss Juanita Veste, of Lake Arthur, La.

# HALL AND CAMPBELL ELECTED F. A. M. DIRECTORS

NEW YORK State Commissioner J. A. Hall was not only re-elected to that office, but also, by a very close vote, was chosen F. A. M. director for the Atlantic District, at the business sessions of the New York State F. A. M. and the Atlantic and Eastern Districts at Saratoga Sunday night. Jes Campbell was unanimously elected as director of the New England District. George Wagner was again chosen, also by acclamation, secretary-treasurer of the New York State F. A. M.

The business sessions were called to order with State Commissioner J. A. Hall in the chair, and opened with the reading of a report from Dr. Gibson, in which it was stated that durning the year, in New York State, the number of affiliated memberships had been four hundred and sixty-eight, unaffiliated two hundred and two, and renewals three hundred and ninety-eight, an increase of two hundred and fourteen in new members for the year.

Mr. Hall reported the probability of a two dollar license law being enacted by the New York Legislature next year. Such a law is favored by Secretary of State Hugo, and it is hardly likely that there will be any trouble in putting it through both houses of the Legislature, when the New York lawmakers meet in January.

For State Commissioner of New York there were two nominations, and J. A. Hall, of Brooklyn, received fifty-eight votes and George A. Ellis, of Yonkers, forty-five.

This election was succeeded by the election of a New England director, and, as above stated, Jes Campbell, of Boston, being the only nominee, was enthusiastically re-elected.

Nominations for Atlantic District director included J. A. Hall, John U. Constant and J. O. E. Dietrich, all of Brooklyn. Previously it had been decided that in order to affect an election the successful candidate must have a majority vote. One hundred and six votes were cast, of which nine were thrown out, as they were not on official ballots, thus leaving ninety-seven votes to count, of which Hall received forty-nine, just over a majority.; Constant, forty-six, and Dietrich, two.

The classification of riders was discussed by Carl Bush, of Newark; Victor Brunzell and Jess Campbell. That the old trade rider class should be restored, was the opinion of Brunzell, who claimed that a man's mere connection with the trade should not make him a professional even though he rode on a track where the public was charged admission. Mr. Brunzell moved that it be recommended to the national body that some provision be made for trade men who do not take cash prizes, so that they would not be professionalized. Mr. Brunzell's resolution was carried.

On motion of Jes Campbell the secretary was directed to ask Chairman Donovan as to his present interpretation of the classification of competitors.

The banner given by George A. Ellis to the winner in the New York State Club contest was awarded to the Cortland Club on recommendation of Secretary Gibson, as the Cortland Club had added to its membership the largest percentage of F. A. M. members.

The recommendation of the Ohio State Convention, at Lima, Ohio, that State organizations become auxiliary units and that fifty per cent. of the dues be applied to the support of State organizations was endorsed, on motion of Arthur Rochow.

A letter of greeting, from the Canadian Motorcycle Association, was read and accepted with thanks.

## "RED" FREEMAN DUE SOON

Chicago, Ill.—J. B. Freeman, the St. Louisan, better known as "Red," may soon be at Riverview to try his luck against the local amateurs. Freeman has the honor of being the only rider to beat Carl Schuette, the Olympic star, in the 200-mile event around Lake Malar, Sweden, in 1912. He has had some track experience in Newark and Philadelphia, but his best showing was made last June when he won time prize in the 26-mile road race staged by the St. Louis Cycling Club. His time was 1 hour and 11 minutes and he beat Schuette and Kuehl of Chicago in the sprint.

Bosch F. A. M. Amateur Championship Trophy

## READY FOR RELAY AT CAPITAL

Washington, D. C., July 5.—The motorcycle relay, which starts from this city, will begin not on Sunday, July 18, as was originally planned, but will start out at ten o'clock Monday morning, July 19. Practically all arrangements have been completed for the first leg in the great transcontinental trial. It is generally believed that President Wilson will hand the message to the bearer and that a number of prominent federal officials will be on hand to witness the affair. Already all the "animated weeklies" have instructed their cameramen to be on the job.

The traffic regulations governing speed will be temporarily suspended while the relay passes through the capital. The local police and bicycle boy scouts will clear the streets, while a number of Washington motorcyclists intend to ride in advance of the message bearers to clear the roads leading to Baltimore. The National Capital Motorcycle Club has placed an order for a leather carrying case, which will be metal lined and waterproof. Duplicate keys have been provided, one of which will be sent on to San Francisco.

## NEW TACOMA SPEEDWAY

Tacoma, Wash., is the proud possessor of a two-mile speedway having unusually broad curves which are banked to enable high speed to be attained with safety. The structure of the track at the surface consists of a series of 2 x 4 timbers laid edgewise on sand and gravel and sand-grounted after being spiked. After grouting the track was heavily sprayed with hot asphalt, making an excellent riding surface.

In our issue of June 24 we showed a picture of this track before asphalting and grouting, but an incorrect title was given to the photograph. It was credited to Portland, Ore., whereas it should have been designated the Tacoma Speedway.

President Coffman, of the F. A. M., announces the appointment of E. A. Robertson, of Philadelphia, Pa., as Pennsylvania State Commissioner.

# EIGHTEEN HUNDRED TOUR TO SARATOGA

## Wet Weather Caused Delays, But List of Those Registered Shows That Last Years' Record Was Broken By 500

"He travels the fastest who travels alone," says our old friend Rud—aforesaid—pardon the familiarity, Mr. [illegible] Well, if the aforesaid bard had been where in the vicinity of Saratoga [illegible] N. Y., U. S. A., on or about the [illegible]th and fifth days of July, 1915, he would have thrown up his hands in disgust at the wholesale contradiction of his [illegible] utterance.

When fifteen hundred riders braved the ways leading to the Mecca of Mid—North—roads battered and soaked by a [illegible] succession of rains. But it takes more than poor roads and weather to [illegible] the boys from "Meeting Us at Saratoga."

### Noyes Tells About It

"Hal" Noyes, Tourmaster of the Western [illegible] was the first victim of our editorial [illegible] when we met him at Sara[illegible]. "Fine trip—fine," said Hal. "We [illegible] the rain all the way down. We [illegible] Tuesday morning from Buffalo [illegible] eight riders. Assistant Tourmaster [illegible] met Cumberland had no trouble [illegible] fine. Then I had Mr. Roder [illegible] ride to deliver messages to the rear guard, buy sandwiches and dri—, and do other aide-de-camp jobs. [illegible] every cross-road sidecar com[illegible] joined us until, by the time we [illegible] Rochester, our noon stop, our [illegible] swelled to forty outfits, thirty[illegible] which were sidecar combinations. [illegible] sidecar outfits had women pas[illegible] Mishaps? G'wan—this is 1915. [illegible] 'em too well to have trouble. [illegible] Syracuse in time to watch the [illegible] in majestic and fiery splendor [illegible] the rolling hills in the West."

### Waxing Eloquent Over Scenery

"Next morning, early, we were on our [illegible] through Utica to Glens Falls, [illegible] had lunch, and then down [illegible] the Mohawk Valley to Schenec[illegible] where the other tours joined us. Oh, [illegible] forgot Mr. Wright, of the New [illegible] & Manufacturing Company, Au[illegible] presented each outfit with spark [illegible] It's against his express wishes that [illegible] this about this. He's very mod[illegible]

"I don't want to seem sentimental, or [illegible] of what-you-may-call-it, but for [illegible] sake, give me a July landscape [illegible] been drenched with rain. I'll [illegible] forget the Mohawk Valley with the [illegible] glistening on the myriads of rain-[illegible] leaves, turning them to burnished [illegible] And the bright, warm green of [illegible] foliage, the glistening rocks and boul[illegible] with the gradual rise of pine and hem[illegible] trees to the tops of the hills, and ever [illegible] to the broad sweep of road dwindl[illegible] to a narrow ribbon in the distance. Ah, [illegible] good to be alive then!" That'll be [illegible] said we firmly, as we gently [illegible] the grieving relatives.

### Southeast Division Turned Back By Rain

B. A Swenson, who was due at Saratoga with about 150 riders, telegraphed to headquarters that the roads between Providence and Albany were impassable. When a veteran like Swenson turns back there must be a very good reason. It was a case of rain all last week.

### Eastern Tour Has Big Representation

Despite the awful weather and the mud-ditches that had once been roads, J. O E. Dietrich, Eastern Tourmaster, piloted a sizable aggregation to the Springs. The 75 boys from the big town had an uneventful trip until Poughkeepsie was a couple of miles behind. There the front rank riders came across Miss Frances Loeb, the nervy little Bronx rider, reclining more or less gracefully in the middle of the road, counting the stars in the noon-day sky. Wilson and Neis, of Splitdorf, and Harvey Snyder, of the New York Sporting Goods Company, were right there with the first aid stuff, and after the rear wheel had been fixed, Miss Loeb continued the journey.

Miss Loeb may or may not have been a jinx, but the fact remains that shortly after, the weather man got nasty and spilled a few billion buckets of water over the landscape, keeping it up for more than six hours. Hudson, N. Y., was reached at 8 p. m., and Schenectady somewhat before midnight.

### Only Two Started From Boston

Jes Campbell was rushed to death attending to the Main New England Tour. The tour was very grateful for the attention Jes showed him. Jes started off Friday morning in a drenching downpour with A. P. Teulon as assistant tourmaster. He arrived in Springfield at 7:45 p. m., Friday, still in the same rain, where the Indian contingent joined the tour. Rain all the way, with riders constantly joining the tour at various points, until, when Schenectady was reached, more than sixty tourists were under the Campbell banner.

That's the way it went. North, East, South, West, no matter what their politics, religion, favorite underwear or drink might be—they all agreed on one thing—there was enough rain for all.

No mention is made here of the hundreds of riders who came in by ones and twos, independently of the tours. For instance, I. F. Jacobs, with 10 riders, came all the way from Toledo to see the races. We say with authority that Jacobs and his bunch managed to amuse themselves anyhow.

Taking it "by and large"—it was a wonderful thing to draw fifteen hundred motorcycle riders through such roads and SUCH weather to Saratoga. And we'll let it go at that.

---

### INJUNCTIONS IN LICENSE CASE

Savannah, Ga., July 1.—Holding that the Georgia motorcycle and automobile law was unconstitutional, Judge Walter G. Charlton, in the Superior Court, today granted a temporary injunction restraining the collection by the State of the $5 license fee for the registration of automobiles and motorcycles.

The decision was upon a petition for injunction argued recently at which time Hon. Warren C. Grice, of Atlanta, attorney general, appeared in defense of the law. The petitioners are the members of the Savannah Motorcycle Club and the Savannah Automobile Club.

In his statement before granting the injunction, Judge Charlton declared that the provision for the distribution of funds accumulated by the State from the payment of fees according to the rural routes in the country "violates every rule of fairness and incidentally double taxes certain citizens for the benefit of other citizens." He did not disturb that section of the ordinance which is regulation. The bench further made some comment on the widespread use of open mufflers by automobilists and stated that some hard and swift punishment should be inflicted on the offenders in this respect.

Attorney Charles Donnelly of the Savannah M. C. stated that if the case went to the State Supreme Court it would hardly come up before October. Before that time a bill will be introduced to make the motorcyclists pay one or two dollars and that for the automobilists remain the same, except that the county from which the fees come will get them all back. With the decision in Savannah, it is expected that similar actions will be taken throughout the State and for the present at least there will be no more taxes paid by motorcyclisits in Georgia.

---

### MORE ATTORNEYS APPOINTED

Recent additions to the growing list of F. A. M. attorneys include Roy F. Anthony, of Newark, N. J.; J. F. Maguire, of 375 Fulton street, Brooklyn, N. Y. (for Kings and Queens counties); F. R. Estes, of San Jose, Cal., and J. S. G. Gallegher, of 115 Eighth street, N. E., for Washington, D. C.

# New Impetus Shown By Export Figures

APRIL export figures show a most encouraging increase in the number of motorcycles shipped, the month's figures being in excess of the figures for March, 1915, and for April, 1914. Imports, on the other hand, have decreased, both the months of April, 1914, and March, 1915, being in excess of April, 1915. Shipments of bicycles have also fallen off, both months being in excess of the figures for April of this year. While shipments to the Hawaiian Islands were less in April of this year than in April of 1914, still they are in excess of the figures for March, 1915. Porto Rico shows a gain over March, 1915, but a loss when compared with April of 1914. Figures for the Philippine Islands, on the contrary, show April, 1915, show a gain over April, 1914, and March, 1915. While the ten months' period shows 1915 to be below the figures set for the year 1914, still the number of motorcycles shipped compares most favorably, there being a difference of but 14, in favor of 1914, whereas when comparing 1915 with 1913, the balance is in this year's favor by 1,857 machines.

### Big Advance in Exports

A total number of 1,455 motorcycles, valued at $244,485, was shipped during the month of April, 1915, to foreign countries. During the month of March, 1915, the number of machines shipped was 578, with a valuation of $42,753. April, 1914, shows figures of 1,165 machines, valued at $217,126. For the ten months' period ending April 30, 1915, the records show 4,721 machines, valued at $847,878. This compares most favorably with the same period of 1914 when 4,735 machines were exported, with a valuation of $911,532. Both years are in excess of the period ending in 1913, when but 2,864 machines were shipped, which were valued at $532,090.

A decrease from $42,753, the value of bicycles exported in March, 1915, to $33,025 for the month of April, 1915, is noted. During the month of April, 1914, the valuation reached $42,489. Both the ten months' periods, 1913 and 1914, are in excess of the same period of 1915, the figures being $563,736 for 1913, $520,261 for 1914, and $334,032 for 1915.

### Imports Are Decreasing

Imports are gradually becoming smaller and smaller. During March, 1915, they showed a valuation of $3,542. During April, 1915, this decreased to $3,311. For the month of April, 1914, the imports of motorcycles and bicycles reached a total valuation of $22,762. This decrease is also reflected in the ten months' periods, that of 1913 showing a valuation of $157,100, as compared with $215,607 for 1914 and $72,263 for 1915.

Motorcycles and bicycles remaining in the warehouses as of April 30, 1915, showed a valuation of $343, as compared with a valuation of $710 at April 30, 1914. The month's figures, however, are slightly in excess of the figures as of March 31, 1915, when the valuation of motorcycles and bicycles in the warehouses was placed at $51.

Imports of motorcycles and bicycles to be shipped to other countries were valued at $30 during the month of April, 1915. There were no machines shipped to this country to be exported to other countries during the months of April, 1914, and March, 1915. The ten months' period shows 1914 with a valuation of $628, and 1915 with $713.

The shipments to the Hawaiian Islands of motorcycles and bicycles for the month of April, 1915, show a gain over the month of March, 1915, but a loss when compared with April, 1914. During the month of April, 1915, the valuation reached $7,216. For March, 1915, the valuation was $5,757, while for April, 1914, the figures reached a total of $9,605. The ten months' period shows the year 1913 to be in excess of both 1914 and 1915, the figures being $90,858 for that year, as compared with $71,563 for 1914 and 46,485 for 1915.

Notwithstanding the fact that April, 1914, was in excess of April, 1915, and also that previous months of this year have run behind the figures set by the previous year, the month of April of this year shows a substantial increase over the month of March, 1915. April of 1914 shows motorcycles and bicycles shipped to the value of $3,360 to Porto Rico. April, 1915, shows a valuation of $2,023, as compared with but $967 for the month of March, 1915. The ten months' period shows the year 1913 with a valuation of $45,498, as compared with $37,461 for 1914 and $22,687 for 1915.

### Philippine Values Greater

A substantial increase is noted in the shipments to the Philippine Islands during the month of April, 1915, when compared with March, 1915, and April, 1914. The month's valuation was $3,314, as against $1,131 for April, 1914, and but $500 for March, 1915. The ten months' period shows the year 1914 to be leading with a valuation of $74,700, as compared with $65,837 in 1913 and $25,678 for the ten months' period, ending April 30, 1915.

---

Middletown, Ohio, June 28.—The Butler Cycle & Electric Company has been incorporated with a capital of $10,000, to act as agent for motorcycles and do repair work.

### LESS FUEL SHIPPED IN APRIL

Shipments of gasoline to foreign countries dropped off during the month of April, 1915. A peculiar circumstance is the fact that no gasoline was shipped directly to the United Kingdom during the month, which may be accounted for by the fact that England is receiving her supply through Canada and other countries. A total of 10,071,792 gallons of gasoline was exported during April, 1915. During the month of March, 1915, the total reached 16,435,783 gallons, while in April, 1914, a total of 15,185,395 gallons was shipped. Out of the shipments during April, 1915, France received 4,104,-[illegible] gallons, as compared with 1,471,461 gallons during April, 1914, and 4,575,320 in March, 1915. During the ten months ending April 30, 1915, there was shipped a total of 136,916,290 gallons of gasoline from this country to other nations.

### JINX IS ACTIVE IN JACKSON

Jackson, Mich.—Riders in this city are trying to run down the jinx that is pursuing them, and hope to locate the animal and kill it. During the last week in June "Wild Bill" McKenzie and Kenn. Wallis have both been struck by motor vehicles and their machines badly damaged. McKenzie, in fact, was badly injured and is now recovering in the hospital.

Wallis, who was hit two weeks ago, was run down again by a motor truck on June 25, but escaped unharmed. He is now in search of four-leaved clovers and other luck-bringing emblems, as two smashes in as many weeks is rather too much.

### WEDDING TRIP IN SIDECAR

Brooklyn, N. Y.—Mirabeau L. Towne, one of the prominent members of the Invincible M. C. of this city, is on his wedding tour with his bride in an Indian sidecar. The happy couple were last heard from in central New York, but it is expected that they will be at the meet in Saratoga on July 10. The wedding took place on June 16.

### INDIAN HONEYMOON TRIP

Boise, Ida., June 28.—From this city to the Indian factory in Springfield, Mass., on their three-speed twin, is the wedding trip which Mr. and Mrs. John Dickson started on, Sunday, June 27. The distance to be covered by the young couple is approximately 3,000 miles. While they purpose to make the trip in fairly good time, they intend to stop en route at several cities, among them being Omaha, Chicago, Marshalltown and Toledo. Mr. Dickson is the expert mechanic of the Morler Cyclery, which handles the Indian in Boise.

### TO TAKE "MOVIES" OF RELAY

Washington, D. C., July 1.—Local motion picture men will be on hand to film the start of the Transcontinental Relay at 6 o'clock on the morning of July 19. These include the Pathé Weekly, Hearst-Selig and Universal Animated Weekly, and Despatch Rider Long, on his Indian, will probably have to run the gauntlet of dozens of cameras, as well as of the cinematographs. Local motion picture representatives state that endeavors will be made to film the riders at many points on the route to San Francisco.

### EACH RODE ALONE ON TRIP

Sikeston, Mo., June 28.—Beechie Walpole and Edward Mitchell, of this city, took a trip to Union City, Tenn., on June 25, returning the same day. The run included 150 miles of rough roads, of which fifty consisted mainly of sand. The first five miles out of Sikeston is rock surface, and where there were neither rocks nor sand, blue gumbo, well rutted, made things lively. Mitchell, who used a belt-drive machine, kept up with his partner all right until reaching the Hickman (Ky.) ferry over the Mississippi. Here the belt parted, but Walpole, who thought that he was right behind, crossed the river and rode on. He did not see Mitchell at all the rest of the day, so each partner made the run to Union City and back by himself in the vain hope of catching the other up.

### Over 3,000 Licensed in Oregon

Salem, Ore.—Upwards of 3,000 motorcycles have been licensed by the State of Oregon during the first five months of 1915, while during the corresponding period of last year, but 2,898 mounts were licensed.

# Advice On Caring for the Brake

## Some Practical Pointers Along Safety Lines

By MURRAY FAHNESTOCK

MOTORCYCLE brakes are now made powerful enough for the work that they have to perform, but they will certainly work more smoothly and last much longer if they receive a little attention now and then.

While it is not often that motorcycle brakes are in such bad condition that they will not stop the motorcycle when required, it more frequently happens that the brakes will drag a little, thus increasing the gasoline consumption and cutting down the speed of the motorcycle. A constant loss of this kind is worth a little attention

on the part of the rider. If the rider makes a practice of coasting down a known test hill, with the gears in neutral, he can soon determine whether the brakes are dragging by noting how far the motorcycle goes before stopping. The same conditions should always be observed as far as possible. Another method of determining if the brake bands drag is to take a short fast ride, slowing down by the use of the throttle and not the brake, and then feeling the brakes to see if they are warm. Dragging brakes may also be discovered by spinning the rear wheel, when the motorcycle is on the stand, and noting whether the wheel comes to rest in a sluggish manner, as if under slight pressure.

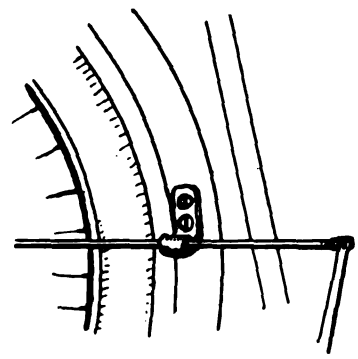
After a hard ride the brakes should be washed and cleaned, for a layer of sand or mud is scarcely liable to improve the action of the brakes, and will cut the brake linings. Oiling should be sparingly done in the case of fabric-lined brakes, for oil has a tendency to form a glaze on the surface of the fabric; but brakes of the coaster type, having a number of metal plates, need plenty of lubrication to make them run freely and prevent cutting.

Dragging may be due to bent brake shoes, to stiff control linkage, or to incorrect adjustment. Bent brake shoes should be straightened to the contour of the brake drums. If the control linkage is stiff it should be lubricated or bent so that the joints work freely, or a spring may be attached to pull the brakes to the off position as soon as they are released. To remove grease or oil from the brake linings they may be cleaned with gasoline and the gasoline burned off. This will burn the oil and grease off also, and leave the brake linings in good condition for replacing on the motorcycle.

### Packing Up Lining

If the fabric linings are not giving good service, two methods are available—blocking up the old fabric, or replacing with new fabric. If the old fabric is easily broken up it should be replaced, but if it seems good it may be underlaid with strips of brass or tin of the proper thickness. See sketch No. 1.

If the rivets show that they have been rubbing on the brake drum, they should be countersunk by means of a punch, for they will prevent the lining from making proper contact with the drum. To renew the brake linings, the fabric must be pried away from the shoe, and then the rivets can be cut off by means of a cold chisel and a hammer. Then the brake can be placed across the jaws of a vise that is opened about three-eighths of an inch and the rivets punched out. Care must be used not to spring the brakes out of shape. When ordering the brake linings from a



dealer, the width and thickness as well as the length should be given. After the fabric has been secured the rivet holes can be drilled by using the holes in the brake shoe as a guide. The holes drilled in the fabric should be countersunk to keep the rivet heads below the surface of the fabric. The rivets should be put through from the fabric side and riveted over on the other side, and the heads of the rivets should be kept about 1/16 inch below the surface of the lining.

### Curing the Rattle

If the brake rods rattle the best method is to put larger pins in the clevises to take up the wear. Or the brake rods can be twisted so that the joints at the ends will not be quite in line, thus putting a constant strain on the joints and preventing rattling. Still another method, sometimes used, consists of a small metal clip attached to the mudguard or other part of the motorcycle, and exerting a slight pull on the brake rod to one side, as in sketch No. 2, which is shown above.

## MOTORCYCLES PLAY IMPORTANT PART IN SWISS ARMY MANOEUVRES

## AMERICAN PRODUCTS FOR BELGIUM

An organization of Belgian business men is now being perfected in England with the object of interesting American manufacturers in introducing their goods into Belgium as soon as the war is over. According to a recent announcement there are a large number of Belgian business men who have been partly ruined as a result of the war, but who still possess enough capital to give any necessary guarantees as agents and dealers. Any American manufacturer who desires to take advantage of the facilities for communicating with Belgian merchants, offered by the newly formed organization in England, should address inquiries to Mr. Willy Lamot, Shardhighs, Halstead, Essex, England.

## FEWER BEARINGS IMPORTED

Imports of anti-friction balls and bearings reached a valuation of $109,486 during the month of April, 1915. These figures show a decrease for the month when compared with March, 1915, when the valuation was $133,946, and with April, 1914, which shows a valuation of $129,872. Remaining in the warehouses as of April 30, 1915, were balls and bearings valued at $488,283, compared with $478,610 at April 30, 1914, and $638,945 as of March 31, 1915. During the ten months ending April 30, 1915, imports reached a total valuation of $1,359,908. For the same period in 1913, the valuation was $1,942,076 and in 1914 it reached a total of $1,561,487.

## OPORTO INDIANS ON PICNIC

Oporto, Portugal.—Indian riders of this city, led by J. J. Goncalves, who represents that make in the republic, took a Sunday trip recently to Braga. The noon stop was made at the beautiful estate of Bom Jesus do Monte, where luncheon was served. The photograph shows the 22 riders who participated as they lined up in the square at Braga.

# On the Pacific Coast

### 1197 CALIFORNIA REGISTRATIONS

Los Angeles, Cal., July 2.—Official publication of new registrations for the month of May in California shows 1,197 new registrations and about 50 substitutions. While the former figure gives a line on the number of new riders, trade authorities point out that the substitutions give little information of value on the number of old riders who have taken new mounts, as many of them transfer their numbers without registering and take a chance on getting by with it.

### EFFECTIVE WORK OF EXPOSITION

San Francisco, Cal.—That the Panama-Pacific International Exposition is doing good missionary work in behalf of the motorcycle has been instanced many times during the past few weeks in sales of an unusual order. John H. Baumgardner, the local Indian agent, announces the sale of a three-speed Indian, electrically equipped, to Francisco Ballestra, an officer of the Argentine training ship, Sarimento, now anchored in San Francisco Bay. The machine has been placed aboard the training ship and will be taken to Argentine when the ship returns home and there introduced to a section of the country where a motorcycle now is unknown.

W. E. and W. H. Jackson, Pacific Coast distributors for Dayton motorcycles and bicycles, report an increasing sale of Dayton motorcycles. F. S. Collier, a motorcycle enthusiast of Worcester, Mass., who has been visiting the Panama-Pacific International Exposition, was so delighted with the big show and with San Francisco, that he decided to take home with him a lasting and at the same time useful remembrance of the great world's fair. After making careful investigation of the various makes of motorcycles on display in the transportation building at the exposition, he decided upon the purchase of a Dayton solo.

### DERKUM MANAGER AT BAKERSFIELD

Los Angeles, Cal., July 2.—"Daredevil" Derkum is now manager of the Kern County Fair Association, owner of the famous Bakersfield one-mile track. This track was built by Derkum in 1913, and made the record mile track gate receipts of $12,000. The owners have again called on Derkum to take hold and turned over to him the entire management of the fair association under contract to June 1, 1917, coveting leasing, promoting, and all concessions and activities inside the gates, except horse racing.

### POLICE BUY HENDERSONS

Los Angeles, Cal., July 2.—Fred Cannon, the oldest motorcycle rider on the Los Angeles county police, last week bought one of the new short coupled, 2-speed, electrically equipped Hendersons to displace his former mount. "Cannon has been a twin rider for a number of years, but through the special showing of economy in upkeep, speed and durability made in the Henderson demonstration to the county police, he became a convert to the 4-cylinder idea," says Sales Manager Hugh A. Fargo, of the Henderson Co., who is now in Los Angeles. Fargo mentions that they guarantee 65 miles per hour with all the new short coupled speedsters. A great deal of interest has been aroused in the machine for all kinds of municipal work throughout southern California. Among other recent sales Mr. Fargo mentioned one to Jack Munson of the mounted police of Beverly Hills. This machine was also of the new short type which, Fargo says, displaced a twin. Mr. Fargo quotes the County officers as saying that the new short coupled Henderson particularly suits their needs for a machine that starts easy and has an exceedingly quick getaway.

### DEALERS AS SUGGESTERS

Los Angeles, Cal.—Members of the Los Angeles Motorcycle Club are considering the nomination of Tom Girton and Hugh Fargo to the positions of official suggesters and creating enough similar positions to go around the men in the trade.

The recent run to Las Flores Canyon was by far the best attended event held by the local club this season. The attendance was stimulated by an announcement from Girton and Fargo that, if a large crowd would turn out, they would make generous contributions to the refreshments. Henderson riders who were planning a run for the same day joined the Los Angeles affair.

### GOOD TIME AT INDIAN RUN

San Francisco, July 3.—The Indian run to San Felipe last Sunday, June 27, was a splendid success from all angles. Fully 250 machines from San Francisco, Oakland, San Jose and Gilroy made the journey and enjoyed the barbecued beef and other good things to eat and drink. There were a great many sidecars and tandems included in the long caravan of motorcycles and a count of noses disclosed more than three hundred visitors assembled to swell the population of the little town of San Felipe, included in the number being a score or more of the gentler sex.

While the affair was arranged by the Indian agents of the towns represented, seventy-five riders of other makes of machines accepted the invitation to enjoy Indian hospitality, and that they were delighted with the treatment they received is indicated by the fact that they have voted unanimously to be on hand at all future Indian events of like character.

### SMALL CROWD AT ROSE CITY

Portland, Ore., July 2.—The Rose City track was in fine shape and the riders made some fast time in Portland, on Sunday, June 27, but no times were taken and but a small crowd saw fit to pay anything to see the racing. Instead, they took advantage of some high ground near the track where they could witness the riding free. If they are permitted to continue this practice it will undoubtedly end racing in Portland.

### ITINERARY OF SUNSET RAMBLE

Los Angeles, Cal., July 2.—Paul J. C. Derkum has issued for the Los Angeles Motorcycle Club the itinerary of the Sunset Ramble to the F. A. M. convention at Sacramento and the San Francisco Exposition, July 18 to August 1. The schedule is as follows:

First day, Los Angeles clubhouse to Willow Springs; second day, to Bakersfield, entertainment at Bakersfield Motorcycle Club; third day, to Fresno, swimming and dancing; fourth day, to Sacramento, entertainment by Capital City Motorcycle Club; next three days, F. A. M. convention; seventh day, boat to San Francisco; eighth, ninth, tenth, eleventh days, at exposition; tenth day, July 27, vote en route home. This will be an easy jaunt, with good roads about all the way, making about 105 miles a day. It is the third year of the Sunset Ramble under auspices of the Los Angeles Club. The committee in charge is as follows: Chairman, Paul J. C. Derkum, originator of the Ramble; W. S. Derenia, captain L. A. M. C. Club; Ed. Peterson, club secretary; Frank Lighting, Bakersfield Motorcycle Club. This affair is open to any rider in the vicinity of Los Angeles. The entrance fee, $2.50, payable to the club committee at 449 West Jefferson street, Los Angeles.

### MERKEL TERRITORY EXTENDED

Los Angeles, Cal.—Sexton & Berry are said to be averaging a Merkel a day in their Los Angeles store. They have taken over the whole stock of machines formerly carried by the Miami Cycle & Mfg. Co. at San Francisco, and are now handling the Merkel motorcycle business of the entire state, as California distributors. The San Francisco agency of the Flying Merkel is now in the hands of A. Castner, 1650 Market street.

### TO ATTEND CONVENTION IN BODY

San Francisco, Cal.—San Francisco motorcyclists are taking a lively interest in the forthcoming F. A. M. meet at Sacramento and it is expected that a large delegation of riders will go in a body from here. Plans are being discussed by members of the San Francisco M. C. looking to the chartering of a boat to carry the local delegation to the capital city, but no definite action has been taken as yet.

### EIGHTH MACHINE SOLD

Anaheim, Cal.—Harry Boon, of Minyard & Boon, the Harley-Davidson agents at Anaheim, hurried into Los Angeles the other day to get from the distributors one of the new model 11-J electrically equipped machines, to deliver to the foreman of an oil ranch in the La Grea fields. He mentioned to Sales Manager E. E. Welborn that this was the eighth machine they had sold in Anaheim already this year, while their orders in 1914 were only two machines. They aren't waiting for things to come their way, but are pushing touring, hill stunts and other motorcycle activities.

### NEW CHICAGO CYCLE CATALOG

Practically everything in the accessory or parts line for both motorcycles and bicycles is described and illustrated in the 320-page catalogue just issued by the Chicago Cycle Supply Company, of 22 West Lake street, Chicago, Ill. The book includes sidecars and cars, as well as a complete list of garage and repair tools. The arrangement of the articles listed is a very convenient one, allowing of quick finding of any article desired. The company claims that it has in this book the largest and most complete catalogue issued in its field.

### BERLING WORKS BUSY

Buffalo, N. Y.—Day and night work is the rule with the Ericcson Mfg. Co., makers of the Berling magneto, according to T. S. Hemenway, manager for the concern. "The Berling is coming into its own," says Mr. Hemenway, "and we have all we can do to keep up with orders." A part of the product is for English consumption.

### DUCKWORTH PLANT BUSY

Springfield, Mass.—The Duckworth Chain & Manufacturing Co. has its full roll of machines working at high tension these days. Chains in the stock motorcycle sizes are in most of the time, while the bicycle chains turned out are by no means inconsiderable. Duckworth officials are of opinion that the present state of affairs will continue indefinitely.

### MOTOR WHEEL TEST MADE

Shelby, Mich., July 3.—A test of a Smith Motor Wheel was made yesterday by the Shelby Cycle Co., local agents. It resulted in running 91.8 miles on two quarts of gasoline. Only one pint of oil was used during the test. The course included many sandy roads. Shelby street hill in front—the steepest in the city—was negotiated several times from a standing start. An average of 20 miles per hour was maintained throughout. The machine was driven by M. W. Pullen, who has since entered the company as salesman in the Motor Wheel Division.

### FISK RUBBER ADDING

Chicopee Falls, Mass.—The Fisk Rubber Company, manufacturers of Fisk tires and tubes, is again making additions to its plant in this city. The new structures involved are a new six-story office building, 160 feet long by 90 feet wide, a garage and two large warehouses, as soon as ready the structures will be occupied.

### TO MANAGE OMAHA BRANCH

Orville A. Olson has been appointed manager for the Omaha branch of the Pennsylvania Rubber Company, of Jeannette, Pa. He was formerly traveling representative in Nebraska. The Omaha headquarters, at 2212 Farnam street, will care for Colorado, Wyoming, Utah and Western Iowa in addition to Nebraska.

### VISITING CYCLE TRADES

O. H. Jones, sales manager for the Majestic Manufacturing Company, of Worcester, Mass., is visiting the motorcycle and bicycle trades with the newest Majestic specialties. He is expected to return to Worcester in a few weeks.

### AMPLE PROTECTION WITH THIS SIDECAR TOP

Protection for the sidecar passenger from sun and weather is amply provided for by the tops manufactured by the American Auto Top Manufacturing Company, of 1451 Washington Boulevard, Chicago, Ill. They are at present adaptable to the 1914 and 1915 Rogers, 1915 Indian Maid and 1914 and 1915 Dunham sidecar models.

The top is of first quality mohair with steel and wood bows. The steel used is especially adapted to this service, while the wood is selected and thoroughly kiln-dried before making up. The main bows run from the upper side-panels at an angle rearward to act as rear upper braces to the top. The secondary bows incline forward from the main bows, while the spreaders extend from strong pivots on the secondaries. A celluloid curtain is fitted at the front and complete side curtains are

**American Auto Top**

part of the equipment. The structure of the bows and top is such that there is no and includes body irons as part of the equipment.

### HEADS FAFNIR IN DETROIT

Howard Cox has been appointed manager of the newly-opened branch of the Fafnir Bearing Company, of New Britain, Conn., in Detroit, Mich. The branch is at 752 Davis Whitney Building.

### DONLEY ON WESTERN TOUR

D. W. Donley, sales manager for the Persons Manufacturing Company, of Worcester, Mass., is covering the Middle West on a business trip at present

### BOSCH TROPHY SCORING SYSTEM

In order that riders shall clearly understand the scoring for awarding the Bosch Trophy, the Bosch Magneto Company, of 223 West 46th street, New York, recapitulates the point system employed ever since the initial offering of the cup. The system, as applied to the 1915 trophy, is as follows:

One-mile F. A. M. championship—4 points to winner, 3 points to second man, 2 points to third.

Two-mile championship—6 points to winner, 4 to second man, 2 to third man.

Five-mile championship—7 points to winner, 5 to second man, 3 to third man.

Ten-mile championship—8 points to winner, 6 to second man, 4 to third man.

Twenty-five-mile championship—12 points to winner, 7 to second man, 5 to third.

Fifty-mile championship—15 points to winner, 10 to second man, 8 to third man.

The winner of the trophy will be the amateur rider who has the highest total points in the F. A. M. championship events.

### THREE DUCKWORTH CONTRACTS

Springfield, Mass., July 5.—Announcement is made by the Duckworth Chain & Manufacturing Company that a contract has been entered into with the Harley-Davidson Motor Company and the Hendee Manufacturing Company whereby both of these concerns will use Duckworth chains on their new machines. The Duckworth company was also favored with a similar contract from the Henderson Motorcycle Company. Many departments of the Springfield plant are running overtime at present.

### BECOMES MOTT AD MANAGER

Utica, N. Y.—D. H. Wetzel, until recently owner of the Wetzel Advertising Agency, of this city, has sold his interests in that business to become the assistant advertising manager of the Mott Wheel Works. Mr. Wetzel has a complete knowledge of the Mott rim business, having handled the advertising of that company for some time past.

# Cameron Wins Two Bay Races

SHEEPSHEAD BAY, N. Y., July 6.—Plenty of thrills were furnished the spectators in the Independence Day card at the Sheepshead Bay Velodrome on Monday night. Although Victor Linart of Belgium had no trouble over the two American riders in the thirty-mile motor-paced race, the other races had close and exciting finishes that worked the crowd up to a high pitch of excitement.

Linart won the motor-paced race in fine style, finishing three and a half laps ahead of Vincent Madonna, of Providence, who was second and a half laps ahead of Elmer Collett, of Lynn.

After a wonderful spurt in the last lap of the three-quarter mile professional handicap, George G. Cameron, of New York, flashed past a field of nine riders and was declared a winner by half a wheel's length. Cameron won his heat and was then entered the final heat until the last moment, as his handicap was thirty yards and his opponents Cameron also won the three-quarter mile professional race.

George Bowker, of the Glencoe A. C., with 160 yards handicap, won the half-mile amateur handicap race open to riders living in Greater New York from Joseph Ohrt, of the C. R. C. A., by a scant few inches. The winner's time was 1:01 4/5. There were fourteen riders off with the scratch men in the two-mile amateur race, all riders living in Greater New York or Long Island, and Tom Bello, of the Acme Wheelmen, was an easy winner by several wheel lengths. His time was 4:29 3/5.

The first two heats of the inter-club team amateur pursuit race the C. R. C. A. defeated from the Acme Wheelmen, of Brooklyn, after one mile and three and a quarter laps in 4:23 3/5. In the second heat the Newark Wheelmen, of Newark, won from the New England Wheelmen, of New York, after one mile and one-quarter lap in 3:19 1/5. The other two heats will be held on Saturday, the semi-finals on July 13, and the final [illegible].

Eight of the field of professionals riding in the five-mile open professional race at the Sheepshead Bay Velodrome last Saturday night, July 3, fell from the slippery track in the last mile of the race, suffering severe bruises about the arms and legs. Only five of the field of twenty-five finished. Goullet took the lead in the last lap and finished a length in front of McNamara. In the fourth heat of the half-mile professional handicap Alfred Goullet won from scratch, his time being one-fifth of a second inside of the world's record.

Georges Columbato, Italy's champion pace follower, returned to his European form and defeated Bobby Walthour and Vincenzo Madonna in a thirty-mile paced race. Madonna, who lost three laps in the first ten miles, was forced to change motors. Walthour stuck close to the Italian champion, but the pace was terrific and the Dixie flyer lost a lap in the twelfth mile. Columbato never slackened his pace, crossing the finish line fourteen laps ahead of Walthour, who was second. Madonna was seven laps in the rear of Walthour.

George Cameron

Frank Whitney, in a duel with Hans Ohrt in the two-mile amateur, carried the Westerner off the track in the last lap, causing several of the riders to spill. Whitney won but was disqualified.

### Tuesday's Races

Sheepshead Bay, N. Y., June 30.—Vincent Madonna had no difficulty in winning the thirty-mile motor-paced race at the Bay Velodrome on Tuesday night, June 29, leading Percy Lawrence, of San Francisco, by fifteen laps at the finish, Worth Mitten, the Iowa boy, finishing third, three laps further in the rear. Time, 44:06. Lawrence fell in the sixth mile and lost much valuable ground, which he made a game effort to regain by a series of desperate sprints.

The Quadruple, a point system race of three heats, was won by Alfred Grenda, with a total of 23 points. Joe Fogler came second with 20, Caesar Moretti a close third and Fred Hill a poor fourth.

Hans Ohrt scored a popular victory in the two-mile open amateur when he beat a big field of crack amateurs. He rode in his usual brilliant style and came in for much applause, as he finished in a pretty sprint two wheel lengths ahead of Ed Kane, N. Y. A. C., third place going to Fred Taylor, of Newark. Time, 4:29 3/5.

The two-mile handicap race for Greater New York riders was won by Felix Cambria, 110 yards start. Harold Platt, of the Empire City Wheelmen, gave him a run for his money by finishing a close second, scarcely a wheel length separating them. Edward Ganzel, Brooklyn, with 160 yards handicap, rode into third place, with the balance of the field close at his heels. Time for the distance, 4:03 1/5.

The half-mile amateur was captured by George Bowker, who had things all his own way. Hans Ohrt lost his heat in this race and did not start in the final. Thomas Grimm second, Taylor third. Time, 57 4/5.

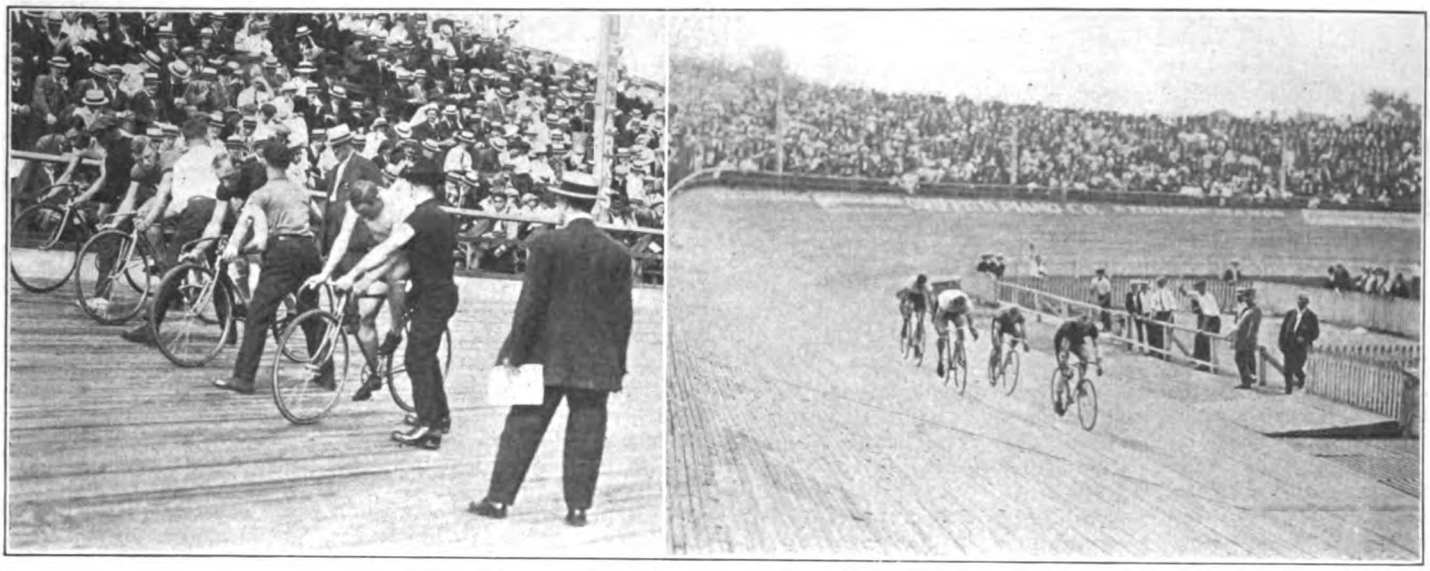
# Kramer Shatters Another Record at Newark



**Left, Raymond, Goullet, Grenda and Kramer at Start of Championship Race. Right, Kramer About to Nip Grenda Near Tape**

NEWARK, July 4.—A tie was established in the race for the national championship cycle honors here this afternoon when Frank L. Kramer, the American champion, nipped Alfred Grenda, the tall Tasmanian, at the tape in one of the most stirring races ever witnessed at the local velodrome. The finish was so close that the judges had to call upon the automatic judge, which registers just how the riders cross the finish mark, before they announced their decision. Kramer had won by about an inch, while Alfred Goullet finished third and Raymond Eaton came in fourth. Kramer and Grenda are now on even terms, each having 17 points, while Goullet is third with 15 points.

Kramer did more than win a championship race, as in his heat at a quarter mile he shattered the world's record for this distance, made by Alfred Goullet two weeks ago. Kramer's time was 27 2/5 seconds, which clips just three-fifths of a second off the mark made by the Australian. When Goullet broke the record it was an old mark of Kramer's made May 4, 1902. Kramer won the final of the championship race when not a fan in the vast crowd thought he had a chance. Going down the backstretch he was in the rear of Grenda and Goullet. Kramer did not put all of his strength into his limbs until the home stretch was reached, but here the champion let out with all that was in him and in his last jump for the tape his wheel seemed to leave the track as finished first.

Harry Taylor, a Newark boy, proved to be the class in the third mile championship race for the amateurs. Frank Whitney, another local youth, of the New York Athletic Club, finished second and Henry Werner, another Newarker, was third. Tim Sullivan, of New Haven, was unfortunate in puncturing in the final and got fourth place. Hans Ohrt failed to qualify in his heat. Taylor leads with 8 points in the amateur title series, while Sullivan has six and Ohrt five. The summaries:

Half-Mile Novice (Amateur)—Won by Fred Knoller, Millburn; Bennie Zager, Newark, second. Time, 1m. 6 4/5s.

Quarter-Mile National Championship (Professional)—Won by Frank L. Kramer, East Orange; Alfred Grenda, Tasmania, second; Alfred Goullet, Australia, third; Raymond Eaton, Elizabeth, fourth. Time, 28 3/5s. Last eighth-mile, 11 4/5s. First semi-final—Won by Grenda; Eaton second. Time, 28 2/5s. Second semi-final—Won by Kramer; Goullet second. Time, 28s.

One-Third-Mile National Championship (Amateur)—Won by Fred Taylor, Newark; Frank J. Whitney, New York Athletic Club, second; Henry Werner, Newark, third; Tim Sullivan, New Haven, fourth. Time, 40 2/5s. First semi-final—Won by Taylor; Sullivan second. Time, 41 2/5s. Second

**Harry Taylor, Leading Amateur**

semi-final—Won by Whitney; Werner second. Time, 41s.

One-Mile Handicap Invitation (Professional)—Won by Ernest Jokus, Newark (40 yards); Donald McDougall, Newark (70 yards), second; Jacob Magin, Newark (40 yards), third; Aubrey Taylor, Australia (115 yards), fourth; William Hanley, San Francisco (scratch), fifth. Time, 1m. 50 4/5s.

The Brassard Race, at One Mile (Reggie McNamara, Australia, vs. Marcel Dupuy, France)—Won by McNamara. Time, 3m. 3 2/5s. Last eighth-mile, 12 1/5s.

Two-Mile Handicap (Professional)—Won by Alfred Goullet, Australia (scratch); Robert E. Spears, Australia (10 yards), second; Marcel Dupuy, France (20 yards), third; Harry Kaiser, Bronx (50 yards), fourth; Jacob Magin, Newark (75 yards), fifth. Time, 3m. 44s.

Half-Mile Handicap (Amateur)—Won by Fred Taylor, Newark (5 yards); Nicholas Horvath, Newark (75 yards), second; Fred Knoller, Millburn (75 yards), third; William Weimar, Newark (45 yards), fourth. Time, 58s.

Five-Mile Open (Professional)—Won by Alfred Grenda, Tasmania; Reggie McNamara, Australia, second; Alfred Goullet, Australia, third; Fred Hill, Boston, fourth. Time, 9m. 53 4/5s.

Oscar Egg, of Switzerland, won the ten-mile race, the feature event at the Newark Velodrome on Monday, July 5. Egg was behind until a third of a mile from the finish, when he passed McNamara and opened a gap of fifty yards. He increased his lead until he was two hundred yards ahead at the finish.

A miscount of the laps in the one-mile Independence stakes lost Champion Frank Kramer a victory in the sprint feature. Alfred Goullet, of Australia, won, with his countryman and team mate, Alf. Grenda, second. Kramer was third.

Willie Hanley, of California, was first in the professional invitation race, with Jake Magin, of Newark, second; Willie Coburn, St. Louis, third, and George Cameron, of the Bronx, fourth. Joe Brexel, of the Century Road Club Association, took the amateur half-mile handicap from the fifty-yard mark. Hans Ohrt, of the San Francisco Olympic Club, scratch man, was second. Ohrt won the two-mile open scratch race easily from Fred Taylor, and Frank Whitney, of the N. Y. A. C.

July 2.—Once more Frank Kramer was the whole show at the bike races ridden at the Newark Velodrome, on Thursday night, July 1. He defeated Alfred Goullet in the deciding heat of a two-thirds mile match race and won the two-mile open from an exceedingly classy field of bike riders. Kramer rode the last eighth miles in 11 2/5 seconds, which is the fastest time ever made by a bike rider in Newark and is probably faster than any cyclist ever negotiated the distance.

Thorwald Ellegaard and Caesar Moretti "spilled the beans" in the one-mile tandem match race, taking two out of the three heats ridden from Alfred Grenda and Freddy Hill, as well as Bob Spears and Reggie McNamara. Hill and Grenda got the second heat while Ellegaard and Moretti annexed the first and third.

# Bicycle Clubs on Holiday Tours

THE annual three-day bicycle tour of the New York Division of the Century Road Club Association, which was scheduled to start on Saturday, July 3, at eight o'clock P. M., was postponed on account of rain to six o'clock the following morning, when five members left Columbus Circle New York City, for Jamaica, where they stopped for breakfast. The riders festooned their wheels with silk flags and presented a fine appearance, as they were rolling speedily over the smooth Merrick road in Long Island. Valley Stream was soon reached and there another member joined the party, making a total of six riders—Captain George Steppello, William Wengust, Max Naphtal, Lucien Wetzel, Charles Hyland and Sylvain Segal.

After stopping at Amityville, the journey was resumed and the riders came to a section of the road which was closed to traffic on account of repairs. It was decided not to make a detour, so onward over the crushed stone the six pedalled. When they reached East Islip, the dinner stop, Segal wanted to make this point his destination, but, when he was advised that the state Insane Asylum was only four miles to the north, he quickly changed his mind. Most of the roads were good from Amityville to Sag Harbor which was the end of the trip. Railroad crossings were the only obstacles encountered which made "walking" faster than cycling." The cyclists passed through Sayville, Blue Point and Patchogue, where a stop was made for refreshments. At East Moriches a brief stop was taken and then the riders continued their trip out to their destination, passing through a number of interesting historical points.

It was six o'clock on Sunday evening when the six cyclists finally entered Sag Harbor and put up for the night at the Bayview House. One lone rider, who had started out from New York late, arrived at Sag Harbor an hour after the "regulars" had finished. The evening was whiled away by walking about the town and seeing the sights. The next morning the tourists were up bright and early and started to clean their machines for the return journey. Rain spoiled a good part of the run during the first few hours; but the cyclists kept right on in spite of the downpour which proved to be rather refreshing.

When Moriches was reached the sun started to break through the clouds. After a delay, due to traversing some bad roads in making a detour, Patchogue was attained at four o'clock in the afternoon and the riders sat down to dinner. The remainder of the journey was easy, and, after having a late supper at Rockville Center, the seven veterans got back to dear old New York at eleven o'clock on Monday night. Neither accidents nor punctures marred the journey.

### FINISH 187-MILE TOUR

Three members of the New York Division of the Century Road Club of America returned late last Monday afternoon after a two days' bicycle tour up New York State, during which they rode 187 miles. They left New York last Saturday afternoon, and going north passed through Dobbs Ferry, Ossining and Peekskill. At Fishkill Landing the cyclists ferried across the river to Newburg and then started down the west side of the Hudson on their trip back to New York. On the return trip they rode through Goshen, Tuxedo Park, Suffern and Hackensack.

The big annual open pleasure trip of the New York Division of the Century Road Club of America has been arranged for next Sunday. A three hours' stop has been scheduled for Rye Beach. The run will be fifty miles, and medals will be awarded to all those completing the distance. Application for entry can be made through L. A. Fraysse, 437 West Seventeenth street, who is Chairman of the Pleasure Trip Committee.

### YOUNG CYCLIST CLEANS UP

Fort Worth, Tex., July 2.—All of the bicycle races held in this city recently by the Panther City Cycle Club were carried off by "Dock" Anderson, the crack little fifteen-year-old cyclist. The distances of the events were five, ten and twenty miles. In an exhibition run at one-half mile, the youngster's time was fifty-six seconds. He has been following the game for the last three years and will come north next month to ride on some of the eastern tracks.

### ST. LOUIS CYCLISTS' TOUR

St. Louis, Mo., July 5.—The St. Louis Cycling Club took a three-day tour through the northern section of Missouri, leaving this city on Saturday afternoon and returning on Monday evening. The large turnout of cyclists covered about one hundred and thirty miles on the trip. All of the participants in the event had a dandy time and came back to St. Louis with a good coat of tan and fit as a fiddle.

### CRESCENTS PEDAL OUT INTO VIRGINIA

Baltimore, Md., July 5.—The Crescent Bicycle Club held its three-day tour over the Fourth of July holidays and pedalled out into Virginia. Stops were made at points of historic interest and many quaint spots were visited. The Crescents returned to Baltimore late on Monday night. They were caught in the rain but were none the worse off for their wet experience.

### POPE SALE DUE JULY 20

Westfield, Mass., July 6.—Owing to the fact that Pope Manufacturing Company's property includes real estate, the law requires that the holdings be advertised for sale for four weeks, and this accounts for the fact that no definite action has been taken in connection with the offer submitted to the receivers a short time ago.

The reported negotiations of the Hendee Mfg. Co. for the purchase of the Pope property are stated to have no foundation in fact, this announcement being made emphatically by officials.

The actual sale of the Pope property, including all the assets, is expected to be consummated on July 20, according to statements made here.

# Revere Honors Captured by Linart

BOSTON, Mass., July 4.—The motor-paced event on Saturday night, July 3, narrowed down to a struggle between Linart and George Seres, both of France. Elmer Collins having a spill in the nineteenth mile that threatened to end his racing career and Leon Didier being out of the running through a combination of accidents. Linart's lead over Seres was four laps at the end of the hour, Linart having to his credit 42 miles 3½ laps. Collins' accident came through skidding on a wet board high up on a turn. He slid head first down the bank, and by almost a miracle escaped being hit by the other riders.

Pat Logan, of South Boston, scratch man in the three-mile professional open, finished in front of Alvin Loftes, of Providence, with 20 yards to spare. In the half-mile amateur, the big handicaps of Fred Hansen, of Revere (100 yards), and Ben Leighton, of Revere (90 yards), proved too much for the seasoned riders, they finishing in front in the order named. The summary:

Half-Mile Amateur Handicap Race—Won by Fred Hansen, Revere (100 yards); Benjamin Leighton, Revere (90 yards), second; John Fardig, Orient Heights (90 yards), third; Fred Herbert, Fall River (50 yards), fourth. Time, 57⅘s.

Quarter-Mile Professional Handicap Race—Won by Frank Droback, South Boston (30 yards); Harold Rollins, Everett (15 yards), second; H. J. Reynolds, Forest Hills (65 yards), third; J. J. Lang, Cambridge (65 yards) fourth. Time 29⅘s.

Mile Invitation Amateur Race—Won by Kenneth Plummer, Revere; Mike Barber, Brighton, second. Time, 2m. 28⅗s.

Five-Mile Open Amateur Race—Won by L. C. Rollins, Everett; Ned Chandler, Boston, second; John Fardig, Orient Heights, third; Bert M. Jones, Revere, fourth. Time, 11m. 29⅗s. Lorimer Winslow, Providence, winner of most laps.

Three-Mile Open Professional Race—Won by Pat Logan, South Boston; Alvin Loftes, Providence, second; Dennis Connoly, Everett, third; Frank Droback, South Boston, fourth. Time, 6m. 49⅘s.

Hour Motor-Paced Race—Won by Victor Linart, Antwerp; George Seres, Paris, second; Leon Didier, Paris, third; Elmer Collins out in 19th mile by fall. Distance, 42 miles 3½ laps.

Victor Linart, the Belgian, cleaned up at Revere Bicycle Track on Thursday night, July 1, winning the famous Golden Wheel Race by making 43¾ miles in the hour. In the Golden Wheel race the Belgian rode his opponents to a standstill. For the first 35 miles Leon Didier, the Parisian, held the lead, but the strain was evident; he was in a state of collapse at the end of that mile and had to ride three laps at a jog before he could again follow his motor.

Clarence Carman, middle-distance champion of America, found the pace set too hot, and after a change of motor he had to give up. George Wiley, the former champion, had his jinx still with him and had a puncture in the fifth mile. Linart's victory was decisive, for he was passing Didier for an even mile at the finish of the race.

The professional miss-and-out race Wednesday night afforded some good sport. Pat Logan won the event. L. C. Rollins, of Everett, got away with the five-mile open amateur event by a narrow margin over Willie Turville, of Revere, Fred Herbert, of Fall River, getting third place. The summary:

Half-Mile Amateur Handicap—Won by John Barry, Cambridge (65 yards); J. B. Rollins, Everett (60 yards), second; W. M. Lane, East Boston (100 yards), third; Frank McKenna, South Boston (95 yards), fourth. Time, 58⅕.

Three-Quarter-Mile Professional Handicap Won by Harold Rollins, Everett (20 yards); Alvin Loftes, Providence (scratch), second; Frank Drobach, South Boston (40 yards), third; J. S. Grant, Lynn (80 yards), fourth. Time, 1m. 31⅘s.

Mile Invitation Race for Amateurs—Won by Fred Hansen, Revere; Benjamin Leighton, Revere. Time, 2m. 22⅕s.

Five-Mile Open Amateur—Won by F. C. Rollins, Everett; Willie Turville, Revere, second; Fred Herbert, Fall River, third; Ned Chandller, Boston, fourth. Time, 11m. 42⅗s. Lorimer Winslow winner of the most laps.

Professional Miss-and-Out Race—Won by Pat Logan, South Boston; Alvin Loftes, Providence, second; Harold Rollins, Everett, third; Hugh MacPartland, Boston, fourth. Distance, 1 mile 2 laps. Time, 2m. 42⅘s.

Golden Wheel Race, One Hour—Won by Victor Linart, Antwerp; Leon Didier, Paris, second; Clarence Carman, Jamaica, N. Y., third; George Wiley, Syracuse, fourth. Distance, 43 miles 6 laps.

**Victor Linart**

## AN EMINENT CYCLIST

Katanga is a section of the Belgian Congo which is rich in minerals, but as yet has only been very partially opened up. One of the most eminent frontiersmen in this district is Mr. George Grey, brother of Sir Edward Grey. In a very interesting book describing this district by Mr. J. B. Thornhill, the following reference is made to Mr. Grey, who it appears uses his bicycle to a large extent in connection with his work. "Straight, accessible, self-reliant, possessed of physical enegry almost beyond human power, a truly great leader, a very strong character, and one of the best shots as well as one of the bravest men that have ever set foot in Africa. The marvelous thing about him was that whatever he did, he never turned a hair. I have seen him bicycle in from Kansanshi mine—just a 100-mile ride over a bad road—and I should have thought that he had not ridden a couple of miles by his general look."

It appears that bicycles are used to a considerable extent in this remote district, but have to be built with specially high brackets so as to clear the ant hills. One of Mr. Grey's most arduous rides was from Kamboye to Victoria Falls in eight days. According to Mr. Thornhill, he is afraid of nothing but wild dogs, and on one occasion when cycling he was chased for five miles by them.

## NEW ENGLAND HANDICAP

September 12 is the date set for the annual fifteen-mile handicap road race of the New England Wheelmen of New York this year. Heretofore, for several years, the race has been one of the first road contests run during the season by this enterprising metropolitan club, but the change in date was agreed upon at a conference of the Inter-Club Amateur Cycle Road Racing League, prior to the season's start.

## MILWAUKEE BICYCLE RUN

Milwaukee, Wis.—The North Side Cycling Club held a run and outing to Theinsville, Wis., Sunday, June 27. The following are the officials: Captain, Theodore O. Gauger; lieutenant, H. L. Warnken; pace maker, Louis Pierron.

# Lawson Disqualified by Referee

CHICAGO, July 4. When Martin Ryan, the Newark pace follower met Joe Kopsky, the Bohemian, last Saturday night in a five-mile motor-paced race at the Riverview Velodrome, he gave the latter an artistic beating. Ryan won in straight heats and in winning he beat his own mark of 7:05 for the distance in each heat. In the first heat, in which he lapped Kopsky twice, he made the five miles in 6:57 and in the second in 6:47⅕.

### Lawson Disqualified

Iver Lawsons desire to reach home by the quickest possible route robbed him of a win in the two-third-mile open for professionals. Lawson came on the inside on the last lap, rode on the flat on the back stretch and beat the field by a good margin. The referee, however, saw the breach in the rules and disqualified the local Swede. The victory went to Frank Cavanagh, the Newarker, Francesco Verri, the Italian, finished second and Charles Piercey, the Australian, third.

The one-mile professional handicap proved a hummer of a contest. The limit men, in their anxiety to gather the dollars put up for lap prizes, made the going so fast that the best the back markers could get was second place which went to Lloyd Thomas a 40-yard man. Bob Diefenbacher, the Brassard holder, won the race from the 155-yard mark. The time was 1:46⅕.

### Amateur Competition

In the amateur races the competition was keen and exciting. In the half-mile handicap Egisto Davini, the Italian, won. But having a rider with his hand he enthused the wrath of the referee and was disqualified. In the pursuit race Ernest Kopsky the Riverview Cycling Club star, won after going almost two miles.

Summaries

One-Mile Handicap (Amateur)—Won by Olaf Hansen, Italian-American C. C., 65 yards; second, Joseph Ferrara, St. Louis C. C., 30 yards; third, Frank Petersen, Conquer A. C., 65 yards; fourth, Louis Kuehl, Chicago C. C., 50 yards. Time, 57⅗. Egisto Davini won, but was disqualified for coming in with his hand.

One-Mile Pursuit Race (Amateur)—Won by Ernest Kopsky, Riverview C. C.; second, Charles Hanson, Riverview C. C.; third Egisto Davini, Italian-American C. C.; fourth, Willie Kell, Chicago C. C. Time, 4 minutes. Distance, 1 mile 1 lap.

Two-Third-Mile Open (Professional)—Won by Frank Cavanagh, Newark; second, Francesco Verri, Italy; third, Charles Piercey, Australia; fourth, Lloyd Thomas, San Francisco. Time, 1:20. Iver Lawson, Chicago, won this race, but was disqualified for coming in on the flat of the track.

One-Mile Handicap (Professional)—Won by Bob Diefenbacher, San Jose, 155 yards; second, Lloyd Thomas, San Francisco, 40 yards; third, John Bosch, Long Island, 90 yards; fourth, Gordon Walker, Australia, 30 yards. Time, 1:46⅕.

Five-Mile Motor-Paced Match—Martin Ryan, Newark, vs. Joe Kopsky, Bohemia. Run in two out of three heats. Ryan won first and second heats. Times, 6:57 and 6:47⅕. Bettering old mark held by himself of 7:05.

### Krebs Loses Brassard

Floyd Krebs, the Newark Dutchman, got the real surprise of his life last Wednesday night in his effort to retain his meal-ticket Brassard. The Brassard netted Floyd two checks of $25 each when he beat Bobby Walthour, the localite, and then defended the same against Albert Krebs, the Salt Lake flyer. The Brassard race is at one mile and was run in one heat, French style. Krebs met Bob Diefenbacher, of San Jose, last night, and Diefenbacher started out as though he was on a quarter-mile dash. The San Jose rider was out to ride Krebs dead and he succeeded. In the first trial both of the riders went down in a heap when Diefenbacher struck his pedal and Krebs went over him. After re-starting the race Diefenbacher tired the Newarker when the latter tried to keep Diefenbacher from jumping him, but when the bell sounded for the last lap the Californian went to the front and Krebs lost out on his money-producing armlet.

**Iver Lawson**

Next in line of importance to the Brassard race was the five-mile motor-paced event between Eddie Root, the Boston rider, and Martin Ryan, who hails from Newark. Ryan won the first heat in 7:26, and Root won the second in 7:11⅘, beating his own mark of 7:19, which he established on Sunday, June 27. In the third heat Ryan won in 7:05, breaking Root's mark made in the second heat.

### Wednesday's Summaries

Louis Kuehl, the Chicago Cycling Club star, won the one-mile open for non-winners. Charles Minnetti, one of the Riverview Cycling Club riders, annexed the two-third-mile point race. Summary:

One-Mile Open for Non-Winners (Amateur)—Won by Luis Kuehl, Chicago C. C.; second, Willie Kell, Chicago C. C.; third, Fred Samlow, unattached; fourth, Andrew Andresen, Conquer A. C. Time, 2:13.

Two-third-Mile Point Race (Amateur)—Won by Charles Minnetti, Riverview C. C., 9 points; second, Kelsey Cleveland, Chicago C. C., 7 points; third, E. Davini, Italo-American C. C., 5 points; fourth, Andrew Andresen, Conquer A. C., 2 pints. Time, 1:20⅘.

One-Mile Brassard Race (Professional)—Won by Bob Diefenbacher, San Jose; second, Floyd Krebs, Newark. Time, 3:30.

Ten-Mile Open (Professional)—Won by Charles Piercey, Australia; second, Lloyd Thomas, San Francisco; third, Francesco Verri, Italy; fourth, Eddie Madden, Newark. Time, 21:04⅘. Lap prize winners, Kopsky, 10; Drobach, 10; Piercey, 7; Thomas, 6, Walker, 5; Rudi-Russe, 5; Anderson, 4; Wohlrab, 4; Lawson, 3; Young, 2; Cavanagh, 2; Verri, 1.

### BOB LAWSON AT 'FRISCO

San Francisco, Cal., June 30.—Bob Lawson is back at San Francisco once more. In a post card received from the veteran cyclist he states that he is immediately going to pedal south.

### TWO STORY BUILDING FOR STORE

Louisville, Ky., July 5.—The Central Manufacturing & Repair Company, which for several years has conducted an exclusive bicycle and accessories store, has leased a two-story building at the corner of Fifth and Walnut streets, where they will continue business on an even more progressive scale. The new store has been repainted, attractive windows have been arranged, and a trim, attractive looking stock of bicycles has just been installed.

On the right side of the store is a raised platform for men's machines, while in a rack suspended from the wall is a complete line of juvenile two-wheelers. Shelves and showcases for accessories are located at the left side of the store. Each bicycle in the windows is separated from its neighbor by means of a brass rail. The manager of the company is Carl G. Ogden, while W. H. Humboldt takes care of all business outside of the establishment.

### MOTOR WHEEL CLUB ORGANIZED

Detroit, Mich.—A club has been formed in this city among owners of Smith Motor Wheels, under the auspices of the Haverford Cycle Co., local sales agents. It is the purpose of the club to have runs at least once or twice a month, or if possible every week, on Sundays. The club is a purely social affair.

### CHAMPION RACES DOUBTFUL

The bicycle championship races which were scheduled to be held at the Panama-Pacific Exposition, August 2-4, may be called off unless some arrangement can be made by the special committee of the National Cycling Association whereby financial guarantees will be assured. If these events are run at all the date will be set some time in October. Nothing definite has yet been settled by the N. C. A. committee.

### VACATION TRIP AWHEEL

San Francisco, Cal., July 2.—Art. Kutz, the speedy young rider of the Southern California Wheelmen, of Los Angeles, has made a vacation trip awheel to this city recently from his home town, in three and one-half days. During the past week he

**Art Kutz**

has been the guest of the New Century Wheelmen. He reported the roads in good condition most of the way. Kutz uses a new model Pierce machine equipped with Vitalic tires which have covered four hundred and seventy-nine miles without a puncture.

### BROWN OPTIMISTIC AFTER TRIP

Buffalo, N. Y., July 3.—Sales Manager Fred L. Brown, of the Pierce Cycle Works, has returned from a ten-days' business trip by auto to Auburn, Syracuse, Albany, Springfield, Boston, Providence, New Haven, New York, Scranton, Binghamton and Elmira, with a fine coat of tan. "All along the line," he said, "there was much evidence that the better grades of bicycles are becoming more and more popular. More ladies' bicycles were noticeable everywhere and especially in Rhode Island. And at one point, a short distance from Narragansett Pier, I saw some neatly clad women in front of a palatial house actually dusting their bicycles. The whole affair was a surprise to me. But on a whole, I might say that, after making this hasty trip to twenty cities, I am convinced that the bicycle business for 1916 will be a big increase over this year."

### NEW BICYCLE STORE OPENED

Washington, D. C., July 5.—Frank D. Hazleton has opened a new bicycle salesroom and repair shop at 901 9th street, N. W., in this city. Mr. Hazleton has for about twelve years been interested in the extensive bicycle business conducted by his father, Edward P. Hazleton, at 429 10th street. The younger Mr. Hazleton has now entered the business on his own account. His location is on a prominent corner in the heart of the motorcycle section.

A line of Tribune bicycles will be handled exclusively. Special tires, made by the United States Tire Co., under Mr. Hazleton's own brand, will be kept in stock, as well as a large assortment of sundries. A well-equipped repair shop, in charge of competent workmen, will be maintained.

In connection with the bicycle business, Mr. Hazleton has secured a sub-agency for the Merkel and Thor motorcycles, under Harry F. Seamark, the local agent for these machines. Motorcycle repair work will be handled in the repair shop and a stock of parts kept on hand, but the motorcycle branch of the business will be kept subordinate and the bicycle line will be featured. Special attention will be paid to the commercial bicycle and its uses.

### LIVELY MARKET FOR MOTOR WHEEL

Milwaukee, Wis., July 3.—According to a recent announcement from the factory of the A. O. Smith Company, the month of June has shown an increase of sixty per cent. in Smith Motor Wheel sales over the preceding month. Nearly five times as many attachments were sold in June as in April and two and one-half times as many in June as in the months of April and March combined, according to the factory bulletin.

Up to the first of the current month, seven hundred and seventy-nine dealers had been assigned agencies, which is an increase of one hundred and fifty-two over the figures as of June 1. There are, the Smith officials assert, 10,624 of the bicycle boosters contracted for by the agencies.

### QUINCY'S (ILL.) OLDEST RIDER

**Capt. W. H. Gay, 80 Years Old, Rides His Bicycle Every Day**

### CALIFORNIA BIKE SALES BRISK

Los Angeles, Cal., July 2.—C. Tobey, prominent rider of the Pope in this season's long distance speed events in the vicinity of Los Angeles, is now on the road selling accessories for C. L. Smith, Los Angeles distributor. He has just returned from a trip making Fresno, Bakersfield and other towns in the San Joaquin Valley, where he reports bicycle business making good progress from sales to ranch hands working on fruit which is just coming in.

### MESSENGERS ON BIKE RUN

Pottsville, Pa., July 3.—Five messengers connected with the Postal Telegraph Company's branch office in this city embarked on a run last Sunday. Each of the five own bicycles, which have seen some wear in the company's service. The youngsters started early on Sunday morning, headed for Reading, arriving there after four hours of pedalling over a distance of forty miles.

### AGENTS DOUBLE BUSINESS

Buffalo, N. Y., July 2.—The Pierce Cycle Works report that they have received a repeat order from their Salt Lake City and Denver agents, which means that these Pierce agencies have doubled the amount of their normal trade.

### QUINCY WILL HAVE CLUB

Quincy, Ill.—The many bicycle riders in this city are going to organize a club. Captain W. H. Gay, the oldest active bicycle rider in Quincy, is one of the chief boosters.

# The Dealer and the Gasoline Problem

## A New Angle on Efficiency in the Motorcycle Agency

SEVERAL times of late, in quarters where such matters are given the keenest possible consideration, the question has been raised—Is it a good business proposition for the motorcycle dealer to sell gasoline? and there is an increasing inclination to believe that in many cases the query can be safely answered in the negative. That there are the usual "two sides" to the situation must be admitted, but developments tend to prove that the average motorcycle agent's profits from handling gasoline are not in proportion to the additional risk he assumes and the time and energy necessary to cater to gasoline buyers.

It is argued that the gasoline sales in themselves have never given a motorcycle dealer a profit, and that the business in accessories and parts brought in the shop through riders who come to have their tanks refilled is negligible. Such sales of accessories, say those who have given the matter much thought, would come to the dealer in the regular course of business—even though he never sold a drop of gasoline. Or would they? There appears to be room for a reasonable doubt on that point.

**?**

**Considering the increased fire risk, the higher insurance premiums charged, the time devoted to handling it and the trifling profit, does it pay a motorcycle dealer to sell gasoline**

**?**

It cannot be denied that many riders, preparing for a trip, discover their need of minor accessories and supplies while having their tanks refilled at the agency, and a dealer who refused to handle gasoline might force into the hands of his rivals quite a number of motorcycle sales during a season. Against this claim it is argued that the loss of such casual sales would be more than offset by the increased business that would result from the concentration of the dealer and his staff upon the sale of motorcycles—their chief aim, after all.

One of the strongest points raised against the wisdom of selling gasoline from a motorcycle agency is that the increased fire risk and the higher insurance premiums are not in proportion to the value of the gasoline business and the accessory sales incidental to it. During the present season several serious fires in motorcycle agencies have been traceable to careless handling of gasoline, and while fires might have resulted under any conditions it is probable that the loss sustained was considerably increased through the presence of quantities of gasoline. Where the gasoline is kept in a sunken tank, entirely apart from the building, there is the item of expense for the tank and its installation, not an inconsiderable one at all.

Then there is the matter of competition. Some of the big companies are now quoting gasoline prices lower than the motorcycle dealer—operating on a limited scale—can possibly cope with. At the big gasoline stations it is possible to obtain gasoline—or something that passes for it—at 10½ cents per gallon, a price below the rock-bottom figure that any motorcycle dealer can sell at and still avoid an outright loss. It follows that the bulk of the gasoline trade will go to the big stations, and that the motorcycle agent will get only the fag end—which fag end boosts his insurance premiums just as high and causes him as much annoyance as if he were doing all the gasoline business in his neighborhood.

ANOTHER argument, not the strongest but still worthy of thought, is that the motorcycle dealer who handles gasoline is called upon to sell to quite a few automobilists during the season. There is no possibility that this class of business will result in any incidental accessory or supply sales, and all the dealer has to show for the attention given the automobilists is the slight margin between the cost and selling prices of the fuel, which is almost too small to consider.

At the bottom of the present arguments, however, is the primary contention that the gasoline business is not worth while because it requires time and attention which ought to be devoted to the sales of motorcycles. That's the basic idea. Among the various reasons why the motorcycle dealer is not justified in selling gasoline, say observers, none ranks in importance with the fact that a dealer in order to be successful needs every waking moment for the upbuilding and general advancement of his trade.

FIGURES collected in several large Middle Western cities of late show that few motorcycle dealers regard the gasoline business as anything but a nuisance. When asked why they continue to burden themselves with it season after season they almost invariably answer that a motorcyclist who had to go elsewhere for his fuel might take the same route when he wanted repairs or accessories.

What are the rock-bottom facts in the situation? Is the sale of gasoline in a motorcycle agency an asset to the dealer—or any out-and-out liability?

**Attractive Interior of Emblem Agency of A. P. Strogonoff, at 107 State Street, Syracuse, N. Y. The Proprietor Prides Himself on the Appearance of Both Shop and Salesroom, as the Photograph Indicates**

## RISDEN'S DANCES A HIT

Los Angeles, Cal., July 2.—Once again C. Will Risden has shown how ingenuity and good fellowship and the spirit of service keep "the finest motorcycle store in the world" busy as a real producing asset. Risden's monthly dances have assumed a place of impotance in Los Angeles entertainments. The first was an experiment during National Motorcycle Week and was such a success that another was held last week. Hereafter there will be one on the last Wednesday of each month.

Risden's store, with the floor cleared and waxed and the counters laden with refreshments, makes a fine place for a dancing. At the last dance, there were enough Indian riders of both sexes to fully occupy the spacious floor in every dance. Mr. Risden is offering a prize to the lady who first wins 2000 points in an interesting contest. Points are awarded by a committee after each dance night under the following system of rating: Prettiest girl, first, 150, second, 75, third, 50; neatest and best dancer, each three similar sets of awards; most consistent scoring an extra 200; submiting name of a new buyer, 100; bringing in a new buyer registered by someone else, 100; bringing in a new buyer not registered, 200.

## NEW MOTORCYCLE SQUAD

Wilmington, Del., July 2.—A motorcycle squad consisting of four patrolmen and one sergeant was recently created by the board of police commissioners. The new squad will be furnish with 1915 Indian motorcycles, purchased from John H. Minnick, the local Indian agent, and will be in charge of Sergeant Joseph A. Davis, U. S. A., an officer in the Delaware militia and physical instructor on the board of police examiners.

## TO OCCUPY BIG BUILDING

Philadelphia, Pa.—Alterations are being made to the property at 503 Market street, this city, which will be occupied by the Haverford Cycle Co., Excelsior motorcycle distributors, when finished. It is planned to consolidate the three stores in this city into the new building which is six stories high. The stores which will be abandoned are located at 329 Market street, 829 Arch street, and 5134 Market street, in West Philadelphia. The new building starts off Market street and runs back about 60 feet, where it turns into Fifth street. Several departments will be established: One for the sale of the Excelsior, one for the Smith Motor wheel, and one for accessories. A repair shop will be erected.

## SIX H-D DEALERS MARRY

Chicago, Ill., July 4.—Six Harley-Davidson dealers in and around the Windy City were married last week. The first one to take the daring step was H. Hanke, of the Northwest Side; then came R. Dolezal, of Dolezal Bros., and C. Vesely, of the Vesely Bros. Not to be outdone by this trio, A. Henderlong, of Crown Point, Ind., followed suit, as did E. A. Flaring and F. Beck, of Joliet, Ill. Cupid, however, found it an absolutely useless job to get C. H. Lang, the Illinois State distributor, entangled in his meshes.

## TO MAKE OUTING ANNUAL ONE

Beloit, Wis.—The success of the first annual outing of the motorcycle dealers of southern Wisconsin and northern Illinois held in this city recently has made the promoters determined to make the affair an annual event. The meeting this year was preceded by a parade through the main streets of the town before going up the river to Yost's Park. It is proposed next year to extend the invitation for the outing over a larger territory and possibly interest dealers in the lower corner of Iowa to attend.

## MOTOR WHEEL IN MOVIES

Los Angeles, Cal.—A Smith Motor Wheel played a prominent part in a comedy entitled "A Motor Cop Constable," which was recently "filmed" by a local moving picture manufacturing company. The scene in which the Smith Motor Wheel made its appearance showed a young lady motorwheeling at a brisk pace after a speed fiend in an automobile.

## NEWARK SCHICKEL AGENT

Newark, N. J., July 3.—Chas. Krebs, the local Henderson and Pope agent, has added the Schickel to his line. He has been kept busy by the local gasoline knights giving demonstrations on the Schickel since the agency was placed.

# DEALERS' SECTION

### CELEBRATES 20TH ANNIVERSARY

Frank B. Widmayer, Flying Merkel agent, whose headquarters are at 2304 Broadway, New York, recently celebrated his twentieth year in business. Widmayer started in a store three doors from his present establishment in the days of the bicycle boom and was the first Indian agent in New York City. His place was the headquarters for the New York Motorcycle Club and its successor, the M. T. C. of New York. With Amos Shirley and Tom Sixsmith, Widmayer forms the veteran trio of the Manhattan cycle dealers.

### SALES COMPANY IN ACCESSORY LINE

Manager Al Graves, of the Harley-Davidson Sales Company of New York, with headquarters at 533 West 110th street, announces that the firm has entered the supply business on an extended scale and has issued an attractive catalogue. One of the features of this new extension of the sales company's endeavors is a credit department, which provision for foreign sales are made. Since issuing the catalogue, Graves and his assistants have been kept busy carrying the orders, as well as selling Harley-Davidson machines.

### MECHANICAL HORNS BIG SELLERS

Louis Goldsmith, Yale and Indian agent, at 4 St. Nicholas avenue, New York, finds the greatest demand among accessories this year is the mechanical horn line. In one week recently he disposed of thirty-three signals of this type and was obliged to turn odnw several additional orders, owing to inabolity to get delivery on short notice. The repair department which Goldsmith installed at the beginning of this season has proved a good money-maker, and the mechanics are kept busy for the full time each week.

### DEALERS INCORPORATED

Middletown, Ohio.—The Butler Cycle and Electric Co. has been incorporated with a capital of $10,000 to act as agent for motorcycles and do repair work. The incorporators are J. A. Pratt, Gordon Gage, E. C. Speier, H. D. Riley and E. Reed.

### POPULAR SALESMAN DIES

Chicago, Ill.—John Nicoll, aged 64, who was until recently a salesman of the Excelsior General Supplies Company, died recently. Speaking of the keen grief which Mr. Nicoll's sudden death has caused among his many friends, F. W. Grubb, manager of the Excelsior company, said: "John was one of the best liked men in the trade and esteemed very highly in our organization. His death is a great loss, for he was not only liked for his personal qualities, but also for the sincerity and conscientiousness which he showed in his work."

Stuart Slosson, special representative of the Firestone Tire & Rubber Co., in San Francisco, has been called to Los Angeles by the illness of his wife.

### THREE-SPEED MODEL IN DEMAND

T. J. Sixsmith, the veteran Excelsior dealer, at 203 West 100th street, New York, finds that the biggest demand for this make is the "15-3," or three-speed twin mdoel. Sixsmith's storage space is getting too small for his customers, and it is rumored that he will take over the store adjoining his present quarters in order to care for the increasing number of patrons.

### VALLEJO CYCLONE AGENT

San Francisco, July 3.—Ludenclos & Henry, Northen California distributors for Cyclone motorcycles, have appointed W. Welch, of 932 Capitol street, Vallejo, as their agent at that place. Mr. Welch is an expert mechanic and an enthusiastic motorcyclist, with wide acquaintance in the navy yard city.

### MUDD BECOMES SALESMAN

Washington, D. C., July 5.—Thomas N. Mudd, who for many years has been connected with the sport of motorcycling in this city and has been identified with the local bicycle trade, has closed his store at 824 9th street, and accepted a position with Harry F. Seamark, local agent for the Merkel, Thor and Emblem motorcycles.

### PITTSBURGH DEALERS PICNIC

Pittsburgh, Pa.—Pittsburgh motorcycle dealers will give a picnic for the riders in the near future at Alameda Park, near Butler, Pa. The date has as yet not been definitely decided upon.

## British Sales Are Still Fairly Steady

LONDON, ENG.—One would naturally think that in these strenuous times, when England is fighting for her very existence, that the motorcycle trade, with the exception of a few manufacturers who are working on War Office contracts, would suffer. Such, however, does not seem to be the fact. One sees on a fine Saturday afternoon or Sunday, more motorcycles on the road than ever before, and the number of red Indians about nowadays is remarkable.

The 1915 Indian, with the three-speed gear, seems to have got on wonderfully in this country this year. I think the reason for this is that W. H. Wells, the London manager of the Hendee Manufacturing Company, has made a study of the requirements of British motorcyclists; the Indian is equipped with so many British fitments, such as tires, chains and saddles. The general design of the machine is also on the lines of the British ideal.

Last Sunday I took a long trip on my two-stroke lightweight amongst the concentration camps within a 50-mile radius of London, and solved the mystery regarding the wonderful demand for motorcycles that exists at the moment. Here are the facts: Amongst our army quartered in England are hundreds of young men of wealth and position. They may not be called to the front for several months. They may have the means to purchase a car, but it is not a handy vehicle to store, and here is where the motorcycle comes in. It is just the vehicle they require to run about camp on, and, when they get leave, to go home and return on.

What will happen after the war is over, no one can foresee, but there is certainly a feeling amongst the motorcycle manufacturers that even if the automobile industry suffers, the motorcycle trade will be more prosperous than ever.

### COVERED 8,000 MILES

Knoxville, Tenn., July 2.—L. C. Wilson, of Asheville, N. C., and his wife recently entered Knoxville on a 1915 Harley-Davidson machine which was equipped with a sidecar. Mr. Wilson is field man for the Southern branch of the Harley-Davidson Motor Company, of Milwaukee, and covers North and South Carolina, Georgia, Alabama and Tennessee from his headquarters at Asheville. Mr. Wilson had been on the road for thirty days when he reached Knoxville, and had covered a very intricate network of roads, including macadam boulevards in North Carolina, sand in Georgia, and rocks and mud in Tennessee. The trip covered a total of nearly 8,000 miles.

### WILL FIGHT ROAD OILING

Louisville, Ky., July 5.—Riders and automobilists of this city are up in arms against the municipal authorities because of the present system of road oiling. The boulevards and a number of important business streets are badly flooded with oil which is not evenly distributed and stands in pools. Last year the Louisville Automobile Club prevailed upon the city officials to oil but one-half of the road at a time and to permit the oil to soak in before the other half of the road was oiled. This plan was found to be the best yet tried in this city, but for some reasons the city is not using this scheme now.

## Classifying Trade Workers in the Racing Game

EDITOR: May I have the privilege of a few lines in your paper in which to discuss the proposed change in the F. A. M. constitution, suggested by the Capital City Motorcycle Club of Sacramento?

I feel with the framers of this change that the present classification of riders into but two classes, the "amateur" and "professional," is not wholly fair to the men employed at motorcycle work who, however, have never competed in any motorcycle event for a cash prize. But it seems to me that the change offered to correct this evil, does not correct it; it simply divides the professional class into two classes—those who can speed and those who cannot—which is wholly unnecessary. What is needed, is a special class for riders who, though they be employed by motorcycle dealers or in motorcycle factories, have no desire to take up motorcycle racing as a profession.

To create another class of riders, basing the subdivision on the speed proclivities of the men included, is simply compounding the work of the chairman of the Competition Committee, who already has subdivided both the "amateur" and "professional" into three distinct classes.

I trust that at the convention the matter will be fully threshed out and that the suggested change of the Capital City Motorcycle Club will be so altered that it will do some real good, and not make harder work for our friend, John Donovan.

### FIRST TOUR FROM HALIFAX

Halifax, Nova Scotia.—The first real motorcycle tour held in this part of Canada was conducted on Dominion Day, July 1, when 17 riders took part in a run from Dartmouth to Middle Musquodoboit, a distance of 81 miles. The objective of the tour was a picnic park, and the party arrived at the resort about noon, after averaging 20 miles per hour over roads in fair condition.

Of the 17 participants, nine came from the city, seven from Dartmouth, while the last came from Elderbank. The route was well "shared" all through so that no difficulty was had in keeping to the course. All enjoyed themselves immensely.

### STANDARD WELDING AGENTS

Toronto, Ont.—The K. & S. Auto Tire Company, of 571 Yonge street, has been appointed Canadian representative for the Standard Welding Company, of Cleveland. A complete assortment of Standard welding products will be carried in stock at the Toronto store, as well as in the branch at 4 Park avenue, Montreal. The K. & S. firm is also pushing the sale of tires in Canada.

### FIGURE IN PUBLIC DISPLAY

Toronto, Ont.—One of the recent big social events held in this city was a combined motorcycle and automobile decorated display in Dickson Park under the auspices of the Daughters of the Empire, the Canadian Ladies' Patriotic Association. The machines were first paraded before the officials of the ladies' organization, after which prizes were awarded. About 20 motorcycles were shown by their owners.

### TO REACH NEW YORK IN JULY

Saskatoon, Sask.—Bob Franks and George Morley, the Harley-Davidson sidecar outfit, who left this city for a tour to New York, expect to reach the American metropolis about the middle of July. During the first two weeks of their trip they encountered intermittent rain and therefore found the roads through Saskatchewan North Dakota and Minnesota in the worst of conditions. Their average so far, however, has been 100 miles a day. On reaching New York both men will take ship to England to join a motorcycle corps.

### WANT RACERS IN BROCKVILLE

Brockville, Ont. — The Commercial Travellers' Association of Brockville, has extended an invitation to motorcycle racers to participate in speed contests at the fair grounds oval on Civic Holiday, August 2. There will also be bicycle races and other [illegible]

## SPENCER HOLDS CHAMP. TITLE

### Toronto Cyclist Takes Premier Amateur Position at Dominion Day Meet, July 1.

WATERLOO, Ont.—Art. Spencer, of Toronto, the Dominion's premier bicycle speedster, now holds the undisputed title of Canada's amateur champion. At the thirty-fifth annual championship races of the Canadian Wheelmen's Association, held in this city on July 1, he won the half-mile, one-mile and five-mile distances. A stiff handicap in the two-mile event kept Spencer from getting better than fourth place, R. Goldsmith, Salem B. C., coming in first in this event. A feature of the program was a quarter-mile exhibition by the five-year old son of Herb. MacDonald, one of Toronto's veterans. Young MacDonald performed well for a youngster.

Spencer, who is a member of the Riverside Athletic Club, covered the half-mile in 1:12, and the mile in 2:37⅖. His time for the five-mile championship event was 12:36⅘. Goldsmith's time for the two-mile handicap was 4:26⅕. C. Coleclough, of this city, was victor in the one-mile novice, the opening race on the card, his time being 2:24⅕. With Bounsall's victory in the mile for 2:35 class men, in 2:25⅕, the Riversides scored heavily over the other competing clubs as regards points. About 4,000 spectators witnessed the races, many of these coming out on a special train chartered by the Riversile club from Toronto. In addition to the speed events, a baseball game between teams from Berlin and Waterloo, a band concert and a meeting of the Canadian Wheelmen's Association rounded out the day. The bicycle fans who saw the events were well pleased.

The summaries:

One-Mile Novice—C. Coleclough, first; H. Bounsall, second; L. Scarletto, third. Time, 2:24⅕.

Half-Mile Championship—Art. Spencer, Riverside B. C., first; George Watson, Riverside B. C., second; Herb. MacDonald, third. Time, 1:12.

One Mile, 2:35 Class—H. Bounsall, Riverside, first; E. Penny, second; L. Scarletto, third. Time, 2:25⅘.

One Mile, Boys under 15—Patsy Brown, Toronto, first; W. Taylor, Waterloo, second; W. Bailey, third. Time, 2:21⅕.

One Mile Championship—Art. Spencer, first; G. McMillan, Toronto B. C., second; Norman Webster, Riverside B. C., third. Time, 2:37⅘.

Half-Mile Boys, Local—G. Gross, first; W. Dierlamm, second; G. Plantz, third. Time, 1:19⅗.

Five-Mile Championship—Art. Spencer, first; Fred McCarthy, MacDonald B. C., second; Gordon McMillan, third. Time, 12:36⅘.

Two-Mile Handicap — R. Goldsmith, Salem B. C., first; W. Taylor, second; R. Martin, third. Time, 4:26⅕.

### BERRY BROTHERS MOVE

Vancouver, B. C.—Berry Brothers, of this city, have moved into a more central location on Dunsmuir street, near Seymour. The new quarters have better facilities than those previously occupied, and the effect has already made itself apparent by the increase in custom.

### CYCLE CORPS NUMBERS FORTY

Vancouver, B. C.—The Vancouver Volunteer Cycle Corps, organized for home defence, has a membership of over 40 at present. Tri-weekly drills are held, and they are always well attended, gun drill proving particularly attractive. Applications for membership in this organization are coming in regularly, but more recruits are being called for.

### MOVIE STAR IN ACCIDENT

Orangeville, Ont.—Miss Pauline Bush, one of the best known actresses in the Kalem moving picture company, was thrown from her motorcycle recently while taking part in a spectacular ride. Although injured about the head and shoulders, she quickly recovered and later repeated the scene without the spill. Miss Bush in private life is Miss Pauline Newport, and lives at 61 Lansdowne avenue, Toronto.

### SOLD ANOTHER TO TELEPHONE CO.

Vancouver, B. C.—W. H. Morrison, who presides over the Vancouver tepee, has just sold another 1915 Indian to the British-Columbia Telephone Company. This machine is to be used by the "trouble shooter" in the Cloversdale district, and makes the 17th Indian in the company's service.

### SIDEVAN FOR GROCER

Cornwall, Ont.—This city has its first "live wire" grocer in the person of G. W. Armstrong, who recently adopted a sidevan outfit for delivering his goods. The machine is an Indian and the van of the same make. Agent, W. O. Relyea supplied both.

### THIRD SHIPMENT BOOKED

Vancouver, B. C.—Haskins & Miller, who are handling the Smith Motor Wheel for Vancouver and vicinity, have already disposed for their second shipment from the Milwaukee factory, and are all ready to deliver the contents of the third shipment as soon as it arrives. At present there are over a dozen of the attachments in use in the city and district. The bicycle department, in conjunction with motor wheel, has experienced a very busy season, as almost every buyer of the latter device purchases a cycle at the same time. Second-hand bicycles have been much in demand.

Digitized by Google

# Another Friend of the Lightweight

EDITOR **Motor Cycle Illustrated:** Nothing that I have seen in your columns recently has pleased me more than Mr. Alfred H. Bartsch's article on lightweight motorcycles, which appeared in the June 17 issue. I agree with the author thoroughly in his statement that the lightweight machine is about to launch its claim for a large share of the popularity which the big twin has enjoyed for some years.

I feel sure that there is quite a large market for these handy and economical mounts here as there is in Europe, where they have almost displaced the more powerful and heavier machines for solo riding, and are frequently used with light sidecars. I would like to offer a few suggestions as to what constitutes a really handy, easily started and controlled lightweight motorcycle.

The motor should be of 22 cubic inch capacity with horizontally-opposed cylinders. There should be two cranks, 180 degrees apart, each carrying a big end. The crankshaft should run on ball-bearings, while the big and little end connecting rod bearings should be plain. Such a motor can be practically perfectly balanced, thus ensuring smooth running and long life to transmission and tires.

The carbureter, placed centrally between the cylinders, should have air and gas levers on the right handle bar. Transmission should be by chain from motor to countershaft, with final drive by V-belt. A two-speed gearset incorporating the clutch should be in the countershaft position. Ignition of course should be by high-tension magneto.

Lubrication need only involve a drip-feed to crankcase with splash for the motor. The frame of course would be sprung front and rear. Wheels should be 26 inches diameter with 2½-inch tires and the weight in running order 140 pounds. I am sure that this mount could be sold for $160.

I have a machine of this type at present, which I use every day, no matter what the weather. It gives the utmost satisfaction. The gear ratios are 5½ and 8½ to one, making the mount capable of climbing any hill as well as of very slow running in traffic. I consider this the ideal machine for the business or professional man who has to make a number of short journeys every day, mostly in cities where a big heavy twin would be very unhandy.

With a machine just as described, one can get along a busy thoroughfare much quicker than either a heavier mount or an automobile, owing to its exceptionally easy steering and control. The machine is capable of making 45 miles per hour and has a gasoline consumption of 110 miles to the gallon. I hope to see further news on this most interesting topic in your valued paper.

Astoria, N. Y. DAVID P. ROBERTSON.

## RECENT TRIP INTO SIERRAS

Fresno, Cal.—A party of four Fresno people have recently taken a sidecar trip from this city into the Sierras in Indian outfits driven by P. K. Carmine and A. B. Knapp. The quartet were away from Fresno for three days, carrying with them their own cooking utensils and food. They found the roads in good condition, and were able to made a distant point in Kings River Canyon, being the first sidecarists on record to have penetrated the Sierras to that point.

The travelers proceeded to the General Grant National Park, down to Hume, and out onto the state highway beyond, to the end of that road, where they followed the Kanawyer trail. In reporting their journey they were able to give some valuable information to the autoists and motorcycle riders of Fresno. They found that all dangerous grades were eliminated, and that the gradients were never more than eight per cent. In Grant park they encountered drifts of snow about three feet deep, which flanked the roadway, the road itself having been found for the most part hard and dry. From the many high points of vantage along the route Fresno tourists were able to get some inspiring glimpses of the beautiful and impressive country.

## LARAMIE CLUB ENTERTAINS

Laramie, Wyo.—The Laramie M. C. acted as host to the Cheyenne contingent and the Motor Club of Northern Colorado on Sunday, June 27. The two visiting organizations rode into this city and were met at the outskirts by members of the local organization.

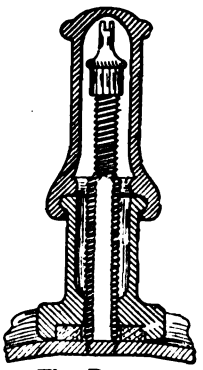
# A TRIO OF INTERESTING PATENTS

### TIRE VALVE PROTECTOR

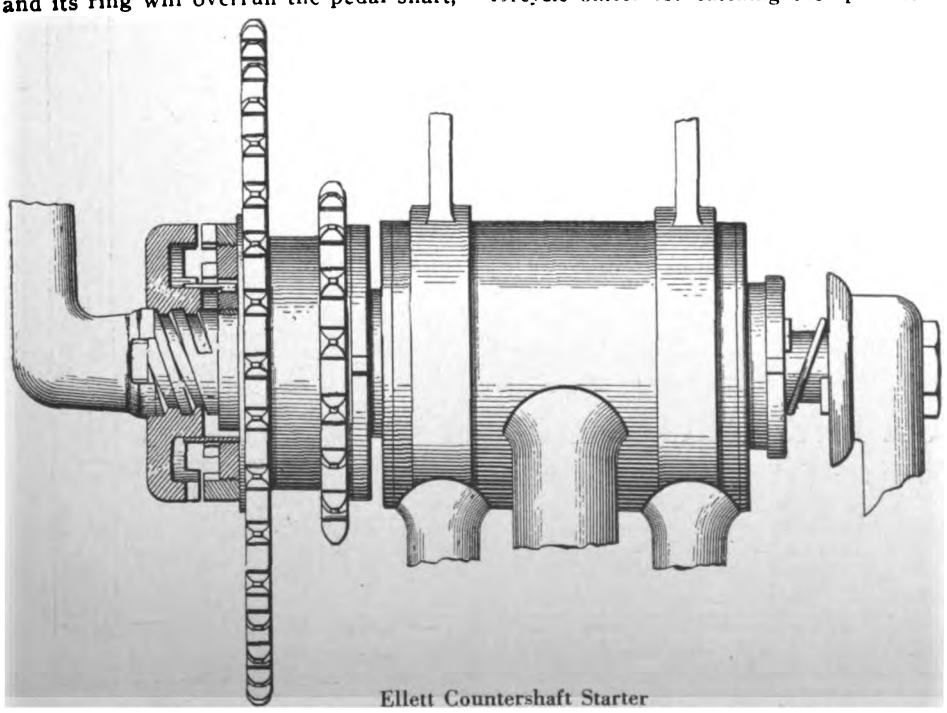
In order to protect the stem of a tire valve, George M. Stadelman, of Akron, O., has invented a cap which will cover all parts of the same, yet will allow of ready access to the cover for inflating. This cap consists of a lower section fitting over the valve nut close to the rim and having an upper rounded rim. Over this fits the hooked end of an upper cap or member, this being of a flexible material so as to be removable by pulling off. The arrangement of both members keeps the valve from dust as well as from shocks. The patent is No. 1,141,219 and has been assigned by the inventor to the Goodyear Tire & Rubber Co., of Akron, O.



The Protector

### COUNTERSHAFT STARTER

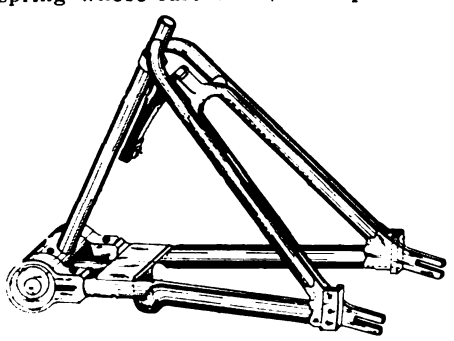
Frederick S. Ellett, of Elmira, N. Y., well known as the inventor of a number of devices used by the Eclipse Machine Company, has been granted a patent on a pedal starter. This device, which is to be fitted on the countershaft, has a quick-pitch, square thread screw formed on the pedal shaft and a collar meshing with the same and having lateral dog-teeth. The primary drive sprocket has attached to it a ring with dog-teeth corresponding to those on the collar. On the rider pedaling forward, the collar is moved inward along the pedal shaft and its dog-teeth mesh with those on the ring, subsequent forward impulses causing the motor to be revolved by the pedals. On the motor starting, the sprocket and its ring will overrun the pedal shaft, causing the collar to recede and disengage the dog-teeth. A spring on the opposite end of the pedal shaft assists the engagement of the teeth. The patent is No. 1,141,787.



Ellett Countershaft Starter

### COMPOUND SPRING FRAME

A spring frame incorporating a rigid rear fork structure and floating fork structure is the subject of patent No. 1,142,344, issued to Frank Mackey, of Newark, O. The floating structure is pivoted to a cross-member near the front of the main forks and its motion is guided vertically by pieces attached to the fork-ends. The stay portion is attached to the end of a leaf spring whose butt in turn is attached to a single leaf spring whose further end clamps to the seat mast under the saddle. Provision is made for attaching a tandem seat and frame on the rigid structure, the frame being fitted with its own springing device.



Mackey Spring Frame

### MAY ADD MOTOR COPS

Watertown, N. Y.—It was learned recently on good authority that the village fathers were considering putting on a motorcycle officer for catching the speedsters.

### ASCENDED TO MOUNTAIN LAKE

Roanoke, Va., July 1.—What is claimed to be the first motorcycle trip of 1915 to Mountain Lake, Va., was made by Messrs. Ford, Littlejohn and Martin, of the Dixie M. C., on Sunday last. The lake is over 4,000 feet above the surrounding country and measures over a mile in length. It was necessary to cross three mountain ranges to get to it from Roanoke.

Mountain Lake is only a short distance from the top of Bald Knob, recently ascended by Martin on his Indian. Time did not allow the trio to go up the Knob after their circuit of the lake, so they left for Roanoke, enjoying the four and a half mile coast from the lake to the level country below, before riding the mountains homeward.

### TENTATIVE PHOENIX PROGRAM

Phoenix, Ariz., July 2. —A tentative program has been drawn for "Motorcycle Day," November 17, at the Arizona state fair. The program includes mile time trials, ten-mile race for private owners, fifteen miles open, ten miles for road equipped machines, twenty-five miles for the Arizona championship, a ten-mile relay and 100-mile open race. It is for the latter that the big money will be offered. The fair commission has guaranteed purses aggregating $1,000.

### TO HAVE MOTOR COP AGAIN

Wausau, Wis., July 4.—The common council has appointed a motorcycle policeman to serve permanently in the detecting of traffic regulation disrespect. The plan was tried out here some time ago and proved a big success and resulted in great improvement in the manner of driving within the city limits and observance of the rules of the road. Lack of finances caused the motorcycle patrol to be dropped and conditions on the highways immediately took a turn for the worse.

### OLEAN M. C. ENTERTAINS

Buffalo, N. Y., July 4.—Forty members of the Buffalo Motorcycle Club rode to Olean today, where they were the guests of the Olean M. C. at their summer cottage, which is located on a small lake just outside of Olean, over the 4th and 5th. Besides the water sports, a baseball game was played between the two clubs.

### NEW PORTLAND M. C. OFFICES

Portland, Ore., July 3.—The members of the Portland Motorcycle Club have elected O. L. Day president, to succeed A. L. Welch. A. C. Knight, who received the next highest number of votes, was chosen vice-president. Mr. Day has been vice-president for a year, and Mr. Knight secretary for three years.

### FORT COLLINS HAS CLUB

Fort Collins, Colo.—The Motor Club of Northern Colorado was recently organized in this city, and now numbers 50 active rider-members. There have been a number of applications for admission to the ranks of the club and these are being acted upon as fast as the membership committee can handle them.

# STURDY STUD Oilproof MOTORCYCLE TIRES

These tires we sell DIRECT. The goodly saving in jobber's profits we split—half comes off the price; half goes for higher quality.

That's how it comes that these splendid tires are sold at such remarkably low figures—considering their demonstrated service.

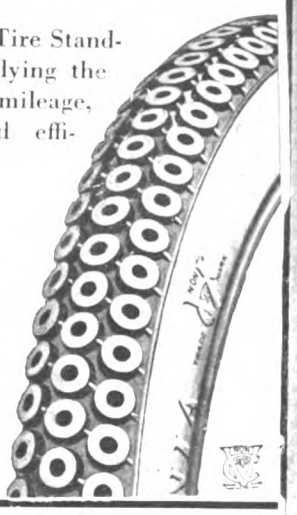
**Oilproof Guaranteed 4,000 Miles**

# VACUUM CUP Oilproof MOTORCYCLE TIRES

Built up to V. C. Auto Tire Standards throughout, embodying the same super service in mileage, oil proofness, non-skid efficiency.

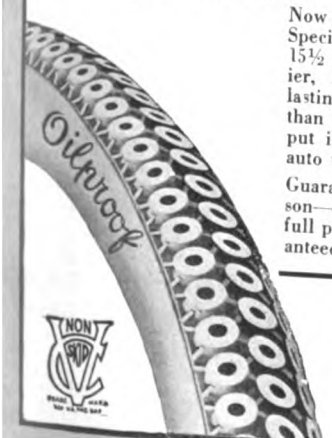
Guaranteed 5,000 miles—and invariably averaging nearer double that distance. They've set a new high mark for low upkeep.

Remember—the Vacuum Cup Tread saves you many a spill on the slippery pavement.



# VACUUM CUP Red Oilproof Tread BICYCLE TIRES

Head and shoulders above the general run—tires that make you proud of your bike.



Now made with the 1915 Special Sea Island Fabric 15½ oz.—a fabric heavier, stronger and more lastingly puncture proof than that most makers put into their Ford Size auto tires.

Guaranteed one full season—else returnable at full purchase price. Guaranteed oilproof.

# ★THREE★STAR★ LINE OF BICYCLE TIRES

Three distinctive quality grades; three popular prices; three different styles of fancy tread—

**Sturdy Stud**
**Tripletread**
**Success**

No matter how particular you are: no matter what your tire preference may dictate—you will find it in one of these tires. Have your dealer show you—and find complete satisfaction.

# Model H-15

# THE LIGHT-WEIGHT CHAMPION

## PRICE $150

**With 3-Speed Gear Price $195**

Thousands of people want a Motorcycle for Business purposes as well as pleasure.

They do not care for excessive speed but require simplicity of construction, ease of control and absolute reliability.

To this great market Model H-15 readily appeals.

By using metals of the highest grade, we save in weight, and the reinforced frame tubes and fork sides give mute evidence of great strength.

The double stem handle bars give a feeling of security well worth having.

Spring forks and seat post with comfortable Persons Saddle dissipate road shocks.

## A FEW FACTS TO BE PROUD OF:

4 to 45 miles per hour as a speed range.

100 to 120 miles with a gallon of gasoline.

7c. per day covers entire cost of operation (in Kansas City).

33c. covered cost of repairs for two years.

## WHAT IT CAN DO HAS A WIDE LIMIT

The *Grocer* takes orders and makes special deliveries which without his Model H would require another team.

The *Plumber* watches twice as many jobs in progress and doubles his income.

The *Carpenter* easily reaches his work in city or country and carries any special tools required.

The *Collector* covers three times the territory he could before and increases his salary.

The *Salesman* carries his sample cases and covers 300 miles per week.

The *Mechanic* reaches home in half the time of other means and lives comfortably in the country.

# The Carburetor That Makes Possible the Efficiency Claims of 16 Manufacturers

Sixteen of the leading motorcycle makers of AMERICA place their confidence in the SCHEBLER carburetor—rely upon the SCHEBLER to establish their claims for economy of fuel consumption, power and speed. The SCHEBLER has never failed to substantiate these claims.

When you consider the wide range of selection possible among American carburetors and realize that these manufacturers have steadily pinned their faith to the SCHEBLER since the sport of motorcycling became a factor in this country, you MUST feel that here is indeed a carburetor of exceptional quality.

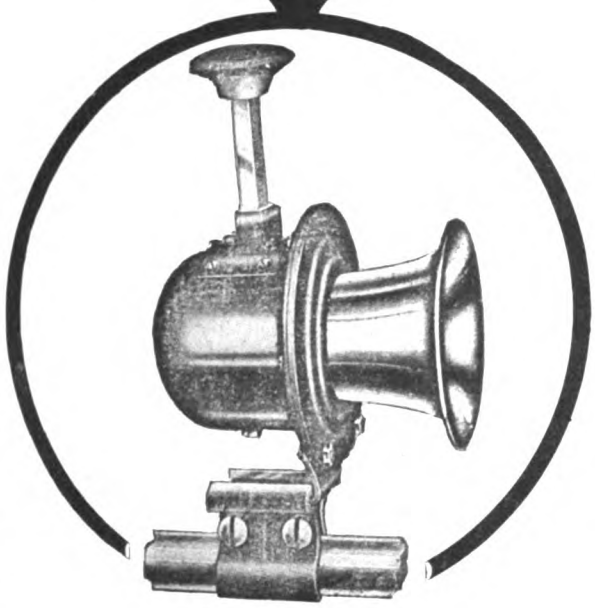
# Warning!



## Clero Horn

When you hear the CLERO HORN you hear the voice of authority. It is a peremptory warning — that MUST be obeyed. When you SEE the CLERO you'll want to own one—before you even know the price. Its handsome, compact, efficient appearance, its instant response to the slightest touch in a blast of deep-toned discord, its total absence of complicated mechanism—these features appeal to every rider as being ideal.

Then finally, the astounding price! $3.50 for a real, honest-to-goodness automobile range horn, with all gears eliminated —a horn that will last as long as your machine and longer! There's quality in the CLERO—don't ever forget that! It is only because of the stupendous production that we can make the price what it is.

**There are but two moving parts in the CLERO; the plunger is connected to a worm, which turns the large, horizontal ratchet wheel, the teeth of which, touching the diaphragm nipple, cause the sound vibrations. That's all there is to it. Each part is perfectly tempered, hardened and practically unbreakable. We will replace free of charge any damaged or defective parts.**

**The Fitzgerald Mfg. Co.**
**Torrington, Conn.**

**Dealers—The horn that will successfully meet all competition and outsell and outserve all others.** Write us for trade prices.

## $3.50—First and Last Cost

The advertiser wants to know—Therefore mention MOTOR CYCLE ILLUSTRATED.

# WHEN YOU BUY A SIDE CAR

Give the matter the same careful consideration you do the purchase of a motorcycle.

Consider the chassis construction. Whether it be Nickel Steel Drop Forgings throughout as in the PULLMAN, or castings and similar cheap make-shifts.

Note the body construction. Compare the Coach Built construction of the PULLMAN with the other kind.

Assure yourself that the axle is adjustable to meet the tread requirements of different road conditions.

Note the springs both as to construction and material.

Get the experience of the expert mechanics and engineers. They will say PULLMAN every time.

Then ask the owner of a PULLMAN. He will tell you it combines Luxurious Comfort with Light Draft, Durability and Absolute Dependability on all roads and under all conditions.

There are reasons—many of them—that need only to be shown to be appreciated.

Quality Counts, and in designing and building the PULLMAN line, we have aimed only to produce the best that can be built, and hundreds of enthusiastic owners of and riders in PULLMAN Side Cars endorse the success of our efforts.

See the dealer. If he is not sufficiently alive to your interests and his own to carry PULLMAN Side Cars, write us direct and we will give you full details and back up every statement by a practically unlimited guarantee.

## PULLMAN COMMERCIAL CARS

We also build commercial side cars to FIT all lines of business and insure the lowest possible cost of light merchandise transportation.

PULLMAN Side Cars are all the name implies in Construction, Finish, Comfort and Durability.

## THE HARRY SVENSGAARD SALES CORPORATION

**471-473 Woodward Avenue, DETROIT, MICH.**

**F. O. B. Factory $75.00**

Digitized by Google

# "I Like To Sell The Emblem"

"Not only for the profit involved, but for the satisfaction it gives to know that every time I sell an EMBLEM I feel that I am putting another supremely satisfied rider on the road—a man who will always look upon me as his best friend; because I have placed at his command a faithful servant that will never fail him." So says the successful EMBLEM dealer.

**POWER**

The EMBLEM motor has 16 inches more cubic piston displacement than any other motorcycle motor made, either domestic or foreign! Although rated at conservative power figures, repeated tests have proven that the EMBLEM motor generates nearly *twice as much power* as the official figures. Think what this means on hills, or for sidecar use!

**SPEED**

An ingenious improvement in valve action in our 1915 models adds from five to eight miles to EMBLEM speed. Seventy miles an hour is the guaranteed speed of every EMBLEM twin that leaves the factory. A final testing card tells the buyer just what the machine can do.

**COMFORT**

EMBLEM springing has always been the criterion of comfort. The now famous EMBLEM step-starter makes the starting question an easy one. No more tugging and lugging onto the stand. A quick kick downward and off you go. Other features are Clutch Control in Grip, the EMBLEM step-starter, foot-controlled two-speed, hinged mudguard, allowing easy access to rear wheel, etc.

Write for the EMBLEM literature. Dealers are requested to get in touch with us on our wonderfully liberal agency proposition.

# Why Smith Motor Wheel Buyers Are All Boosters

In addition to the wonderful convenience of the Smith Motor Wheel, the pleasure it brings to the owner and its extremely low cost of operation, there are several more reasons why it is so popular. For one thing, it is thoroughly practical, well designed, carefully built and made to stand up. This means freedom from mechanical trouble. Also, the

**Smith MOTOR WHEEL**

**(Detachable)**

**"THE BICYCLE BOOSTER"**

has a high tension Magneto—no troublesome batteries. The Float feed Carburetor means uniform gas feed and economy in gasoline consumption. Non-skid tread, double tube pneumatic Tires means a lot in the way of comfort and efficiency. The Smith Motor Wheel then is, practical, durable, cleanly, wonderfully convenient—and besides all this is the most economical means of fresh air transportation in the world. Riders find this out before they have ridden 50 miles and they "Boost." Boosts mean sales.

The Smith Motor Wheel attaches to any bicycle in 5 minutes—speeds up to 25 miles an hour—runs 100 to 125 miles on one gallon of gasoline and is fully controlled by a small thumb lever attached to the handle bars of the bicycle.
You responsible, well established dealers who have not taken on the Smith Motor Wheel, don't overlook this little profit maker any longer. The season will soon be at its height. Tell us what lines of bicycles and motorcycles are you handling, number sold, etc., and we will make you an interesting proposition.

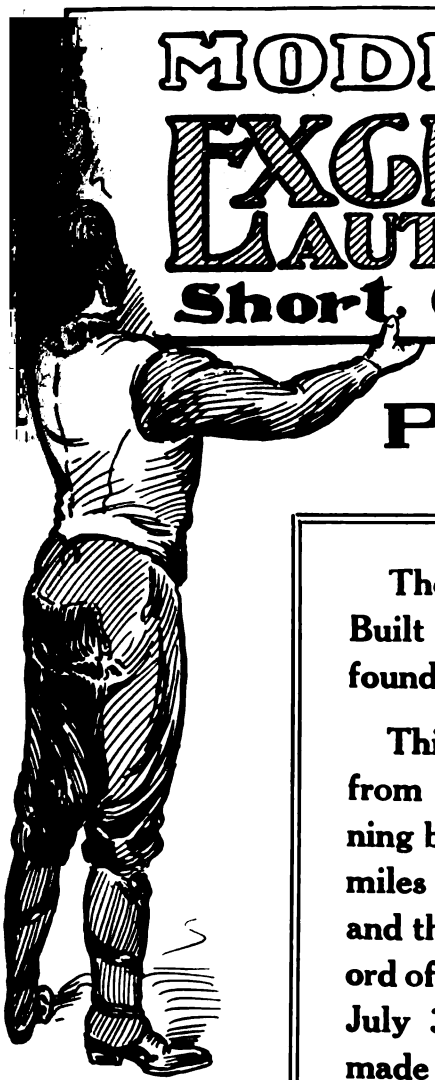
# ANNOUNCEMENT

## MODEL 16-S-C-
## EXCELSIOR AUTO-CYCLE
### Short Coupled Stock



## Price $250.00

100 MILES in 74 minutes 10 seconds.

81¼ MILES in an hour on a dirt track.

The Fastest Stock Motorcycle Ever Built has been developed, tried and found good.

This is the machine that ran away from all competitors at Readville, winning by 25 miles over the second and 50 miles over the third, in a 300 mile race, and that established a new 100 mile record of 74 min. 10 seconds at Dodge City, July 3rd, beating the previous record, made on June 13th, by nearly 14 minutes. The greatest slash ever made in a record for this distance.

Watch this space for full details or write for information.

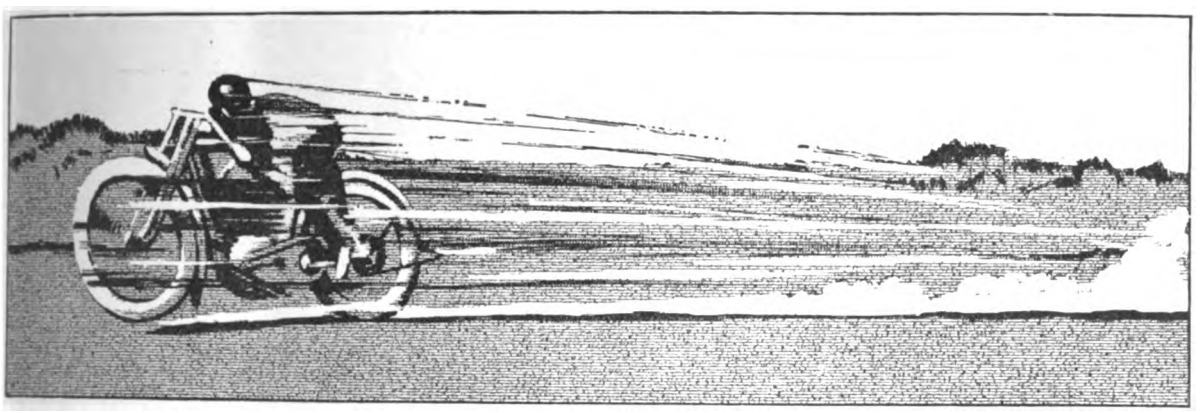
# Some Remarkable Facts Concerning the Harley-Davidson Victory at Dodge City



79 6/10 miles an hour for 100 miles
78 4/10 miles an hour for 200 miles
76 3/10 miles an hour for 300 miles

Harley-Davidsons won 1st, 2nd, 4th, 5th, 6th and 7th.

8 Harley-Davidsons started—every one was running at the finish, and not one experienced any motor trouble.

19 machines of 5 other makes started—14 of these were not running at the finish, and only 1 of these 19 machines was able to finish in the first 7 places.

6 Harley-Davidsons finished in the first 7 places, all 6 breaking the previous world's record.

4 makes failed to place a single machine in the first 7 places.

Taking out time lost for pit stops, Walker's Harley-Davidson averaged 79 3/10 miles an hour throughout the race.

# "Old Sol"

## *"The Name That Spells Lighting Perfection"*

When you see that name on a lamp, be it gas or electric—you know that its owner is satisfied with his lighting service.

"Old Sol" has been a name to conjure with since the sport of motorcycle riding began.

It means solid construction—scientific construction—enduring construction. It means the highest form of lighting efficiency—it means QUALITY.

Therefore, whatever be your needs in the lighting line—whether you require a steady, glowing electric lamp for your bicycle, or a powerful searchlight for your motorcycle—"OLD SOL" has *just* the lamp, with *just* the lighting power that you want—selling at *just* the price you feel you ought to pay.

Hence, if you need anything in the lamp line—go to your dealer and ask to be shown the "OLD SOL" stock. You'll be satisfied.

## "BEE JAY"

### *The Horn They're Talking About*

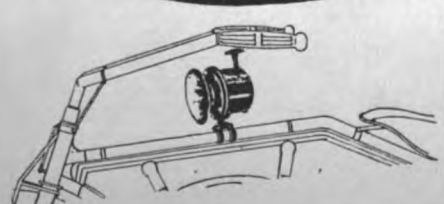
The "BEE JAY" has jumped into favor overnight. It's the horn they all have been waiting for. It contains all the necessary elements of warning signal perfection. Its sound is distinctive and penetrating, its range tremendous. A slight touch of the finger is all that is necessary to produce a harsh discordant call that makes them jump.

Simple—a tool steel ratchet vibrates a vanadium steel diaphragm, producing the sound.

The "BEE JAY" weighs but 21 ounces—very light for its enormous range. It is large enough to give depth to the tone, of just the right size without being flimsy.

Finally, the price is the lowest of any practical warning signal made. You can't get any greater value if you paid twice the price.

Go to your dealer today and ask him to show you the "BEE JAY," You'll want one on sight.



With Top Bar Bracket $2.75

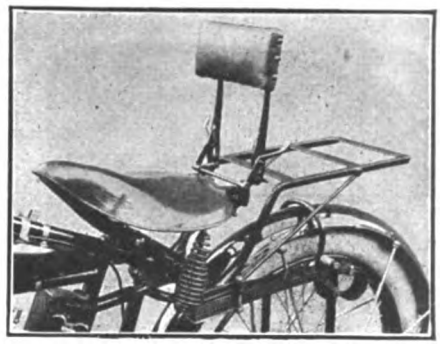
# For All Machines

The Weed Spring Folding Back Rest is made for all machines, and its sensational selling success conclusively proves that it fills a positive need.



Backaches are absolutely prevented by using the

## Weed Spring Folding Backrest

The luxuriously padded leather back supports the rider at exactly the right place, the small of the back. The use of a WEED makes the longest ride over roughest roads an "easy-chair" proposition.

The WEED is strongly made throughout, and its simplicity of construction minimizes the chance of trouble from breakage. The flat spring supporting arms of Backrest take up all surplus jars not absorbed by the saddle and its springing system.

Every rider appreciates the patented folding feature. It allows rider to mount and dismount machine without the slightest interference from Backrest which lies flat at saddle level when folded. Folding accomplished by simple movement of a lever at rear of saddle.

Send for illustrated booklet at once.

# The Morrow Coaster Brake Is Stronger Than it Ever Need Be

The man who rides a wheel equipped with the MORROW COASTER BRAKE is safe. That's the most important essential. There are varying degrees of safety. There's the coasting safety, that means a gradual jolting grind to a halt on a downgrade. There's the sliding, slipping stop on a level road.

But with the MORROW you get **real safety**—the sort that means an abrupt, silent, velvety "hold" on the steepest down-hill—a quick, effective stop from speed on the level path.

Then, too, there is the indescribable delight of the free coasting of the MORROW. One pedal push generally means a block of coasting on the level road. Hills become half as hard to climb—the rider "rests" all the way up.

The dealer who harnesses MORROW quality and MORROW reputation to his stock makes a clean-up in his territory.

# Sacramento Extends The Glad Hand

SUNNY-TEMPERED Sacramento, smiling through friendly vistas of scenic beauty and extending the hand of hospitality in keeping with the sacred traditions of the Golden State, awaits the F. A. M. delegates and riders. For weeks past carefully-chosen committees have labored night and day to perfect the details of the five-day convention program, and the task is finished. F. A. M. members and others who visit the Capitol City during the convention week will find that the work has been well done. Expense has not been spared to give the program variety, and at this writing it is apparent that the visitors will have to establish new records for versatility if they are to avail themselves of all the amusements set forth, and hinted at, in the announcement of the general committee.

Sacramento's motorcyclists have rallied nobly in support of the big undertaking, and the business men of the city, inspired by the Chamber of Commerce, have also been heard from. It remains now for the riders to do their part by rolling into the convention city in such numbers as to repay Sacramento for all her efforts.

When the final phase of the big program has passed into F. A. M. history on the evening of Sunday, July 25, there will undoubtedly be new reasons for pointing to California as the queen state of American motorcycledom.

A Glimpse of the Majestic State Capitol Amid Luxuriant Foliage

# Chief Features of the Convention Program

SACRAMENTO, Cal.—As the date draws near for the opening of the F. A. M. annual convention in this city it is increasingly apparent that Chairman Pixley and his co-workers on the general committee have prepared a well-balanced and highly interesting program. There is no necessity for adding greatly to the program outlined recently in the columns of **Motor Cycle Illustrated,** because the features already provided for will occupy all the time of those who visit the convention.

**Wednesday, July 21**

The formal program opens on July 21, when the delegates and other visitors will arrive and register. An informal reception will be held at the Travelers' Hotel in the evening, that being the official headquarters, and the Capital City M. C. will keep open house. The 21st will be devoted largely to making the visitors comfortable and getting them acquainted with their surroundings.

**Thursday, July 22**

Morning and afternoon sessions will be held on Thursday. The opening session is scheduled for the Senate Chamber of the State Capitol and Governor Hiram Johnson has agreed to make an address of welcome. Following the evening meal, the motorcycle visitors will make a boat trip about 20 miles up the Sacramento river. Music will be provided for those who wish to dance, and those who do not feel turkey-trottish will be entertained otherwise. Thus endeth the second day.

**Friday, July 23**

Automobiles furnished by the Sacramento Chamber of Commerce will be used for a trip through the fruit belt on Friday. Enough cars will be provided to carry all the delegates and other visitors, and the route will lead through Loomis, Penryn, New Castle and Auburn. The club's guests will be escorted through packing houses, orchards, etc., and given every opportunity to see how California handles her fruit. If the party arrives back in Sacramento early enough there will be amusements for the evening, but it is expected that the trip through the fruit belt will just about fill Friday's phase of the program.

**Saturday, July 24**

Saturday morning will find the delegates gathered for another business session and in the afternoon the F. A. M. National Championship races will be staged at the State fairgrounds track, Agricultural Park. An illuminated and decorated motorcycle parade is on the program for Saturday evening, and it is predicted that this will be one of the most striking features of the whole convention. Hundreds of machines will participate, and they may even run into the thousands.

**Sunday, July 25**

On Sunday morning the delegates and visiting motorcyclists will be lined up for a panoramic photograph at South Side Park, and in the afternoon the final series of championship races will be held. Late Sunday afternoon and Sunday evening the riders will leave the city in squads, many of them going on to San Francisco to view the Panama-Pacific Exposition before returning home.

---

**MORE LEEWAY FOR F. A. M. RACERS**

Competition Chairman John L. Donovan, of the F. A. M., announces his intention to endeavor to have suspended the provision in the competition rules relating to eligibility of riders for national championships. This provision, which appears under article 12, section 2, states: "No rider shall be eligible to enter the national championship excepting the winner of a place in a state championship."

Chairman Donovan desires the suspension by reason of the fact that very few states have held state championship races this season, and therefore strict adherence to the section would debar amateurs who the chairman knows are capable of entering the major events, but in whose state there have been no championship races held.

# Two Days of Spectacular Racing Assured

SACRAMENTO, Cal.—As usual, much of the interest in the F. A. M. convention program centers in the two-day race meet to be held on Saturday and Sunday, July 24-25. An attractive list of prizes has been prepared and some of the best factory racers, in addition to a lot of clever amateurs, have assured the club committee that they will be at the tape. The races will be staged at the State fairgrounds track, Agricultural Park, and while no records are in great danger, some spectacular speed work is counted upon, owing to the strong lineup of entrants. The programs follow:

**Saturday Card**

Five-mile professional stripped stock. Cash prizes amounting to $100.

Five-mile National F. A. M. amateur championship. Merchandise prizes and three medals.

Ten-mile professional stripped stock. Prizes amounting to $100.

One-mile National F. A. M. amateur championship. Merchandise and medals.

Twenty-five mile professional F. A. M. National championship. Medals and $100.

Ten-mile amateur F. A. M. championship. Merchandise and medals.

Five-mile professional Capital City Motorcycle Club race for members only. $50 prize.

Fifty-mile amateur F. A. M. National championship. Merchandise and medals.

**Sunday Card**

Five-mile professional free-for-all. Prize of $100.

Two-mile amateur F. A. M. National championship. Merchandise and medals.

Ten-mile professional F. A. M. National championship. Medals and $100.

Five-mile amateur Capital City Motorcycle Club race for club members only. $50 in merchandise.

One-mile professional F. A. M. National championship. Prize $100.

Fifteen-mile professional stripped stock. Prize of $200.

Twenty-five-mile amateur F. A. M. National championship. Prizes of medals and merchandise.

**Committee Chairmen**

The committee heads that have complete charge of the Sacramento end of the convention consist of the following:

C. S. Pixley, general chairman; Albert Elkus, finance; F. M. Woodson, entertainment; H. A. Ten Bosch, program and prizes; T. W. Madeley, accommodations; Dr. E. C. Turner, decorations; H. L. Duke, printing and decorating; Fred Pearl, race meet; W. W. Jenne, publicity.

The official headquarters will be established at the Travelers Hotel, Fifth and J streets, opposite the house of the Capital City M. C.

## RIDERS ATTENDING CONVENTION TO RECEIVE TOURING PRIZES

Sacramento, Cal.—The Capital City M. C. of this city announces an extensive list of touring prizes for those who ride or drive to the National Convention and races on July 21 to 25. To be eligible for the prizes, riders and passengers will have to show proof of accomplishment to R. H. Carter, of the club's prize committee. Following is the list:

A 28 x 3 inch Federal casing to the rider coming the longest distance; a similar casing to the Pacific Coast rider coming the longest distance; a 28 x 3 inch Goodrich Black Tread casing to the lady rider coming the longest distance; a Wald tandem to the tandem pair coming the longest distance.

For the couple coming the longest distance another Wald tandem will be awarded. The heaviest rider attending will be given a Weed folding back-rest, as will the oldest rider. An Eclipse clutch will be awarded to the sidecar coming the longest distance. A Heitger carbureter is to be given to the married couple coming the longest distance from Sacramento via sidecar combination.

In every case, the prizes have been donated by the makers of the various articles themselves.

Travellers Hotel, Where F. A. M. Delegates Will Gather

# California the Tourists' Wonderland

## Ever-Changing Range of Attractions for Motorcyclists

By FRANK REED

THE motorcycle sport is California's own favorite. Indeed, the Golden State believes that the motorcycle was made especially for it, and that, therefore, the holding of the national F. A. M. convention in the capital of the state is particularly appropriate, for this is a country where nature and man have prepared ideal conditions for the votaries of the powered two-wheeler. Many pleasures and interesting experiences lie before the motorcyclists who will tour through California.

With the most inviting out-of-doors that ever beckoned a man to see its magnificent wonders right in the midst of riders from all corners of the country, the question, Where shall we go? is one that never lacks an answer. Look over the sands of Venice to the breakers, where the foaming crests of the ocean sparkle like animated crystal in the sun. Are the cool waters of the Pacific inviting? Just see the radiant jollity on every face, as hundreds swim and dive in the surf that is strong enough to be exciting but surely not over rough. The temperature is bracing and the salt air most exhilarating. Stay in five minutes, or all day, and when you come out you will find how good it is to be alive and hungry!

They don't overcharge you for the "eats" in California. A real "glad-you're-with-us" smile lights up on the face of the waiter as he courteously and promptly fills your order. Fill up, men—and you ladies do the same. That ride on the tandem will settle your dinner for you.

Look up to the north and see the beautiful colors on the Santa Monica Mountains. "How solid they look," you muse; "I wonder whether you can ride among them." Sure you can—everybody is but too willing to point out the road. The Topanga Canyon road from the sea to the San Fernando Valley is finished. "Some roll!" is the general opinion of riders who have tried it. Just get a picture of that road fixed in your mind: seven per cent. grades; surface as smooth as a floor; rocks, mountains and trees on either side, and a bubbling little stream of purest water dashing by—that's the Topanga Canyon road.

Stop anywhere to picnic; it's all open and free, like all of California. And if anybody else is in the spot you like, go right in and hear the cheery California welcome.

Then further up the shore from Venice are Las Flores Canyon and the Malibou shore where the sea fishing off the rocks is as fine as the trout fishing up the stream. Of course, for the trout you have to go inland from the head of the canyon, through the San Fernando, and turn beyond Calabasas, into Clyatt's Ranch, and down afoot to a place opposite that big peak you see towering up into the clouds.

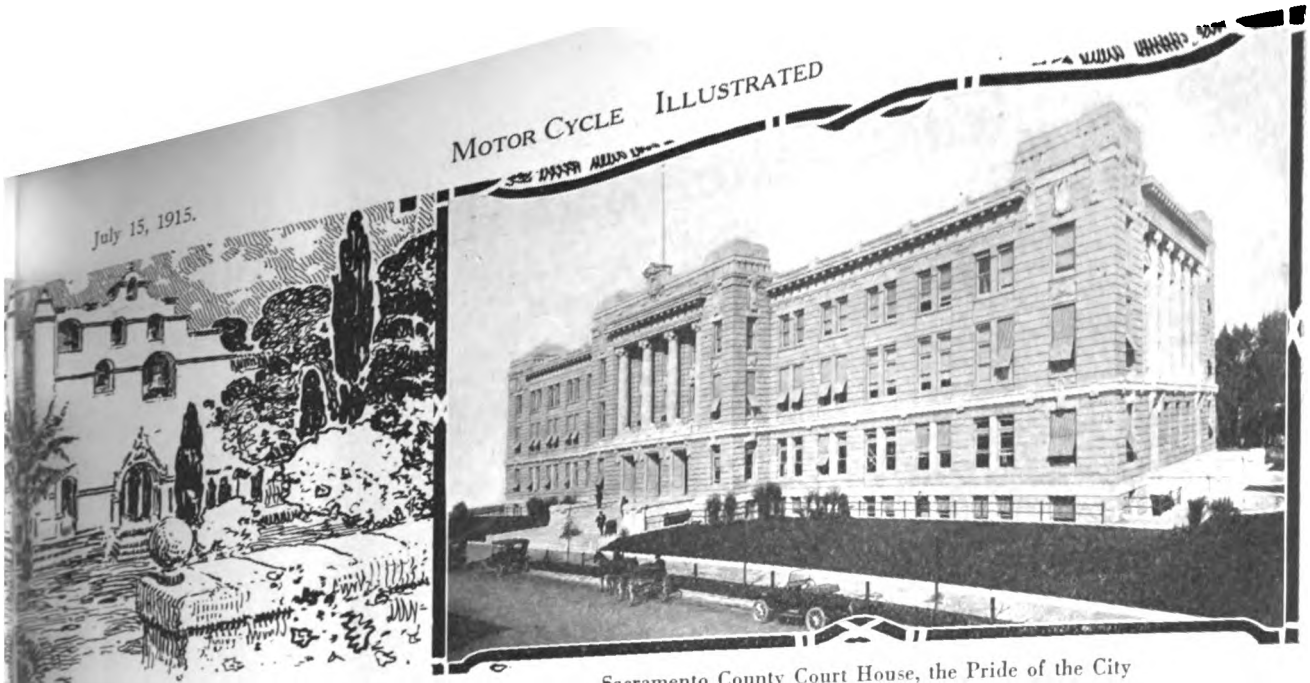
Venice is but one point out of many in California where the shore is the magnet that draws motorcyclists by the hundreds. San Diego has its beaches where many congregate, and so has San Francisco Bay and a number of the inland rivers. There are thousands of little camping spots by the ocean that are open to tourists. Here cottages can be rented and tents set up or else just a blanket will do to ward off the cool breezes that spring up during the nights. It isn't at all necessary to make any elaborate preparations — you can live on the fish you catch and the game you shoot. Flour, butter and eggs can be bought at depots near the camps.

Usually in sight of the shore are the gigantic mountains from whose tops the most wonderful views are obtainable and in whose rugged seams sometimes lurk bob cats, bears and rattlesnakes. In many instances the peaks of these mountains can be reached by good roads, and once on top, the tourist is more than rewarded for his efforts in grinding up the grades. Rivers and brooks that seem like narrow threads of silver winding in and out among mountains and huge rocks can be seen in the valleys below, together with masses of green trees flanking the banks, the monotony of the verdant foliage being broken by brilliantly colored flowers.

California is the land of the places to which one wants to go. Satiety is never reached because the good places are so numerous. Each famous place is so big and so far away that to see it means a trip of a day to several weeks; and every mile along the way is full of novel incidents, interesting scenes and enlivening people. Canyon riding gets a firm hold on a man who once really learns to ride. When a man becomes master of his machine there is nothing like the freedom of the great hills. The cycling enthusiasts who are fortunate enough to be guests on these rides off the asphalt into the country back

**Headquarters of Capitol City M. C.**

Digitized by Google



Sacramento County Court House, the Pride of the City

of the sapphire veil, that clothes the distant hills and conceals their gates through which their winter rivers pour out on the plain, never fail to become enchanted with the country.

As for the lady tourists, they soon learn why khaki was invented, and that an open fire heats gas for cooking. Many of the California motorcycle girls are learning to take a trout with the fly or shoot a quail on the wing with the confident technique of frequent practice.

The desert in California usually calls to the man who has already tamed the mountain trails: it has risks and terrors and mysteries of its own. The desert can only be traveled with infinite precaution and reasonable provision for quick rescue if a man is to come through very close to the year he is due. But this year's riding has proved that the desert, strewn with bleached skeletons of mules and burros, has been successfully conquered by the three-speed motorcycle when in control of a master rider. Others had best keep out, taking warning from the bones that bleach in the dazzling, white sands.

It is surprising to find how many interesting places in California have been visited by almost all motorcyclists one meets. Just begin to run over the names of places: Mt. Lassen in eruption, San Francisco and the exposition, the old missions along three hundred miles of El Camino Real, San Diego and her exposition, Arrowhead, Bakersfield and Coalinga and the oil fields, Lake County, the gold mining country, and the great valleys of the Sacramento and San Joaquin, Humboldt County with its lumber and its salmon rivers, Shasta, Crater Lake, Monterey, San Marcos Pass and Conejos, Fresno and the beautiful towns of the vineyard country, Santa Barbara, Inyo County, where the perpetual snows of the Sierra peaks look like a forbidding wall, but in reality overhang canyons that suggest a paradise on earth to the favored explorer, Salton Sea and the ancient craters of Mono. Then there are Lake Tahoe, Sequoia and General Grant national forests, home of the big trees in their greatest glory, and, finally, the universal goal, the Yosemite. California motorcyclists are barred from visiting the Yosemite on their machines, but they can ride up to the edge of this wonderland and explore its marvels afoot.

It would require many pages to give anything like an adequate conception of the great marvels of nature that abound in every nook and corner of the Golden State. Every interesting place that one might mention suggests at least a dozen others equally alluring. The motorcyclist who attends the convention, in touring through the state, will soon realize that California makes no empty boast when she claims motorcycling as her favorite sport.

# Motorcyclists at Top of Mt. Tamalpais

SAN FRANCISCO, Cal.—One of the most daring feats ever attempted with a motorcycle was successfully accomplished by "Happy" Alzina and W. G. Collins, two local motorcyclists, on Saturday, June 26, when they climbed Mount Tamalpais on their 1915 three-speed Indians, equipped with United States chain tread tires. The ascent was made over the ties of the Mount Tamalpais Railway Company, "the crookedest railway in the world," and was accomplished without mishap.

An idea of the strenuousness of the feat may be gained when it is known that the mountain has an elevation of 2,592 feet, and the railroad track which was followed contains 281 curves in a distance of 8½ miles. If in following the tortuous course the curves had been continuous, there would be forty-two complete circles made. The longest straight piece of track is but 413 feet. About half way up the mountain is the "Double Bow-Knot," where the track of the railroad parallels itself five times within a distance of about 300 feet, forming, as the name denotes, an almost perfect double bow-not.

Curving through the canyons, looking down their steep sides, the road crosses over Slide Gulch, through McKinley Cut, around Summit avenue, into Mill Valley Canyon, the vast panorama expanding every moment as the bay of San Francisco unfolds to view. Winding around the edges of grand canyons, one can see below the different curves of the serpentine road, and when the rail trip is ended at Tamalpais Tavern, there is spread out on all sides one of the most magnificent panoramas of valley, bay, ocean and mountains, near and far, that it is possible to conceive.

But arrival at the tavern does not complete the journey, for the summit, back of the tavern, rises a considerable additional height, which has to be undertaken on foot, up steps cut in the rock of the mountain. Not satisfied with having ascended to the tavern, "Happy" Alzina left his companion and took his machine up the steep and, winding steps to the observation tower, perched on the extreme summit of the mountain, where he may be seen in the accompanying picture.

# "We're Ready—the Glad Hand is Waiting"

## Chairman Pixley Tells of the Good Time Arranged for Delegates to Sacramento

By G. A. PUTNAM

SACRAMENTO, Cal., July 10.—"We are preparing to entertain between 7,000 and 8,000 motorcycle visitors during the period of the F. A. M. convention program in this city," said Chairman C. F. Pixley, of the General Arrangements Committee, in an interview with the representative of **Motor Cycle Illustrated**, "and it goes without saying that we are leaving nothing undone to make the most of our opportunities.

### Big Things are in the Air

"We take it for granted that at least 2,000 visitors will be on hand from points outside the state and there are the strongest possible reasons for believing that California will send a sufficient number to make up the balance. In the past this state has shown her ability to give motorcycle demonstrations of greater magnitude than any other part of the world, and now that the annual convention of the governing motorcycle body is to be held here it is fair to assume that there will be big things in the air.

"No matter where the visitors come from, they will be assured of a cordial welcome—a typical Western welcome, which means that we will take them to our hearts and go to the very limit of our resources to make their stay pleasant. In this plan we have the hearty support of Governor Johnson, a native Californian, who has promised that he will exert every possible influence to make the convention and the incidental entertainments the best ever. Governor Johnson will hand the keys of the state to the motorcyclists, and if he can be persuaded to make one of his famous Johnsonian speeches he will certainly convince the motorcyclists that they are welcome.

### Capital City M. C. on the Job

"There are a thousand and one things to be thought of and attended to by the committee, of course, but we have practically completed the preliminary work. From now on we shall simply be adding the finishing touches. Much attention has been given to the matter of accommodating the convention visitors, and a list of hotels and their rates will be obtainable at the rooms of the Capital City Motorcycle Club, which are located at Fifth and J streets, just across from the Travelers' Hotel—the latter being the official headquarters. Every visitor who needs information should go to the club rooms, where everything possible will be done to assist him.

"The business sessions of the convention will be held in the large California room at the Travelers' Hotel, and the convention banquet will also be held at this hotel. Owing to the excellent location of the official headquarters, it is believed that unusually well-attended sessions will be held.

### Splendid Co-operation Assured

"The Sacramento Chamber of Commerce is co-operating with the committee and the Capital City M. C., and this trade body will supply automobiles in which the visitors will be taken on trips into the rich fruit belt, and to other points of interest. It is likely, of course, that most of the motorcyclists will stick to their trusty single-trackers, but the ladies at least can avail themselves of the automobiles.

"One of the best side trips will be a sail up the Sacramento river, the third largest river in the United States. There will be a barge for dancing, and those who do not wish to indulge in that fascinating pastime will find other amusements ready for them. Visitors to Sacramento in the past have always commented very favorably on this river trip, and it is expected that the visiting motorcyclists will find it very pleasant. It will be a pleasant ending for the day.

### 10,000 Expected at Races

"As for the motorcycle racing, everyone knows that there will be plenty of action, and it can safely be predicted that no less than 10,000 speed fans will witness the championship events. The plans for racing program are being laid very carefully, so that both spectators and racers can be given the best of attention. Nothing will be left undone to make the track as safe and as fast as human ingenuity can make it, and there will be enough officials on hand at all times to attend to the details.

"While much is expected of the racing programs, the motorcyclists of Sacramento naturally expect that a great deal of the pleasure to be derived by the visitors will come from pleasant side trips to points of scenic and historical interest. Sacramento is an ideal place from which to start short motorcycle sight-seeing trips. The trip to beautiful Lake Tahoe is only 109 miles, and the route is easy for the motorist. The run is frequently covered without hurry-

(Continued on page 53.)

**"We are leaving nothing undone to show the boys what Westerners have on tape in the line of hospitality. My committee has arranged a varied and interesting program for all the delegates. Now let 'em come!"—C. F. Pixley, in charge of Sacramento convention arrangements.**

# Coffman's Administration a Busy One

## F. A. M. Chief's Tireless Work Throughout the Country Has Shown Results

By THE VETERAN

"IT'S difficult to put your finger on any one improvement in the F. A. M. of late aside from Legal Action work," said a member in conversation with the writer a few days ago, "but you feel confident just the same that the national organization is in much better condition now than it was a year ago."

That certainly is true. The Federation has a firmer grip on the loyalty of its riders and a better understanding with the general public than it had a short time back. As for the legal action progress which has created such an excellent impression, it is entirely the outcome of Chairman William Johnson's energetic campaign and attention to details. All the other advances—the improved spirit from coast to coast and the various improvements by which F. A. M. members get more for their money—are due to President Coffman and his "never-say-die" personality.

Before he had been wearing the presidential toga two weeks Coffman was sky-hooting up and down the country preaching the doctrine of co-operation and grabbing members—many of them old-timers in the cycle field who knew just how to jump in and help boost—and behind him he left a trail of live ones.

The pace he set during the first few weeks has never been slackened, and he is just as eager to get a new member today, or to put in motion plans for even a slight improvement, as he was when the executive honors were fresh upon him. His activities in behalf of the F. A. M. have been many and varied, and they have extended from the Atlantic to the Pacific. It follows, therefore, that Coffman knows his field and that if retained in office for another term he will be enabled to widen his sphere of usefulness.

President Coffman himself has said very little about his candidacy for another term, but his friends have been over the situation for some time that the possibility ramento is date the strongest presidential timber in California is Director C. S. Pixley, of Sacramento—and Director Pixley has asserted that he is "for Coffman."

Conventions are sometimes "uncertain quantities," but there is every reason to believe that President Coffman's efforts to place the affairs of the F. A. M. on a business basis have met with widespread approval and that said approval will be evinced in Sacramento by an almost unanimous desire to keep the rapid-fire Toledoan in office.

"Coffman has vitalized the F. A. M.," said the member who was quoted in the opening paragraph of this screed, "and one does not have to consider the national motorcycle situation very extensively to discover signs of life where there were none before. Local and State commissioners have been more active than in the past, chiefly because they knew Coffman expected better things from them, and as a result the F. A M. doctrine has been consistently boosted in sections where the organization spirit had hitherto been weak or non-existent."

As a "mixer" the present F. A. M. executive has set a record that future occupants of the presidential chair will find difficulty in maintaining. It is safe to say that President Coffman has attended more club meetings and encouraged the riders by his presence at more club racemeets than any previous head of the official Federation family. On personal business trips he never fails to keep in touch with the clubs, even when stopping in the smaller towns.

Coffman does not believe in hiding the F. A. M. light "under a bushel," and never overlooks an opportunity to deliver a short speech or otherwise call attention to the fact that he is the active head of a wide-awake organization of national scope. He makes the most of conditions wherever he may be, and just when the "assembled multitude" begins to wonder what is going to happen next, out comes the F. A. M. doctrine and all its trimmings and the converts begin to hit the gasoline trail.

Those who have seen President Coffman work are surprised at the ease with which he combines his own extensive business schedules and those of the F. A. M.—and scores bull's-eyes on both sides of the house. But he does. The fact that Coffman would have to jump around the country a good deal on his own account anyway, has enabled the F. A. M. to have official representation in many cases where it would not have been possible to send a special emmisary, but that's only an incidental. The big points are that Coffman is a dyed-in-the-wool booster, and that he is behind the F. A. M. heart and soul.

**"President Coffman has vitalized the F. A. M. and one does not have to consider the national motorcycle situation very extensively to discover signs of life where there were none before. Local and state commissioners have been more active than in the past."**

### PLEASANTON RACE RESULTS

Pleasanton, Cal.—Johnny Gibson, Harley-Davidson, won the five-mile pro. race on July 4 in this city, in 4:36. "Shrimp" Burns was second on a Pope and Ben Torres, third, on an Indian. J. Houghton, Indian, carried off first honors in the five-mile amateur event for 61 cubic inch motors, his time being 5:12⅕. Al. Zettle, Excelsior, was second. In the five-mile amateur for 30½ cubic inch mounts, J. Wilson, Excelsior, came first, with F. de Soto, Indian, second. Time, 6:10.

The ten-mile pro., stripped stock 61 cubic inches, went to B. Burns, Pope, in 9:14⅕, with L. Gibson, Harley-Davidson, second, and G. Benedetti, Thor, third. The 25-mile amateur race was won by Al. Zettle, with Houghton second. Zettle's time was 26:55. About 2,600 witnessed the program.

### NEW CYCLONE RACER

San Francisco, Cal.—John Gibson, the half-mile track champ, has joined the Cyclone racing stable and will appear in a number of the professional events at Sacramento. He now is engaged in demonstrating work in this city for Ludenclos & Henry. In addition to Gibson, Dave Kennie and Don Johns, of the Cyclone racing team, will be on hand to contest in the professional races at Sacramento.

### WHERE ROADS ARE EASY ON TIRES

Los Angeles, Cal.—"One of the best things about California, from the viewpoint of the motorcyclists," said President Walter Davidson, of the Harley-Davidson Motor Co., a few days ago, "is that the roads are exceptionally easy on tires. Tires appear to last much longer here than they do in any other part of the country."

### CAMERON'S CROSS-COUNTRY TRIP

Los Angeles, Cal.—A. C. Cameron called at the Los Angeles Excelsior store last week with an interesting tale of cross-country travel. He spent about a month on the road, stopping at various places along the Lincoln Highway route, and several days at San Francisco and San Diego, where he took in the expositions.

One of the three-inch Goodyear studded tires on his machine had made a trip from Chicago to Boston last year and altogether stood 4,500 miles before it started on this tour and still had Chicago air in it in Los Angeles. Last year his Boston trip was a series of punctures and chain breaks. This year he came through without a puncture or a break, using a Perry short chain and Duckworth long. His spills on the entire trip were only three, one of them a good one in the sand, where his dive measured 30 feet.

T. C. Girton, of Girton-Hoffer Company, the Los Angeles Excelsior distributor, entertained Cameron while he was in town.

### KARSLAKE WILL RIDE

San Francisco, July 8.—Manager J. D. Fraser, of the Appeal Manufacturing Company, California distributors of the Harley-Davidson line of motorcycles, has announced the selection of the great endurance rider, H. T. Karslake, of Oakland, to ride in the transcontinental relay race. He has been assigned to ride between Sacramento and Tracey. Karslake has an enviable reputation as an endurance rider and he is expected to give an excellent account of himself when he hits the trail.

# Greater Harmony Should Be Keynote

## Legal Action Committee Needs Backing of Trade and Riders, Says Johnson

By JAMES M. ANDERSON

A GREAT deal has been said during the last few months concerning the achievements of the F. A. M. Legal Action Committee, under the able and untiring direction of Chairman William Johnson, and with the attention of motorcyclists the country over centered on the Federation because of the approaching annual convention it will not be amiss to say that Chairman Johnson has set all records for activity.

He has done it with energy but with considerable modesty. Mr. Johnson studied his big task thoroughly and prepared to advise legislators the country over that they could not ride rough-shod over the interests of motorcyclists. And he has convinced them.

As the work of the Legal Action Committee progressed its scope grew rapidly until at one time not long ago the chairman had cases in hand affecting motorcyclists in half a dozen states. It is safe to say that riders in at least a dozen states have profited by Chairman Johnson's activities this year and he is still hard at work. He has already made a big year in F. A. M. legislative developments, and he will be even bigger if he only has a little more about it. And there is no scarcity of work for him. Matters demanding his attention are piling up on all sides.

### Benefits the Whole Industry

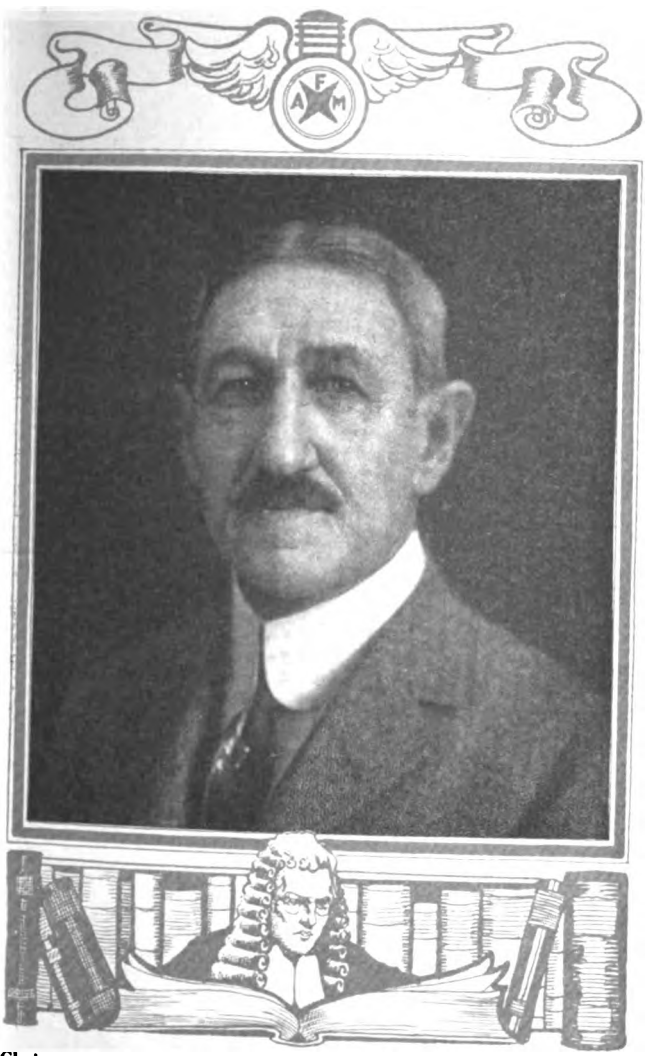
The work, of course, Chairman Johnson's work is intended to benefit the rider, but by assisting the sale of motorcycles he is also a spur for the entire industry. What helps the rider is bound to benefit the dealer, and where the dealer profits, his profit is certain to be passed back to the manufacturer. So that the work is more far-reaching than might appear at a casual glance.

Chairman Johnson has learned by experience that states where the law is not all it should be have fewer motorcycle riders than those states which have given the motorcyclists reasonable consideration. Naturally, the stringent laws in the states tend to drive off riders and cut into the business of the dealers.

### Harmony the First Essential

"We are going into a lengthy discussion of a series of legal terms," said Chairman Johnson in a recent interview, "I will try to outline as simply as possible the main aims and plan to improve legislative conditions for motorcycling without the country, as applied to the motorcyclist. As a starter, we are trying to produce greater harmony among the motorcycle dealers. There must be enough harmony, for example, to permit of the dealers agreeing upon one attorney for each section or city. It stands to reason that any lack of harmony in the work we are doing will have a bad effect upon public opinion in that section, and we need favorable public opinion to back us up.

"When the dealers unite in recommending a certain attorney to look out for F. A. M. interests in any city or district, he is officially authorized to represent the riders. Naturally this attorney looks to the dealers to assist him in every way possible, and he in turn gives very close attention to every case brought to his notice by an F. A. M. rider. A certain amount of rivalry is a good thing, perhaps, but both dealers and riders cannot co-operate properly with the Legal Action Committee unless they are willing to take a broad-minded view of the situation and pull together. That's one of the biggest objects of our campaign.



Chairman William M. Johnson, 42-Centimetre Executive of the F. A. M. Legal Action Committee, Who Makes a Plea for a Solid Stand of the Trade and Riders Behind the National Governing Body.

### The Dealer's Interests Affected

"When there is an accident it will usually be found that the dealer is as deeply interested as the rider himself. Many motorcycles are being sold these days on the instalment plan, and when such a machine is damaged on the road through the carelessness of another road user, it is a mighty fine thing for the dealer who sold the mount to know that both he and the rider have the backing of the national motorcycle body. When the dealers and a rider—or better still, a whole club of riders—unite in a movement to force a just claim there is pretty sure to be favorable action. Working hand in hand with our local attorney some very excellent results can be obtained—in fact they are already being obtained in cities where the F. A. M. members have realized the value of co-operation. After one or two successful legal fights in behalf of motorcyclists, the authorities in any city will think twice before taking an unjust advantage of a motorcyclist. They begin to understand that he has certain rights which must be given reasonable respect.

"All this work is leading towards a 'get-together' spirit which will help the F. A. M. immeasurably in years to come. We are only laying the foundation now. The interests of the rider, the dealer and the manufacturer are so closely allied that the ultimate outcome of the present campaign must be far-reaching.

### Improving Public Opinion

"We find that the growing tendency to stand together on the part of dealers and riders is creating a better feeling outside of the motorcycle ranks. People who find motorcyclists kicking over this, that and the other thing are soon convinced that there is something wrong with the whole industry. On the other hand, when they find a healthy air of optimism and co-operation pervading the ranks of riders in any given district they arrive at the conclusion that there is something solid and dependable behind our efforts.

"The motorcycle game has certainly advanced very rapidly in the last two years, and there is every reason for believing that it will keep up this pace. Fewer open-muffler fiends are to be found these days, and the speeder is slowly but certainly being discouraged. We hope to have him entirely eliminated very soon. He is a

**On the Crest of California's Giant Peak: The Author and Miss Ruth Ashbrook Just Finishing the Climb**

MANY of the motorcyclists of Northern California and those from other states who are going to attend the national convention of the F. A. M. at Sacramento will, if they tour through Southern California after the big rally, get an inspiring glimpse of this beautiful country by grinding up to the summit of Mt. Wilson, a peak of the Sierra Madre range, as Ruth and I did a few weeks ago. Any red-blooded motorcyclist can accomplish this feat provided he has at least a seven horsepower, two-speed machine, for the city of Pasadena has built an automobile road to the very top of the mountain. The road winds up in "S" curves at 22 per cent. grades for a distance of nine miles until the summit is reached, which is more than a mile high.

### Ready for the Ascent

Early one Sunday morning, when the sun had just crept out of bed, Ruth and I found ourselves at the foot of snow-capped Mount Wilson, ready to make the ascent. We borrowed a big wrench from the German tollgate keeper and swung the exhaust pipes out of the muffler to prevent toasting the valves on the long climb. After digging up six "bits" at the toll gate, we were off with the motor shooting like a machine gun and the noise reverberating up the canyons of the mountainside.

There is a giant arroyo at the base of the mountain, which the road crosses over a wooden bridge; after that the highway shoots off at right angles up a hair-raising grade. For the next nine miles I was as busy as a cat on a tin roof. The road is just wide enough for an automobile, with turnouts dug into the mountain wall about every thousand feet.

Twenty-two per cent. grades are not so bad with a modern twin, three-speed, even when one is carrying a tandem passenger, as I was. The character of this road, however, didn't afford much opportunity for admiring the scenery, for nearly every hundred yards or so it angles back over itself at a curve worse than a hairpin. Rounding these turns one can see just about where he would land were he to slip off the road.

Roaring up-grade for the first three miles, I amused myself by keeping my eyes glued to the road and pumping oil, while Ruth crowed and clapped her hands in feminine delight over the beauty of the view down into the valley. Then we came to a wonderful spring, where we stopped to refresh ourselves and let the motor cool. We had no sooner dismounted than lizards and gray squirrels scampered in all directions. Looking around, Ruth and I were somewhat surprised to find that the orange, lemon, pepper and eucalyptus trees, which we were accustomed to see down in the valley, had given place to gigantic pines. A difference of a couple of thousand feet in elevation had caused sufficient climatic variations to change entirely the nature of the vegetation.

We were already above the fleecy, white clouds, and as we looked down upon them they seemed to blow against the side of the mountain and vanish. The wind had robbed the sunshine of its warmth, putting "goose-bumps" on my bare arms and sending Ruth into her sweater coat.

### The Motor Stalls

After a half hour's stop, we started again, but hadn't gone far when the needle valve to the gasoline line jiggled shut and killed our motor right in the center of the hairpin curve and on a grade that was so steep that we immediately began to slide downhill. With my foot on the brake I was able to stop, but in doing so I found it difficult to balance the machine and start the motor again. It was a thousand feet straight down over the edge of the curve and for a moment our predicament was "deucedly peculiar," to say the least. However, Ruth, with her usual presence of mind, came to the relief of the situation by jumping off the tandem and placing a large rock under the rear wheel. With this as a support, we were able to start in low gear and continued to the halfway point before stopping again.

At this place the road breaks through a canyon to the east side of the mountain where a magnificent view of the back country mountains can be obtained. Here Ruth and I rested and took a cooling draught from a crystal spring which bubbled out of the adamantine rock. Then we were off once more.

### A Miniature Landslide

Hardly had we proceeded many feet when a big touring car appeared in front of us, that was growling up the hill in low gear at a mere snail's pace. The driver of the car, however, was evidently a gentleman, for he pulled over close to the wall and permitted us three feet on the edge of a 1,500-foot precipice. We managed to get by and in doing so dislodged a couple of stones that went crashing down the mountainside, causing a miniature landslide.

The last half of the ascent was not nearly as difficult as the first. The grades were not as steep and the curves were less abrupt. For two miles we pulled in high gear, dropping into intermediate only at the turns.

Noon found us perched on a rock, looking from the highest pinnacle of the peak down upon the entire southern por-

Digitized by Google

tion of California. Back of us were the San Bernardino mountains with their white crests towering high above and "Old Baldy" (Mt. San Antonio) with its ten thousand feet of snow and ice looming up into the heavens and glistening in the bright sunshine.

Under our feet, in the crevices of the rocks the last of Mt. Wilson's summer snow was fast melting under the persistent heat of the sun's rays. In front of us stretched the cities of Los Angeles and San Gabriel as well as the beautiful, verdant valleys of the Santa Ana, which lay unrolled before Ruth and me like an immense map. Two hundred miles of ocean beach extended north and south, while the blue waters of the Pacific were seen to girdle the Santa Barbara Islands and then merge into the western horizon. The Santa Catalina Islands, eighty miles away, also reared their backs out of the glistening ocean, while the San Clemente Island, more than one hundred miles to the west, appeared to be only a pistol shot in the distance.

Surrounded by this glorious and inspiring scenery and breathing in the cool, exhilarating air, we gazed down upon the big, white clouds which blew over the valleys, ate the dainty lunch that Ruth had prepared and were happy for the great joy that was ours.

### Squirrels Came to Lunch

Ruth discovered that by striking two stones together all the squirrels, within hearing distance, would come up to share our lunch. It was but a moment before we realized that we didn't have lunch enough for all the squirrels that barked for crumbs. Several of them got confidential to the extent of accepting tit-bits from our fingers, and Ruth even induced one to climb up to her outstretched arm and sit on his haunches on her shoulder while she treated him to some salted peanuts. They were pretty little "bunnies" evidently enjoying themselves as much as we were.

Resting Under a Monster Pine at the First Step in the Early Morning

### Coasting Down the Mountain

The trip down Mt. Wilson was, of course, much easier than the ascent. At first I attempted to coast with the clutch out, using the hand brake to regulate our speed. However, I dispensed with this method before we had gone a mile when we discovered that our brake lining had caught fire. I found that by coasting in low gear we had all the brakes that were necessary. When we desired to increase our speed, a slight release was sufficient.

We arrived at the toll gate at the base of the mountain just an hour and a half after leaving the summit. Again we were greeted by the friendly German gate-keeper who spoke to us in his native tongue. Borrowing his wrench we put the exhaust pipes back into the muffler and were off over the boulevard. We arrived home at dusk, sunburned and a little tired, but happier than ever for the splendid trip and the keen appetite it had given us for a bountiful supper. Such was our journey to the peak of Mt. Wilson, which invites every F. A. M. delegate to its beautiful sight-seeing summit.

Over the Abyss: Hogg On Overhanging Branch Near the Summit

## VISIT SAN DIEGO EXPOSITION

Los Angeles, Cal.—A successful two-day run to the San Diego exposition over July 4 brought out several scores of riders for the start from the clubhouse of the Los Angeles Motorcycle Club.

Fred Hoffer and his family led a big party of Excelsior riders, among them being a lot of tandems and a good number of sidecar parties. August Haas made the return run of 147 miles via Laguna Beach in five hours, carrying a 200-pound man in a sidecar attached to his 1915 three-speed Excelsior. As it took Hoffer six hours to come back in his automobile, rolling right along, he thinks this time was pretty good for Haas and the "Ex."

Bruschi & Pierce practically turned their splendid store over to visiting riders. They parked 85 machines, of which over 50 were Harley-Davidsons, let the boys use the shop and do anything they pleased in the place. Monday morning, when the riders were ready to go back, their machines were all out on the curb waiting. The boys mention this as an example of the finest kind of hospitality and service.

A Halt on the Downward Trip Near the Big Arroyo Above Los Angeles

## BACK IN THE MERKEL ALLEY

Los Angeles, Cal.—Every little while there comes out on the street in Motorcycle Row on South Main street some young fellow well covered with sweat and dust and with his cheeks flushed. Ask one of these boys what he has been doing and the answer is invariably: "Oh, just a few stunts back in the Merkel Alley." Probably there is no more famous proving ground in the country than this little space back of Sexton & Berry's store, for here motorcycles have been tried against man power, automobile power and one another, pulling on straightaway, climbing boards and brick walls, jumping and bucking contests and everything else that the minds of healthy young fellows can devise.

Harry Sexton, if not in the game himself, is always ready to act as referee, and T. E. Berry, when not doing the honors as master of ceremonies, is always leader of a very appreciative audience. Back in the Merkel Alley there is always lots of fun and good fellowship and every rider and machine is welcome. It is a good deal like the spirit of the old swimming hole where the boys used to get together for the good time of the town on hot days.

## GETTING READY FOR FRESNO MEET

Fresno, Cal., July 11.—Louis Weilheimer, who is promoting the motorcycle race meet which is scheduled to be held in this city on August 8, reports that he has already been assured by factory officials that they will have professional riders entered in the races. The local track has been put into good shape, and no efforts are being spared to improve its condition. An F. A. M. sanction has been secured.

All details with reference to scoring, announcing and policing of the course are being perfected, and the services of an expert starter and race manager will be had.

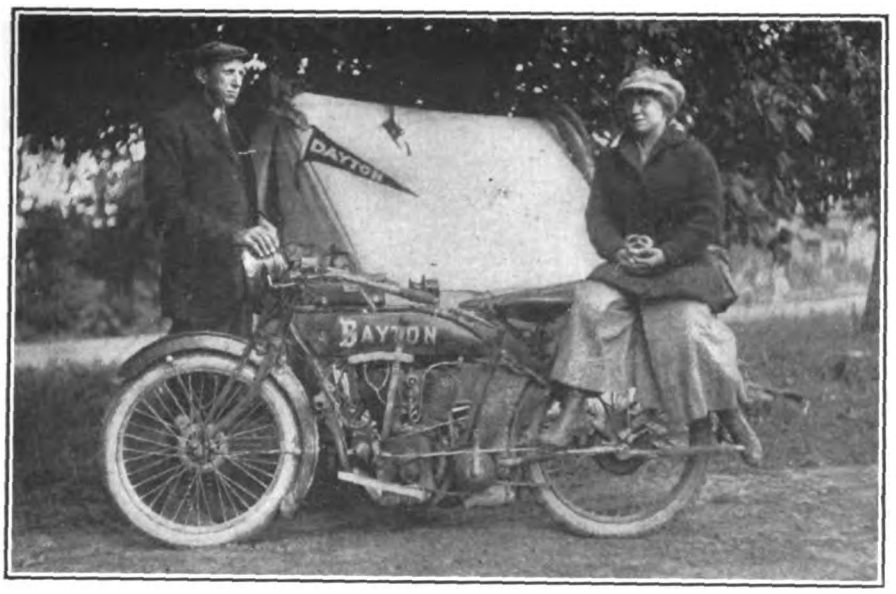
# DRIVING DAYTON TO THE PACIFIC COAST



**Mr. and Mrs. Wingate at One of Their Camping Places**

ALBANY, N. Y.—R. Wingate, one of this city's best-known riders, left Albany on June 10, accompanied by Mrs. Wingate, for a tour to the Pacific coast. They expect to arrive in San Francisco about September 1. The Wingates are using a Dayton machine with sidecar.

Mr. Wingate laid out a schedule for the trip westward which includes visits to a number of points of interest. The first run was to Boston, from which city the pair drove back to Albany, thence over to Batavia via Elmira. At the latter place they visited the factory of the Eclipse Machine Company, and went throught the Batavia Rubber Company's plant at Batavia. The route then led them to Lima, O., via Cleveland, and while in Lima they attended the Ohio State convention. They went on to Dayton, spending a week in that city and visting the plant of the Davis Sewing Machine Company.

The Wingates recently stopped at Loudonville, where they went through the Flxible sidecar factory. Before leaving Loudonville, they fitted a trailer of Flxible design, to accommodate some of their luggage. They will traverse the Lincoln Highway to Cheyenne, gaining the Pacific coast via Denver, Ogden, Utah, and Reno, Nev. After visiting the exposition in San Francisco, they will return over the Southern route, taking in San Diego, Galveston, New Orleans, Pensacola, Fla., and passing through the Southern and Middle States to Albany. The total journey will be about 10,000 miles.

The equipment on the Dayton combination used by the Wingates is very extensive. A tent and a wireless apparatus with a 50-mile sending and a 3,000-mile receiving radius are two of the most noticeable and unusual items of equipment carried. The tent will be used instead of hotels all the way across the continent. The sidecar used is of Rogers make. Following are other fitments on the sidecar combination: Stewart speedometer, Prest-O-Lite tank, Persons "King Kumfort" saddle, Solar lamps, Stewart horn, Fulton exhaust horn, Renold chains and Eclipse two-speed gear. The total load carried is 1,372 pounds.

## CLUB'S GIFT TO SHARP HEIR

Milwaukee, Wis.—The extreme modesty of **Motor Cycle Illustrated's** correspondent in Milwaukee has forbade mention before this time that Hugh Sharp, secretary of the Milwaukee Motorcycle Club, became father of a baby boy on June 12. Being father of a new motorcycle enthusiast did not make him any prouder than the fact that the boys of the club got together and presented him with a handsome baby cab. James Berton is the youngster's name and he and his mother expect to make their first appearance in motorcycle circles since his arrival at the coming picnic of the local club July 18.

## SHORT GRASS DIRECTORS NAMED

Pratt, Kan., July 8.—The Short Grass Club, in a meeting held after the big race at Dodge City, elected the following directors: D. B. Clement, of Haviland; W. J. Davies, of Dodge City; B. J. Patterson, of Pratt; Miss Inez Patterson, of Pratt, and L. I. Goodrich, of Goodland. It was decided to adopt a new constitution and by-laws for the club at the meeting and a motion was made and carried that the 1916 tour be to the Ozark section of Missouri.

## NEW CLUB FORMED IN DENVER

Denver, Col.—The Western M. C. has recently been organized in Denver with the following officers: Frank Egender, president; George Leary, secretary; Elmer Johnson, treasurer; Packey Garbarino, road captain. The headquarters of the club will be the rooms provided by the Western Supplies Company, at 1448 Larimer street. The first run of the club was held July 4, to Greeley, Col., and return.

## WHEELING RUN CALLED OFF

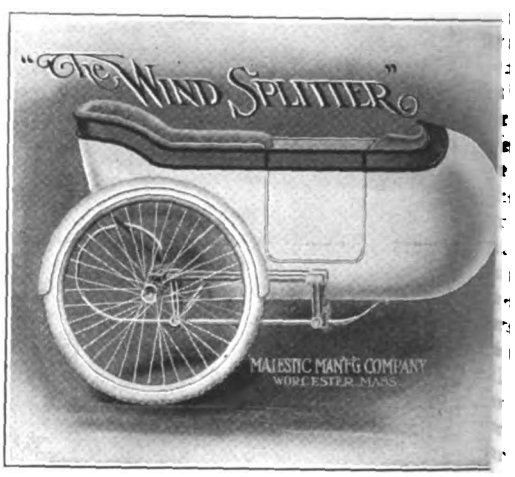
Wheeling, W. Va.—The endurance run of the Wheeling M. C., slated for July 10 and 11, was abandoned by reason of the roads being torn up in many places along the route laid out. It is not yet stated when the run is to be held.

## MAJESTIC SIDECAR PRICES REDUCED

The Majestic Manufacturing Company, makers of sidecars and sidevans, at Worcester, Mass., announces a substantial reduction in the prices of the "Wind Splitter" and "Gunboat" pleasure sidecar models, as well as in the price of the Delivery Commercial Car. The first of the pleasure models is now listed at $65 instead of the former price of $75, while the other passenger sidecar is quoted at $55, a considerable reduction from the former figure. The commercial van lists at $55. The new prices are effective on and after July 15.

The chasses on the various models have been improved to give greater strength. The springs are of the double "C" type, each being heat-treated to obtain the proper resiliency for the best results in comfortable riding. The fittings are of the instantly-detachable type, each being a drop-forging. The body of the new model of delivery car is made of metal, replacing the wooden body of the former van.

At the prices now in effect, the Majestic



company is of the opinion that the competition between the sidecar outfit and the low-priced light automobile will swing heavily in favor of the former, and when the much lower cost of operation and upkeep of the sidecar combination is considered, the favorite bugbear of the motorcycle dealer should be buried for good.

The company points out that immediate deliveries can be made on all models of the Majestic sidecar and invite correspondence from dealers and jobbers who do not as yet handle this line.

## TRIO BOUND COASTWARD

Terre Haute, Ind.—Delton B. Sergent, of Mt. Gilead, O.; Roy B. Foureman, of Greenville, O., both teachers in the public schools of Greenville, and Howard L. Foureman, a farmer of Greenville, who are making a trip to San Francisco on motorcycles, arrived in Terre Haute July 8 and are tied up here on account of the heavy rains in Illinois. The men are carrying a tent and complete camping outfit and expect to sleep wherever darkness catches them. They expect to make the trip to the coast in about three weeks. After two days' riding from Greenville they have decided that the lighter one can travel the better and they have packed up the greater part of their cooking paraphernalia and spare clothing to be shipped back home.

# Castle Would Help R. F. D. Riders

GUS CASTLE, director for the South Atlantic District of the F. A. M., with headquarters in Atlanta, Ga., brings up an interesting new point for consideration by Federation boosters and motorcycle manufacturers in the following letter, which he forwarded a day or two ago to Chairman William Johnson, of the Legal Action Committee.

"Another very important item, which I believe would be a big feather in the F. A. M.'s cap if we can accomplish the results: As you know, there are probably some 5000 R. F. D. carriers in the United States who are riding motorcycle and carrying the mails over rural routes, and there is considerable agitation going on among them on account of decisions recently rendered by Postmaster General Burleson, which if carried through, will affect the motorcycle business to a considerable extent.

"In the last month there have been combined R. F. D. routes in several states, which in every instance causes the removal of one or more carriers on motorcycles. For instance, out of a town where there are two routes, each of 25 miles or more, the Postmaster General has decided to combine these routes into one, making a route of 50 or 52 miles, requiring that the carrier handling such route must have an automobile which has a carrying capacity of 800 pounds and a space of 80 cubic feet. As you will readily see, in this case, it requires two motorcycles. This action is causing considerable comment and dissension among R. F. D. carriers, as it is reported when these two routes are combined that the two carriers who are at present carrying the routes are required to take an examination and are only given the benefit of three per cent. for their former experience, and as the examination now is much more rigid than in former years, when a farmer with only an ordinary education could pass the examination very easily, in a great number of cases the old carriers are unable to pass this examination, which, of course, removes them entirely, bringing it down to the point where a new man with a better education, but without the experience, gets the much-desired situation.

"I have talked with quite a number of carriers here recently and they feel that if some influence is brought to bear by the motorcycle makers upon the Postmaster General that these rigid requirements could be reduced considerably. The increase in pay for carrying the double or combined route is only 50 per cent., but the expense upon the carrier has increased 100 per cent., or even more, thereby working a hardship on the carrier. Quite a number of these routes are arranged in opposite directions, which require the carrier to return to the post office before taking his second route. On routes of this kind it could easily be handled by a motorcycle and sidecar attachment.

"I think proper agitation and concentration of the efforts of the motorcycle builders on this line will work a great benefit for the future sale of the motorcycle."

### BOARD TRACK DAMAGED

Cincinnati, Ohio.—The terrific wind-and-rain storm which visited this vicinity on the evening of July 7 did not spare the Ludlow Lagoon, with its handsome club house and the board motordrome. The latter structure was damaged to the extent of five or six thousand dollars, much of it being demolished. In view of the lateness of the season and the extent of the repairs required to place the track in good shape for further racing, it will probably not be rebuilt this summer.

### CRUMLEY BADLY BURNED

Columbus, Ohio.—John Crumley, a machinist employed by the Franklin Cycle & Supply Company, agents for the Excelsior in Central Ohio, sustained severe burns in the shop of the company, at 142 East Gay street, while working on a speed machine belonging to H. Sudduth last week. While cleaning the frame, a bystander dropped an electric bulb which burst and the spark from the filament ignited the gasoline used by Crumley. Crumley was treated by a surgeon for his injuries and will be back to work in a short time. The machine was damaged to the extent of $50.

# COLUMBUS TIME IS NEW RECORD

## F. A. M. Referee Decides That New Flat Track Mark Was Established at July 5 Meet

COLUMBUS, Ohio.—Charles G. Cleveland, of Lima, Ohio representative of the F. A. M., has rendered a decision on the question of the disputed time in the 100-mile race which was held at Columbus July 5. It has been decided that the official time for the 100 miles, made by James Davis, of Columbus, was 87 minutes, 43⅖ seconds. This is regarded as a new record for dirt tracks.

The mixup in the time came at the close of the race. When the race was over and most people thought that a new record had been made, a comparison of two watches showed a difference of more than two minutes. The third watch was of no reliability at all. Mr. Cleveland refused to render a decision until he had the watches tested and certified. This was done and the decision was then announced.

Davis covered the first 10 miles in 8 minutes and 45⅘ seconds. He passed the 25-mile mark in 21 minutes and ⅗ seconds, and the 50-mile mark was reached in 43 minutes and 36 seconds. The first 65 miles were covered in 58 minutes and 43 seconds, and that was where the leader made his first stop for supplies. The 75-mile mark was passed in 66 minutes and 33 seconds. The fastest time was made between the 90th and the 95th miles, the four miles being covered in 3 minutes and 27 seconds. The last five miles were negotiated in 4 minutes and 30⅘ seconds. The last mile was covered in 55 seconds flat.

### SOLDIERS TAKE FIFTEEN

Fort Lyon, Colo.—Guilfoyle & McKinley, Indian dealers, have sold fifteen machines to soldiers in the fort near this city. They hope to get more of the garrison mounted on the red twins, as those who are now using Indians are more than pleased with them.

# Sahagin's Mountain and Desert Trip

LOS ANGELES, Cal.—Lem Sahagin, employed in the shop of the A. M. Kupfer Corporation, covered the 640-mile double round of the Los Angeles Motorcycle Club endurance run course through mountains and desert on his 1915 Henderson in 25 hours. If he had not been "pinched" by an over-zealous speed cop in San Bernardino before daylight and delayed three-quarters of an hour he would have made it within the coveted limit of 24 hours. As it is, the record gives glory enough to both the man and the machine. **Motor Cycle Illustrated's** correspondent asked Sahagin how long he slept after the tearing grind through the sand under burning sun, and Lem said seven hours. He reported for work before Hugh Fargo and A. M. Kupfer got in from Barstow in a 40-horsepower Hudson. The machine, just as he rode in on it, without a touch from a tool, stands in front of Kupfer's store, and if a suspicion of a knock could have been heard Fargo would have had to make good on his promise to give it away to the man who detected it.

The riders who were to have stationed themselves on the route to help Sahagin get gasoline, oil, food and water took the wrong road and he neved saw them. Fargo and Kupfer were on hand at Mojave to give him an orange and bid him good luck on his second round. His Presto tank gave out while he was still in the desert and he made the run through miles of sand and the risky Cajon Pass into San Bernardino by the pale moonlight.

### Some Risky Riding

Sahagin left the Los Angeles Motorcycle Club under sanction of the F. A. M. referee at 2 a. m. Sunday. He reached San Bernardino at 3:15 and was arrested and detained 45 minutes. A. M. Kupfer and Sales Manager Hugh A. Fargo had started with their wives to go out into the desert at 10 p. m., and as their six-cylinder Hudson reached the top of Cajon Pass at daybreak, after a night of steady driving, they heard a roar down the grade and Lem shot by and was gone. He made Barstow at 6:15, and covered the terrible desert 77 miles into Mojave without a spill at 8:45. He rode up to check at the club in Los Angeles at 12:45, ate and left on his reverse round at 1:30, making Chandler at 3:40 and Mojave at 4:55. He stopped there 20 minutes for a bite and rolled across the desert and into Barstow at 7:54. He made Victorville at 9:51, and beyond there his Presto quit. On the first trip he gained Barstow three hours and twenty minutes ahead of Kupfer's automobile, and returning they were one hour and twenty-six minutes slower than the two-wheeler in the 77 miles from Barstow to Kramer. After riding 43 miles without a light, he reached San Bernardino at 1:15 and Ontario at 1:55 and feeling discouraged because he had missed the 24-hour trick, took it easy and played safe into Los Angeles, checking in at Kupfer's store at 3:15. He covered in the 640 miles 100 miles of mountain passes and 332 miles of desert. Equipment: Firestone tires, Schebler carbureter, Diamond chain.

# Prexy Davidson's Rapid-Fire Vacation

SAN FRANCISCO, Cal.—Prexy Davidson, of the Harley-Davidson Motor Company, who has been basking in the salubrious climate of sunny California for the past two weeks, leaves for the Cream City tomorrow, after a flying trip from one end of the State to the other, in which he combined a considerable amount of business with a like amount of pleasure.

Mr. Davidson is a speed-burner, very much akin to the product of his big plant in Milwaukee, when it comes to getting around and seeing things, and during his short sojourn in the Golden State he was here, there and everywhere. He had to be "jobbed" in order to induce him to remain in one place long enough for a representative of **Motor Cycle Illustrated** to get a slant at him and to ply him with a few leading questions. Manager Fraser, of the local branch of the Appeal Manufacturing Company, California distributors for the Harley-Davidson line of motorcycles, worked the trick by turning the clock in his office back a half hour.

President Davidson said more in ten minutes than the average mother-in-law could have said in ten times that time, and what he said was to the point, as witness the following:

### Discusses the Lightweight

"With all due respect to Henry Ford's usually excellent judgment, he is all wrong when he says, as he is quoted in the last issue of **Motor Cycle Illustrated,** that when a lightweight machine is produced at an attractive price, more motorcycles will be sold than Ford cars. We hear much about the alleged demand for a light car at a low price, but when you get down to analyze just what is meant by this, you will find that the demand is not for a light car but for a cheaper car. As proof of this assertion, look around and you will see that very few light cars are in service anywhere in this country. What the people want is power, and the twin three-speed motor gives just what is wanted on motorcycles. In the case of my company, the percentage of sales of lightweights is only nominal, while there is an ever-increasing demand for the three-speed twin. What is true of my company is probably true of the other leading motorcycle manufacturers.

"There is little likelihood of lower prices for worth-while motorcycles, at least for some time to come, if at all, for the reason that metals are too high-priced and seem destined to go still higher, as a result of the war. Copper has reached an almost prohibitive price, and aluminum, which could be bought before the war in Europe for 18 cents a pound, now has soared to 28 cents, and may go even higher.

### No Lower Prices in Sight

"Another thing, motorcycle construction has been pretty well standardized, enabling manufacturers to place a definite, fixed price that represents only a fair profit, to go below which would mean that quality would have to be sacrificed, as material prices now rule. I look for no material change in design or weight from the twin three-speed machines now manufactured by the leading builders of motorcycles, for the reason that they are giving every satisfaction."

Mr. Davidson is accompanied to California by his wife and Mr. and Mrs. Frank L. Wood. Mr. Wood is a director of the Harley-Davidson Company. The party first stopped at Los Angeles and while there visited all of the points of interest, including Catalina Island and Mount Lowe. They made a side trip to San Diego for the purpose of seeing the Panama-California Exposition. While seeing the sunny southland, Mr. Davidson called on the various Harley-Davidson agents in the cities and towns he found time to visit. Coming north, he stopped at Bakersfield and Fresno, where he extended the glad hand to his company's representatives.

Arriving in San Francisco, Mr. Davidson, who was accompanied north by Manager Sayre, of the Los Angeles branch of the Appeal Manufacturing Company, joined Mr. and Mrs. Wood, and the party since has divided its time between seeing the Panama-Pacific International Exposition and viewing the points of interest in and about the Golden Gate city.

### Off for the Factory Again

This is Mr. Davidson's first trip to California and he is elated at what he has seen. He declared that, while business is not as good here as he would like to see it, his company is holding its own, and when the crops are marketed in California he expects to see a material improvement in general business conditions.

Mr. Davidson returned to Milwaukee in response to an urgent telegram, which compelled him to cut short his visit and made him forego, regretfully, calls on a number of Harley-Davidson agents in this territory.

**President Davidson (at left) and Frank L. Wood, with Two of the Finny Beauties Caught in Catalina Bay**

## RECONSIDERING AWARDS

San Francisco, Cal.—Owing to the fact that George W. Sherman, in charge of the Hendee Mfg. Company's exhibit at the Panama-Pacific Exposition, has lodged a protest with the Jury of Awards against the giving of more than one award to each exhibitor the decisions recently arrived at by the judges are being held in abeyance.

# Think This Over, Mr. Dealer

WE hear of a dealer here and there who, having done exceedingly well in the motorcycle business until a year or so ago, is thinking of giving it up because his business during 1915 has not been up to his expectations. We know that wise dealers have no such intentions, because they are far-sighted enough to appreciate that the motorcycle industry is just coming into its own. The weak-kneed agent may be unable to fully appreciate that the past few years have constituted simply a period largely of development work, the time of foundation-construction upon which to build solidly and permanently for the future. This is our firm conviction, and we have no hesitancy in predicting that those who give up their motorcycle business now will have plenty of occasion to regret it.

The motorcycle is a comparatively new thing. At the same time, advancement towards perfection has been made much more rapidly than it was, for example, in the development of such modern utilities as the locomotive, steamboat, telephone and telegraph. Were a comparison made between the locomotive after ten years of development with the motorcycle after a similar period, the verdict would be, as all will readily admit, entirely in favor of the motor-driven two-wheeler. Just as we would not think today of attempting to get along without railroads, so the time will come when the motorcycle will be regarded as almost, if not quite, as necessary. And that time is very near at hand.

This is not a dream of an optimist, but simply a prophecy based on the fact that as an economical and convenient means of rapid transportation the motorcycle of the future is bound to be used by thousands where now hundreds are users. Those who know the history of the bicycle, with its gradual transition from an expensive and heavy vehicle into a cheap and light one, must know that there is a wonderful future, and not far distant, for the motorcycle. The dealer who refuses to read the handwriting on the wall is deliberately putting himself out of the way of a profitable business, one in which his experience in the past, whether satisfactory or otherwise, will stand him in good stead. He will be foolish to retire from the fight now, with victory almost within his grasp.

As we have previously stated, the present type of machine, perfectly adapted for sidecar work and for the requirements of thousands of solo riders wanting the highest quality motorcycle that can be manufactured, is about to be supplemented by a kind of machine which will have ready sale among thousands who do not now ride motorcycles, because they desire a lighter, simpler and more adaptable machine. It may take a little time to educate this big potential market, but the market is there, and only a little cultivation is needed to make it active and extremely profitable to all engaged in the manufacture and sale of motorcycles and accessories.

The new idea in motorcycledom is rapidly assuming tangible shape, and the prediction of Henry Ford, commented upon in one of our recent issues, is about to come true. A year from today it won't be an easy matter to secure good motorcycle agencies. Those who have them now will do well to keep them.

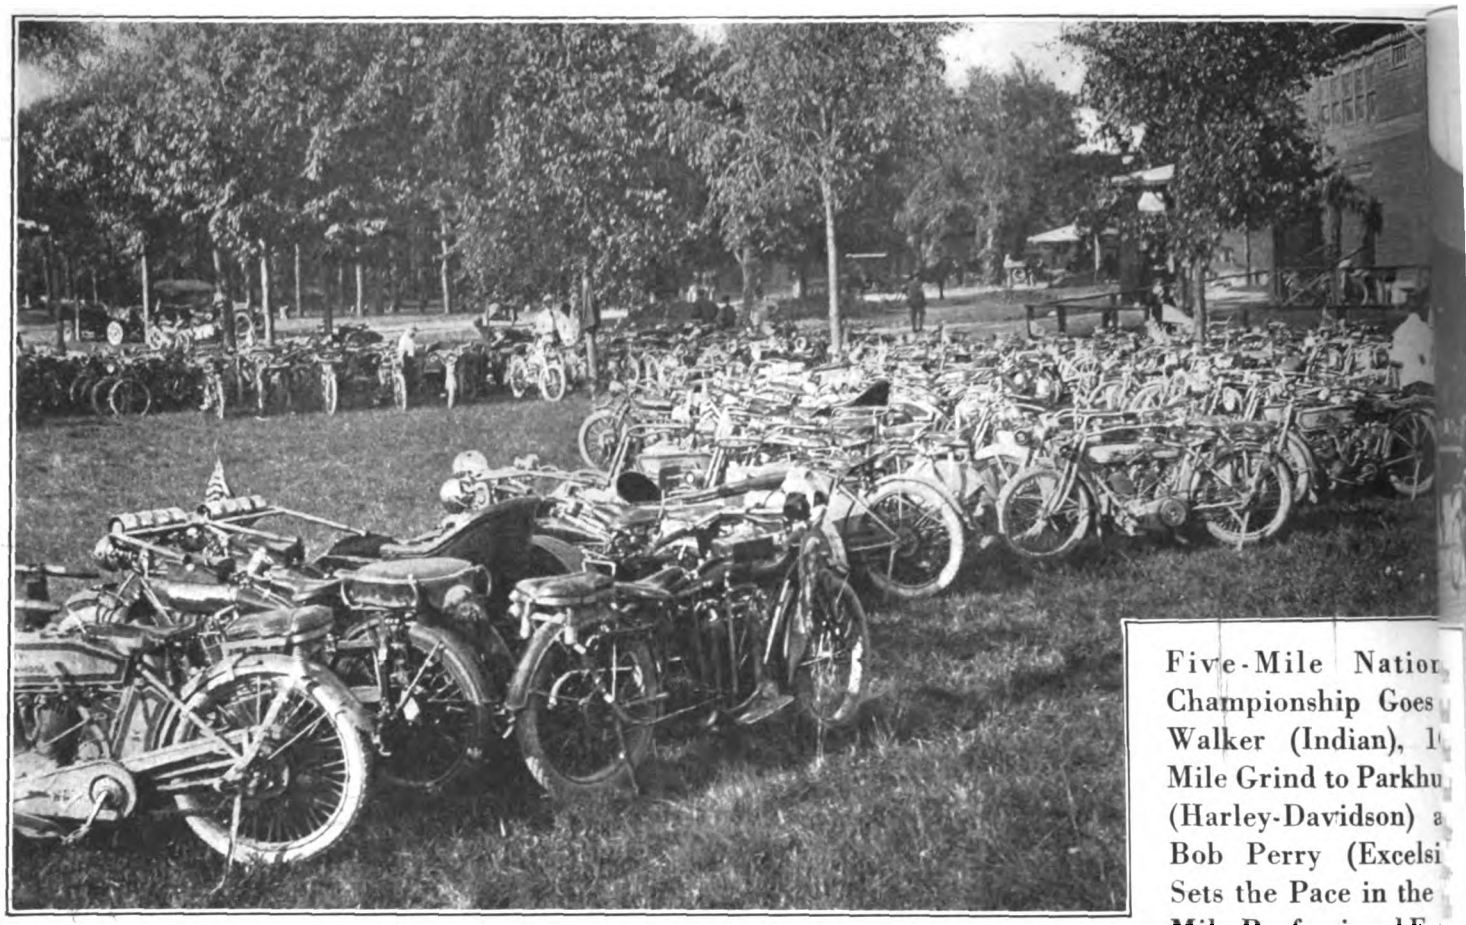
# Big Crowd Finds the Stuff That Thril



Five-Mile Natio
Championship Goes
Walker (Indian), 1
Mile Grind to Parkhu
(Harley-Davidson) a
Bob Perry (Excelsi
Sets the Pace in the
Mile Professional Ev

**Some of the Motorcycles Parked at the Racetrack**

AS a general rule, a postponement is not a howling success. No matter what the affair postponed, the put-off event usually lacks the snap and enthusiasm which would have attended the original. Saturday's races at Saratoga, postponed from the preceding Monday, provided a striking exception to the rule. A brilliant day, a large attendance, a big entry list and the finest kind of competition formed a combination in which there was room for but one regret, namely, that it had been impossible to run off the program as scheduled, when a much larger number of motorcyclists would have had the opportunity of enjoying it. Even as it was, upwards of 700 riders came to Saratoga last Saturday and witnessed as well balanced and as interesting a series of races as has ever been put on in the East.

### The Prize Winners

Honors were fairly well divided, the following being the winners:

10-lap professional—Constant (Indian).

5-mile professional—National Championship, Walker (Indian).

15-lap professional—Bob Perry (Excelsior).

5-lap professional sweepstake—Carroll (Indian).

100-mile professional—Parkhurst (Harley-Davidson).

From the above summaries it will be seen that Indian riders captured the 5-mile championship and two other professional events; Parkhurst, on a Harley-Davidson, annexed the 100-mile honors; and that Perry, on an Excelsior, led the field in the 15-mile pro.

### Two Track Records Broken

The track was hard but rather rough, on account of the constant rains. Despite this condition and although the time in the long distance event was only slightly more than a mile a minute, track records were broken in the National championships and the 15-lap race. The Saratoga track is a mile and an eighth circuit, which will explain the odd distances in several events.

First on the program was a 10-lap or 11¼-mile professional race. There were twelve entries, including Constant (Indian), Carroll (Indian), Lewis (Harley-Davidson), Hart (Indian), Barclay (Harley-Davidson), Janke (Harley-Davidson), Frederick (Harley-Davidson), Dolan (Excelsior), Perry (Excelsior), Davis (Indian), and Parkhurst (Harley-Davidson).

### Constant Wins First Race

Barclay, after a bad start, had succeeded in gaining back some of his lost time, when he went down on the fifth lap, but sustained no injuries. Hart dropped out on the fourth lap. Teddy Carroll led for three laps, with Constant and Walker right on his heels. Constant took the lead on the fourth lap and Carroll regained in on the fifth lap. On the sixth, however, Constant forged ahead and held the premier position until the end of the race. On the eighth lap Perry passed Carroll, but fell back again on the ninth, and finished in third place, close behind Walker. Summary:

Ten-lap (11¼ miles) professional; prizes $35, $25, $10—Won by Constant (Indian); Walker (Indian), second; Perry (Excelsior) third. Time, 10:03⅕.

### Championship Won By Walker

Ten riders lined up for the 5-mile National Championship as follows: Constant, Carroll, Walker, Lewis, Hart, Frederick, Perry, Stokes, Davis and Parkhurst. Constant dropped out early in the race and the rest of the field was soon outdistanced by Walker and Carroll on Indians, and Perry and Stokes on Excelsiors. At the end of the third mile Walker was in the lead, Carroll second, Perry third and Stokes fourth. Perry and Stokes changed places during the fourth mile, and the leading four, after one of the prettiest races ever witnessed in the East, finished in that order. Summary:

Five-mile professional National Championship; National Championship medals—First, Walker (Indian); second, Carroll (Indian); third, Stokes (Excelsior); fourth, Perry (Excelsior). Time, 4:28⅗, a new track record.

### Perry First in 15-Lap Race

Entrants for the 15-lap professional were the same as in the 5-mile championship, with the exception that Goudy took the place of Stokes. Carroll, on his Indian, led on the completion of the first lap, with Walker second, Perry third, Davis fourth and Dolan fifth. Walker took the lead and Perry second place on the second lap. On the fifth Perry passed Walker, and after that was never in danger of being over-

### Fourteen Ride in 100-Mile

...r the long distance event, 100 miles, or ... 8-9 laps, started by Secretary of State ...ancis M. Hugo, there were fourteen en- ... as follows: Constant, Walker, Car- ...ll Hart, and Davis on Indians; Lewis, ...arclay, Janke, Frederick, and Parkhurst ... Harley-Davidsons, and Dolan, Perry, ...oudy and Stokes on Excelsiors. First ...ize was $100, second $50, third $25 and ...urth $10, with additional prizes of $25 ...ach to the leaders on the 25th, 50th and ...5th laps, respectively.

After the riders had encircled the track ...three or four times in an effort to pole up ... the start, Referee Wagner finally got them well bunched and as he gave them the white flag, Secretary of State Hugo fired the starting pistol. Hart was the first one to experience trouble, on the third lap, but started again after a short delay. Lewis was the next one, then Carroll and then Constant. Constant had been leading between the eighth and the 12th laps, when he was overtaken by Perry, the order on the 12th lap being: First, Perry; second, Walker; third, Constant; fourth, Carroll; fifth, Davis; sixth, Goudy, and seventh, Parkhurst. Perry held the lead for ten or twelve laps when Walker, coming up from fourth place, went ahead on the 21st lap and held it long enough to win the $25 for leadership in the 25th lap. Upon Walker's retirement in the 31st lap, Davis assumed the lead, with Parkhurst a close second. They ran in this position through the 50th lap, Davis capturing the 50th lap prize. Walker started again when Davis and Parkhurst were on their 39th lap.

The 50th lap was reached with the following still in the running: Constant, Carroll, Walker, Lewis, Janke, Frederick, Dolan, Goudy, Davis and Parkhurst.

### Between Parkhurst and Davis

By the time the 75th lap had been reached, Parkhurst and Davis, constantly changing position and had outdistanced all their competitors with the exception of Goudy. The latter, on his Excelsior, although he had lost three laps early in the race, was at this stage of the game traveling faster than the leaders, and rapidly gaining on them. But the distance he had to make up was too great. The 75th lap prize was won by Parkhurst, after he had passed Davis on the 73rd lap. Parkhurst never lost the lead after that and won by a comfortable margin, with Davis, on an Indian, second; Goudy (Excelsior), third, and Walker (Indian) fourth. Summaries:

One hundred-mile race (88 8-9 laps); prize $100, $50, $25, $10—Won by Parkhurst (Harley-Davidson); Davis (Indian), second; Goudy (Excelsior), third; Walker (Indian), fourth. Time, 97:31. Twenty-five-lap prize, won by Walker; 50-lap prize, won by Davis; 75-lap prize, won by Parkhurst.

### CORRECTED F. A. M. STATISTICS

In last week's issue of **Motor Cycle Illustrated,** an error was made in reporting F. A. M. membership statistics for New York State. The corrected figures are as follows:

For the fiscal year 1913-1914: New members, affiliated, 468; unaffiliated, 203; renewals, 398. For the fiscal year 1914-1915: New members, affiliated, 556; unaffiliated, 207; renewals, 526. Two hundred and twenty more cards were send out to New York members during the fiscal year 1914-1915 than in 1913-1914.

The Goodyear Company was represented at Saturday's races by J. F. Reddick, of the advertising department at Akron headquarters; J. Lawrence, Albany branch manager, and Frank Hart, also of the Albany branch.

Charlie Barr came all the way from Columbus in company with Davis, and was glad to see that his protege took second in the 100-mile.

### DESCRIBING THE PHOTOS ON THE OPPOSITE PAGE

The large photograph at the top of the layout on the opposite page shows a number of the tourists getting acquainted in front of the Worden Hotel in Saratoga at the **Motor Cycle Illustrated** Rally, July 3-5. Below at left, some of the trade workers watching the baseball game—Ye Publisher is seen wearing his reg'lar seventh-inning smile. At right, Jes Campbell and Hal Noyes pulling some big league stuff just before the start of the baseball game. In the lower left hand corner are shown another view of the ball game and a section of the crowd of spectators at the official hotel. The small panel depicts "Pooter Joe" Brady, of the Indian advertising forces, decorating the grandstand, and the last picture shows how the sidecar combinations were worked into the general program.

**Main Party of New Jersey M. C. Riders Resting at Saratoga; This Club Made a Particularly Strong Showing at the Motorcycle Rally, July 3 to 5**

### NEWARKERS AT SARATOGA

Newark, N. J.—The New Jersey M. C. is proud of the fact that it had over twenty members at the Saratoga rally, July 3-5. As the distance from Newark to the scene of the program is over 200 miles, the club argues that its showing was an exceptionally good one. As a distinguishing mark all the New Jersey M. C. boys wore orange and black neckties. Three members of the club played on the two baseball teams at Saratoga, Cordes on the Indian and Herrington and Bush on the Harley-Davidson team.

The club has just taken in its 96th member and under the energetic leadership of "Link" Holland is fast coming into a position of prominence in the East.

# SHORT GRASSERS REACH SPRINGS

## After Spending Two Days Around Colorado Springs, They Started on Return Journey

COLORADO SPRINGS, Colo., July 11.—The Short Grass Tourists safely reached their destination, Colorado Springs, on the evening of Friday, July 9, and spent two days seeing the marvelous sights of this city before starting on the return journey. A smaller number of riders turned out this year than last, due to the heavy rains which prevented many who expected to join the tour from reaching Dodge City, the starting point. But there certainly was plenty of good fellowship. Everybody had a dandy time and promised not only to join the tour of 1916 but also to bring many of their friends along. It was decided to hold next year's event out to the Ozark Mountain region of Missouri.

Because many of the riders found it necessary to overhaul their motors and make other necessary adjustments to their machines, the Short Grassers did not leave Las Animas until two hours behind the schedule time on July 6. They found that between Las Animas and La Junta the country was wild and rugged. In rapid succession Swink and Rockyford were passed through. At Manzanola a big cherry pie dinner was the attraction. Through a country rendered a fertile paradise where once only the cactus and sage brush thrived, the tourists rode while on their way to Pueblo, the "Pittsburgh of the West," where they put up for the night.

The next day, July 7, a smooth highway, constructed by convicts, took the tourists into Canon City. After having dinner there, they made an inspection of the state prison. The riders were very much interested to see the very humane manner in which Colorado treats its prisoners. On Thursday, July 3, a trip was taken to the top of the Royal Gorge. This is one of the show places of Colorado, which is over 3,000 feet wide and 2,957 feet deep. They saw the roaring Arkansas River and rode on the famous Sky Line Drive.

On Friday, July 9, the tourists left Canon City for Colorado Springs and covered the forty miles between the two places in leisurely fashion. Dinner was had at Dead Man's Gulch before the springs were reached. July 10 and 11 were spent in visiting nearby points of interest, such as Pike's Peak, the Woodman's Sanitorium, Cave of the Winds, Ute Pass, Manitou Incline and Crystal Park. The riders were pretty well tired out after the two days of sight seeing, but they all felt that they were more than repaid by what they saw.

### NO NEW YORK LICENSE YET

Contrary to reports that have been circulated, New York riders will not have to obtain a license to operate motorcycles or sidecar combinations in the metropolis or in New York county. An ordinance relating to licensing was brought before the Board of Aldermen early in the week ending July 10, but was referred to the committee on thoroughfares of that body before the end of the week. It is stated that some of the provisions of the measure needed revision, and that such would be made before submitting the same to Mayor Mitchel for his signature.

As the committee in question will not meet before September 21, and the measure will be considered for a week before going to the city's executive, riders will probably not have to consider a New York license before October 3 at the earliest.

# DEALERS WILL ACT AS HOSTS

## Baltimore Tradesmen Will Entertain Riders at Big Picnic to be Held Sunday July 25

BALTIMORE, Md.—There will be big doings for local motorcyclists on Sunday, July 25, when the Baltimore dealers give their picnic, and present indications lead to the conclusion that the attendance will be a record-breaker. "Chic" Thomas has turned his place on the Back River over to the motorcyclists for the occasion. The dealers are giving this treat out of the fullness of their hearts, and with the desire to sweep away all the stiffness of trade and business and meet their patrons on the mutual ground of motorcyclists and jolly good fellows.

The program for the day will open with a ball game between the Haley-Davidson and Indian teams. Bert Heinz will twirl the horsehide for the Harleys and Howard A. French will be on the mound for the Indians. Gus Heinz and "Happy" Mears will stand behind the bat and handle the hot ones. Nelson Johnson and F. O. Boyd will act as umpires and see that all the squeeze plays, etc., are pulled off according to big league requirements.

Following the baseball battle games of other kinds will be in order. The tug of war, with Captain Bob French on one side and Captain Charlie Hubert on the other, will be hotly contested, and the bag race, potato race and swimming contest will add to the interest. Music, dancing, dinner and supplementary refreshments will round out the fine program. Clarence Mahrer, Ted Krug and "Chic" Thomas compose the committee of arrangements.

### FOREIGN ORDERS FOR EMBLEMS

Angola, N. Y., July 9.—During the past few days, the Emblem Manufacturing Company, of this city, has received numerous cablegrams for motorcycles in large quantities and is busily engaged in shipping to fill the same. Among the foreign orders were those of the Amsterdam (Holland), Johannesburg (South Africa) and Havana agents, nine being asked for by the first, six by the South African representative and four by the Cuban agent.

### EMPIRE TIRE EXPANDING

Trenton, N. J.—The Empire Tire & Rubber Company, of this city, is carrying out its plans for enlarging the capacity of its plant by means of additions and alterations. A new building is in course of erection at the present time, and a siding has been run from the tracks of the Pennsylvania railroad direct to the shipping room. The latter has been modified to enable quicker handling of product and to give room for an increase in shipping. The need of additional room is demonstrated by the fact that in the tire building department the men are being worked on three 8-hour shifts.

### FOURTH OF JULY VICTORIES

In a bulletin issued a day or two ago the Goodyear Tire and Rubber Company calls attention to a long list of victories scored by motorcycles shod with Goodyear Blue Streak tires on July 3, 4 and 5. "From its initial appearance in motorcycle tiredom the Blue Streak tire has taken its place as a winner," says Shelby A. Falor, manager of the Goodyear motorcycle tire department, "and the results of the Fourth of July races show that it is living up to its reputation."

### NOVEL FIRESTONE WINDOW DISPLAY

Branches of the Firestone Tire & Rubber Company, of Akron, O., all over the country are using a novel form of window display during the month of July on "back-to-the-soil" lines. In each case, it takes the form of a farm-scene with fences, flag sidewalk, haystack, barn and silo.

Firestone products enter into the entire construction of the scene. The fence posts are valve parts, the stack cover is an inside blow-out patch, while the flags in the sidewalk are inner tube patches. The background is made from a number of hand-painted cutouts. The barn and silo stand over three feet high, and the miniature automobile, which stands in front of the barn, is fitted with wee Firestone tires. These displays are but part of a large advertising campaign which the company is conducting throughout the country.

### MANY CALL AT POPE FACTORY

Westfield, Mass.—Charles Krebs, Pope representative at Newark, N. J., headed a party of seven riders from the New Jersey city who paid a visit to the plant of the Pope Manufacturing Company, in this city on July 6. The septette, all on Pope motorcycles, consisted of Krebs, Carl Dambach, Bernard Kroemer, Frank Vaught, Rudolph Cisko and William Schlieper. Other visitors to the plant were L. E. Fowler and Mrs. Fowler, of Pittsburgh, Pa.; Abijah H. Barrett, Jr., of Keene, N. H.; G. W. Silsby, Roy Smith, James Goode and H. A. Slack, of Littleton, N. H.; S. W. Starquist, of Woonsocket, R. I.; E. F. Tupper, of North Wilbraham, Mass.; V. D. Parker, of Batavia, N. Y., and J. S. Rosenthal of Montreal, Canada. Pope officials say that not even the rainy days which have recently been experienced seem to keep visitors away from the factory.

### WEIS APPOINTED SALES MANAGER

Chicago, Ill., July 10.—Albert J. Weis, for many years connected with the Chicago Belting Company in the capacity of salesman, has been appointed salesmanager of that company. He succeeds Mr. Scherer, who resigned recently. John H. Clayton, former advertising manager, who also resigned to set up in business for himself, is succeeded by E. H. Ball.

### ELECTRIC MODEL PROMISED

"An electric motorcycle, or 'electrocycle,' as it is called, to be operated by a 1.5-hp. motor, will be placed on the market, it is announced, by the Hill-Standard Manufacturing Company, of Anderson, Ind., next spring," says a recent issue of the *Electrical World*. "It is planned to develop a machine weighing about 120 pounds, which will be equipped with a storage battery designed to provide energy for a run of 100 miles."

### NEW FOLDING DIMMER GOGGLE

Announcement is made by the Chicago Eye Shield Company, of 134 South Clinton street, Chicago, Ill., that a folding model of Dimmer goggle has been added to its line of eye protecting devices for motorcyclists. The Folding Dimmer, as the new goggle is designated, is full convex formed when open and flat and compact when folded. The fold is in the center of the nose-arch and in no way interferes with the correct seating of the goggle on the face even after months of use. The goggle is made of a transparent material known as pyralin, and can be had in clear or amber color, with or without the green "dimmer" or upper section which characterizes this make of goggle. It is supplied with a carrying case and lists at 85 cents with dimmer, or at 65 cents without dimmer. Jobbers and dealers should communicate with the company for trade terms, etc.

**The Folding Dimmer**

### BECOMES A MOTORCYCLE M. D.

From the dissecting room of the foremost medical college in the country to a motorcycle repair shop seems a far cry, but J. J. Colen has achieved this stunt. Colen has just opened a large motorcycle agency in Mount Vernon, where he will handle the Harley-Davidson and also rejuvenate all damaged motorcycles to their owner's satisfaction.

Mr. Colen was formerly a medical student in the Johns Hopkins University, but the lure of the motorcycle game proved too strong for his medical ambitions. He still gratifies his desire to take things apart and put them together.

### REACH THE MILLION MARK

Mr. Louis Schwab, of Stevens & Co., makers of the well-known Sampson Inner Tube Repair Plug and of a host of other popular accessories, reports that the million mark has been reached in the sale of the Brass Bicycle Plug Kits, which they have been manufacturing for more than a decade. Mr. Schwab ventures the prophecy that this record will be broken by the Sampson Plug.

### JUNE HONEST INJUN OUT

Pithy and direct arguments in favor of the motorcycle are given in sermonette form by Jesse Edwards as the leading article in the June issue of *Honest Injun*, the monthly house organ of the Hendee Manufacturing Company, at Springfield, Mass. There are three pages of this matter, all of which should make a strong appeal to the dealer and assist him in making sales. The various performances on Indian machines and riders in hill-climbing, endurance runs, and on flat tracks, as well as the 1,600 mile New Zealand non-stop run take up most of the book, while the excellent "Story of a Discouraged Dealer," runs into its second installment.

### MOTOR WHEEL HOUSE ORGAN

Milwaukee, Wis., July 3.—Beginning with the month of August, the Motor Wheel Division of the A. O. Smith Company, will start issuing a monthly house organ to its dealers. In an effort to link itself closely to its seven hundred and seventy-nine dealers, the Smith company will publish in its organ chatty cycle news, store hints and helps of value to dealers. The title of the booklet will be "The Bicycle Booster."

### NEW DETAILS FOR PULLMAN

Detroit, Mich.—Harry Svensgaard, of the Harry Svensgaard Sales Corporation, announces that he is working on a number of new things for the Pullman sidecar, of which he is the manufacturer. They will be definitely proclaimed at the Chicago show.

### HUFFMAN HEADS AD. CLUB

Dayton, Ohio.—Horace M. Huffman, sales manager of the Davis Sewing Machine Co., with especial charge of the motorcycle end of the business, received a well-deserved honor recently when he was elected president of the Dayton Ad. Club. He has for some time been prominent in the activities of the organization, and his selection was no surprise to his friends.

## Greater Co-operation Needed in Legal Action Work

(Continued from page 35)

...e to the motorcycle field and should ...ounted as such. Riders are also taking ...e care of their machines, as regards ...eral appearances, and the inclination to ...ear neater costumes on the road is also ...preciable. The neater motorcyclists can ...appear on their machines the more powerful ...the influence they will exert to batter down ...that old-fashioned belief that the single-...tracker is necessarily dirty. We know that ...it is not, but the general public, being 'from ...Missouri,' must be shown.

### Many Horses to Be Replaced

"While I dislike to dwell upon an un...pleasant subject, I cannot refrain from ex...pressing the belief that the present heavy ...loss of horses on the battle fronts of Europe ...will exert a favorable influence upon the ...motorcycle industry. It takes from three ...to four years to replace a horse, while we ...can produce motorcycles almost as fast as ...the country can pay for them. How the ...motorcycle is to supplant the horse can only ...be discussed on a general basis of course, ...but it can hardly be denied that the elimina...tion of thousands of American horses from ...the commercial and pleasure fields is certain ...to affect the motorcycle industry. The au...tomobile manufacturers will reap the heav...iest harvest, naturally, but I believe that the ...motorcycle will obtain a considerable share.

"To get back to our Legal Action work, ...I may say that the motorcycle manufactur...ers are showing in a most practical manner ...their appreciation of the benefits derived ...through the activities of this committee. ...They are giving both time and money to the ...work, and without them our plans could ...not progress as well as they have.

### Results Almost Uniformly Satisfactory

"I shall not go into a review of the work ...already accomplished, for that has already ...been discussed quite fully in the trade jour...nals, but it may be well to state that we ...have obtained definite and satisfactory re...sults in nearly every case taken up. Some ...idea of the scope of the Legal Action work ...may be gained from the statement that a ...short time ago we had developments under ...way in Massachusetts, New York, New Jer...sey, Maine, Wisconsin, North Dakota and ...Ohio at the same time. Operating on such ...a broad basis, it is essential that we have ...the harmonious backing of the dealers and ...riders from coast to coast—and that is the ...strongest suggestion I have to give at this ...time. The Legal Action Committee of the ...A. M. is working to the very limit of its ...resources, and all that is needed to make ...this task a wholly pleasant one, and to insure ...increasing results, is greater co-opera-

...his committee can take up a case in any ...and fight it to the last ditch, as we ...have been doing, but unless the trade and ...riders in that state show in every way ...that they are a unit in support of ...A. M. the work will not go on as ...vigorously as it might. 'United, we stand ...divided we fall' is a pretty good slogan ...for cyclists the country over, and I ...hope they will keep it in mind more ...and more as time goes on.

...We are in better shape to protect motor-cyclists now than ever before—and there is more to protect them against. Not long ago there seemed to be a boom in legislation unfavorable to riders, and from all sides came complaints. We did our best, that's all, and the general results were pleasing. We shall go on working on this basis."

### LEBELL CLEANS UP ON THORS

Los Angeles, Cal.—"See that machine going out the door? That's our last Thor until we get a new shipment," said George Rubsch, head salesman of the Pacific Motor Supply Co., to the representative of **Motor Cycle Illustrated,** a few days ago.

This was the last machine of the season's shipments, including two straight carloads and a lot of stragglers, and they are anxiously awaiting the next lot. The local telephone company has been a heavy purchaser this year. The Saturday before July 4 was the firm's biggest day in bicycle sales this season. Rubsch sold eight bicycles, two second-hand motorcycles and one new one, and the accessory business kept up strong until they had to drive people out of the store at 10:30 at night.

Manager Edward Lebell was kept busy behind the counter without any supper until late and they had the bookkeeper and Ralph Sullivan out of the shop attending to customers all day and until late at night. The day after the holiday things were quiet in the store, but the shop was crowded.

### ASK FOR MORE "KING KUMFORTS"

Los Angeles, Cal.—Edward Lebell, manager of the Pacific Motor Supply Company, is anxiously waiting for a second shipment of the Persons "King Kumfort" saddles for the Worcester factory, for his first shipment vanished like snow in a stove as soon as received. Two of the saddles came over by parcels post, and were sold a few minutes after being unpacked. Another four came in by express and soon were fitted to the seat posts of as many customers. Lebell's travelers are asking for more of the saddles, so the next shipment will be welcome, "and so will some more," says Lebell.

### A PLEASING TRIO

*How the Girton-Hoffer Company in Los Angeles Attracted Attention Recently to An Excelsior Demonstrator Equipped with Side-by-Side Seat*

## "We're Ready; The Glad Hand Is Waiting", Says Pixley

(Continued from page 30)

ing in eight hours, and the hotel accommodations along the way are all that could be desired. Trout fishing at the lake is only one of many amusement features to be enjoyed there.

### That Trip to Lake Tahoe

"The round trip to Lake Tahoe starts and ends in Sacramento. It takes the rider around the lake and back to Sacramento through Auburn. On the outward run the tourist goes through Placerville, which is only a few miles from Coloma, where James Marshall in 1848 discovered gold. Then the rider passes through Riverton, Kyburg, Phillips and Tallac, and the shores of Lake Tahoe are reached. On the return run the rider visits Emerald Bay and then Tahoe City, on the lake, and then proceeds to Truckee before striking the road which leads through Auburn to Sacramento. While this is by no means the only pleasant motor trip out of Sacramento, it is easily one of the best.

"To sum up, I can only say that California—and Sacramento in particular—will do everything possible to live up to the opportunities offered for entertaining the visitors, and there is no state in the Union where the natural entertaining facilities approach those of California. We invite all motorcyclists to come and get acquainted—the more the merrier, and we guarantee to convince them that the term 'Western hospitality' really means something. We're ready—the glad hand is outstretched; now let the boys roll in and make themselves at home."

### ACTIVITY IN THE NORTHWEST

Los Angeles, Cal.—Walter S. Tullis, Western representative of the Continental Rubber Works, with headquarters at San Francisco, called in Los Angeles after a trip to Seattle, Portland and Tacoma, where he secured some fine orders for Vitalic tires. Mr. Tullis reports that shipping from Seattle has had a great increase in the past few weeks. A lot of shipments to Europe are going by way of this port and Russian ports of entry, and a lot of grain from the Northwest is being shipped out of Seattle. This has stimulated business conditions generally and created a better feeling.

### REED'S FAST ROADWORK

Los Angeles, Cal.—Lester E. Reed, of the Los Angeles Harley-Davidson store, has just made a trip from Los Angeles to San Bernardino, 64¾ miles from the corner of Jefferson and Main streets, Los Angeles and back, in 2 hours 25 minutes on a Harley-Davidson two-speed with 15-K motor. He made two stops coming back, one for gas and one to change a plug. He slid every turn and at Puente slid a wide one into the barley field, but had no spills.

### NEW USE FOR MOTOR WHEEL

Seattle, Wash.—J. A. Noll, a mail carrier of this city, has purchased a Smith Motor Wheel and bicycle from Ellis Brothers, local agents, for use in delivery work.

# MESINGER—The Ideal Touring Saddle.

***Centre Compression—Air Cushion Springs***

For touring, and for the endurance runs that bring out the qualities of every part of the motorcycle, the **MESINGER AIR CUSHION SADDLE** demonstrates forcibly its absolute ease of riding; its staunch durability.

In construction, the springing system of the Mesinger is identical to the shock-absorbers used on the automobiles of today. Coil springs enclosed in a steel barrel, with air space at the bottom of each barrel. Thus a cushion of air softens the downstroke of both springs.

In addition, the rider sits perfectly still on his saddle at all times. He does not shift from side to side, or sway dangerously. The **centre compression** on all Mesinger saddles assures both sides of the saddle being depressed equal distances at all times.

Ask your dealer what he thinks of the MESINGER. Then specify it on your next machine.

...n, Pa.—There was quite a line-... speedsters in the hill-climb ... recently, Irving Janke, Carl ...wyn Jones, Bob Perry, Harry ...n Klark being "among those ...st year's record on the hill ... but in this year's program ... the mark down to 3:16⅕. ... made by the automobiles

was 3:27⅗, by a special six-cylinder racing car.

Carl Goudy, Excelsior, hung up a mark of 3:22⅗ and it was taken for granted that this would stand. Then Rich Bacon, Harley-Davidson, cut the time to 3:20⅖, and received an ovation. Janke, on his Harley-Davidson, then sprung the surprise of the day. Taking the turns at terrific speed, he was clocked at 3:16⅕. This left Bacon, Harley-Davidson, second; Goudy, Excelsior, third; Maldwyn Jones, Merkel, fourth; Bob Perry, Excelsior, fifth; Karl Benz, Thor, sixth; Harry Immel, Henderson, seventh.

### CAFIERO SETS NEW 100-MILE MARK

Savannah, Ga., July 9.—J. S. Cafiero, Harley-Davidson, came in first in the 100-mile race on the eight-mile course on July 4, his time being 93:03. This sets a new record for the distance. H. F. Kuck, Indian, came second, some fourteen minutes behind. Third place was awarded to de Montmollin, Harley-Davidson, of Macon, Ga., who had just completed his sixth lap when the race was called. In the 50- mile event, Eddie French, Harley-Davidson, of Birmingham, took first place in 49:44, with Kuck, Indian, second.

There were nine starters in the 100-mile race: Eddie French, J. S. Cafiero, Martin Schroder, L. G. Buckner (last year's winner) and J. S. de Montmollin, all on Harley-Davidsons; R. O. Lancaster, F. Kuck, Jr., and Dennis Downing on Indians, and John Mosher on a Thor. Schroder led the field for the first five laps, and then retired with a broken tank. Buckner retired toward the end of the race with a broken valve, French had fuel trouble, Lancaster went out with motor trouble in the sixth lap, Downing froze up in the eleventh lap and went out, while Mosher rode off course in the first lap and did not resume riding. Cafiero rode a consistent race throughout.

Only two riders finished the 50-mile race, four others having quit for various reasons. Buckner led at the start, but soon retired with motor trouble, whereupon French had things his own way.

Eddie French, Winner in 50-Miles, and J. S. Cafiero, 100 Mile Victor

### R-S CLOSES HUGE CONTRACT

Reading, Pa.—The Reading Standard Company announces that it has just closed a contract with "one of the biggest concerns affiliated with the motorcycle and automobile business in London for several thousand motorcycles." Work will be started within a few days. In addition, negotiations are now pending for another big order which the company can very nicely handle in connection with the manufacture of motorcycles.

The officers of the company believe that under the circumstances prospects for 1916 are excellent, and they declare that they are very pleased with the outlook.

# Walker's Leather Breeches Scare the Jinx

## Better Than a Yellow Jersey for Such Work, Says Dodge City Winner

By HUGH SHARP

A PAIR of leather riding breeches played an important part in the victory achieved by Otto Walker and his Harley-Davidson in the Dodge City classic July 3—if you leave it to Otto. It would be hard to find a racing man who defies superstition. Every puncture and every bit of mechanical trouble invariably can be traced back by the rider having it to some incident out of which he can extract the hoodoo responsible for that particular job.

Walker used to prize his yellow jersey as his very best mascot and he never was seen on a machine without the traditional yellow jersey—before the Dodge City races. Down at Venice before the big Easter Sunday race "the fellow with the yellow jersey" was the most popular with the people living in Venice. After the race Walker could have had anything he wished for in Venice, just so long as he wore that yellow jersey.

But racing men are fickle. The yellow jersey soon was supplanted in Walker's affections by the leather riding pants. It was the La Grande race that did it. Otto wore the yellow jersey, but a pair of ordinary khaki trousers in place of his regular leather pants. Two blowouts that cost him first place at La Grande hung the crepe on the yellow jersey so far as its good luck properties were concerned.

Now Walker pins his faith to those riding pants. At Dodge City he wore them. The absence of the yellow jersey was freely commented upon, but there were only a few persons at the race who were intimately acquainted with the demise of that yellow jersey's popularity. The fact that he won at Dodge City with the pants and without the jersey has firmly convinced Walker that his wearing those leather trousers will be a fixed habit hereafter.

### A Memorable Birthday

"It isn't everybody that can celebrate his birthday by becoming world's champion," said Otto, in that quiet way of his.

"What you you mean?" It's quite a jump from leather pants to birthdays, and we didn't quite "get" Walker.

"You see, I was just 25 years old on the day of the Dodge City race and that $600 for winning first place, added to the $200 for breaking my former record at Venice, made quite a handsome birthday gift, don't you think?"

Walker thinks that the present 300-mile races are too short to stand as a test of the durability of the motorcycle. "I would like to see promoted a 1,000-mile race," he says. "There would be the real honest-to-goodness contest to bring out the survival of the fittest.

"The Dodge City track is one of the best I ever rode on," said Otto. "There was only one bad chuck hole in the whole course and you hit that coming out of the upper turn. I got a few bumps on the nose from my handlebars before I got the location of that particular hole fixed in my geography of the course.

"I rode about twenty miles looking out of one eye on account of the chuck hole, because I broke the glass on one side of my goggles when the handlebars bumped me. If you think it's a cinch making turns with one eye closed, try it some time.

### Graves Surprised Him

"I did not know that Morty Graves was ahead of me. I realized that the last blowout, which came right after I left the pits and which made me ride the grass all the way around the track to save the rim, cost me a lot of time, but I thought I had piled up enough of a lead to still be ahead.

"I had a 2¼-inch tire on the rear and was afraid to let out the last fifty miles for fear she would go. Every time I came around to the pits I could see Bill Ottoway jumping up and down and motioning me to go faster. Every time I came around Bill got more excited and I could not figure out the cause, thinking at the time that I was ahead.

"Bill's actions were beginning to get my goat, and finally I opened her up and tore around in the last ten miles. When I saw Morty fussing around with his eight-valve on the other side of the track I was only mildly interested. It never occurred to me that up to that time he had been ahead of me."

Otto Walker is a native of Lathrop, Cal. He began his racing career in July, 1911, at the age of 21 years, his first mount being an Excelsior. With this machine he got fourth place at San Jose, Cal., in September of that year, the award being a turkey which he and his family enjoyed for Thanksgiving dinner.

Walker and the Leather Riding Breeches

Shortly before Thanksgiving Day, 1911, Walker was bitten by the speed-mania and he signed up to ride at the Elmhurst motordrome against Joe Wolter. He broke the local amateur records for five and ten miles at this bowl and won seven out of eight races in which he was entered. During 1912 he finished his apprenticeship as a machinist, which training he has found to be of great value ever since.

### With Earl Armstrong

Early in 1913, Walker joined forces with Earl Armstrong and started to use a ported Excelsior. He won the W. F. M. ten-mile amateur championship in May of that year in Sacramento, his time being 9:40. From Sacramento, he went to Santa Rosa, where he cleaned up all the amateur events, and shortly afterward turned professional. It was during his early days as a pro. that Walker competed with Dud Perkins, and so close was their riding that dead heats were the rule at most events. Perkins later allied himself with Walker and there was an end to their rivalry.

At the Decoration Day races in Portland, Ore., in 1913, Armstrong and Walker swept the board between them. They then traveled to Elmhurst motordrome and again rode, but Walker had to be content with second places only, for Armstrong and Perkins were too much for him. In the San Jose races Walker and Perkins rode three dead heats, but Walker took the fourth.

### Ups and Downs at Portland

Early in 1914, Walker made excellent showings at Tacoma and Portland, gaining many firsts. He tried out a new Harley-Davidson stock twin at the latter track when it was wet and had to go to hospital for thirty days as a result. On being discharged as cured, he found that his capital amounted to but seventy-five cents, but luck was with him and he came away from a race meet several days later with some sixty dollars to the good. On July 3, 1914, he broke the track record at Salem, Ore., making the circuit in 51 seconds. He followed this up with perfect scores in the Portland-Roseburg and the 375-mile San Francisco-Gilroy runs, showing his ability on the road.

The present season has been a banner one for Otto Walker. He won the 300-mile race at Venice in 4:17:24, averaging 68.31 miles per hour. He was not so fortunate at Bakersfield, however, as he lost out by reason of ignition trouble. At Sacramento he took the five and ten-mile stripped stock event, competing against Goudy and Perry, and won the majority of races at Santa Rosa, Fresno and Portland. Two blowouts let him out of first place in the La Grange-Portland run, but he came second to Joe Wolter, the winner, nevertheless, having to ride eleven miles on the rim to do so.

# Goullet Leads In Title Races

NEWARK, N. J., July 11.—Alfred Goullet took the lead in the race for the national cycling championship here on Sunday by leading Alfred Grenda, Frank Kramer and Bob Spears to the tape in the final of the one-mile title race. Grenda was disqualified for not staying down on the pole while riding the last lap of the race and second place was given to Kramer while Spears was credited with coming in third. The race resulted very unsatisfactorily, as Grenda and Goullet gave Kramer a very high ride on the last turn of the final lap, keeping the champion from getting to the front.

**Goullet Has 25 Points**

Goullet is now in first place with twenty-five points, Kramer is three points behind with twenty-two credits, while Grenda is but one point back of Kramer, resting in third position with twenty-one points. The victory of Goullet breaks the tie that existed for first place between Grenda and Kramer, who each had twenty points, while previous to Sunday's race Kramer had sixteen points.

Going into the last lap of the race, Grenda was leading, trailed by Goullet and Kramer. Kramer raced after the two Australians but was unable to catch them in the home stretch. He was gaining as the riders made for the last turn which carried the home stretch and the finish line once more. Grenda then swung high and Goullet swung up the track still higher, forcing Kramer to go pretty near to the top of the embankment. There was not a chance of "Big Steve" getting by the leaders and he raced after Grenda and Goullet as they went down the stretch. Goullet beat Grenda over the finish line. Even as the race was over, Kramer put in a hard protest to the referee and Grenda was disqualified.

**Australian Beats MacDougall**

Goullet, after winning the title race, beat Donald McDougall, the former amateur star, in straight heats of a match race. Jack Fogler, the Brooklyn Taxicab magnate, was easy "pickins" for Reggie McNamara in the Brassard race, which carries with it, for winning, a crisp fifty dollar note. During the entire mile McNamara was in the lead at all times and Fogler just trailed him around for six laps. This makes the seventh time that McNamara has been returned the winner.

Georges Seres, of France, was beaten almost by a full lap by Oscar Egg, of Switzerland, in the ten-mile tandem paced race. Seres's pacemakers dashed off around the four-mile mark and left him without a tandem team, while Egg, riding behind Hill and Fogler, gained pretty near a half lap. He increased his lead until at the end of the race he had all but lapped the French rider.

**1, Spears, Goullet, Kramer and Grenda at the Start of the Championship Title Race; 2, Hans Ohrt Winning the Half Mile Amateur Race**

**Hans Ohrt Again Stars**

Once more Hans Ohrt, the San Francisco boy, rode at top form and won two races, taking first place in the half-mile handicap and the two-mile open. In the two-mile race he took the lead two laps from home and held it right into the finish, while in the shorter race he led going into the last lap and was not passed. The summaries:

One-Third-Mile Novice (Amateur)—Won by William Eager, Newark; Frank Huber, Newark, second. Time, 43s.

One Mile National Championship (Professional)—Won by Alfred Goullet, Australia; Alfred Grenda, Australia, second; Frank L. Kramer, East Orange, third; Robert E. Spears, Australia, fourth. Time, 2m. 40s. Last eighth mile, 12⅗s. Grenda finished second but was disqualified for riding above the black line.

First Semi-final—Won by Alfred Grenda, Australia; Alfred Goullet, Australia, second. Time, 1m. 3⅕s. Last eighth mile, 12⅖s.

Second Semi-final—Won by Frank L. Kramer, East Orange; Robert E. Spears, Australia, second. Time, 1m. 16⅖s. Last eighth mile, 12⅕s.

Half-Mile Handicap (Amateur)—Won by Hans Ohrt, San Francisco (scratch); Fred Taylor, Newark (scratch), second; William Weimar, Newark (45 yards), third; Eddie Kane, New York Athletic Club (15 yards), fourth. Time, 57⅗s.

The Brassard Race at One Mile (Professional) (Reggie McNamara, Australia, vs. Joseph Fogler, Brooklyn)—Won by McNamara. Time, 2m. 54⅗s. Last eighth mile, 12⅕s.

Match Race (Professional) (Alfred Goullet, Australia, vs. Donald McDougall, Newark)—Won by Goullet. First heat at a quarter mile won by Goullet. Time, 28s. Second heat, one-sixth mile, won by Goullet. Time, 20s.

One-Third Mile Handicap (Professional)—Won by Larry Corbett, Australia (60 yards); John Schlee, Newark (30 yards), second; William Hanley, San Francisco (20 yards), third; Frank Blatz, Jersey City (45 yards), fourth; Fred Weber, Newark (25 yards), fifth. Time, 36⅗s.

Three Mile Open (Professional)—Won by Reggie McNamara, Australia; Menus Bedell, Lynbrook, L. I., second; Oscar Egg, Switzerland, third; Jackie Clark, Newark, fourth. Time, 5m. 40s.

Two Mile Open (Amateur)—Won by Hans Ohrt, San Francisco; Thomas Grimm, Irvington, second; Fred Taylor, Newark, third; Eddie Kane, New York Athletic Club, fourth. Time, 1m. 18⅘s.

Ten Mile Tandem Paced Match Race (Professional) Oscar Egg, Switzerland, vs. Georges Seres, France—Won by Egg. Time, 18m. 29⅗s.

# Big Day for "Simon Pures" at Bay

SHEEPSHEAD BAY, N. Y., July 11.—Greater New York amateur riders were featured in all the contests before the motor-paced contest at the Sheepshead Bay Velodrome, Saturday night, July 10. Tom Bello, the veteran cyclist of the Empire City Wheelmen, defeated a big field in the three-mile amateur race open to riders living in Greater New York and Long Island, but he was hotly pursued by his clubmate, Jerry Nunziata, who made up almost half a lap in the final mile. Third place fell to Franklin Fisher of Brooklyn, the old Irish-American A. C. representative. Fourth money was won by Joseph Napthal of the Century Road Club Association. Bello's time for the three miles was 6:43 2-5.

Antony Desimone, of the Century Road Club Association, outsprinted George Bowker of the Glencoe A. C., in the final dash for the honors of the three-quarter-mile handicap for riders living in Manhattan and Brooklyn. Bowker was scratch man while Desimone started with an allowance of thirty yards. Joe Napthal secured third place in a hard drive with Louis Hiban of Inwood. Desimone's time was 1:31 3-5.

In the second of the series of interclub league amateur pursuit team races, the representatives of the Unione Sportivia Italienne defeated the New Jersey division of the Century Road Club of America and the New York members of the latter organization won from the Glunz Wheelmen of Brooklyn. It took the Italian cyclists only five laps and a half to catch their opponents, while the Glunz wheelmen rode two miles and two laps before they were passed by the New York Century men. The respective times of the victors were 1:29 and 5:21. Eight teams of two men each were entered in this race, which was run in four trial heats. Two of the trials were contested on July 5, the Century Road Club Association and the Bayview Wheelmen of Newark qualifying. The final will be decided on July 17.

Leon Didier, champion of France, created a thirty-mile motor paced record for

*Leon Didier*

the Sheepshead Bay Velodrome eighth-lap track in a race in which he was opposed by Clarence Carmen of Jamaica, L. I., the world's champion, and the former messenger boy of Syracuse, George Wiley. With Nazo, the peer of pacemakers, carrying him around at a gruelling pace, Didier did the thirty miles in 43:53 2-5, beating by 12 seconds the record made earlier this season by Wiley. Carmen was beaten off by two and three-quarters laps, while Wiley, who had trouble with his own cycle and that of his pacemaker Morin, finished thirteen laps behind the winner.

For fifteen miles of the thirty Carmen remained in front, hitting a clip that seemed certain to bring him victory, but Didier, who got away with a poor start, came along like a shot, and at fifteen and a half miles he had passed the world's champion. Then ensued the most thrilling paced battle of the season. With every lap Carmen slipped slightly to the rear. Wiley went by the titleholder at eighteen miles, and at twenty was a good second to Didier, who was timed at this point in 29:02 2-5.

At the twenty-first mile the French titleholder gained his first full lap on Carmen, and from this stage the Jamaica cyclist appeared to lose heart. Wiley's pacemaker, Morin, lost the chain of his machine, and before Hanburg could be substituted the Syracuse man had lost whatever chance he had for victory.

About the twenty-fifth mile Carmen made an earnest bid to regain his lost lap, and he drew up on even terms with Didier, but the Frenchman drew away again by adding just a little speed. After that Carmen did not figure strongly. Didier passed twenty-five miles in 36:31, and was moving at a pace that assured him of a new record. At twenty-nine miles Carmen was lapped for the second time, and he lost another three-quarters of a circuit in the final mile.

The race was the best paced affair of the season and was witnessed by a crowd that taxed the capacity of the Velodrome.

## CRESCENT CENTURY STANDING

Baltimore, Mo., July 12.—The report of the century mileage contest of the Crescent Bicycle Club to the end of June shows that William T. Wright, who jumped into the lead last month is still in first place, the next ten in order being John G. Stricker, Fred. M. Sanborn, Welby Sherman, Langdon M. Sanborn, William McAvoy, Walter Doersch, Raymond Curry, Rudolph Leimbach, August Leimbach and William Leimbach. The position of the three leaders remains unchanged, but further down the line several changes have taken place, Walter Doersch having moved from eighth into seventh place, and William McAvoy, although a member of the club for only a little more than a month, has accomplished the remarkable feat of moving from last into sixth place.

## NEW ENGLAND WEEKLY

The weekly cork race of the New England Wheelmen, of New York, held on July 11, was won by Erler Sprower in 13:05⅗. The roads were in good condition and the weather was ideal for the race, resulting in the fast time made. J. Boyes was second, and W. Hall finished third.

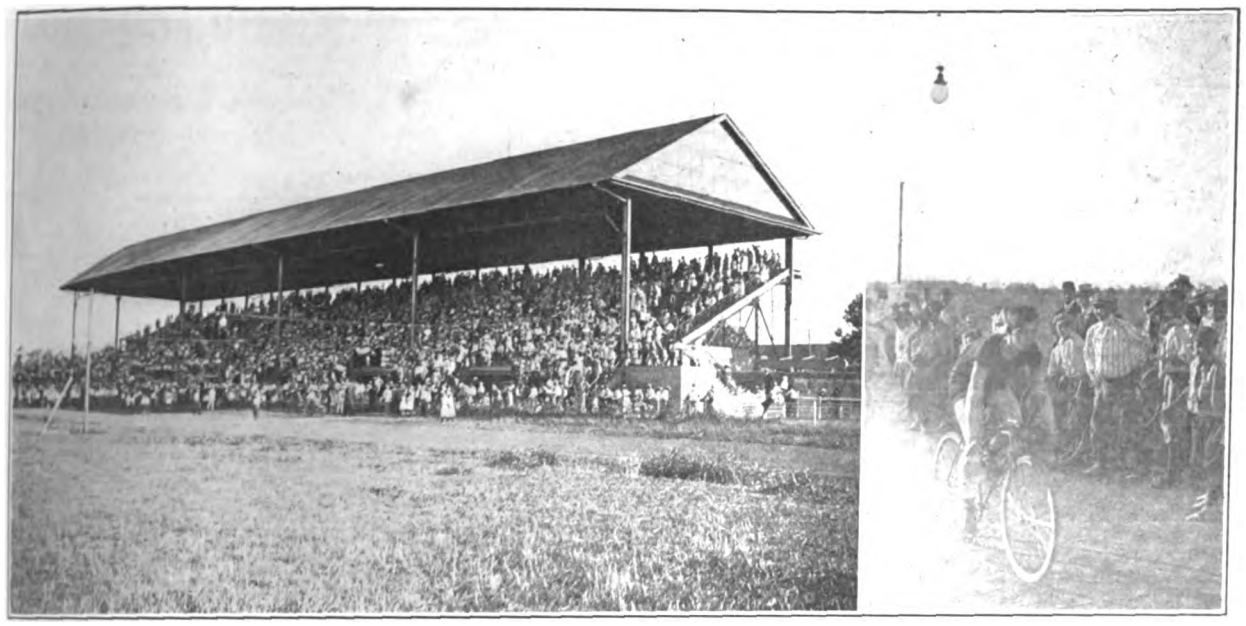
THE STATE BICYCLE CHAMPIONSHIP RACE DREW A CROWD OF 15,000 AT DALLAS, TEX.



Left, Witnessing the Bicycle Races From the Huge Grandstand on Fair Grounds. Right, Scott Winning the State Championship Race

Dallas, Texas.—L. L. Scott, riding a ..., won the two-mile handicap and the ...-mile state championship events in the ... meet at the Dallas Fair Grounds on ... Kenneth Gross, Pierce, carried off ... mile handicap, while Harry Bartsch ... in the one mile boys' race. The ... was conducted by the Cortines Sup... Company, Dallas bicycle and supply ...

... time for the handicap was 5:28, ... the championship event 2:30. ... Etkins, Reading-Standard, came ... in the two-mile handicap, with ... Parr, Pierce, third. In the state ... ship, Etkins and Parr also finished ... and third respectively. Parr was ... ed in the five-mile handicap, be... few feet behind Gross, the winner. ... son and Otis Meserole, both on ... came third and fourth in this ...

... race saw Bartsch win in 3:17, ... Clarde Stalling second and Howe ... third. During the interim between ... cycle events, a two-mile and a ten... motorcycle race were run, the former ... Schmidt and the latter to Whiting. ... crowd witnessed the program.

### ST. LOUISANS TO HOLD PICNIC

... Mo.—The annual picnic of the ... Cycling Club will be held on ... August 8, at Ten Broek, Mo., lo... the Meramec River. A party of ... seven of the club riders will go ... cycle vacation trip for Haha Tonka ... Saturday, July 17. A stay of a few ... le made at the destination and ... return will be via Washington, Herman ... Jefferson City.

### SHOPS ACTIVE IN ORANGE BELT

... Angeles, Cal.—Julius Smith, manager ... Edwin F. Merry's bicycle house in Los ... reports repair shops in the orange ... northeast of Los Angeles very active. ... Redlands, Gowland Bros., agents for Excelsior and Indian motorcycles, report all their second-hand machines cleaned up except two, and repair business very active with a shop full of machines requiring attention.

R. E. Owen, the Harley-Davidson agent at Redlands, reports better business and has been doing a lot of repair work.

Riverside Cycle & Sporting Goods Co., who handle the Excelsior, report business picking up a little. They have sold a lot of new bicycles and are doing a fine business in the Smith Motor Wheel, which they find to be a good bicycle booster.

### BICYCLE DEALERS TO GIVE PICNIC

Terre Haute, Ind.—Invitations for the bicycle dealers' association annual picnic on July 21 are being sent out to the trade men of this territory. The party will make the trip up the Wabash to the mouth of Otter Creek on Commodore Tetzel's boat, "Sport," leaving the foot of Walnut street at nine o'clock. The association will ask the traveling men to play a game of baseball on the sand bar. It has been announced that any salesman who carries an order book, holds private conversation with any dealer, or in any other way appears to be dampening the picnic spirit by talking business of a serious nature, will be taken before the commodore and promptly fined on the charge of conduct unbecoming a guest of the dealers' club. J. Ed. Sayre, of J. E. Sayre & Company, secretary of the association, has charge of the affair.

### MIDDLE WEST SALES ACTIVE

Terre Haute, Ind.—L. G. Hughes, traveling representative of the National Cycle Company, returned from his second trip through the Middle West today and reported bicycle and motorcycle conditions better than he had expected.

"Of course, a man cannot expect to sell as much on the second trip of a season as on the first," said Mr. Hughes, "but I was agreeably surprised at the business I found through Kansas, Nebraska and Iowa."

# CHICAGO CLUB TO HOLD BIKE TOUR

## Windy City Cyclists Will Pedal 250 Miles on Their First Annual Tour

CHICAGO, July 13.—The Chicago Cycling Club has plans well under way for its first tour of the season on Labor Day.

The Chicago club, while strong the beginning of the season as a touring and road racing club, seemed to have forsaken this part of the game when the local velodrome opened and all flocked to the track. It was with difficulty that the officers of the club staged the Decoration Day race and they, therefore, hesitated to hold another race on Labor Day. Hence the decision of having a tour for this date instead of a road race.

As Labor Day falls on Monday, giving most of the boys a two and one-half day week-end vacation, the start will be made in all probability from the Chicago avenue waterworks at three o'clock Saturday afternoon.

A road captain will be chosen who is an old-timer at the touring game and who will set a pace of not more than 100 miles per day. The course, which has not been decided on fully, will cover about 250 miles, divided into three districts: 100 miles north, 25 miles west, 100 miles south and 25 miles east.

### MILLER WON BIKE RACE

Los Angeles, Cal.—Earl Miller won the 15-mile race of the Southern California Wheelmen over the Eastlake Park course, Los Angeles, on July 4, riding a "light" machine. Ralph Kingsley was second on a Pierce, and Earl Thompson third on an Iver Johnson.

## MILWAUKEE CYCLISTS ON RUN TO THIENSVILLE

1, T. Andrae and His High Wheel; 2, Hoffman of Century C. C.; 3, Start; 4, L. Pierron and His 24-Year-Old Bike.

MILWAUKEE, Wis.—When members of the North Side Cycling Club met at Rader's corner, recently, for their trip to Thiensville there were 115 bicycle riders on hand and out of this number 74 finished the eleven and three-quarter-mile run in good condition. Terry Andrae, pacemaker on his high wheel, set a fast clip for the boys at the start, but riders gradually settled down to a more steady grind. Louis Pierron, on his 24-year-old machine, also showed up in fine style and made the trip without mishap.

The actual riding time was one hour, but various stops were made along the route and two hours were practically used to make the run. The youngest member to make the trip was Master George Schmidt, nine-year-old son of G. B. Schmidt. Fred Hausman, 53 years, an old-time bicycle manufacturer, made both runs. The return trip was made by the cyclers in one hour, without a stop being made.

### TWO RACES AT PORTSMOUTH, O.

Portsmouth, Ohio.—Two interesting bicycle races were held here on July 5, under the auspices of local dealers. A ten-mile race for boys over sixteen years was won by Howard Brunner, while a five-mile event for younger boys was nabbed by Ray Baybee. Prizes donated by the merchants were given to the first nine who finished in each race of the dealers' meet.

### BALTIMOREANS IN SPEEDY RACE AT WASHINGTON, D. C.

Washington, July 11.—W. T. Cauffman, riding from the five minute mark, won the 25 mile road race of the National Cycling Club, of Washington, in the fast time of one hour and four minutes on Sunday, July, 11. L. Howell, from the six minute mark, and J. L. Torney, a co-marker of the winner, finished second and third, tying for the second time prize. They tossed for it and Torney won it. The first three men caught Howell a few miles from the starting point, and working together, finished with a good lead over all other contestants. But eighteen riders started owing to the threatening weather. The four scratch men, all members of the Crescent Bicycle Club of Baltimore, failed to account for any of the three time prizes, Sherman and L. M. Sanborn puncturing, and McAvoy and F. M. Sanborn finishing fourth and sixth respectively, for place position and fourth and fifth in time.

An argument arose over the time prizes, the scratch men questioning the extremely fast time made by the first three, none of whom has ever before ridden in a road race. But after some friendly discussion the protest was waived by the Baltimoreans. The first ten men:

| Name | Handicap | Actual Time | |
|---|---|---|---|
| W. T. Cauffman | 5:00 min. | 1:04:00 | N. C. C. |
| L. Howell | 6:00 min. | 1:05:00 | N. C. C. |
| J. L. Torney | 5:00 min. | 1:05:00 | N. C. C. |
| Wm. H. McAvoy | Scratch | 1:05:30 | C. B. C. |
| H. King | 6:30 min. | 1:12:15 | N. C. C. |
| F. M. Sanborn | Scratch | 1:05:45 | C. B. C. |
| L. Holbrook | 7:30 min. | 1:16:00 | N. C. C. |
| H. Miller | 6:30 min. | 1:15:30 | N. C. C. |
| L. M. Sanborn | Scratch | 1:15:00 | C. B. C. |
| P. Garner | 9:00 min. | 1:28:00 | N. C. C. |

# CAVANAGH STIRS CHICAGO CROWD

## Irishman Wins One Lap Record Trial and Breezes in First Open Event

CHICAGO, July 12.—Frank Cavanagh, the Newark Irishman, was the bright star at the Riverview Velodrome on Sunday night, July 11. Cavanagh won the one-sixth-mile (one lap) record trial and later on in the evening took the two-mile open for the professionals by one of the finest prints seen at the local track.

In the record trial each rider was given two laps in which to wind up. Bobby McLean, the local skater who has branched out as a racing cyclist, had the first try and negotiated the distance in 17⅗ seconds. Eddie Madden, the Newarker, bettered that by going the circuit in 16⅗ seconds. Then Albert Crebs, who holds the record at 15⅗ seconds, which was made in Crebs' home town, Salt Lake City, negotiated the lap in 16⅗ seconds. Peter Drobach rode the circuit in 16⅗ seconds. Others tried but most of them were slower than Drobach, until Cavanagh had his try and put the mark down to 15⅘ seconds. Verri, the Italian, then made the lap in the same time as Drobach, and Iver Lawson tok 16⅕ seconds to do the tour.

The finish of the two-mile open for the professional was a hair-raiser. Peter Drobach went to the front at three laps to go and took the field along a great rate. Pete led at the bell, but Iver Lawson came around Piercey and Walker, who were following in the wake of Drobach, and set sail for home after the last lap had started. Lawson opened up a big lead and looked like a winner, but Cavanagh, coming from sixth position, set after Lawson and just did nip the local Swede at the tape.

Ernest Kockler and Bert Nelson, two Riverview Cycling Club riders, took the amateur races. Nelson won the one-third-mile handicap, while Kockler won the strenuous "miss and out" race by a wide margin. The latter race was a hard one and Kockler deserved his win. A spill featured the handicap for the amateurs, but no one was seriously hurt. Summary:

One-third-mile handicap, amateur—Won by Bert Nelson, Riverview C. C., 65 yards; second, C. Schroeder, unattached, 75 yards; third, M. T. Monson, Conquer A. C., 80 yards; fourth, E. Davini, Italo-Am. C. C., 10 yards. Time, 37⅘ seconds.

Miss and out, amateur—Won by Ernest Kockler, Riverview C. C.; second, Willie Kell, Chicago C. C.; third, George Klasen, Danish-Am. C. C.; fourth, Kelsey Cleveland, Chicago C. C. Time, 4:04. Distance, 1 5/6 miles.

One-sixth-mile record trial, professional—Won by Frank Cavanagh, Newark, 15⅘ seconds; second, Iver Lawson, 16⅕ seconds; third, tie between Francesco Verri, Italy, and Peter Drobach, South Boston, 16⅗ seconds.

Half-mile handicap, professional—Won by Floyd Krebs, Newark, 45 yards; second, Norman Anderson, Denmark, 45 yards; third, Eddie Madden, Newark, 20 yards; fourth, Lloyd Thomas, San Francisco, scratch. Time, 54⅗.

One-mile Brassard race, professional—Won by Ned Young, Salt Lake City; second, Bob Diefenbacher, San Jose. Time, 3:18⅘.

Two-mile open, professional—Won by Frank Cavanagh, Newark; second, Iver Lawson, Chicago; third, Francesco Verri, Italy; fourth, Lloyd Thomas, San Francisco. Time, 3:53.

# WALTHOUR WINS REVERE FEATURE

## Veteran First in Boston Motor-Paced Race; Goullet Defeats Dupuy in Match Race

BOSTON, July 12.—The Parisian riders, Leon Didier and Georges Seres, finished first and second in the Franco-American motor-paced match at Revere track, Wednesday night, July 7, the former American middle-distance champion George Wiley, and the present champion, Clarence Carman, being in third and fourth positions, respectively. In the Saturday night, July 10, feature 25-mile motor-paced event, the veteran Bobby Walthour won out over the younger blood in the person of Pinkie Turville, who in turn was well ahead of Worth Mitten, of Davenport, Ia., and Percy Lawrence, of San Francisco. In a match race tonight, also, between Albert Goullet, the Australian sprint champion, and Marcel Dupuy, the French crack rider, Goullet won in straight heats.

The Franco-American race Wednesday night was in three heats and was scored by points. In the first two heats of 10 miles each first place counted two points and second place one. In the third heat of 20 miles, first counted 7, second 5, third 3 and fourth 1. In the first heat Seres went out to the front, winning over Wiley by about a third of a lap. Carman had it easy in the second, as Didier punctured early in the heat. The third heat had a rather nerve-racking finish, for three trials were necessary before they were finally sent away, Didier finishing the first time and breaking a tape on the second. No more troubles of this way, however, and he went out to the front the first mile and was never headed. The two Americans were out of the race early, Carman losing pace in the second mile and Wiley breaking a chain in the eighth. Didier held his pace perfectly, and finished some six laps ahead of his more erratic countryman.

In Saturday night's 25-mile motor-paced event Worth Mitten, the Indiana boy, started off with a sprint that took him well into the lead with several laps to the good, but the steady-going Walthour and Turville, by perfect pace following got into the front before many miles were wheeled, and thus they finished, Bobby Walthour being four laps ahead of Turville when he crossed the line, in the time of 35 minutes 5⅕ seconds.

In the match race between Goullet and Dupuy, one of the best ever staged at Revere, Goullet had the better of the jockeying. In the first three-fourths-mile heat he won out by a wheel and in the second, although Dupuy was ahead in the final sprint, Goullet had the strength to again put his forward wheel over at the tape. Saturday night's summary:

One-half mile amateur handicap race—Won by Fred Hansen, Revere (100 yards); L. C. Rollins, Everett (scratch), second; New Chandler, Boston (35 yards), third; Tim Sullivan, New Haven (10 yards), fourth. Time, 57 seconds.

One-half mile professional handicap race—Won by Saxon Williams, Buffalo (75 yards); Frank Drobach, South Boston (30 yards), second; Harold Rollins, Everett (scratch), third; Dennis Connolly, Everett (45 yards), fourth. Time 57⅗ seconds.

Special match race, French style—First heat (three-fourths mile) won by Alfred Goullet, Australia; Marcel Dupuy, Paris, second. Time, 5:07⅗. Second heat (three-fourths mile) won by Goullet; Dupuy, second. Time, 3:20⅕.

Five-mile open amateur race—Won by John Barry, Cambridge; John Farding, Orient Heights, second; Lorimer Winslow, Providence, third; Fred Herbert, Fall River, fourth. Time, 11:22⅗. Lorimer Winslow, Providence, winner of most laps.

Unknown distance professional race—Won by Pat Logan, South Boston; Hugh McPartland, Boston, second; Frank Droback, South Boston, third; Alvin Loftes, Providence, fourth. Distance, 1 mile 4 laps. Time, 3:20⅘.

Twenty-five-mile motor-paced race—Won by Bobby Walthour, Atlanta; "Pinkie" Turville, Revere, second; Worth Mitten, Davenport, Ia., third; Percy Lawrence, San Francisco, fourth. Time, 35:5⅕.

### RESULTS OF PLEASANTON RACES

Pleasanton, Cal., July 10.—The Acme Wheelmen, of Oakland, accounted for the six man team race, held on Sunday, July 4, at Pleasanton, as a feature of the Alameda County Association picnic. The Acme Wheelmen scored a total of fifty-six points, Garden City 55, and New Century 51. There were six heats and one rider from each club rode a distance of three miles, with a sprint at the end of each mile. The Acme team was awarded a trophy and each rider received a gold bar.

The one-mile open was captured by H. Hoffman, Olympic Club, while N. Eisentraut, of the Garden City club, was second and L. Cooper, a clubmate, took third position. There were thirty entrants in the three-mile handicap affair, which was carried off by L. Nelson, of the New Century, 30 seconds; A. Wink, Garden City, was second with a handicap of 45 seconds, while H. Spence, of the New Century, took third position with a handicap of 15 seconds.

Smith Motor Wheel Riders From Salt Lake, Utah, on Recent Outing

# 75 CYCLISTS IN AMERICA'S RUN

## Fifty-Mile Pleasure Run to Rye Beach, N. Y. Was a Monster Affair

SEVENTY-FIVE cyclists participated in the fifty-mile pleas re run to Rye Beach, N. Y., which was held on Sunday, July 11, under the auspices of the Century Road Club of America. The riders started from Columbus Circle, New York City, at nine o'clock in the morning and then proceeded to the Southern Boulevard in the Bronx, where the first stop was made. After partaking of refreshments, the chief pacemaker, L. A. Fraysee blew the whistle and the cyclists strung out in double file and pedalled into New Rochelle, the second stop.

Arriving at Rye Beach, the destination of the run, it was announced that the cyclists could amuse themselves in any way they pleased until the hour of departure, which was three o'clock in the afternoon. Nearly all the riders went in bathing. The water was fine and the swimming was greatly enjoyed after the ride of twenty-five miles.

At the scheduled time the homeward journey was started along the Boston Post Road, a detour being made at New Rochelle. At first the pace was leisurely, but after the Pelham Parkway in the Bronx was reached the cyclists were going at a fourteen miles an hour clip. The last stop was attained at five o'clock in the afternoon.

The pacemakers on this pleasure trip were: L. A. Fraysee, Andrew N. Segal, Emile E. Fraysee, George Steppello, Julius G. Schmidt, Harry Aron, William Muller, William Lock, Fred H. Petersin and A. L. Everard.

By NORTHWAY AND BENSON

**Northway and Benson in Buffalo, N. Y., About to Resume Their Transcontinental Bicycle Trip**

Cleveland, Ohio.—Well, Benson and I have reached this city safely, arriving on the morning of June 30. We're just getting our second wind, after pedalling all the way from New York City, which we left on Sunday, June 20. Gosh! but it's wonderful to hit the trail for the great out doors. Bob Benson and I are as happy as larks for having broken the shackles of city life and taken to the roads with our wheels.

### Sad Farewell to New York

We thought we'd leave old Broadway in a light-hearted fashion, but we sure did feel a pang of regret when we saw the tall buildings of Manhattan growing smaller and smaller in the distance. Then as we entered the suburbs of New York and tackled some real country roads with green fields and woods on either side, the wanderlust which had seized us became keener than ever and we soon forgot all about Gotham.

Along the shore of the picturesque Hudson River, Benson and I plugged up hill and down until we reached Ossining when we spotted a restaurant that looked good. We found a colored brother in charge and immediately Benson started to impersonate the shady branch of the human family. "Man," he asked, "did you ever ride one er them there bicycles?" The darky came back at him: "I sho has, boss. I spec I done rode over all dese here roads round here. I sho had a good wheel, too. She was a racer and all she needed wuz a little pressure. Jus a little pressure, yes suh, that wuz all." Bob and I have often thought of what the negro said; he was about right—all you need is a little pressure.

While we were eating a young fellow came in, who, upon finding that we were on a cross country trip, invited us to bunk with him. However, there was a string tied to his invitation. He stipulated that we were not to take away with us any of the plumbing in his house. We discovered later that only a week before he had had a guest under his roof, who like a Jean Val Jean had departed during the night with all the brass faucets, chandeliers and most of the lead pipe in the house. Well, we managed to behave ourselves properly and after a good night's sleep thanked our host and departed.

### Money Scattered Around

We rode only a short distance and looking down on the road I saw nickels and dimes strewn about. Believe me, it didn't take long to gather up all that were in sight. After we had continued our journey, Benson was not satisfied that I had covered the ground thoroughly, so he went back and began a new search. The result was that he found a wedding ring. There were no initials in it, and figuring that we would have a hard time to find the owner we reluctantly kept the ring.

Little of interest happened to us on our way into Poughkeepsie except that at Wapinger Falls Benson certainly qualified as a trick rider. The town is built on two sides of a little valley and the gradient of the road we were following was very steep. We started down very fast and did not notice that at the bottom the roads was being repaired. Bob being behind, saw the obstruction last and did not have time to turn aside as I did. A barricade had been thrown across the road, but fortunately it was low, so Benson did the famous Kramer jump and got across safely. Our tires were punctured with broken pieces of glass when we were a short distance out from Poughkeepsie. However, we were lucky in finding the establishment of Jochmus and Gindele, bicycle dealers, where we were well received. Mr. Gindele sold new tires at cost.

### What the Ham Did

Twenty-six miles out from Poughkeepsie we struck the town of Red Hook. The road house at that point wasn't much to look at from the outside, but the people inside certainly knew how to cook and they gave us lodgings at rock bottom prices. It happened that a bunch of fellows were making this place their headquarters during the strawberry season. They were a splendid lot of lads and treated us to all the strawberries and cream that we could possibly eat. Early the following morning we started out in a drizzle which soon turned into a real storm, making us seek shelter under a huge tree. When the lightning looked as though it were playing a game of tag around the trunk of the tree, we made a break for the nearest house. Bob and I found a lady in charge and asked to be permitted to use the barn. But she would have none of that; she insisted that we go into her house and dry our clothes by the stove. About half-past eleven in the morning we were fairly dry, and the approach of the dinner hour made us feel a little uneasy. "Let's get out of here," I said. "This kind lady will think we're

# When Gasoline Handling is an Asset

## Dealers in Smaller Towns Often Benefit by Having Fuel on Hand

By POWELL A. JONES

HAVING studied the welfare of the motorcycle dealer for the past six or seven years, I was naturally much interested in your article on whether the dealer should store gasoline, which appeared in the Dealers' Section in your last issue. There are several points upon which I must take issue with the author of the article, and the first of these is the question of profit in handling the fuel.

In most places, the dealer can purchase gasoline in barrels at eleven cents a gallon. He sells it for fifteen cents a gallon at least, and in some places for 19 cents. This will give him a gross profit of four or eight cents per gallon, allowing for wastage and leakage in the garage for storing there will be a net profit on each gallon of three to six cents.

Now if the dealer's trade is such that he can only dispose of a few gallons a day, I would say that he should not handle gasoline, unless he feels certain that sales from that source would induce sales in accessories, increase in the number of machines stored or more repair work. The relatively small profit on fuel sales alone would not warrant the installation of a storage outfit, while to store the fuel in a barrel or even a metal tank above ground would be showing too much of a risk. In contrast to this, anyone who looks in the trade journals and see photographs or read descriptions of dealers whose establishments are on main roads, and who find that transient trade in the shape of touring riders and automobilists warrants the storage of fuel and results in considerable profit to the dealer.

The question of time devoted to handling gasoline, is too small a one to consider seriously, in my opinion. It takes but a few minutes to draw a gallon or two of fuel and insert it in the customer's tank. A boy can do this, or the customer himself, as far as that goes. It would take a big demand for fuel to interfere with the selling of motorcycles in any agency, and if it was found that the fuel end was growing out of proportion to the size of the staff another man or boy could be added, for the increased profits would enable this to be done. There are always riders about any establishment who will lend a hand in case of a rush.

**When not in competition with large gasoline stations, says this writer, the motorcycle dealer is justified in storing and selling fuel, and the risk and trouble involved in a small town need not be bothersome. What do you think about it? Does the motorcycle dealer get enough out of gasoline sales to repay him for storing the "gas" and handling it?**

IN the big cities, the matter of competition as stated in your article holds good, but not so in smaller towns. Many towns—a great many, in fact—have no large fuel and oil stations; the hardware man, the grocer or the automobile agent has to be interviewed to get a supply of the precious "gas." The big refiners do not sell to these people at rock-bottom prices, and the motorcycle dealer stands on an even footing with the others, but with the advantage that all motorcyclists will come to him and a number of automobilists, too, rather than seek a hardware store, for example. He can also count on sales to other local users. The auto agent in a small town is often a plumber or small tradesman instead of being exclusively a motor vehicle agent, and is a doubtful quantity at best.

But there is a chance of profit from itinerant automobile trade. It comes in two essentials to the operation of any gasoline motor: oil and spark plugs. Nearly every sale of oil shows a profit, as does the sale of any first-class spark plug. Riders and drivers naturally feel that where there is gasoline there must be lubricating oil, hence the dealer who has both has a double chance to sell. And spark plugs are included in any display of accessories.

LASTLY, the question of fire risk arises. The premiums charged by insurance firms will always be high if the underwriters' provisions are not followed to the letter. On the other hand, insurance companies take cognizance of gasoline stored in an underground tank, and reduce premiums accordingly. As far as the installation of such apparatus is concerned, it is not high in cost, and the work can be done by almost anyone capable of handling pick and shovel. As to fitting the necessary piping, a repairman of ability can do this himself.

I think that the article was written more for the dealer in the big cities than for the one who occupies a big place in a smaller town. I feel that the having of gasoline on hand is an asset for the small dealer—that it is an aid to business both directly and indirectly—provided he has no competition in the form of big gasoline service stations before installing a proper outfit. But I would not advise the dealer in a large city, one situated near automobile garages in particular, to install one.

## NOVEL INFORMATION SYSTEM

Buffalo, N. Y.—Neal, Clark & Neal, Indian representatives in this city, have a novel way of looking after their prospects and old riders. If a rider, whether of an Indian machine or otherwise, desires information on any point about his motorcycle, he is requested to fill out a special information card designed by the Neal agency. This card is then handed over to their mechanical man, who gives the matter immediate attention. Any letters written or calls made are noted on the back of the card. This service idea has been an excellent aid to sales, the firm reports.

## FULTON POLICE TAKE FOURTEEN

Atlanta, Ga.—The Harley-Davidson Motor Company's Southern Branch, of which Gus Castle is manager, has just delivered four three-speed models to the Fulton County police department. These four are the first of a lot of fourteen which will be used by the police in covering the entire county, and all will be three-speed models. The department until recently had only eight machines in service, but the Chief, G. Matthewson, determined to add six others, and at the same time have them all of one model, hence the order for fourteen Harley-Davidsons.

## MANY ATTEND WESTERN CO. PICNIC

Kansas City, Mo.—The Western Motorcycle Company, Harley-Davidson distributors for this city and vicinity, was host to over 150 riders at the first annual picnic of the company on July 11. The party assembled at the firm's headquarters, 1509 Grand avenue, in the morning for a run out to the Blue River, where a fried chicken dinner was being prepared. A baseball game was played between the H-D Independents and the Grand Avenue Stars, with the result that the Independents carried off the bacon. The return was made to this city late in the afternoon.

## OUTING FOR BALTIMORE DEALERS

Baltimore, Md.—The motorcycle dealers of this city will hold a big outing on Sunday, July 25, when all the local riders, their ladies and friends will be entertained at the shore of Chic Thomas, who has turned it over to the dealers for that purpose. The object of the dealers in giving this picnic is to bring the riders and the men who sell machines in closer touch and create a more cordial spirit among them. The day will be given over to numerous games, chief among which will be a sizzling baseball contest. Numerous races will round out a program of events that will reach a climax with music, dancing and a splendid old-fashioned Maryland dinner.

## CRESCI SOLD TWENTY-EIGHT

Vineland, N. J.—Antony Cresci, local Harley-Davidson agent, has sold 28 machines so far this season. Of this number, three were three-speed models fitted with sidecars. Cresci states that all the motorcycles sold by him are fitted with Prest-O-Lite tanks as source of illumination, and that there has been no call for other lighting means as yet.

## GOT HIS MACHINE BACK

Kansas City, Mo.—J. L. Murray, of the Western Motorcycle Company, distributor for the Harley-Davidson in this city, recently returned from Chicago with a machine stolen from him in Kansas City. The machine, a twin model, was sold by Murray to a negro in this city on time payments, but after a few installments had been paid, the colored man left for Chicago, arranging with another negro to ship the machine to him.

Murray got busy as soon as he heard of the scheme and sent out cards offering a reward of $25 for the return of the mount. Getting a tip about the Chicago trip, he made a fast run to the Windy City and located the machine in a pawnshop where the negro had raised a loan on the same. He replevined the mount and sent it back to Kansas City. It cost Murray $50 to get the machine back home, and he says he will never again sell motorcycles to negroes, except for cash.

## WEITZMAN WITH MAJESTIC CYCLE

Detroit, Mich.—Abe Weitzman has resigned his position with the W. E. Wandersee Company, agents for the Harley-Davidson, and has become associated with the Majestic Cycle Company, sub-agents for Flying Merkel and Dayton motorcycles. Ben Goodman, proprietor of the Majestic Cycle Company, 497 Gratiot avenue, has been in business in Detroit for three years, being for five years previously in the motorcycle business in Philadelphia. He conducts a branch store in Detroit at 306 Clay avenue.

### FOREIGN ORDERS FOR SVENSGAARD

[illegible] Mich.—Harry Svensgaard, of [illegible] Harry Svensgaard Sales Corporation, Michigan agent for Excelsiors, and manufacturers of the Pullman sidecar, is "tickled to death" over some foreign orders he has recently received, two being from South America and one from the Philippine Islands. He is also in receipt of a letter from the Norwegian agent of the Excelsior company asking for cuts, descriptive matter and prices on the Pullman sidecar, which his company is making at a factory in Ionia, [illegible]

### [illegible] ON HARLEY-DAVIDSON

[illegible]eeley, Colo.—Floyd Clymer, of 607 Eighth avenue, this city, has taken the agency for the Harley-Davidson for Greeley and vicinity, in addition to his Excelsior representation, which he has had for two seasons. Clymer reports that Excelsior sales for 1915 so far have been greater than those for the entire 1914 season. He is endeavoring to organize an F. A. M. club for Greeley riders at present.

### GETS 'EM GOING AND COMING

[illegible]ersville Kan.—E. F. Case, Excelsior and Smith Motor Wheel agent in the city, has a demonstrating model of motorcycle to cover his territory, accompanied by one of his boys on a Motor Wheel equipped bicycle. Case is thus enabled to appeal to almost every prospect he visits, and expects this season to be a big one, if present sales of both motor rigs is any indication that way.

### TAKES ON MIAMI LIGHTWEIGHT

Cincinnati, Ohio.—The Remelin Co., local agents for the Cyclone, recently took on another machine, the Miami power bicycle, which was handled for a time by Ferd Stenger, who sells the Flying Merkel. R. C. Nepper, of the Remelin Co., is much pleased with the Miami lightweight. He believes that with this machine to offer to the man who wants a low-priced machine, and who does not call for excessive speed, and with his Cyclone for the speed boys, he can meet all demands.

### HILLYER IN NEW QUARTERS

Brooklyn, N. Y.—Following his having his Excelsior agency gutted completely by fire some months ago, Ferdie Hillyer has new re-established his headquarters at 1407 Bedford avenue, this city. The new quarters are larger than the old establishment, and Hillyer is of the opinion that he can better accommodate his patrons as a result.

### NOT WORRYING OVER CHANGE

Kansas City, Mo.—The Saufley Supply Company suffered a reduction in the size of its salesroom when the city widened the street about 30 feet. Mr. Saufley is not worrying over this, as he figures that increased travel facilities will more than make up for the change in size of the premises.

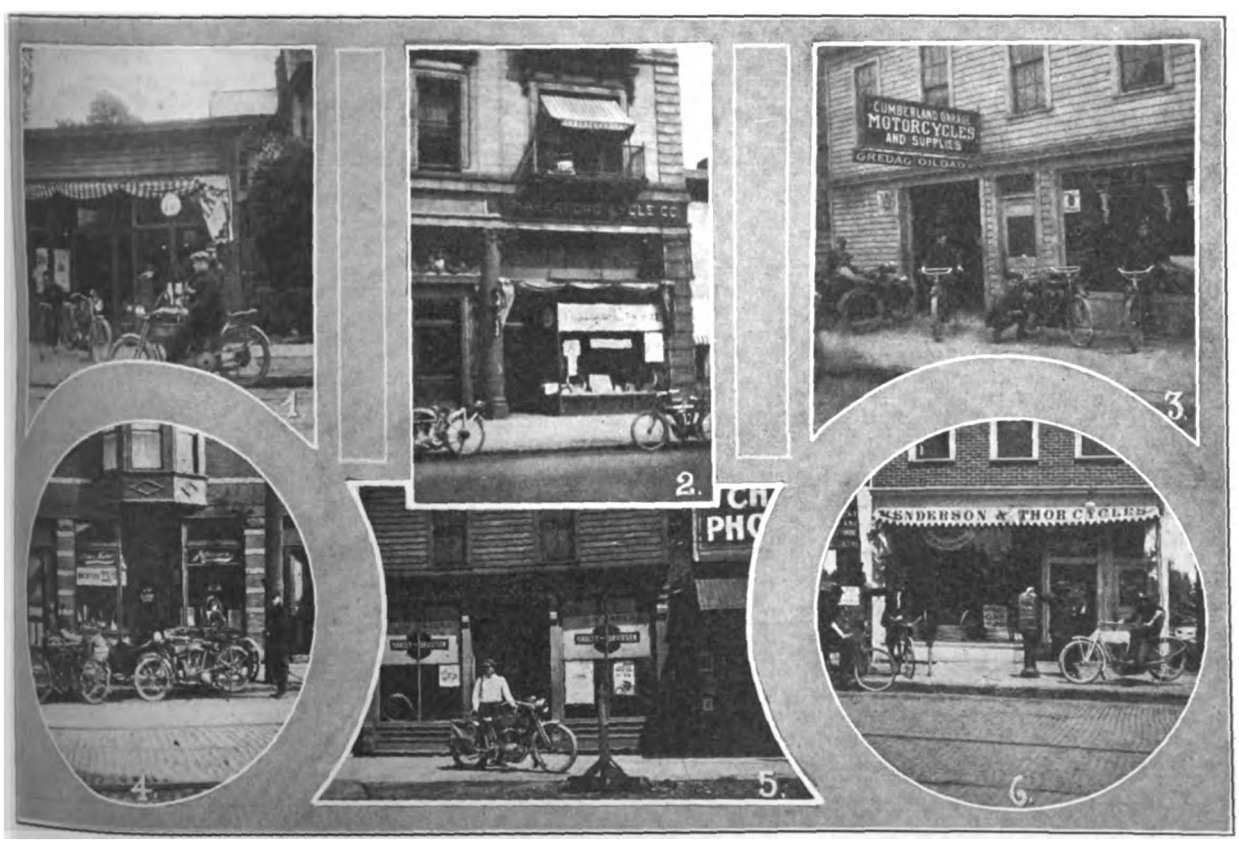
### FLECKSERS SOLD SIX

Lockport, N. Y.—Fleckser Brothers, Harley-Davidson agents in this city, have sold six 1915 machines so far this season. These six were the only new mounts sold in Lockport this year.

### ASHLEY IS CYCLONE AGENT

Brooklyn, N. Y.—George Ashley, veteran bicyclist and motorcycle dealer, has taken the agency for the Cyclone for Greater New York. He has been kept busy answering inquiries and giving demonstrations from his headquarters at 1213 Bedford avenue since the first machine arrived last week.

Kansas City, Mo.—Charles Hanson, Indian agent in this city, has sold a sidecar combination to the City Park Board, for use in inspection service.



**Thriving Agencies in Buffalo, N. Y., and Vicinity: 1, Shop of B. L. Moone, Handling Harley-Davidson in Niagara Falls; 2, Haverford Cycle Co., Buffalo Branch, District Agent for Excelsior and Smith Motor Wheel; 3, Indian Store of Homer Cumberland at the Falls; 4, Dayton Agency of Charles Liske in Bison City; 5, Tonowanda Harley-Davidson Agency of E. C. Arenz; 6, Where Henderson, Reading-Standard and Thor Models are Sold by the Veteran Dealer, G. H. Houck in Tonowanda**

## BREAKING THE SHACKLES OF CITY LIFE—BY NORTHWAY AND BENSON

(Continued from page 66)

waiting around for a charitable feed.

Hardly had the words slipped from my lips, when the cook brought in a big ham—one of those good old country hams. Gosh, my mouth watered and Bob had to reach for his handkerchief. We rose and began our little speech of thanks to our hostess, when she interupted and commanded us to stay to dinner. I looked at Bob; Bob looked at me, and then we both looked at the ham. So we decided to stay. That sure was some dinner, and I bet we're going to dream about it many times before we reach the Pacific coast.

### Arriving at Buffalo

About eight o'clock that night we arrived at Albany and turned in to rest. The next day we covered the ninety-five miles into Utica in eleven hours and thirty minutes. While riding into Syracuse, I saw a lady looking out of a window, and thinking that all farm folk were democratic I doffed my hat and asked her how Syracuse was getting along. Her only answer was to draw her head into the house and bang the window shut. Such is life! Well, we made Syracuse in good time, and from that city pedalled into Rochester, where we had some letters to deliver to people we knew and were royally entertained. We did not remain very long, for it was our object to push on nearer to Buffalo. Sunday night found us at Batavia where we had a sound rest, and the following morning we covered the forty miles into Buffalo in a very short time.

Reaching Buffalo we were the guests of the Pierce Cycle Company and the Buffalo Metal Goods Company. We were inclined to feel a bit in doubt as to the kind of reception we were going to receive, for neither Benson nor I had ever met any of the officials of either concern. However, as soon as we met that very genial person, Mr. Fred L. Brown, of the Pierce company, and Mr. Emerson, of the Buffalo Metal Goods Company, we were immediately put at ease. They certainly know how to make a stranger feel at home.

### What We Saw in Bison City

Mr. Brown introduced us to the entire office force of the works and had Mr. Powers, the head Pierce salesman, show us just how machines like those we were riding were constructed. We found the various processes very interesting and that the workmen were but too willing to stop and explain anything that we wanted to know. They were a happy lot of fellows; all of them seemed to reflect the hearty geniality that was manifested by the officials of the company.

At the Buffalo Metal Goods Company's factory, Mr. Emerson delineated the various steps in the manufacture of the Atherton coaster brake which had served both Benson and myself so well on our long ride into Buffalo from New York. Our visit to the different departments of that factory, in which we saw the care and skill with which the brakes were being made, enabled us to realize how Bob Lawson, the veteran cyclist, could travel from coast to coast and then cover thousands of miles, riding from through the State of California and from Mexico to the Canadian border, without changing his Atherton coaster brake.

We liked Buffalo so well that we remained there for several days and did not leave until Thursday morning, making fifty miles that day. About six o'clock in the evening we stocked up with eggs, bacon, ham, bread and cherry preserves and were on the lookout for a place to camp as we had added a light tent to our equipment in the Bison City. Passing by a farm we saw a splendid spot to camp and obtained permission to pitch our tent there. We found a cool spring and plenty of wood for fire near the place. Later in the evening the farmer who owned the property sent over some milk and strawberries.

The sun came out bright the next morning. But Benson and I were only fifteen miles under way when we were caught in a rain storm. However, we kept on riding hard and managed to get into Erie where we met the proprietors of the Erie Cycle and Supply Company. The two young hustlers who own this place, Messrs. Montgomery and Sully, have one of the best stores in the city and from the crowd of fellows who swarmed about the establishment we gathered that they must certainly be popular with the Erie cyclists.

Our camp that night was on the shore of the Lake Erie. We had a good swim about ten o'clock in the evening and then slept in the open lulled by the music of the waves. The next few days we encountered nothing but sand and rain, for we hugged the beach for quite a distance. On two occasions when the rain was pouring down hard we were invited to spend the night at the homes of some very hospitable people. On Monday, after a day of riding under very severe conditions we got into Cleveland.

## N. Y. CYCLISTS ON PARADE

The seventh of the series of eight weekly bicycle parades which are being held under the auspices of the New York Division of the Century Road Club Association, was held Wednesday evening, July 7, starting from Columbus Circle, New York City, with an attendance of twenty-eight New York cyclists. Captain Steppello, assisted by A. R. Jacobson, led the paraders up Broadway from Columbus Circle, to 106th street, where a turn was made to Central Park West, and thence to 110th street, over to Seventh avenue, and north to 155th street bridge, into Jerome avenue, in the Bronx. Here a stop was made for fifteen minutes, and then the captain called for starting, and the bicycle riders returned across the bridge to Seventh avenue and south to 110th street, from which point the paraders went down Central Park West to Columbus Circle and there disbanded.

## VETERANS RACE AT GENEVA

Geneva, Switzerland, June 21.—"Old timers," including ex-champions and local cracks, to the number of eighteen, competed in a "veteran" race on June 20 between this city and Hermance, a distance of ten kilometers (6.21 miles). The race was won by Vital Manera, who was given two minutes handicap, in 18:50. Lance, of this city, was second in 19:33, and Laeser, a former distance champion, was third in 19:42. The scratch man, Lequatre, obtained fifth place, while Bosshardt, of Geneva, came fourth in 19:43.

In handicapping the contestants, age and past performances as recorded in the books of the U. C. S. were considered. Not one of the entrants was less than 32 years of age. The winner, Manera, is approaching his fortieth year at the present time, and his victory came as a surprise to most of the field.

## ALTOONA BICYCLISTS ON LONG TRIP

Altoona, Pa.—Charles Just and Charles Cavery both, of this city, have just completed a trip through the eastern part of the state. The boys visited Lancaster and on their homeward trip stopped at Harrisburg, Port Royal and other towns. During their trip they visited the home of the Hershey Chocolate plant at Hershey, Pa. They covered about 500 miles on their entire trip.

## VARIETY IN BIG SAUCER PROGRAM

TORONTO, Ont.—The greatest crowd of the season, numbering about 5,000 people, witnessed thrilling races on the local saucer on Saturday night, July 10. The program was unusual in that the events staged consisted of four motor-paced bicycle contests and six exclusively motorcycle speed flights in which J. A. McNeil, of Omaha; Brownie Carslake, the Australian star, and Henikman, of Detroit, proved to be the real big guns. The feature event was the ten-mile Canadian championship motorcycle race which was captured by McNeil riding his fast Excelsior in 6:29⅗. McNeil lapped the second man, Brownie Carslake who straddled an eight-valve Indian. Carslake trimmed McNeil, however, in a four-mile dash, the time of which was 2:41⅗.

Quite the most spectacular motorcycle race ever staged on the local bowl was a four-mile contest in which the five starters flew around the track almost abreast. It was decidedly thrilling and the crowd went wild. Henikman captured first honors in this flight in 2:49.

The biggest surprise of the season so far was the defeat of George Wright, the crack motor-pace follower of the Riverside club, in a four-mile drive, by Gordon McMillan, the ex-Canadian champion. The latter won out after a desperate half-mile sprint in the good time of 5:28⅗. Norm. Webster, the Riverside youngster, annexed a three-mile motor-pace event in 4:25⅗. This was his first attempt behind a motor and he made good with a vengeance.

### MOTORCYCLES FOOLED GRAFTERS

Niagara Falls, Ont.—The value of the motorcycle in emergencies was demonstrated here on July 7 when a fearful trolley car wreck took place on a section of the Gorge Route at Queenstown, seven miles from here. Immediately following the disaster the radial trolley service was put out of commission and the owners of livery automobiles demanded exorbitant prices to carry officials and others to the scene. Reporters and others who owned motorcycles, however, were able to ride at top speed to the place quite independently of the taxicab and livery people.

### A BRACE OF WINNIPEG NOTES

Winnipeg, Man.—Emerson W. Walker, the traveling representative of the A. O. Smith Company, Milwaukee, makers of the Smith Motor-Wheel, has made arrangements with the Winnipeg Cycle & Motor Company to handle the motor attachment in this city. When Walker appeared on the streets here with his propelled bicycle, he created profound interest and practically every dealer made a bid for the local agency. Walker will leave shortly for the Pacific Coast where there are thousands of bicyclists, mainly of English nationality, who have been in the habit of doing considerable cross-country riding.

Seventeen members of the Winnipeg Motorcycle Club who took part in the club's annual run to Selkirk are not likely to forget about their outing very soon. The trip to Selkirk was made in fine style, but an unexpected rain storm made the roads terrible for the return journey. Only eight of the seventeen riders returned to the city on the same day, the others becoming mired in the glue-like gumbo. Five sidecarists and three soloists made the return trip.

### BANDITS MADE A MISCUE

Owen Sound, Ont.—The story of how two desperadoes, who are now lodged in the Kingston Penitentiary, intended to make use of both bicycles and a motorcycle and sidecar in a typically Wild-West hold-up of a railway train near this city which they had planned to accomplish a few days ago sounds like the plot in a "blood and thunder" penny pamphlet. The two highwaymen, Norman Regan and "Broncho" Turner, first stole two bicycles and an Indian motorcycle and sidecar, according to their confessions, and it was their plan to use the bicycles first in making their getaway from the scene of the robbery. After making their way to the place where they had hidden the motorcycle they had intended to throw the wheels away and take to the fast machine. In this way they hoped to throw the authorities off their trail because the police would probably be looking for two bicyclists instead of a couple of men on an apparent joy ride.

A miscalculation in the time of the arrival of the Canadian Pacific Express at the spot where they had decided to make the hold-up spoiled their plans and a few hours later they were arrested in this town for the robbery of an express company's office in a nearby city, for which they had also used the motorcycle outfit. When they saw "the jig was up," they talked quite freely of their plan to rob the train.

### NEEDED A MOTORCYCLE

Ottawa, Ont.—After No. 2 Casualty Clearing Station of the Red Cross branch of the Canadian forces in Europe arrived at the front the need for a motorcycle for despatch and emergency work was immediately felt. Capt. Harvey Jakes of this unit wrote home regarding the want for a single tracker and within a few days sufficient funds had been collected among his friends to purchase and send forward a machine with the permission of the Militia Department.

## FRESH BITS OF TORONTO NEWS

TORONTO, Ont.—The factory staff of the John T. Wilson Company, Limited, manufacturers of the Cyclemotor, the twenty-pound motor attachment for bicycles, has been increased by the engagement of R. A. Fish as production manager. Fish was formerly a district representative of the Canada Cycle & Motor Company, Limited. A steady production of the tiny motors has now been reached and the outfits have been shipped to many places from Halifax to Winnipeg.

The International Motors, Limited, Eastern Canadian representatives for the Thor, went into the hands of the receiver this week. One reason given for the failure is that the increase in the import tariff on motorcycles practically ate up all profit on machines for which contracts had been made with dealers in their territory before the duty was advanced.

Harold Cole, the local Cyclone dealer, who is now located at 369 Yonge street, has disposed of his first shipment of three machines. Cole has made several demonstrations with his Cyclone which have been really spectacular.

The Canada Cycle & Motor Company, the big distributors, report a heavy demand for Victor dry cell lamp outfits for both bicycles and motorcycles and there is also a splendid demand for combination rear carriers and stands for bicycles.

### STILL AFTER BOARD TRACK

Montreal, Que.—A well-known sporting man of Montreal has had several conferences with George I. Kreamer, the board track builder, with a view to the erection of a bicycle and motorcycle saucer in Montreal for next year. Several Montreal magnates have visited the Toronto "speed works" and have been impressed with the general situation there with the result that this city may soon have the second board bowl in Canada.

### MOTORCYCLE REPLACES TELEGRAPH

Fort Erie, Ont.—How the newspapers were able to overcome the disadvantage of the lack of telegraph facilities at the Fort Erie Jockey Club course during the turf meet last week has just been announced. The race track people refused to permit the telegraph companies to install a service at the course because of certain alleged malpractices last year, but the situation was saved for the dailies by the use of a motorcycle. A rider was used to carry the reports from the track to the nearest telegraph station about four miles away and the service maintained was almost as prompt as direct wire communications.

# Variety in This California Trip

## Sand-Plugging and River-Fording Were Regular Incidents

LOS ANGELES, Cal.—Stewart Slosson, who represents the Firestone Tire and Rubber Company on the Pacific Coast, recently returned from a business tour through central and southern California on his three-speed Harley Davidson sidecar combination. While on this trip he encountered practically all the varieties of surface that the State can offer and forded many streams. Part of the time, Slosson was accompanied by George Kemp, from the automobile tire sales department of the Firestone branch in Los Angeles, and it was during Kemp's presence as passenger that the most interesting events occurred.

The regular automobile routes were followed on most occasions, but all was not plain sailing for the sidecar combination, by any means. Shallow pontoons of wood are used to cross a number of rivers, but as these are much wider apart than the sidecar tread they could not be utilized, so fording was the order of the day. In attempting to cross the Salinas river at one point, Slosson and the mount got into quicksand and the outfit went down over the motor. Passing automobilists assisted in getting the rig onto solid ground once more, and after cleaning it off, the river was crossed on one of the pontoons in typical Slosson fashion.

Riding the motorcycle with the sidecar empty, Slosson balanced the sidecar in the air while the machine wheels traversed the pontoon. "It was a ticklish stunt," said Kemp later, "and I expected to see Slosson flop and get another dose of quicksand any minute. He got across all right, much to our satisfaction."

After the Salinas river incident, the Firestone outfit came to some typical desert going, and had plenty of work to do to get the wheels to roll in a number of places. Kemp as passenger, was requisitioned as shovel-man on most occasions (a source of much chuckling on the part of his partner, as the automobile tire man was on his vacation in order to get a "complete rest.")

The top photograph shows Slosson with A. J. (Firestone) Smith of Los Angeles, ready for a morning's spin. The righthand picture shows Slosson at the Salinas ford before striking the quicksand; at the left of this photo is one of the pontoons for automobile passage. The lower picture shows Kemp assisting the combination in deep sand by clearing a passage with a fence rail.

Slosson crossed the Continent on Firestone tires, using a solo machine last year. He encountered two weeks of steady rain in Kansas, which kept him back for ten days, but finally came through without tire trouble. In the recent trip there was no difficulty with tires, although burning sand, rocks and much water had to be traversed.

"Firestone" CYCLE TIRE

# Firestone

## Motorcycle Tires

### Same Quality, Same Materials as in Firestone Automobile Tires

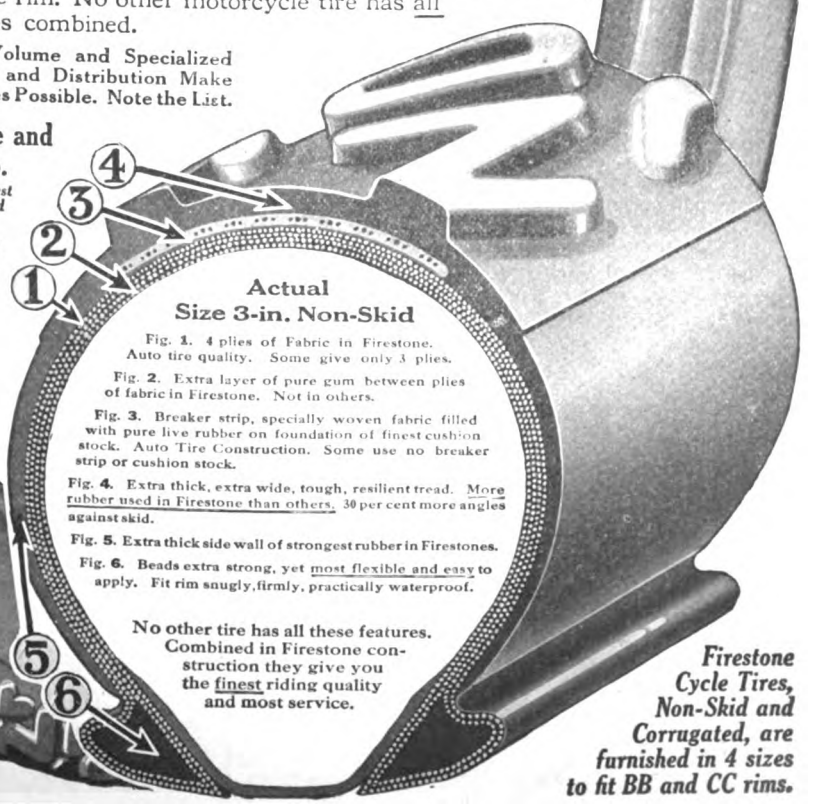
EXAMINE the construction of Firestone Motorcycle Tires from the inside out. These tires are specially designed for the machines now in use, and now being manufactured. They are built of the same rubber and the same fabric as Firestone Automobile Tires.

Study the cross section. Note the four plies of fabric with extra layers of pure gum between plies—the breaker strip on foundation of finest cushion stock. These mean extra strength, and in addition the extra tough, extra wide tread means effectual road grip.

The flexible beads with soft rubber core make the tire easy to put on and take off, and give a practically water-tight seating on the rim. No other motorcycle tire has all these features combined.

**Firestone Volume and Specialized Production and Distribution Make These Prices Possible. Note the List.**

**Firestone Tire and Rubber Co.**
*"America's Largest Exclusive Tire and Rim Makers"*
Akron, Ohio
Branches and Dealers Everywhere



**Actual Size 3-in. Non-Skid**

Fig. 1. 4 plies of Fabric in Firestone. Auto tire quality. Some give only 3 plies.

Fig. 2. Extra layer of pure gum between plies of fabric in Firestone. Not in others.

Fig. 3. Breaker strip, specially woven fabric filled with pure live rubber on foundation of finest cushion stock. Auto Tire Construction. Some use no breaker strip or cushion stock.

Fig. 4. Extra thick, extra wide, tough, resilient tread. More rubber used in Firestone than others. 30 per cent more angles against skid.

Fig. 5. Extra thick side wall of strongest rubber in Firestones.

Fig. 6. Beads extra strong, yet most flexible and easy to apply. Fit rim snugly, firmly, practically waterproof.

**No other tire has all these features. Combined in Firestone construction they give you the finest riding quality and most service.**

# Repairing With Adhesive Plaster

## Many Novel Uses to Which Surgeon's Tape Can Be Put

By GEORGE M. JOHNSON

THERE must be many riders who find the regular tire or electrician's tape very convenient about their machines, but probably few of them have ever tried adhesive plaster as a substitute. This plaster, also known as surgeon's plaster, has numerous advantages over tire tape, even though it costs more, but the greater cost is more than offset by the fact that a repair done with adhesive plaster will last much longer than one made with tire tape.

The most satisfactory way to purchase the plaster is in five or ten-yard rolls, one inch in width. At large city drug stores, the cost will be 35 and 50 cents respectively, and in smaller stores it may be ten cents more. The larger size is by far the more economical, as is obvious. Having gotten the plaster, here are a few of the many ways in which it can be made valuable to the motorcyclist.

### Fine for Grip Repairing

In the first place it is fine for repairing cracked handlebar grips. It is much stronger than tire tape, being made with a background of substantial linen cloth, and so it will naturally stand the wear and strain on a broken grip much longer. Another good feature is the way it sticks. The adhesive part consists of a zinc oxide or rubber gum preparation that sticks where it is put—whether to metal, leather, or any kind of fabric—worse than a bad habit. Furthermore the plaster is sticky only on the inside, and will not blister the rider's hands or get them coated with greasy black gum. The damaged grip should be repaired as soon as the crack appears, for after its back is utterly broken, no repair job can save it.

When a horn, either of the bulb or mechanical variety, is attached to the handlebars or frame tubing, a few turns of adhesive tape will make a first-class foundation for the clamp, and protect the nickel or enamel from being scratched. The same applies to the attachment of watches, magneto cut-outs, speedometers, etc. If the flexible speedometer tube rubs against the gas tank and threatens to mar the enamel, wrapping the tube for a short distance with tape will save the looks of the machine; nor will there be anything unsightly about so treating the tube. One of the big advantages of the use of surgeon's plaster in place of tire tape lies in the fact that the tire tape always looks messy, while the plaster never does.

### For Clamping Cables

Adhesive plaster is strong enough to make good clamps for securing the insulated cable of a magneto cut-out to the frame of a motorcycle. For this purpose tear the inch width into half-inch strips eight or ten inches in length. It is a simple enough matter to do a very neat job of fastening the cable in this way, and it will stay.

The surgeon's tape can be used for binding together the two high-tension magneto cables on twin cylinder machines. The cables can be joined at about the middle and then fastened to the frame bar just above. This will prevent the insulation from being burned by coming in contact with the hot cylinder heads.

### In Tire Service

The plaster may serve as reinforcing fabric in the repair of a casing which is weak and likely to blow out; if the blow out is not too large, it may even make a temporary repair of that. Clean the inside of the shoe thoroughly and then press firmly into place strips of tape cut into six or seven inch lengths. They should cross the weak spot from all directions and angles, so that ten or a dozen thicknesses will come over it. After a repair of this kind the tire should not be pumped too hard, and the rider should realize that the repair cannot be permanent. It will last for a while, however, and if on the front tire, which can be run quite soft, may hold for a surprisingly long time.

Surgeon's tape is also valuable for temporarily repairing a big blow-out or cut, in that it can be successfully used to hold a a ready made patch in position. If a stiff piece of leather, or part of the sole of a rubber overshoe or tennis sneak, is employed for a blow-out patch, the problem of anchoring it in position is not easy of solution. Cement is not strong enough, and if fastened in this way, the patch will soon go adrift, whereupon the tire will blow out again. Here is where the adhesive plaster comes in. Use strips of it across the patch, cutting them long enough so that they can get a firm grip on the fabric of the tire. Naturally all chalk, etc., should be cleaned from the latter first, otherwise the plaster will come away.

### For First Aid Work

Another good feature of this treatment is that the tape will make a smooth surface of the patch and prevent any irregularities on it from chafing through the tube. I once used a starched linen cuff for a blow-out patch, and the sharp edge of the cuff wore a hole through the tube within twenty-five miles.

A roll of adhesive plaster is a handy thing to have along for hygienic purposes. If a rider is careless enough to try conclusions with the road and is more or less battered up as a result, the plaster will be found very convenient, if not necessary. Do not neglect injuries where dirt is ground into the flesh, as when a rider gets the force of a fall on knee or elbow. I knew of one man who failed to have such hurts promptly and carefully dressed by a physician, and consequently he developed a bad case of blood poisoning which laid him up for weeks.

The preceding paragraphs suggest but a few of the many uses to which this handy article can be put. Any rider can think of others.

# Transferring Fuel on Road

IT is not so very unusual for the touring motorcyclist these days to meet a fellow-roadster stranded on the highway for the want of a little fuel. A teacup full will generally bring the distressed one to the next town, but many would-be Samaritans do not know how to transfer the vital fluid from one tank to the other, if they are not equipped with a priming-gun.

However, the transfer is very simple and can be undertaken with the means which every rider has about him or on his machine. The most reliable device is the siphon, which can be improvised from the rubber tubing that leads to the headlight or to the tail-lamp. All that is necessary to do is to get the filler-openings of the two machines as close together as possible, insert the tubing in one tank and suck on the other end. After pinching the sucked end to prevent return of the fuel, drop it into the filler-opening of the other tank.

Now there may not be enough tubing to reach when the two machines are placed side by side. In such a case, two sections of tubing can be coupled by splinting the ends with twigs, after taping them in their proper relation to one another. If the machines cannot be brought close to each other, siphon the gasoline into an envelope and carry it by hand to the stalled mount. A good linen or manila envelope will be gasoline-tight for a short time; just long enough to transfer the cupful in most cases.

Of course, if the priming-gun is fitted, it is a question of a few squirts only to give the other fellow the "arterial blood" to carry him on his way. Cups can be improvised from vine-leaves or sheets of paper. An envelope with one corner torn out will make a good funnel.

### ON A PACK BURRO TRAIL

Henry Massard and George Moore, mounting Indian and Excelsior motorcycles, recently made a successful trip over the old toll road between Ouray and Silverton, Colo., a route now so little used except by the daily stage coach and trains of pack burros that it has been considered almost beyond the scope of the motor-driven vehicle. The mountain climbs to a height of 13,000 feet above sea level, and it goes without saying that the motorcyclists found striking scenery and more than one place where exceptional skill and daring were called for to avoid a plunge.

### GEPHARDT RODE AN INDIAN

In the account of races held in Baltimore on July 5, which appeared in our last issue, it was stated that George Gephardt rode an Excelsior in winning the 5-mile professional race. As a matter of fact, Gephardt used an Indian. The error was due to the fact that Gephardt formerly used an Excelsior, and changed to the Indian for this race meet.

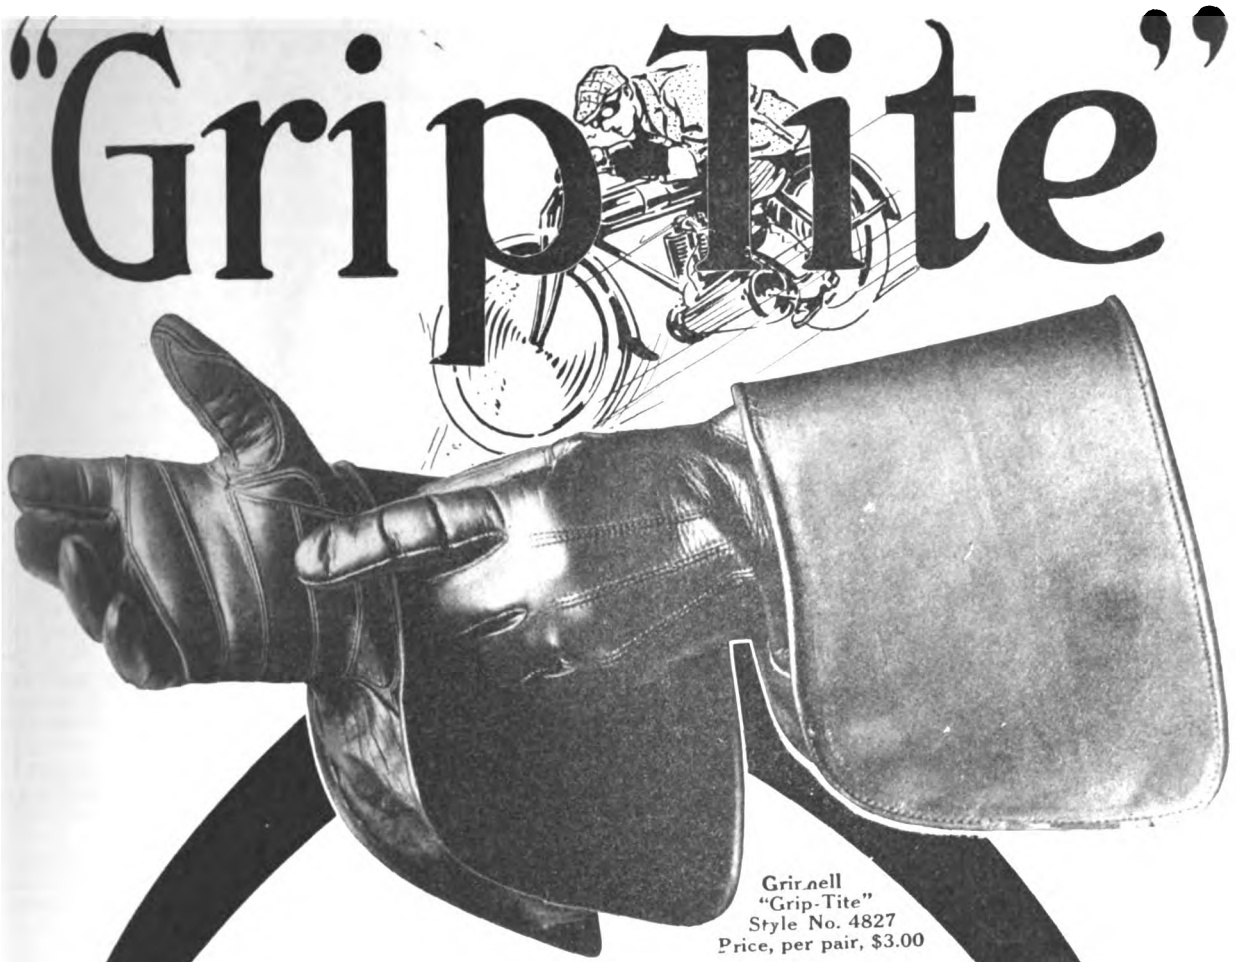
# "Grip-Tite"



Grinnell
"Grip-Tite"
Style No. 4827
Price, per pair, $3.00

## The great big winner for you, motorcyclists

A double, corrugated palm and reinforced thumb, that gives a firm, non-slip grasp on the handlebars. No tense muscle strain. Go as fast as you like over the roughest road. Your arms won't ache, your hands won't be sore.

# Grinnell Gloves

### Best for every purpose

Grinnell Gloves, made from soft, pliable Reindeere and velvety Coltskin, wear like rawhide. Washable—dry out soft as new. Uninjured by steam, heat, water, gasoline, heavy lubricants, dirt, etc. Guaranteed not to crack, harden, scuff or shrink. Many exclusive features besides "Grip-Tite."

"Rist-Fit" prevents cuff lopping down. "Ventilated Backs" evaporate perspiration, exclude dirt, grease, etc.; keep hands cool and dry in hottest weather. "Limp-Kuff," the newest out, has a soft, limp cuff that wrinkles at the wrist. Crumple up and stuff in pocket.

Dealers everywhere—or sent on approval, prepaid, where not stocked.
Write for glove book and sample of leather—sending dealer's name.

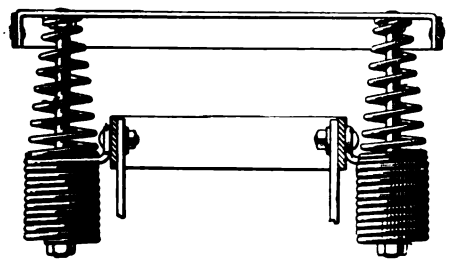
# RECENT MOTORCYCLE PATENTS

## FENTRESS CARRIER SPRING SUPPORT

Compound spring suspensions designed to flexibly support the seat frame on the main frame of a tandem carrier is the subject of a patent granted to Frank P. Fentress, of Detroit, Mich., and assigned to the Troxel Manufacturing Company, of Elyria,



Fentress Spring Design

O. The spring suspension on each side consists of an upper spiral of varying diameter, bearing at top on the seat frame and at bottom on a lower coil of constant pitch and diameter. The lower part of this coil is attached to a vertical through rod attaching at its upper end to the seat frame, while the upper end of the same spring is attached to an arm which fits to the main frame of the carrier. The lowest part of the upper spring fits within the coils of the constant pitch lower spring, and assists in resiliently supporting the seat on each side, both springs working together to this end. The patent is No. 1,144,646.

## CHILSON MOTORCYCLE SEAT

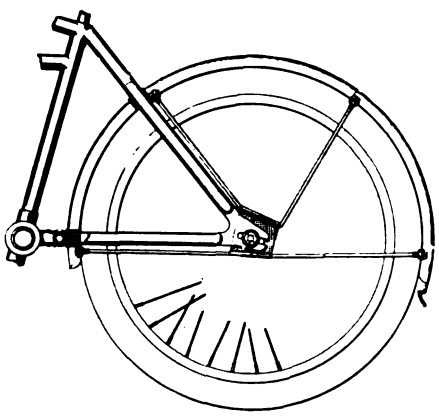
Bert S. Chilson, of Fayetteville, N. Y., has been granted a patent on a motorcycle seat, in which riders will recognize the C. & G. twin seat so widely used. The patent shows the C. & G. seat as particularly adaptable to the Indian spring frame mount, the reversed U-portion forming the main frame of the seat having a three-point bearing on the motorcycle. Two of these points are on the spring bearers at the rear by vertical cylindrical pieces while the third is an arm pierced at its forward end to enclose the stub at the upper extremity of the seat post. The ribbed construction characteristic of the C. & G. seat frame is clearly shown, as well as the method of fitting the seats and seat-springs. The patent is No. 1,144,588.

## NELSON DUPLEX STAND

To John M. Nelson, of Duluth, Minn., has been granted a patent for a motorcycle stand frame of an inner and an outer piece. These pieces are pivoted to each other, one being longer than its fellow, while both are pivoted to the motorcycle frame. A latch on the mudguard holds the two frames in the raised position and stops on the frame bars engage against notches in the longer of the pieces to hold it in the lowered position. The function of the shorter piece or leg is evidently to give a temporary stand, without raising the rear wheel from the road. The patent is No. 1,134,893.

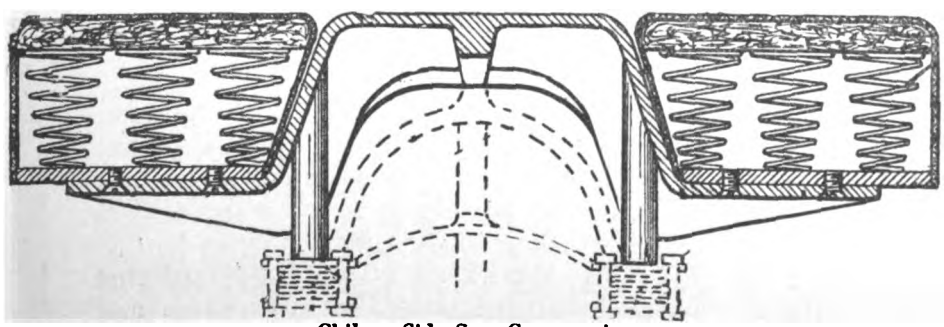
## CORNELL MUDGUARD STAY

Fred J. Cornell, of Detroit, Mich., is the inventor of a novel mudguard supporting device for motorcycles, and has been issued



Cornell Stay Plate

Patent No. 1,144,463 on the same. The stays to the mudguard are carried by plates which are removable secured to the axle ends. The stays are continuous, being held at their centers by lips in the plates themselves. The stays are designed to be readily removed from the plates or from the mudguards as desired.



Chilson Side Seat Construction

## OBJECT TO EIGHT-MILE LIMIT

Springfield, Ohio.—The eight-mile speed limit prescribed by the proud city of West Liberty, Ohio, is to be questioned legally by Mayor C. F. McGilvray, who fell into the clutches of the constable at West Liberty for driving twelve miles an hour. Motorcyclists and automobilists have for some time derided the ordinance as ridiculous, and the attack on it will be watched with interest not only by Ohioans, but by riders visiting the county.

## SHIPPENSBURG TRIO ON WAY HOME

Atlanta, Ga.—Leroy Shoap, of Shippensburg, Pa., came into the Harley-Davidson branch in this city on July 8, on the way home from Jacksonville, Fla. Shoap left Shippensburg on June 17, accompanied by Orran Kramer and William Miller, going first to Washington, D. C., and then on to Fredericksburg, Va. They found the roads between the National Capital and Fredericksburg in very bad condition, by reason of road work being done by the county authorities.

After leaving Fredericksburg, they went on to Greensboro, N. C., over the National Highway and then on through Charleston to Jacksonville. They stayed a few days in Jacksonville and then came northward to Atlanta via Macon, Ga. Shoap and his riding mates will tour northward through the Carolinas and Virginia, arriving at their home on July 15. The sum total of trouble the trio encountered was nine punctures since leaving the Pennsylvania city in June.

## FIRST MOTOR WHEEL RUN

Salt Lake City, Utah.—Thirty Motor Wheel riders made their first run on June 13 from this city to Ogden, 45 miles out. The start was made in the morning, and the entire party made the round trip of 90 miles by 4:30 in the afternoon. The riding time was four hours, with a half of one and one-half hours in Ogden for lunch, gasoline and a rest.

The route followed was in general over good roads, but there were a few poor places. These consisted mostly of sand-stretches. There was some climbing work in the form of small hills to be ascended, but in no case did any of the party have trouble on the grades. The run itself was organized by C. A. Fowler, Motor Wheel dealer in Salt Lake City. Agent Fowler reports a considerable number of sales of the little attachment as a direct result of this run.

## ON LONG DISTANCE TRIP

Boise, Idaho.—M. J. Bennett, of Verden, Okla., arrived in this city on July 6 after covering a distance of 5,025 miles on his two-speed Indian twin. He left Verden on May 6. The total cost of his trip, he stated, has been about $96.

Bennett's tour led him across the continent to San Francisco, where he took in the exposition. He then went to Los Angeles and finally headed northward for Boise. His daily average was 200 miles, but for the four days preceding his arrival in this city he averaged 250 miles. After leaving this city, he will ride home, covering some 2,500 miles according to his route, which includes a number of side-trips.

Bennett found much variation in the price of gasoline during his trip from Verden. The lowest was 12½ cents and the highest 50 cents a gallon, the latter being charged at a mountain resort mile from nowhere. He paid 40 cents for most of his fuel.

## 1,900 LICENSES IN BUFFALO

Buffalo, N. Y.—According to the city records at noon on July 9, the motorcycle licenses to the number of 1,900 have been issued to Buffalo riders since February first, 1915.

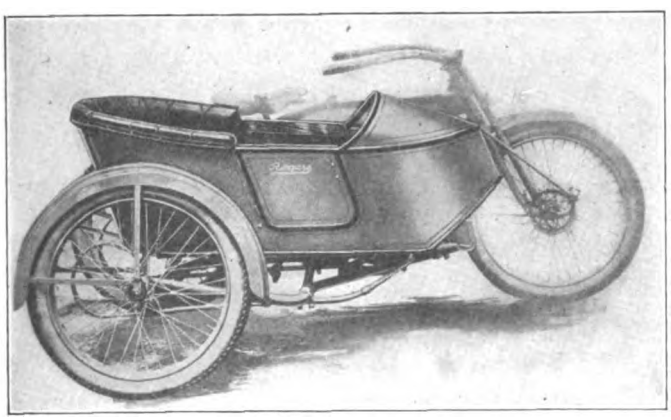
# Rogers The One Really Perfect Sidecar

The ROGERS Sidecar has been built for YOU, friend rider, with a keen knowledge of the conditions under which it is to be used.

ROGERS service covers *all* conditions of usage. A sidecar used in the city gets much less abuse than one in which long road tours are made. A touring sidecar must necessarily be stronger and heavier than a "town car." In the ROGERS we have incorporated best qualities of both town and touring car. The ROGERS is strong, yet lighter than any other car made.



## Some Interesting Features

A Ford-size hub, for 15/16" spindle, three times as strong as necessary. Deep, upholstered cushions, genuine hair padding. Squared support tube, eliminating all side strain on motorcycle frame. Body 61 inches long, plenty of leg room. Ball and socket joint, giving safe and certain attachment to any motorcycle in five minutes. Steel, automobile type door, non-rattling lock, pocket on inside of door, mahogany strips on door. Chassis of heavy gauge drop forged construction.

There are other important details which we give in our pamphlet, which will be sent on request. Ask your dealer for a demonstration.

**ROGERS MANUFACTURING CO.**
**328 West Madison St., Chicago, Ill.**

Eastern Service Station, 1493 Fifth Ave., N. Y. Full line of cars and repair parts always carried in stock.

# Positive Grip

due to the generous design and construction—we think it is the best and strongest rat-trap pedal you ever put your foot on.

## The No. 4 Standard

is a big, substantial, motorcycle-type pedal. It stands for the utmost mechanical value.

With a pair of these pedals on your wheel you are equipped with correct, up-to-date foot-holds, fairly representative of our business in the cycle industry.

Our products comprise:

Diamond E Spokes and Nipples for bicycles, motorcycles, tricycles, velocipedes, invalid chairs, sulkies, carriages, cyclecars and automobiles. Pedals for bicycles, tricycles, velocipedes and motorcycles. Toe clips for bicycle pedals. Emergency axles for pedals.

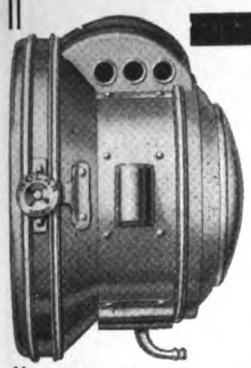
## Gas or Electric



Son 156—Gas

### Record Breakers for Efficiency

"Son" 156. Our LATEST large size medium price Gas Motorcycle Headlight is particularly powerful. Outside diameter of door 8½", depth over all 6". The body and flare are made from one piece of heavy gauge metal. Has roll type door with hinge and catch, and is fitted with a 6" Solar short focus mirror, and front aluminum reflector. Door glass, lens mirror and front reflector are easily removed. Is fitted with ½-ft. gas tip. Prop centers 7". In parcel post box, weight 5 lbs. 8 oz.

All Nickel or Black and Nickel, each $6.00.

Em 2 S—Electric

### Model Em 2 S

Is a two bulb Motorcycle Headlight. The small light is a G. 6, 2 c.p., 6 volt two wire bulb, and is intended for city use to meet light ordinances. The large center light is a G. 12, 6 volt, 12 c.p., two wire bulb to be used for country riding. Either can be lighted or both turned off by our combination switch and plug at the bottom to which wiring is attached.

Nickel, Each $5.50.

# The Savage Jerk of the Back Pedal

Do you ever stop to think of the terrific strain you apply on your pedal chain when you suddenly set your brakes in an emergency? Suppose that chain should snap at a critical moment? Are you SURE it won't? You can be, if you equip with

## "The Coventry" Chain

"The Motor's True Mate"

Built for the harsh service of motorcycle usage, tested to be 100% more efficient than necessary, sold with an iron-clad guarantee of quality and flawless perfection "The Coventry" Chain stands foremost in the ranks of transmissions. There are many good chains—we can't deny it—but by the exercise of judgment and discrimination you will find that "The Coventry" Chains are just a bit better. Write for our catalogue.

## TRAVEL ON AIR

INSIST ON COMFORT AND EASE, BY USING THE PNEUMATIC AIR CUSHION.

Is inflated without use of pump and deflated and carried in pocket or tool kit. Radically different and far superior to any article used for this purpose. FITS ALL LUGGAGE CARRIERS and can also be used for any other purpose, such as camping, fishing or any other place where you want comfort.

**PRICE $3.50**

Write for literature today.

MOTORISTS' ACCESSORIES CO
Ashland, Ohio

---

## Jones Valve Wings

are to take the place of the ordinary hexagonal nut furnished on the valve stem of motorcycle tires. The two wings make it easy for the rider to lock the valve stem firmly in place with his fingers, instead of using a monkey wrench or pliers. Should the nut become rounded the tools are practically useless.

### Time Savers

They aid in pulling or pushing the valve through the rim. A convenience that will not be overlooked by the veteran motorcyclist. Riders are always losing valve nuts. Are you prepared to furnish them with a real convenience, "The Jones Valve Wing"? They are fastened on cards (24 wings to the card) which are specially made for counter display.

# All the light you want

and strong, synchronized ignition is furnished by the Remy Electric Lighting-Ignition System for motorcycles.

See it on a **HARLEY-DAVIDSON** 1915 Model, and you will agree with the thousands and thousands of motorcyclists who say it is perfect.

**REMY**

**Motorcycle Lighting-Ignition System**

has been tested under every possible condition and found to be a complete success.

It reduces the bulk of the machine, is not affected by road vibration, and cannot get out of order.

The battery is non-spillable. The wiring is thoroughly protected.

It is *guaranteed* by the Remy Electric Company, makes cranking easier, adds the touch of luxury to motorcycling, and is just what you will insist on having as soon as you have seen it demonstrated on a **HARLEY-DAVIDSON** 1915 Model

High and low power head-lights, tail-lights, horn and improved ignition.

# STURDY STUD Oilproof MOTORCYCLE TIRES

These tires we sell DIRECT. The goodly saving in jobber's profits we split—half comes off the price; half goes for higher quality.

That's how it comes that these splendid tires are sold at such remarkably low figures—considering their demonstrated service.

**Oilproof Guaranteed 4,000 Miles**

# VACUUM CUP Oilproof MOTORCYCLE TIRES

Built up to V. C. Auto Tire Standards throughout, embodying the same super service in mileage, oil proofness, non-skid efficiency.

Guaranteed 5,000 miles—and invariably averaging nearer double that distance. They've set a new high mark for low upkeep.

Remember—the Vacuum Cup Tread saves you many a spill on the slippery pavement.

# VACUUM CUP Red Oilproof Tread BICYCLE TIRES

Head and shoulders above the general run—tires that make you proud of your bike.

Now made with the 1915 Special Sea Island Fabric 15½ oz.—a fabric heavier, stronger and more lastingly puncture proof than that most makers put into their Ford Size auto tires.

Guaranteed one full season—else returnable at full purchase price. Guaranteed oilproof.

# ★THREE★STAR★ LINE OF BICYCLE TIRES

Three distinctive quality grades; three popular prices; three different styles of fancy tread—

**Sturdy Stud**
**Tripletread**
**Success**

No matter how particular you are; no matter what your tire preference may dictate—you will find it in one of these tires. Have your dealer show you—and find complete satisfaction.

# Make Your Store Bicycle Headquarters

Many a dealer has written to tell us that since taking on the Smith Motor Wheel, his store has become the Bicycle headquarters of his town. This is easy to understand. The Smith Motor Wheel advertises the store of the man who sells it, continually attracts customers for itself and bicycles too. In short, the

**Smith MOTOR WHEEL**
(Detachable)

**"THE BICYCLE BOOSTER"**

is a regular little business booster. Every Smith Motor Wheel dealer receives his full share of help from headquarters. Our dealers are one big, happy family of cycle men who are making more money this year than they ever made before, notwithstanding that in many other lines business is none too good.

The Motor Wheel attaches to any bicycle—speeds up to 25 miles an hour—runs 100 to 125 miles on one gallon of gasoline and is fully controlled by one small thumb lever attached to the handle bars of the bicycle.

**High tension Magneto, float feed Carburetor, Non-skid, double tube clincher tire.**

We invite applications for territory from responsible, well established dealers who will mention make of Motorcycles and Bicycles now handled, volume of business done, etc.

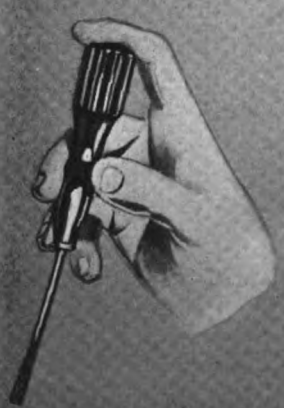
# DIXIE MAGNETO

TO "make" a hill with power to spare, to breeze along the pike with the steady, purring hum of the motor in your ears, to tear through sand and mud without the loss of a single spark—for this you need flawless ignition. Anything less than perfect sparking means trouble. And trouble should not be present in the modern motorcycle.

DIXIE MAGNETO means modern ignition service—troubleless. It is the 20th Century Magneto, up-to-now—in its simplicity of construction, accessibility of parts and efficiency.

There is only one reason for taking apart the DIXIE MAGNETO. For inspection, NEVER—FOR—TROUBLE. To do this, you need but an ordinary ten-cent screw-driver. The veriest novice can take apart and reassemble the DIXIE.



The DIXIE magneto offers the following distinct advantages:

Simplicity of construction and accessibility of parts.

Whether timer lever is at retard or advance position the spark is of the same strength. The DIXIE begins to deliver sparks in the engine cylinder under the compression therein at ve low speed and the spark increases in intensi to maximum motor speed.

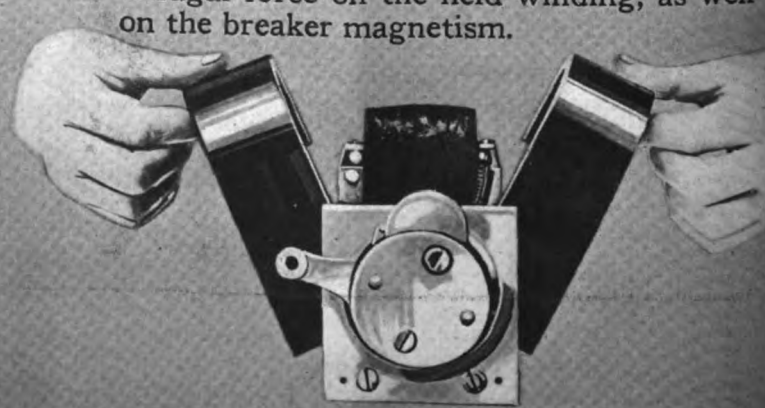
The breaker is stationary with the platinu breaker points outside of the breaker box. He the points are not only entirely out of the rea of oil but are readily accessible for adjustme by simply raising a hinged cover.

No wiring on any of the revolving parts.

A simple high tension winding housed in t arch of the magnets, away from oil and greas

No change in polarity takes place in t rotating member. Change of polarity tak place only through the field pieces, assuri the minimum loss of energy. The high tensi current is generated in the windings housed the arch of the magnets without the use of special induction coil.

Suppression of all harmful influences of ce trifugal force on the field winding, as well on the breaker magnetism.



Digitized by Google

Water, dust and oil—enemies of motorcycle magnetos in general—have no terrors for the DIXIE. Special felt rings, metal coverings and joints of marvellous ingenuity all contrive to make the DIXIE absolutely water- dust- and oil-proof.

MODEL L-15 (WITH POPE 15-4/10 H. P. ENGINE

# POPE MOTORCYCLES INVITE INSPECTION FRONT FORK TO REAR STAND

At every point of a Pope Motorcycle you will find a scientific reason for its design and application. Our machines are safe and sure.

The 15 4/10 H. P. Engine gives ample power. The double stem handlebars guard the rider on rough and sandy roads.

Our famous rear spring suspension keeps road shocks away from machine and man and gives real comfort.

Big gasoline and oil tanks make frequent stops unnecessary. Extremely low saddle position makes the last mile as comfortable as the first.

Pope Motorcycle metal is "made to order," not picked up in the open market, and is determined by engineers of broad experience and great knowledge.

Pope riders know they have the best which is made.

***To ride a Pope Motorcycle is to gain a new delight in life***

# Sensational Success of Our Cap Offer

## 39,700 Caps Already Sent to Bicycle Dealers

### Dealers are Grabbing This Great Business Booster

We made this offer through this magazine, two months ago. We did not expect it would pull in such an overwhelming way.

Scores of dealers ordered them at once. Since then, re-orders have flooded our Cap Department.

Think of it! 39,700 Bicycle Caps, bearing Dealers' names on front, have already been distributed to thousands of happy boys.

These caps have proved a wonderful business getter—far more than we had hoped for.

To meet this new demand we have just placed another tremendous big order for more of these caps.

If you are not familiar with our Cap Offer, get in touch with us today.

### Every Boy Should Wear Your Cap

So far as we know, there has never been an offer like this in your business before.

These caps are made by the biggest cap maker in the country. The cap itself is orange with your name in strong green type across the front. The visor is long and durable. It is striped in black and orange. The caps are shaped at the back to fit down over the head. We tell you how they are made because we want you to see why boys take to them. They wear them everywhere.

GOODYEAR
AKRON
Bicycle Tires

### Pull Trade This Way

Get the boys into your store. Get them looking at new bicycles. Get them talking about you to the rest of the "gang."

**THE GOODYEAR TIRE & RUBBER CO.**
**Dept. 227, Akron, Ohio**
**Makers of Goodyear Fortified Automobile Tires**

They will talk to the home folks about you, too. Focus attention on your store. It's the quickest way to new business.

You won't have these caps a day before all the boys in town—and most of the men—will know about them.

And remember—across the front of every cap is your name—a walking advertisement for you.

Small favors like these caps can win you a host of friends. Hundreds of dealers have proved their business-pulling power.

### Get the Facts—Mail Coupon

We don't suggest giving these caps away. Most dealers give them with purchases only. This increases your popularity and number of sales.

We send you these caps at manufacturers' cost. We print your name on free.

Your profit from one or two extra sales more than pays for the slight cost of the caps. Every cap that is worn after that is pure "velvet" for you.

And you will find that people will buy dollars' and dollars' worth of supplies that they never would have thought of getting otherwise.

They will buy all this extra *because they want a cap.* It is not too much to say that dealers who take advantage of this form of advertising will, in this one way alone, increase their sales immensely.

Send us the coupon NOW and get full facts on this far famed offer.

MOTOR CYCLE ILLUSTRATED
WITH WHICH IS NOW INCORPORATED
The Bicycling World
THE MOTORCYCLE PUBLISHING COMPANY
NEW YORK

Vol. 10 Thursday, July 22, 1915 No. 29

TUESDAY, July 20.—As this issue of **Motor Cycle Illustrated** goes to ... the White House message and a document prepared by Assistant Secretary of ... Breckenridge are nearing Chicago on ... lash across the continent by motorcycle ... That the precious papers arrived ... in Toledo at 4:45 p. m. today is ... n, but no definite information as to ... elopments beyond that point were ob... able as late as 11 o'clock tonight.

### Bad Roads Beyond Toledo

That serious trouble would be encountered by the relay riders between ... do and South Bend was a fair assumption in view of the fact that the roads throughout that district had been deluged by rains during the day, but it was taken for granted that the dispatch bearers would get through even though it became necessary to travel on railroad ties. Lack of reports from them, however, raise a doubt as to whether it was found possible to make any headway against the weather conditions.

### Rains in Middle West

Elsewhere in this number is printed a report concerning road conditions through the Middle West during the last week which leads to the conclusion that only good fortune combined with superhuman efforts by the motorcycle messengers can get the official documents over the flooded highways.

### The Eastern Relays

While there were mishaps and several delays on the relays east of Buffalo the showing made was generally satisfactory and Manager Donovan's calculations would not have been far wrong if the same pace could have been maintained to Chicago and beyond. The full story of the start from Washington and the relays as far west as Toledo, accompanied by striking photographs, will be found in following pages.

### Donovan Closely in Touch

The latest bulletin on the relay riders received from Manager John L. Donovan referred to the arrival of the messengers in Cleveland, and stated that the outlook was still very encouraging. Manager Donovan is now in Sacramento, but is keeping closely in touch with the progress of the relay trip by a special telegraphic intelligence system which he spent weeks in perfecting. When he noted the terrible road conditions in the Middle West the relay manager was tempted to postpone the trial, but was persuaded to let the riders continue.

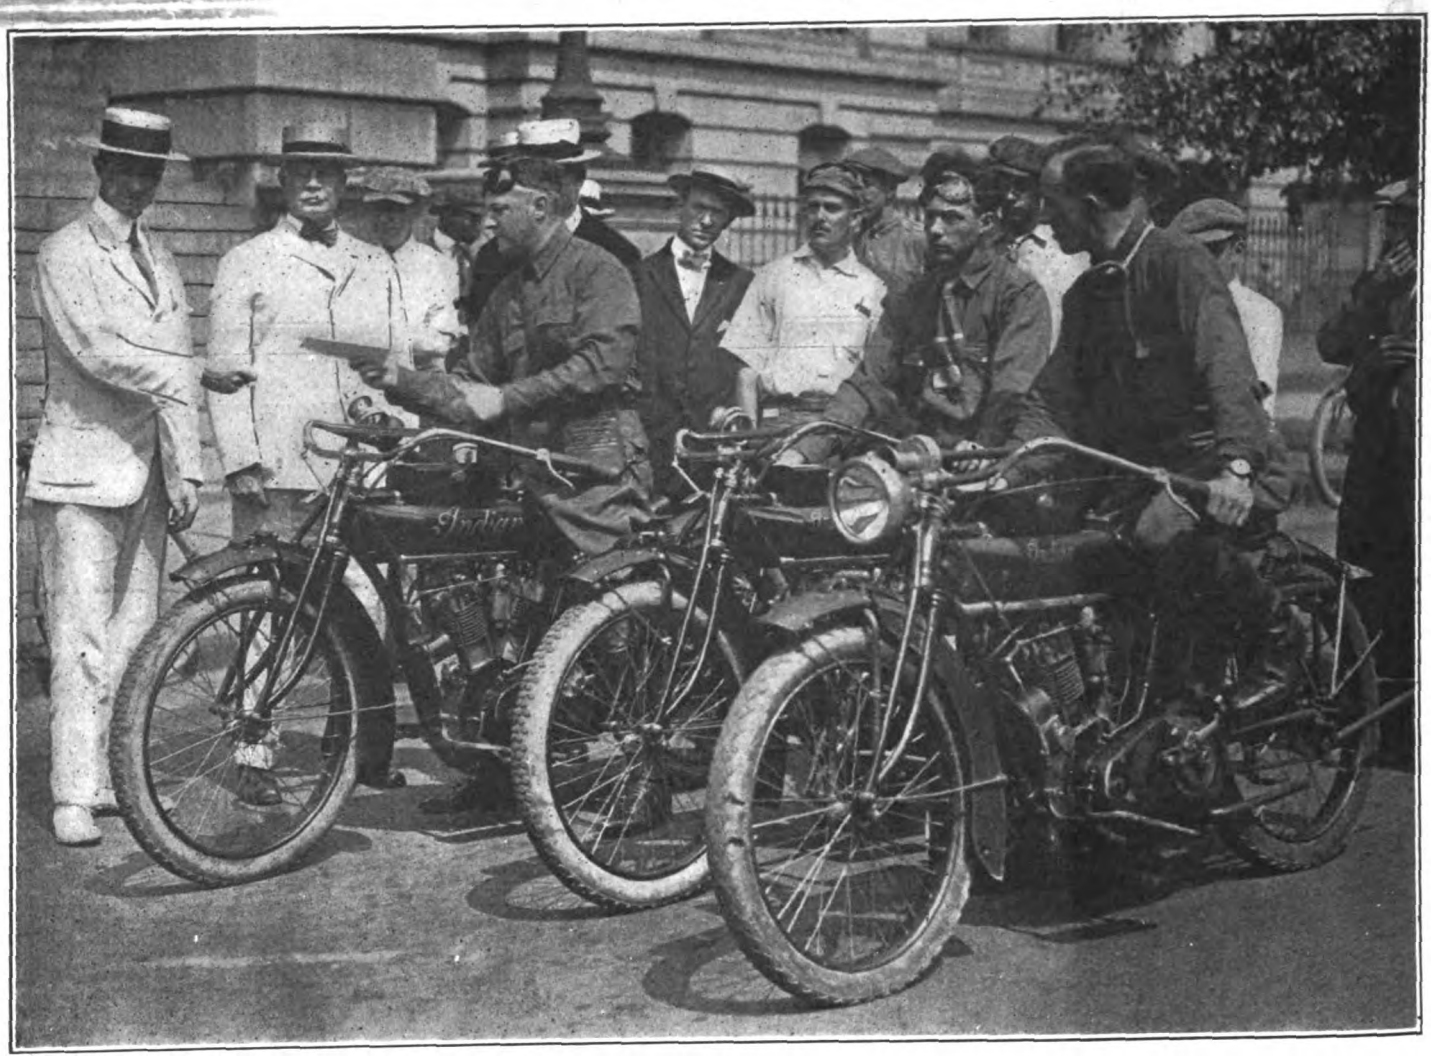
# How the Cross-Country Dash Was Started



**Assistant Secretary of War Breckenridge Handing Message to Frank S. Long in Washington**

WASHINGTON, July 19.—Promptly at ten o'clock this morning members of Relay A team of the transcontinental motorcycle dispatch received an official document from Assistant Secretary of War Breckenridge and the big event which for weeks has been uppermost in the minds of many hundreds of motorcyclists throughout the country was on.

Washington F. A. M. officials, who have worked hard in the interest of the Relay, were much disappointed that President Wilson did not deliver his message in person (two messages were carried, one from the President and the other from the War Department), but the President, who arrived in Washington this morning at nine o'clock from Cornish, N. H., was unable to take part in the ceremonies at the start of the Relay.

**Tumulty Hands Over the Message**

The President's message was placed in its traveling case and handed to the messengers by Secretary to the President Tumulty, who stated that President Wilson begged to be excused, he having just arrived at the White House and had retired to his apartments. The message was handed to Relay Rider Long in the doorway of the Executive Offices, after which Long proceeded to Executive avenue, between the White House and the War Department, and joined his companions. Assistant Secretary of War Breckenridge then came down the steps of the War Department, and the second message was placed in the hands of the riders. With a kick at the starters and a roar from the motors, the riders were off.

**Prominent Officials Present**

Among the officials prominent in Washington civil and military life who were in the group on the Executive Office steps when the message was started were Major-General Bell and Major-General Bliss, representing the War Department; Major Russell, chief signal officer, United States Army; Captain Wallace, engineer officer, United States Signal Corps. Many other officials from the State, War and Navy Departments joined the group in Executive avenue and witnessed the start. The members of this group, separately and collectively, posed for a battery of moving picture cameras and local newspaper men.

**Not Molested by Police**

Informed at the last minute by Superintendent of Police Pullman that the speed laws of the District of Columbia are a special act of Congress which he has no power to suspend, the members of Relay A team had to take their chances on getting through the city. Their route was by way of Pennsylvania avenue through the Capitol grounds and Maryland avenue to the Washington-Baltimore boulevard.

A quiet tip must have been sent out from Police Headquarters, for motorcycle police were conspicuous by their absence and the message bearers were not molested while leaving the city. A large number of riders who endeavored to follow the messengers were not so fortunate and many of them fell victims to the vigilance of the speed cops.

**Donovan's Fast Schedule**

Chairman Donovan's schedule required the Washington riders to cover about 43 miles in one hour, a considerable portion of which was through the cities of Washington and Baltimore and a number of smaller municipalities along the route. The necessity for slowing down at these points caused Relay A team to fall somewhat behind the schedule, but Leishaar arrived at the exchange point in Baltimore at about 11:10 o'clock and handed the message over to the riders of Relay B.

Digitized by Google

# Quick Transfer of Message Made at Baltimore

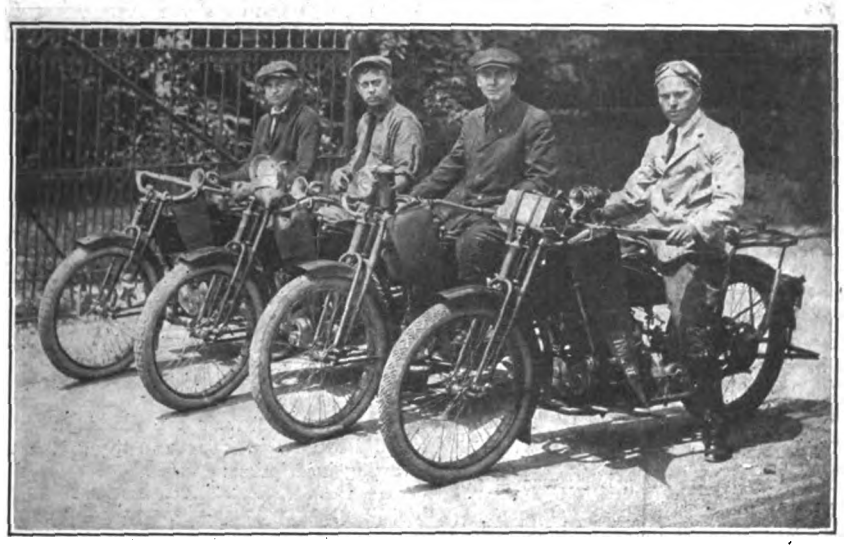
BALTIMORE, Md., July 19.—Dashing into this city at a mile-a-minute clip this morning, L. S. Leishaar, of Washington, completed the first stage of the transcontinental relay of President Wilson's message to San Francisco. Leishaar left the capital accompanied by Frank S. Long and J. McL. Seabrook, all mounted on Indians.

Leishaar had to traverse nearly all of Baltimore before he reached the transfer point at North avenue and Gay street. Awaiting him there were the three riders from Philadelphia, mounted on Hendersons. Commissioner Wood was on hand to see that there was no hitch in the plans. As Leishaar dashed up to the corner John V. Daniels caught the dispatch bag and was off like a flash, followed by Clifford Gibbs and Edward Hance. They were accompanied by Arthur O. Lemmon, of Detroit, who also rode on his Henderson machine.

Leaving the White House at 10:06, Leishaar covered the distance in 1 hour 4 minutes, remarkable time, reaching here at 11:10. He would have clipped 5 minutes off his time had he not missed a shorter route outside the city. There were two mishaps, Long running onto a pile of rock on Fulton avenue in this city, receiving a cut on the face and head as a result of his header. He had his wounds attended to and returned later to Washington. Seabrook got a puncture just outside of the city and did not complete the trip. The officials in charge here are enthusiastic over the fine showing made on the first stage and the precision with which the schedule was carried out.

The three members of the Washington team remained together pretty well and set a fast pace until the fourteenth mile, when Seabrook broke both chains on his mount and was retired. Long and Leishaar continued the dash and met with no trouble until the outskirts of Baltimore were reached. There Long ran out of a side street at speed and the driver of a buggy misunderstood his signals with the result that Long's machine crashed into the carriage. The motorcyclist was thrown and sustained slight injuries which were dressed in Baltimore. Later he rode back to Washington.

The Washington messengers rode their machines wide open for practically all of the trip, and Leishaar's dash into Baltimore after Long had transferred the precious documents to him following the collision with the buggy, was spectacular in the extreme.



**Henderson Team, Made Up of Daniels, Gibbs, Hance and Lemmon, Which Covered the Relay from Baltimore to Philadelphia**

# Daniels Saves Time in Dash to Philadelphia

PHILADELPHIA, Pa., July 19.—John Daniels, who carried the messages from Baltimore to this city in the transcontinental relay, arrived here at exactly 2 p. m., and a few seconds later Arthur Chapple, astride his Flying Merkel mount, was smashing road records on the way to New York. I. Dick and Robert Kennick, also mounting Merkels, accompanied Chapple. The getaway was witnessed by a big crowd and the Merkelites were cheered lustily as they flashed out of the city.

Daniels had been accompanied out of Baltimore by C. Gibbs, E. Hance and Arthur Lemmon at 11:15. Gibbs arrived in Philadelphia 18 minutes behind Daniels and explained that he had been delayed by tire trouble. Hance and Lemmon were also delayed. Daniels set a terrific pace between Baltimore and this city and succeeded in making the trip in 40 minutes less than the time estimated for it. A telegram was received here stating that the Baltimore relay would arrive in Philadelphia about 2:40, but, as stated above, Daniels reached here almost on the minute of 2 p. m.

**Emblem Team That Rode from Albany to Utica, Made Up of T. Ryan, A. Holzhauer, Jack Warner and A. P. Strogonoff**

The exact time between Baltimore and Philadelphia was 2 hours 45 minutes, which is regarded as remarkable considering the poor condition of some of the roads. The route was through Havre de Grace, Perryville, Charleston, Elkton, Newark (Del.) and Wilmington. Daniels' time to Wilmington, a distance of between 70 and 80 miles, was just two hours. From Wilmington, Daniels dashed through Chester and Darby, on the Pennsylvania side, and then through Lansdowne. Here he struck the Baltimore Pike into Fifty-eighth street, Philadelphia. Daniels had only one delay worthy the name, near Wilmington, when he stopped for oil and gasoline.

When Chapple and his escort saw Daniels coming they started their motors and the transfer of the message required only about 5 seconds. Although the relay riders were required to pass through a maze of automobile and other vehicles in leaving the city, they made good time.

Digitized by Google

# Chapple Breezes into New York Alone

NEW YORK, July 19.—Breezing in from Philadelphia at a speed that mocked the city ordinance, Arthur Chapple, on his Flying Merkel, preceded by a motorcycle policeman, whizzed into Columbus Circle, New York City, at 5:30 p. m. on Monday night, having left the Quaker City at 2 in the afternoon. His two alternates were missing.

Chapple literally shot through the huge waiting crowd, and, dramatically pulling from his shoulders the leather case which contained the President's message, he threw it to the dispatch bearer of the outgoing Excelsior relay, which was off like a flash. On the relay from New York to Poughkeepsie, under the management of Stanley T. Kellogg, Excelsior distributor at Bridgeport, Conn., were Dispatch Bearer William F. Stubner and alternates Ben Willig and Orrin Perry.

### Kennick Struck a Trolley Car

Robert Kennick, an alternate, whom Chapple had reported as having smashed into a trolley at Trenton, N. J., sailed into New York at 6:15 in the evening. His face was wreathed in smiles and he was not injured by the mishap, though his machine was badly damaged. An hour after Kennick had arrived, I. Dick, the other alternate, who had run into a ditch at Bustleton, Pa., entered the Metropolis. Outside of a slightly injured leg, Dick was in good shape.

Almost before his motor had stopped, the Brighton Beach star was lifted from his saddle by some of the bystanders and forced to pose before the cameras of the weekly movies. The face that peered into the lenses looked tired and worn, showing the evident strain of the steady grind through which Chapple went.

### Lost Time at Ferries

The schedule time for his appearance in New York City was 4:20 in the afternoon. But there were delays in the previous relays, and Chapple claimed that considerable time was lost waiting for the Staten Island ferry at Perth Amboy, N. J., and the New York ferry at Stapleton.

The lone dispatch bearer had a sensational story to tell to the staff representative of **Motor Cycle Illustrated,** after he was comfortably seated in the office of H. A. Gleisman, the Eastern district Miami Motor Bicycle distributor. He drew a vivid word picture of the mishaps which had befallen his team mates and the splendid co-operation which was accorded him by the city officials along the route.

"We made our get-away from Philadelphia almost on the second that the Baltimore riders entered the heart of the Quaker city," he said to an eager group of listeners. "Everything went well until we reached Bustleton, Pa., when Dick ran into a ditch. We did not stop to look behind, but kept right on. When in Trenton, Kennick ran plumb into a trolley car, and I thought he was put out of the running for sure. The roads in Bustleton and after Trenton were in wretched condition and it required some heady work to negotiate them.

"The police in most of the towns and villages through which we passed had not only suspended the speed laws during the progress of the relay, but were also on hand to clear the traffic for us. In Trenton the militia turned out as well as the police and we were shown the way by R. S. Wood, the local Harley-Davidson agent.

"Then we certainly struck some tough going part of the way. When both my partners were out of the relay, it devolved upon me to exercise a great deal of care and precaution in order that I, unassisted, might get into New York City in safety.

"I reached the Perth Amboy ferry at 3:33," continued Arthur Chapple, "and the boat did not leave until 3:40, while at Stapleton I was forced to wait 3 minutes before the ferry left for Manhattan. They say that a police boat was to take me across, but I failed to make connections with that boat. Landing at the lower end of Manhattan Island, I found a motorcycle cop who, astride his Indian, cleared the way the entire distance to Columbus Circle. And let me tell you, there sure was some going up the traffic-bound streets of New York. That motorcycle cop had to do some mighty skillful dodging. After we reached Forty-second street, the last part of the journey to Columbus Circle was a cinch."

## Special Carrying-Case for the Messages

WASHINGTON, July 19.—The message which is now being carried by motorcycle from Washington to San Francisco is enclosed in a specially constructed leather case, which was made for the purpose and presented by members of Relay A team and the F. A. M. Commissioner for the District of Columbia. This case is lined with metal and is practically waterproof. The metal inner case is enclosed in a hand-sewed sole leather carrying case, fitted with a lock and shoulder and belt straps. The case bears the following inscription:

TRANSCONTINENTAL
MOTORCYCLE DISPATCH
Washington—New York—San Francisco
July 19-24, 1915.
Promoted by Motorcycling, Chicago,
and
Motorcycle Illustrated, New York.
John L. Donovan, Manager.
Case donated by Relay A (Indian Team)
Frank S. Long, F. L. Leishear, J. McL.
Seabrook, Fred N. Mills, D. C.
Commr., F. A. M.

The case was displayed in the windows of Howard A. French & Co., Indian distributers, and attracted considerable attention. After delivery of the message, the case will be returned to this city and become the property of the National Capital Motorcycle Club.

This case contained two messages, one of which was from President Wilson to the President of the Panama-Pacific Exposition, signed by Secretary Tumulty, and the other was from the War Department to the military commander at the Presidio, San Francisco. A copy of the President's message is given below. The text of the War Department message was not obtainable:

### GROSSMAN NOTES PAID IN ADVANCE

Anticipating the maturity of the extension notes issued some time ago when it effected a time composition with its creditors for the full amount of their claims, that is, 100 cents on the dollar, the Emil Grossman Mfg. Co., Inc., of Brooklyn, N. Y., on June 25 mailed to each creditor holding extension payment notes a check in full for notes which were to fall due on July 1. July 1 was the due date for the first of the extension notes, and the fact that the Grossman company sent out the checks in full for these notes on June 20 has removed any doubt that may have existed as to the solidity of the Grossman organization and the popularity of its products, of which Red Head spark plugs, Everlastingly Good bumpers and Red Rib cable are the best known.

### THE MESSAGE FROM THE WHITE HOUSE

**THE WHITE HOUSE, WASHINGTON, D. C.**

**My Dear Mr. Moore:**

**I am glad to send you this greeting by the forty-four teams of motorcycle riders, who, I am informed, will attempt to make the trans-continental journey from Washington to the Pacific Coast in five calendar days, or 116 hours of actual traveling. The purpose of this trial of speed and endurance, it has been explained to me, is to demonstrate the efficiency of the American-made motorcycle for military scouting purposes and dispatch carrying.**

**I shall hand this message to the team leaving the Executive Offices at 10 o'clock A. M., Monday, July 19th, with the understanding that it is to be passed from team to team at approximately each 100 miles across the continent. It has been estimated that about 3,700 miles will be traversed, including the run from Washington to New York City.**

**In the event that the test proves successful, may I not ask you to convey through the team delivering this dispatch to you my hearty congratulations to all participants?**

**Sincerely yours,**

**J. P. TUMULTY,**
**Secretary to the President.**

**Mr. Charles C. Moore,**
**President, Panama-Pacific Exposition,**
**San Francisco, California.**

# How the Message Was Transferred in New York

# Bulletins on Relays From New York City Westward

**NEW YORKERS ARRIVE IN POUGHKEEPSIE WITHOUT A HITCH**

POUGHKEEPSIE, N. Y., July 19.—The Excelsior squad of relay riders from New York City arrived here at 7:30 this evening, having made the run from the mete poles without trouble. This squad was made up of Stubner, Willig and Perry. The riders managed to keep together on the trip, except for one or two short stretches when Stubner, who carried the messages, rode out in front at a record-smashing clip. Some rough spots were encountered, but the riders state that they kept their mounts wide open for a good part of the journey.

This is the first team so far heard from that managed to bring all three riders through to its destination together.

(Continued From Page 17)

tion and riding at speed became extremely dangerous. Despite these handicaps the Poughkeepsie trio hit up a good clip over most of the course. Sorenson's machine was put out of the running by a short circuit and he arrived in Albany riding with Lyons.

In this city the messages were delivered to A. P. Strogonoff, who got under way promptly, accompanied by H. Holzhauer and J. Warner. These riders used Emblem machines and their destination was Utica. Strogonoff and his escort pulled out of Albany at 11:21.

### HOLZHAUER DELIVERS MESSAGE IN UTICA AT 2:46 A. M.

UTICA, July 20.—It was 2:46 this morning when Albert Holzhauer roared into Utica with the President's message, and Jack Warner, of his escort, was only a minute or two behind him. A. P. Strogonoff, who was carrying the message when the riders left Albany, was held up for a time and he transferred the documents to Holzhauer, who gave an excellent performance on his Emblem on the remainder of the trip to this city.

It is understood that the riders on this relay were delayed at several points by bad roads, and that Strogonoff was retired while trying to ride a particularly rough section at high speed.

### FAST TRIP BY ROCHESTER SQUAD IN SPITE OF SPILL

BUFFALO, July 20.—Gordon Smith (Henderson), George M. Spacher (Pope), and J. R. Millard (Eagle) entered Buffalo at 8:07 this morning, after an exciting run from Rochester in the transcontinental relay. Spacher was ditched near Batavia, and although his machine was demolished he escaped injury. He hopped aboard Millard's machine as a tandem passenger and completed the journey. The riders lost 5 minutes as a result of Spacher's accident, but for the remainder of the dash into Buffalo excellent time was made.

The riders who started off on the next relay, to Westleyville, were Ray Frawley (Emblem) and Nelson Eckhardt (Emblem). They "looped it" out of this city a few seconds after the relay squad from Rochester arrived, the time consumed in making the transfer of the messages being so slight as to be negligible.

### MESSAGE REACHES ERIE AT 10:30 AND CLEVELAND AT 1:11; ROADS BOTHERSOME

CLEVELAND, July 20.—The Buffalo riders, Ray Frawley and Nelson Eckhardt, on Emblems, reached Erie at 10:30 a. m. The Erie boys, Ralph Lossie, Roger Brandt and Archie Mang, riding Dayton motorcycles, got a quick start and after considerable hard road-plugging delivered the message in Cleveland at 1:11 p. m.

### RIDERS OUT OF TOLEDO FIND ROADS DELUGED BY HEAVY RAINS

TOLEDO, July 20.—Ivan Jacobs, Clover Friedman and C. L. Murray, on Indians, reached this city after riding the relay from Cleveland, at 4:45 p. m. The transfer was neatly made and the message was started on its next jump—to Bryan—by Alfred Oberwegner, who is escorted by Roy Carns and Bob Trowbridge. All three riders on this relay mount Hendersons. The roads have been deluged all day by rain and are in fearful condition.

### ELLINGHAM'S NEW DUTIES

R. W. Ellingham, formerly works manager for the Hendee Manufacturing Company, is now connected in an important capacity with the Remington Arms & Ammunition Company, of Bridgeport, Conn. His many friends in the motorcycle trade will be pleased to learn that genial Bob is well satisfied with his new work, and getting along famously.

Norbert B. Sandmann, the Louisville, Ky., Excelsior dealer, recently returned from Chicago where he visited the Excelsior factory.

# Scouting By Train on the Relay Route

## Some Rapid-Fire Impressions From a Car Window

*By Frank B. Rodger*

ABOARD the San Francisco Limited, Sunday, July 18.—Chairman John L. [illegible] and wife, Chairman William [illegible], wife and daughter Gladys, and [illegible] Yonk, are on the San Francisco [illegible] No. 17, headed coastward and go- [illegible] mont. At Cheyenne we expect to pick [illegible] Ash, of the Chicago Cycle & Sup- Co.

[illegible], oodles, great gobs, chunks and [illegible] cloudbursts are all we have seen [illegible] Moline—Relay 15, to where we are [illegible] Relay 18. The red, white and [illegible] sorted posts of the Lincoln Highway [illegible] where the roads were (not are). [illegible] places the marks themselves are [illegible] water. We saw people going to [illegible] today in buggies with the water [illegible] axles.

[illegible] riders will have to hit the rail- [illegible] for much of the distance west [illegible]. You can't put it too strong [illegible] riding the relay are deserv- [illegible] greatest credit.

[illegible] Valley Junction is the name of [illegible] we just passed—so Donovan [illegible] the water is still with us, al- [illegible] so high as it was. Donovan [illegible] to see relay managers at [illegible]. At Omaha W. E. Dewey, in [illegible] Relay 18, and John Stiehle, in [illegible] Relay 19, will give us an idea [illegible] roads are in Nebraska. We [illegible] they are better than they were [illegible] Carl Larson, of Des Moines, [illegible] that Relay 16 will be gotten [illegible] and others along the line give the [illegible] assurances. But it will be hard go- [illegible] hard.

[illegible] a chap on a motorcycle plug- [illegible] through the mud. Donovan said he [illegible] it was a relay rider out survey- [illegible] conditions. Just now we are pass- [illegible] that are a trifle higher and not [illegible] Apparently there has not been so [illegible] here as farther east. Condi- [illegible] particularly bad around Boone, [illegible] Denison, Iowa. You can call [illegible] road town Vale of Tears if you [illegible] Swan thought of the idea first, but he hasn't copyrighted it; you can use it.

We have just passed through Honey Creek, and the roads seem to be pretty good. After we leave Omaha we expect to see the relay manager at all stops. Donovan has wired all the boys to hit the railroad tracks where necessary and to keep him and the relay managers ahead fully posted as to the progress that is being made.

The sun is trying to come out and a strong wind is blowing. Both are welcome for they will help the road conditions. Before Monday, the 19th, it is possible that all the roads will be improved. Let's hope so. One thing is certain; this relay trip is one of the most remarkable tests ever given American-made motorcycles—and let us not forget the game riders. Three cheers and a tiger for them!

Ray Pawley and Nelson Eckhardt (in Center and at Right) the Emblem Riders Who Carried the Message from Buffalo to Erie

### TRANSCONTINENTALISTS ARRIVING

San Francisco, July 15.—Hardly a day passes now that one or more dust-stained transcontinental motorcyclists do not put in an appearance in the World's Fair city. Yesterday Mr. and Mrs. W. H. Morris, of Joplin, Mo., arrived here in an Indian sidecar. They were a month and a half on the way, traveling in a leisurely manner and making many side trips to points of interest en route.

Day before yesterday a party of transcontinental riders entered this city. Bud Baker and Dick O'Brien, of Washington, D. C., came across the continent on an Indian tandem, traveling over the Lincoln Highway. This is the first tandem motorcycle that has ever crossed the continent, it is believed. The young men are traveling in the interests of the Goodyear Tire and Rubber Company, of Akron, Ohio, and have kept a record of the mileage, condition of the roads and other information that will be of benefit to other Eastern motorcycle riders who are planning trips to this State this summer. The mileage piled up by the two plucky riders is given as 5,100.

Two other Eastern riders, E. Hakemann and H. A. Sutter, of Akron, Ohio, arrived here with Baker and O'Brien, and after viewing the exposition will return East by way of the Southern route.

### JERSEY M. C. HEARS LECTURE

Newark, N. J., July 15.—After the regular meeting of the N. J. M. C., an address by Mr. R. C Jenkinson on traffic regulations was enjoyed by 50 of the members.

Mr. Jenkinson, who is a special inspector for the motor vehicle department, gave a short outline of the history and progress of the modern motor vehicle; then he told of the reasons why a motor vehicle department was created and what its aims were. Out of 70,000 automobilists and 10,000 motorcyclists who are registered in New Jersey probably 500 are the habitual offenders in regard to speeding or other violations. Remove these people from the State's highways, and the accidents would be reduced to a minimum, he said.

Mr. Jenkinson then informed the boys that more complaints come from the open muffler nuisance than from the speed craze. When vital statistics are looked into Mr. Jenkinson declared that in one out of every 50 houses in Newark alone some person lay sick and at the point of death, so that the open muffler pest could cause untold suffering.

### AFTER-HARVEST PROSPECTS BRIGHT

San Francisco, July 14.—Prospects are bright for a big increase in motorcycle sales in Northern California following the completion of the harvesting of crops, according to reports made to Manager J. D. Fraser, of the Appeal Manufacturing Company, California distributors of Harley-Davidson motorcycles. The reports came from H. A. Lilly, special traveling representative of that company, who has just completed a tour of north of the Tehachapi mountains.

Lilly reports that agents in a large number of towns visited by him have received deposits on machines for delivery after harvest and the outlook for a material increase in sales of motorcycles within the next thirty to sixty days is most promising.

### STANDARD TIRE INCREASES STOCK

Willoughby, Ohio, July 19.—The Standard Tire & Ruber Company, of this city, has filed amended articles of incorporation in which its capital stock was increased from $100,000 to $500,000. The object of this increase is to finance the needed extensions to the business.

### TAUNTON CLUB RUN

Taunton, Mass., July 18.—The members of the Southern Massachusetts Motorcycle Club held an enjoyable run today to Narragansett Pier by way of Providence. There were eighteen starters in the run and they all finished the one hundred and five miles.

Digitized by Google

# Sunset Ramblers Welcomed in Bakersfield

LOS ANGELES, Cal., July 19.—With President A. B. Coffman, of the F. A. M., on hand to witness the start of the annual ramble of the Los Angeles M. C., and a big crowd of club members and spectators in attendance to give the tourists a royal send-off, the trip was started yesterday at 11 a. m. Press photographs were taken, and the members of the club who are not participating in the ramble formed an escort for the tourists as they left the city.

Among those in the party were: Paul J. C. Derkum and wife, with Indian sidecar combination; Charles Fuller Gates, United States Tire Car; W. Edwards Henderson, trade journalist; Edward Peterson, secretary of the Los Angeles M. C., with Harley-Davidson; C. F. Bruschi, Harley-Davidson dealer at San Diego; G. A. Woods, Harley-Davidson; Harry Crandall, Harley-Davidson; Hugh A. Fargo and wife, Henderson motorcycle and Rogers sidecar; F. L. Sweeney, Indian.

Crandall rode from Phoenix, Ariz., to join the ramblers in 17 hours, and Woods left San Diego at midnight for the ride to Los Angeles.

The route led through beautiful Hollywood and San Fernando to Saugus, where the party stopped for dinner. The trip was then continued through Bouquet Canyon, one of the four passes through the San Antonio mountains. The ramblers rode through the desert in the cool of the day to Willow Springs. Bruschi had a spill in the sand and injured his hip so severely that Derkum was obliged to take him to Willow Springs in his sidecar. Willow Springs is a quaint adobe village in the desert.

This morning (Monday) the riders turned out at 6 o'clock, and after breakfast the journey was continued through Oak Creek Pass, Halter Pass and White Wolf Pass, which together form the route through the Tehachapis into the famous San Joaquin valley. These passes are the and have caused many automobile accidents. From the top of White Wolf grade is visible 800 miles of the richest valley in the world. The view from this 4,000-foot elevation is simply wonderful.

The ramblers were met at Tehachapi by an escort made up of members of the Bakersfield M. C., and accompanied to the city limits of Bakersfield. On the outskirts the motorcyclists formed in line and paraded through some of the main streets of the city to the Bakersfield Athletic Club. After a clean-up and luncheon the riders were taken for a sightseeing trip about the city. In the evening there was a banquet and reception in honor of the ramblers at the club.

On Tuesday, the 20th, the party will head for Fresno, several of the Bakersfield boys going with the delegation for the remainder of the run. Although the course so far traveled included about 170 miles of genuine endurance riding, there has been little or no mechanical trouble so far, and the outing is being fully enjoyed by the riders.

## F. C. Cornish, Veteran Dealer, Answers the Call

NEWARK, N. J.—Frank C. Cornish, one of the veterans of American cycledom and an all-around athlete of repute in his day, died at his home 18 Beverley street, Newark, June 16. Mr. Cornish was in his 48th year. He conducted a bicycle business and general sporting goods store at 219 Clinton avenue for many years, and was general sales manager for the Consolidated Mfg. Co., of Toledo, Ohio, producers of the Yale motorcycles and a line of bicycles. Mr. Cornish had active charge of the Yale interests in Eastern territory, with headquarters in Newark.

Mr. Cornish had been critically ill for a week, and for the last six months his health had given cause for anxiety. Death resulted from gastritis, brought on by a general nervous breakdown.

Almost from boyhood Mr. Cornish had displayed a keen interest in sports and his name was found on many bicycling programs when the L. A. W. was in its prime. In addition to being a recognized speedster in bike circles, he was an accomplished roller skater and frequently gave public exhibitions. Many years ago he played third base on the old New York Athletic Club baseball team, and was credited with being a top-notcher of his time on the diamond.

Mr. Cornish is survived by his widow, Mrs. Imogene Walker Cornish and two sons, David Chester and Frank Walker Cornish.

### MADISON DATE CHANGED

Madison, Wis., July 22.—The date of the second race meet of the Madison Motorcycle Racing Association has been changed from August 1 to August 8 in order to avoid conflict with the Milwaukee meet and to insure the appearance of the best racing talent at Madison.

Purses aggregating $360 will be hung up in three professional events, a 100-mile free-for-all, 15-mile-free-for-all and a 10-mile event for local professionals. The races are run on the mile track of the Dane County fair grounds.

### TO FORM HARLEY-DAVIDSON CLUB

Kansas City, Mo.—Harley-Davidson riders in this city, assisted by the Western Motorcycle Company, local distributors, are soon to form a Harley-Davidson motorcycle club. Over 50 riders have signified their intention to join the organization.

# F. A. M. Convention Formally Opens

SACRAMENTO, Cal., July 20.—The F. A. M. National Convention was formerly opened when Freeman H. Bloodgood, representing Governor Hiram Johnson, welcomed the visiting riders and delegates.

"Fittingly does California welcome the motorcyclists of the United States," said the speaker, "for 24,125 brother cyclists now live within her borders. In addition to wheels and gasoline engines and pneumatic tubes there must be good roads, and we have them; more miles than any other State, 800 miles completed with 2,200 miles now under construction and $15,000,000 in bonds to be voted for next year. All this in addition to county highways built at a cost of many millions.

"You salesmen wish markets. Here we have them. You cyclists need good roads, and here we have them. And more than that we have them 365 days in the year. Also do we welcome you and invite you to join our club of 'adopted sons of the golden West.'"

Among the trade men present are C. H. Hart, C. H. Minto, Thos. Lynch, R. R. Robinson and W. G. Colins, all on the staff of the United States Rubber Co., and all hailing from San Francisco; W. J. Cameron and H. S. Quine, of the Goodyear Tire & Rubber Co., of Akron; George Bellis, the Excelsior booster; Bob Perry, Ignatz Schwinn and wife, Frank Schwinn, Carl Neely, Glenn Stokes, Emil Fabian and W. Nelson. From George Bellis on, all those present are singing the praises of the "X."

From the Indian camp the following are present: George W. Sherman, E. G. Baker, Morty Graves, Ray Crevison, C. I. Hedstrom, Victor Strain, Hap Alzine and Joe Armstrong.

The Cyclone is represented by E. A. Lundy, general manager, Stroud Don Johns, mechanical engineer, Wm. Goudy, E. Fickelstein and Lounden Claus. Hugh Fargo is on deck for the Hendersons.

Arthur Davidson is there with the glad hand, accompanied by Frank Rodger, O. P. Daenitz and wife and Wm. Holdocker of Portland. The Federal Tire & Rubber Co., is represented in the persons of E. L. Rettig, L. H. Thompson.

Among the other men prominent in the trade were: John L. Donovan, G. B. Gibson, and C. L. Smith, Southern California Pope distributor.

All the trophies to be awarded at the races were declared by Secretary Gibson to be the finest ever offered at any F. A. M. meet. The trophies are on display at the store of Kimball-Upson Co.

Delegations are now arriving from Marysville, Stockton, Fresno, Bakersfield, San Jose, Santa Barbara, Pasadena, Los Angeles, San Diego, Santa Rosa San Francisco and Oakland and other California towns.

All local dealers have decorated their stores lavishly, the capital M. C. club rooms and Travelers hotel, convention headquarters have special electrical decorations. Governor Johnson could not appear because he was called to 'Frisco on account of Roosevelt Day.

Great local interest centers upon the big motorcycle parade to be held on Saturday night. Ten prizes are offered for the best showing in the parade. E. O. Putzman will be grand marshal.

---

Secretary-Treasurer G. B. Gibson, of the F. A. M., left Westboro, Mass., on July 14 for the trip to the federation convention at Sacramento, where he arrived Monday, July 19. During the secretary's absence business affairs at the Westboro office are kept in motion by Mrs. Gibson.

# BIG PRIZE LIST FOR PARTS RACES

## Many Donations for the Cycle Parts Bike Races at Atlantic City, Aug. 6

ATLANTIC CITY, N. J., July 20.—Great interest is being taken in the amateur bicycle road races which will be held here in connection with the Cycle Parts Trade Convention. The races will be staged on August 6. Mr. W. J. Surree, treasurer of the Cycle Parts Association, advises that the manufacturers have been very generous in their donations, which will be hung up as prizes.

There will be four events. The first race will be a 5-mile handicap, the second a 5-mile motorwheel race, the third 1-mile Atlantic county championship, and the last event a 15-mile handicap. The first prizes range in value from $10 to $60. The A. O. Smith Company has given a Smith Motor Wheel and a silver cup.

Entries close with George W. Robb, 918 Arch street, Philadelphia, on Tuesday, August 3. The races will start at 2:30 p. m. sharp, and the rain date has been set for Saturday, August 7. It is particularly specified on the entry blanks that all riders must appear in neat and clean costumes in order to be permitted to enter the races. The races are open to all amateur riders except the Atlantic county championship event, which is open only to riders who have resided in the county for the past six months.

Since some of the best riders in the East are planning to spend their vacation in Atlantic City, many will ride the races.

# Creviston Nabs Three Races at Marysville

MARYSVILLE, Cal., July 18.—Ray Creviston, astride his Indian, came the way to his competitors in three of the professional events which were held here this afternoon on the fairgrounds track under the auspices of the Marysville Motorcycle Club. The Indian made its initial debut on the local track and put up a good showing. Creviston covered the five miles in the first professional race in 4:26⅗, which was the fastest time made in the entire meet. He was closely followed by Perry, Harley-Davidson, and Gibson Cyclone, who finished in the order named. Burns, mounted on a Pope, took a spill but was not badly injured.

### Pope Wins Three Mile

Harrels went to the Pope rider, Branstatt, in the three-mile stripped event, covering the distance in 5:24. Furrow on a Harley-Davidson accounted for second position in this event. The five-mile amateur affair for twin machines was a hummer and brought out some of the best local "simon pures." Reed, Excelsior, finishing in 5:24, was second, closely followed by Winkley, Cyclone and Branstatt, Pope, in that order.

The state amateur championship at two miles had the crowd up on its feet. Much interest centered in the Cyclone as the riders shot off from the tape, and the fans broke into great applause when Winkley, on his Cyclone, breezed in the winner, in 4:48⅘. Christenson, Excelsior, snatched second place, while the third honors were accounted for by Hess, Excelsior.

### Creviston Given Ovation

Creviston was given an ovation when he brought home the bacon in the five-mile race for twins. His time was 4:38⅘. The Cyclone rider, Gibson, came home second, while the third place went to Fabian, Excelsior. Ray Creviston repeated his good work in the ten-mile event, when he covered the ten miles in 8:55⅘, and accounted for the victory. Gibson again was second and Fabian third.

A five-mile event was arranged for members of the Marysville Motorcycle Club, in which Richardson, Branstatt and Reed participated. Richardson on his Excelsior won this event, while Branstatt, Pope, finished second, and Reed, Indian, came in third. The time was 5:05.

The best time made for one lap was 52 flat. A crowd of one thousand fans attended the races. F. W. Woodson, of the local club, acted as the official referee.

---

### VERRILL TAKES DAYTON RACE

Dayton, Ohio.—"Krazy Horse" Verrill, on his Indian, captured the 25-mile professional at the Dayton race meet, which was held at the fair grounds track on Sunday, July 11. Verrill did some sensational riding and covered the distance in 32:03. Maldwyn Jones, Flying Merkel, took second position in this event, while C. W. Voss, Excelsior, took third place.

In the 5-mile sidecar race, Frank Tobias, Thor, accounted for the victory, while Mel Mumma, Indian, was second, and Ray Eddy, Harley-Davidson, was third. The time was 7:21⅘. The 10-mile professional saw Jones, on his Flying Merkel, breeze in first in 13:47. Second honors were won by Shorty Mathews, Indian, and third by Emmet Amos, Flying Merkel.

# Gibson's Report Shows Need of Continued Activity for Sound F. A. M. Finances

WHILE the generally healthful condition of the F. A. M. after a year of fruitful work by the heads of departments has afforded grounds for satisfaction, the report of Secreary-Treasurer G. B. Gibson, which has just been presented to the convention in session at Sacramento, indicates that additional years of the same kind of rapid-fire co-operation will be required to place the federation on the sound financial footing that it once enjoyed. The report of the Secretary Gibson shows a balance on hand of $7.02, with a deficit of $44.33 for the preceding year taken out, but these figures take no account of three unpaid salary bills which foot up to $1,950.

### Three Salary Bills

The largest of these bills is for $1,400 in salary due Secretary-Treasurer Gibson. It covers forty weeks, from September 26, 1914. Three months' salary, amounting to $250, is also due Chairman William Johnson, of the F. A. M. legal action committee. The remaining $300 is claimed as salary by O. F. McLain, who formerly acted as head of the legal action committee. This account is disputed by the F. A. M.

As shown in the tabular statement printed below, the receipts of the F. A. M. for the fiscal year just completed amounted to $13,630.27. The total expenses for the year footed up to $13,578.92. This left a difference of $51.35 in favor of the receipts, but when the deficit of $44.33 is deducted, the balance on hand is cut to $7.02.

### In the Secretary's Office

Owing to the great number of items involved in Secretary Gibson's statement of expenditures, it is impossible to print that portion of the report in full, and reference will be made only to some of the more important features. The report shows that Secretary Gibson received $385 as the balance of his salary due for the fiscal year of 1913-1914, and $385 as part of his salary for the 1914-1915 fiscal year. He also had returned to him $350, the sum of several F. A. M. bills which he paid from his personal account during the last winter. Mrs. Gibson, as assistant secretary, received a salary of $624, and four stenographers were paid $507, $432, $224 and $45. The other expenditures charged against the secretary's office were of a routine nature.

### Executive and Touring

The outlay for President Coffman's office, in combination with the F. A. M. touring bureau, reached a total of $936.72. Of this amount $623 was the stenographer's salary, and $105 was the office rental. For help in connection with the touring bureau $25 was paid. The expenses for June of this year, amounting to $88.57, will appear in the report for the next fiscal year.

### The Competition Committee

The secretary's report states that the outlay through the office of Chairman Donovan of the competition committee was $2,075.68, but an attached note explains that these figures are likely to vary somewhat from the exact outlay because of the fact that Chairman Donovan sometimes paid his office expenses from competition funds in hand, while at other times such expenses were paid from Secretary Gibson's office. Only by a comparison of Chairman Donovan's report with that of Secretary Gibson could the exact figures be obtained, and a copy of the Donovan report is not in hand at this writing.

### Legal Action Work

For the operation of the legal action office the outlay was $1,205.14 for the fiscal year. Of this sum Chairman William M. Johnson receivd $676.66 as salary, and the next largest item, $333.75, was for the salary of C. E. Johnson, employed as stenographer. The other items, ranging from $20 to $55, were for routine matters.

### St. Louis Meets Expenses

The secretary's report shows that the F. A. M. expenses incidental to the national meeting in St. Louis were $502.80, made up of carfare for federation officials who were obliged to attend the convention, and an item of $160.80 for fobs which were presented to touring members in the convention city.

A hang-over from the legal action office of O. F. McLain in Indianapolis, amounting to $81.85, was paid. Of this the former legal action chairman received $57.37 as a balance on his salary, and the remainder was made up of office expenses.

Three months' back salary, amounting to $125.07, was paid to J. H. Donehue, former manager of the F. A. M. touring bureau, in addition to office expenses amounting to $8.90.

### Newspaper Expenditures

For the membership committee the outlay was $414.02 for the year. Chairman E. M. Estabrook received $173.32 as two months' salary at the full restored rate, and also $225 for five months due him at the restored rate. Office expenses made up the balance.

There are two items in the secretary's report referring to the office of former president B. J. Patterson, one of $38.49 for postage and telegrams, and another of $60 for Miss Inez Patterson, who acted as the president's stenographer.

The F. A. M. paid $200 to persons who recovered motorcycles stolen from federation members during the year, on the basis of $25 to each one entitled to a reward.

### Outlays for State Commissioners

Following are the expenditures by F. A. M. State commissioners for the fiscal year: J. A. Hall, New York, $97.38; O. F. McLain, Indiana, $47.33; J. D. Miller, Georgia, $10.50; G. R. Moses, Missouri, $10; F. W. Sullivan, Illinois, $6.10; A. R. Ketcham, Michigan, $5; H. E. Baldwin, Wisconsin, $1.50. In the amount charged against Commissioner Hall is included $35.68, paid by the secretary's office in connection with the F. A. M. birthday party held at Brighton Beach.

## FIRST ENTRY FOR INDIANA RUN

Indianapolis, Ind., July 11—F. A. M. Commissioner Jack Carr has received the first entry for the two-day endurance run of the Indiana State Federation on August 7 and 8, from Leslie Vandament, of Greencastle, Ind. A check accompanied the entry. Vandament is Indian agent in his city and is known all over the western part of the State as "Van the motorcycle man."

In addition to mailing entry blanks to all factories and motorcycle clubs in Indiana,

the county commissioners and dealers throughout the State have been sent maps of the course as well as the usual blanks. It is expected that at least 12 Indiana clubs will be represented in the class set aside for them. A number of dealers have written to Commissioner Carr stating that they intend to enter teams to assist the factory entries.

The date for the closing of the entry list has been set for July 20. After that day the judges will have nearly three weeks to place starters and perfect checking arrangements. A special checker, who is a member of the Consolidated M. C. will be at each station, armed with duplicate checksheets, to make certain that riders are properly registered. No direct controls will be established.

About six factories are expected to enter teams in the factory class for pros. Information and blanks can be had from Commissioner Jack Carr, care of G. H. Westing Company, Indianapolis, Ind.

### WISCONSIN F. A. M. MEET SET BACK

Milwaukee, Wis., July 22.—Due to the short time left for preparation and also a desire to make it a three-day instead of a two-day meeting, the first annual convention of the Wisconsin F. A. M., contemplated for July 31 and August 1, has been set back to September 11, 12 and 13. This will enable the committee to make greater plans for the convention and will allow the delegates to take in the state fair at Milwaukee and also the third race meet of the Milwaukee club, September 13, in connection with the opening day of the fair.

### VOLUNTEER MOTORCYCLE POLICE

Dayton, Ohio.—The use of volunteer citizen police, using their own motorcycles and automobiles, selected carefully with a view to securing their assistance in the suppression of the various evils due to careless driving, is being considered by the city authorities. It is believed that, with such a force supplementing the regular traffic and police force, it will be possible to secure information regarding offenders which is not now possible, and that the approximately complete suppression of speeding, failure to give warnings, and so forth, will be possible.

### BISON PARADE MAKES A HIT

Buffalo, N. Y., July 14.—The motorcycle parade held under the auspices of the Buffalo M. C. here tonight proved to be a decided success. And judging from the applause of the spectators it certainly made a favorable impression. The procession was headed by President A. D. Cook and Captain George Haier. Immediately following these riders was a brass band which rode in motor cars. All of the machines were decorated. After riding through some of the principle business streets they proceeded to the Buffalo Velodrome in a body.

### MACHINE FOR DEPUTY SHERIFF

Hopkinsville, Ky.—Will Hester, the Christian county Indian agent, has just sold a 1915 machine to Sheriff Smith, who will have Deputy Sheriff Herbert Johnson use in answering calls out through the county in which the automobile is not as well suited.

# Pope Plant is Sold to New Yorkers

WESTFIELD, Mass., July 20.—The Pope Manufacturing Company plant and business was sold at noon today to New York City capitalists represented by the law firm of Austin, McLanahan and Merritt, of New York. The receivers, George Pope, of Hartford; Charles A. Morss, of Boston, and Charles A. Persons, of Worcester, were ordered by the Federal Court to sell the plant for not less than $725,000, and that was the only bid submitted to Auctioneer Edward J. Leyden, of Springfield.

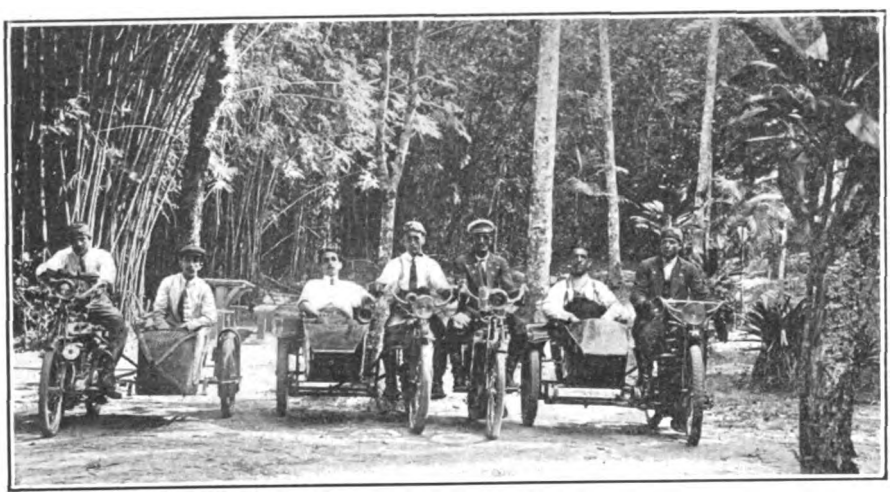
The bid was accompanied by a certified check for $25,000, presented by H. P. Coursens, of New York, who is connected with Austin, McLanahan and Merritt. Scott McLanahan of the law firm was present with Mr. Coursens and issued this statement:

"We cannot at this time reveal the names of the men back of this sale. The new owners will continue the business along the same line and manufacture bicycles and motorcycles.

"I can say authoritatively that the plant is not being bought to turn out munitions of war for the Allies, nor is there an English concern back of the purchase for making bicycles and motorcycles for the British army. When the transfer is made by the receivers to the new owners, the names of the men interested in the purchase will be made public. There will be no disposition to disrupt the present working force."

The cash on hand by the Pope Manufacturing Company on July 19 was $229,000. This is included in the sale as a part of the assets possessed by the Pope company.

## WHERE TOURISTS FIND PICTURESQUE SURROUNDINGS



**Riders from the Indian Agency of Christoph & Co., in Rio Janeiro, Enjoying a Social Jaunt Through a Brazilian Forest**

## PHOENIX WILL HAVE FAIR RACES

Phoenix, Ariz., July 20.—At last the Arizona two-wheeler enthusiasts have won their fight for a "motorcycle day" at the annual state fair. Saturday afternoon, November 20, will be given over entirely to motorcycle races, and the fair commission has guaranteed $1,000 in prizes. It is hoped that this sum will be materially increased by the Phoenix chamber of commerce and by motorcycle boosters, who will probably hold a series of race meets and add the proceeds to the prize fund.

Heretofore Thursday afternoon of each fair has been given over to automobiles and motorcycles. Invariably the autos left little time for the motorcycles.

Craig W. Pottinger has been named by the fair commissioners to superintend the motorcycle races. He says that the principal event will not be less than 100 miles in length. Pottinger has asked the chamber of commerce to give $350 toward the purse for the annual San Diego-Phoenix race, and the same amount for the race from San Diego. Last year the chamber gave $250 for each of the road races.

## ARNOLD WITH NEW DEPARTURE

E. E. Arnold has joined the New Departure Company, of Bristol, Conn., in an engineering and sales capacity. He was formerly with the Standard Screw Products Company, of Detroit.

## HENDEE OUTING CLUB FORMED

San Francisco, July 14.—The Hendee Outing Club has been organized here, with B. O. Anderson, local manager for the Hendee Manufacturing Sales Company; Earl and Mrs. Armstrong and Chas. Meyer, secretary of the San Francisco Motorcycle Club, as charter members. An application will be made for a charter from the Hendee Manufacturing Company, which some few years ago organized a similar club at Springfield.

The local club had its inception during a sociability run made by the quartet to Santa Cruz on the Fourth. After a visit to the beach city, the little party rode north for about 25 miles and went into camp in the wilds of the Santa Cruz mountains, five or six miles from the nearest road. Leaving their machines hidden in the deep underbrush near the road, the party dived into the wilderness and after a strenuous trip discovered a delightful camping place near a mountain stream that teems with trout. Here they constructed a crude hut of boards from an abandoned lumber camp, after which they got busy with rod and reel and during the two days' sojourn in the wilderness, bagged the limit catch every day. Mrs. Armstrong was unanimously elected chief cook and bottle washer, and the "feeds" she spread before the happy and hungry crew during the two days has made them long to return to the wilds again at the earliest opportunity.

It was while lolling around the camp fire the first night of the stay in the camp that the idea of the organization of the outing club was conceived and it was forthwith launched with the above mentioned charter members. It is purposed to admit to membership other congenial souls and to make the camp a regular week-end rendezvous for the balance of the summer and autumn.

## SCHACK ON WESTERN TRIP

W. G. Schack, president of the Emblem Mfg. Co., made a quick trip through the middle west recently, stopping at Kansas City, Detroit and Chicago. He reported business as holding its own.

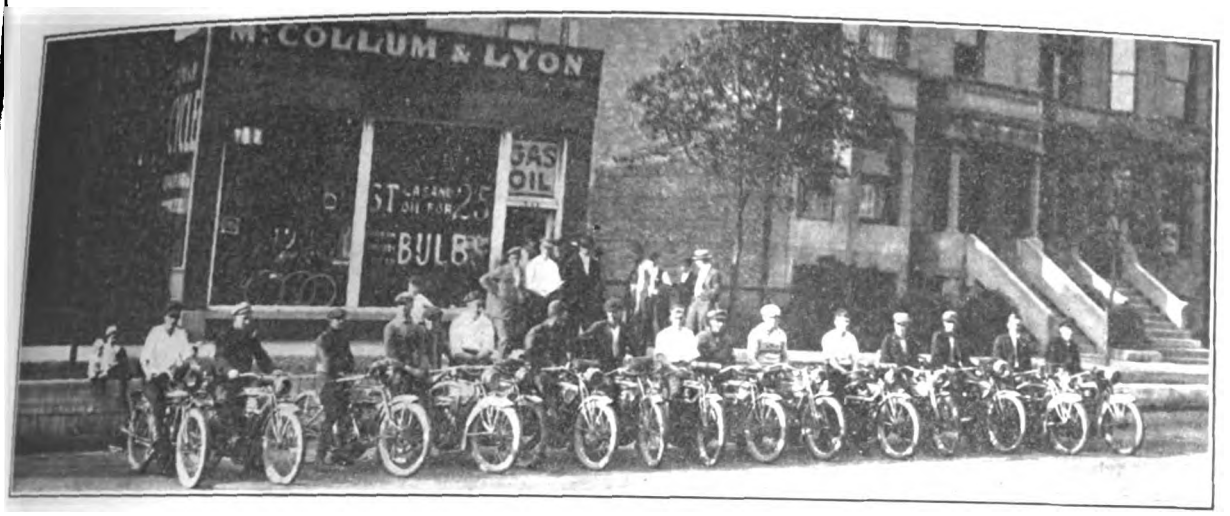
# Mud and Rain Splash Endurance Riders



**How the Contestants in the Englewood Run Lined Up for the Start**

CHICAGO, July 21.—Five members of the Englewood M. C., covered from head to foot with mud, made perfect scores in the second of a series of endurance runs staged on Sunday, July 18.

**Rain Came Down Hard**

The run was the worst ever held from the Windy City on account of the rain. E. Wearing and H. Ford started for Crown Point, Ind., the first control, at 8.01. At intervals of one minute two riders were sent on their way until all fourteen had been accounted for.

Coming down Wentworth avenue, the boys were overtaken by the rain, which had started in earnest. Not to be outdone by the shower, they plugged along until they came upon one grand mud hole in the middle of the road, just outside of Crown Point. They all had to dismount here and hold a consultation before proceeding.

**Engines Stalled**

Several riders managed to get in all right, but engines went dead, so all hands pushed to the front and carried most all the machines across. On arriving at Crown Point the riders were compelled to lose 5 minutes for the checkers, who had failed to put in an appearance.

After leaving the first control, mud was very much in evidence and quite a few lost considerable time. All told, about 50 miles of mud were encountered, which made going hard.

**Tired Riders Drop Out**

On the road to Kankakee, the noon check found several of the boys weary from the ordeal, so they dropped out. Hall and Gass both had time to burn, so stopped off at Cedar Lake and had a cool swim, which, incidentally, Gass's lighting system went wrong, which prevented him from getting a spark.

After the final check at Kankakee, it was found that all but two warriors had been accounted for, although several more looked as if they would not get through. The check in at Joliet found two more riders missing. Grady fell out at Roeby, and Stewart had a bad spill and quit.

Nearly all the riders experienced spills and trouble because of mud getting into the exhaust pipes, which knocked their engines out completely. After leaving Joliet, the last control, it was not long before the men were again encountering more mud, which cut down their time considerably.

The five riders who made perfect scores follow: J. E. Jenkinson, Thor single; Harry Ford, Excelsior; E. Wearing, Excelsior; E. W. Mead, Excelsior; W. Croop, Excelsior.

## CLOSES BIG RACE DEAL

Chicago, Ill., July 10.—John L. Donovan, chairman of the F. A. M. competition committee, today closed a deal for the three hundred-mile race which is to be held at the Chicago Speedway on Labor Day. Five thousand dollars in prizes will be given, it has now been definitely announced. Three thousand dollars will be offered in regular prizes, one thousand to the rider who will average ninety miles an hour and one thousand for other records.

## ON BUSINESS TRIP TO COAST

In the accompanying photograph appears the van combination with which H. O. Van Antwerp, of Grand Rapids, Mich., is making a business trip across the continent in the interest of the Chicago Eye Shield Company, 128-134 So. Clinton street, Chicago. Mr. Van Antwerp rode all through the New England states last year boosting the Chicago firm's sales of Folding Dimmer Goggles, of which it makes a specialty, and his trip was so successful that it was decided to send him across the country.

## RAIN STOPS TOLEDO RACES

Toledo, O., July 18.—The sudden displeasure of the weather man spoiled what promised to be a beautiful bunch of races at the meet of the Interstate Racing Association here this afternoon. A big crowd of star riders had entered, and were there on the spot ready for the fray, and the first heat had fulfilled the fond hopes of the big crowd of spectators.

In the first heat at five miles, Jones and Amos, on Merkels, had jumped away from the rest of the field on the first lap, with Jones a little in advance. But Amos hung on and slowly fought his way to the front, taking the lead in the third mile. And in spite of Jones exertions, Amos kept his place and won, in 5:58⅘. Jones took second, and Coffey, on a Harley-Davidson, was third man across the tape.

And right away it rained. Didn't last long, but long enough to make the track too wet for anything but schooners to travel on. So the folks in the audience went sadly away, sorry that there was no more for this day, but cheered by the announcement that the meet would be held next Sunday and that their rain checks would let them in to see it then.

## BALTIMORE LABOR DAY RACES

Baltimore, Md.—The renewed interest taken in motorcycle racing here, as manifested at the meeting held on July 5, has caused the Maryland M. C. to make plans for another racing card to be staged on Labor Day. The local dealers have already promised their support. The professional features will be augumented and a 25-mile race will be added with a big money purse as an incentive to the speed artists to enter and do their best.

## MAY HAVE NEW BOARD TRACK

Los Angeles, Cal.—L. W. Wickes, of this city, has been in Chicago making a study of the engineering and construction features of the two-mile Chicago track. He is associated with A. M. Young in plans for promoting an automobile and motorcycle speedway in this city. It is claimed that options have been secured on three sites.

# BUFFALO FEATURE WON BY LOCHNER

## In Thrilling Fifty-Mile Open Event Excelsior Rider Shows the Way Home

BUFFALO, N. Y., July 18.—More motorcycle fans witnessed the second dirt track motorcycle race meet held under the auspices of the Buffalo M. C. at the Lancaster Driving Park this afternoon than in the entire local dirt track motorcycle racing history. Not a single accident marred the entire program. Only two riders took a spill, but each came out without a scratch. The big crowd was kept in good humor by a brass band, which played before the races and during the fifteen minute intermissions.

Brigham Young captured the ten-mile stripped stock, while Oliver Allyn won the two-mile Firestone Tire Novelty race. In this last event the fans were much amused, because at the end of each lap the riders were obliged to stop; at the end of the first lap they had to thread a needle; second lap, drink a glass of water and eat a ham sandwich; third lap, tie a Firestone penant to their handle bars. Bob Barclay could thread a needle, eat a sandwich, drink a glass of water and tie knots faster than any of his competitors. He led from the very start and every one was sure he would win the race, until he was 200 yards from the tape in the final lap. Then his motor refused to work, so by sheer pluck he paddled his mount across the tape for third place.

George Lochner, of Syracuse, placed another diamond in his crown this afternoon when he won the fifty-mile open from Don Barclay, of Denver, by a quarter of a mile on his speedy little "X." Lochner led from the very start, with Don Barclay close at his heels, but in the twenty-seventh mile Lochner was forced to drop out for a few minutes to get a fresh supply of oil and gasoline. So by the time he was again on his mount Don was leading him by 1½ miles. It was only a short time after that Barclay was forced to stop for oil and gas. This gove Lochner an opportunity to regain what he had lost.

But Don Barclay's assistants were swift, and he was on his mount again with still a half mile to the good. It was only by continuous hard plugging that Lochner succeeded in passing Don in the thirty-ninth mile. For a lap or so they rode neck and neck, with Lochner but a yard or more in advance. Gradually, Lochner began gaining on Don, as the latter seeme to lose the ability to hold his own in thi hard-fought race. The summaries:

First Event—Ten-mile stripped stock—Won b Brigham Young, Detroit (Harley-Davidson); se ond, Oliver Allyn, Buffalo (Harley-Davidson) hird, Don Barclay, Denver (Indian). Time 12:29⅘.

Second Event—Two-mile Firestone tire novelt race—Won by Oliver Allyn, Buffalo (Harley-Davidson); second, George Lochner, Syracuse (Excelsior); third, Bob Barclay, Denver (Indian) Time, 4:19.

Third Event—Fifty-mile open—Won by Georg Lochner, Syracuse (Excelsior); second, Don Barclay, Denver (Indian); third, Bob Barclay, Denver (Indian). Time, 1:04:10⅗.

# Rough Going on Salt Lake City Run

SALT LAKE CITY, Utah.—The first annual mountain endurance run of the Salt Lake Dealers' Association, which was held July 4, had nineteen starters and introduced some road features not ordinarily found in such contests. The start was made from in front of the Salt Lake *Tribune* office at 6 a. m., the riders going off at one-minute intervals.

The course was laid out from Salt Lake City to Manti, Utah, and return, and included sand, patches of desert, irrigation ditches and three winding mountain canyons. The first checking station was at Provo, in charge of the Simmons Supply Co. All the entrants arrived at this point with clean scores. Beyond Springerville the fun began. Five miles of newly ploughed road with a covering of six inches of sand brought grief to four riders.

For 18 miles the contestants rode through Spanish Fork Canyon and spills were numerous. The next checking station was at Thistle, in charge of Elias Gardner. Thirteen riders were still perfect at this point. Then for 37 miles, through Thistle canyon, the riders and machines were subjected to terrific tests. When the riders emerged from the canyon and came down through Fairview and Indianola to Mount Pleasant, where the checking station was in charge of J. E. Doty, the clean scores had dwindled to nine.

The contestants enjoyed a chicken dinner at Manti, the noon control, and then started on the return trip. From Manti t Nephi there were 43 miles of desert and i the Salt Creek canyon bad roads, dr washes, deep sand and unbridged stream were encountered. From Nephi to Provo th roads improved, and nine perfect score were still recorded when the boys reache Salt Lake City and checked out.

The following finished within the tim limit: Lon Claflin, Indian, perfect; J Louis Anderson, Thor, perfect; H. F Cooper, Excelsior, perfect; Ab Jenkins, Ex celsior, 982; Don Smith, Excelsior, 949 William Edgington, Excelsior, perfect Fred Hartley, Excelsior, perfect; Ray Peck Excelsior, perfect; O. F. Gloystein, Excel sior, perfect; A. S. Margetts, Indian, per fect; G. L. Moore, Indian, 966; L. E Palmer, Indian, 931; H. A. Lund, Thor perfect.

### MILWAUKEE OUTING POSTPONED

Milwaukee, Wis., July 22.—"Postponed on account of rain" is getting to be a fa miliar story in connection with the spor of motorcycling in this community as al most every event scheduled by the Mil waukee Motorcycle Club, with the pos sible exception of the first race meet, an even that was preceded by rains that mad its staging doubtful, has suffered.

The latest enterprise to suffer was th first annual outing, which was to have bee held up the Milwaukee river at Rhinegan Park, Thiensville, on Sunday, July 18, bu which had to be postponed until July 2 Messrs. Binger and Horlach, of the club have charge of the picnic arrangement and promise some novel entertainment i the games which are to be run off unde Mr. and Mrs. Frederick Rowell.

### RITZ TAKES EVERYTHING

Moundsville, W. Va.—Otto Ritz, on hi Harley-Davidson, made a clean sweep o all three events in the Wheeling M. C meet on the half-mile track in this city o July 10. He won by one minute over D Mickels, Thor, in the five-mile stock, hi time being 6:41, and again from the sam Thor rider in the subsequent five-mile r 6:34. The third event, also for five miles resulted in Ritz and Mickels finishing i the same relative positions, the Harley Davidsonite's time being 6:39.

C. K. McCluskey, Excelsior, got third place in the first and last events, but los place in the second due to tire trouble. A Drummond, Thor, came third in the second race. The attendance was 1,000.

# With the Manufacturers

## New Berling Magneto for Lightweights

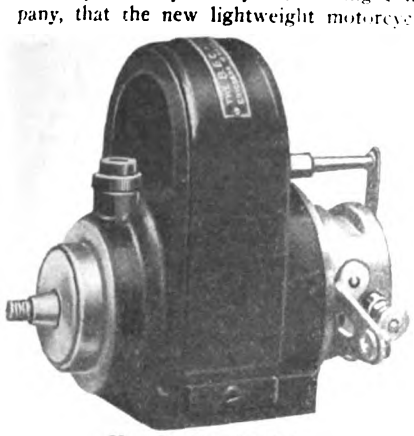
ANNOUNCEMENT is made by the Ericsson Manufacturing Company, of 1115 Military Road, Buffalo, N. Y., of a new model of Berling magneto, especially designed for use with lightweight motorcycles. This magneto, known as the "S" type, is small and light in construction and incorporates in its design a number of features which have characterized Berling magneto construction in the larger models. Among the latter may be mentioned the quick-acting interrupter and the unit-frame construction. The magneto can be had in single cylinder and twin cylinder types.

The unit-frame of the "S" type of Berling instrument is constructed along the same lines as in other magnetos which have proved their worth not only in the motorcycle field but in the automobile and aeroplane services. Aluminum or bronze can be had, the former being preferred by reason of its superior lightness. The frame is a one-piece casting, no matter what the metal used. This casting includes the base and sides, the top and the driving end.

The advantages of such exterior construction lie in rendering the magneto water, dust and oil proof, without the use of packing, as well as doing away with a number of screws which would otherwise be necessary in a construction involving several pieces. The unit construction further renders the instrument unaffected by vibration and wear, and insures permanent alignment of field and armature, allowing the use of a minimum air-gap.

The Berling interrupter used on the new magneto is the same as that used on previous models. It is designed to give a snappy action with quick and uniform break and make at all speeds. Its construction has been worked out to utilize centrifugal force as a means of assisting its positive operation. The makers state that the "S" type magneto can be counted on to give a fat spark at all positions of the timing lever, as a result of this construction.

The probability is, say the Berling company, that the new lightweight motorcycle



New Berling Model

will have an extensiveness of use, and will be employed proportionately more in cities than previous models have been. This fact, if true, will make it necessary that the magneto not only work well on hill-climbing and general country road work, but also that it operate properly in crowded streets. The ability of this new Berling magneto to give a full spark on retard especially adapts the new model for service on the new all-around model of lightweight machine.

Although the Ericsson company has devoted its engineering abilities recently to the perfection of the "S" magneto, work on other models has by no means been slackened. The motorcycle and automobile models are being produced in large numbers, and there is much production of eight-cylinder models for use in aeroplane service. The firm has done much laboratory research in the development of not only this but of all other Berling models, thus insuring proper operation in both theory and practice before each instrument is put on the market.

## Indian Outing Club Celebrates Fishing Event

SPRINGFIELD, Mass.—The third and best fish dinner of the Indian Outing Club at Springfield took place at the Highland Hotel Tuesday evening, July 13, with 41 present. Half of the company, the Blue fishing team, were the guests of the other half, the Reds, who caught less fish in a 24-hour contest starting Saturday noon and ending Sunday noon preceding the banquet. President Charles H. Spencer read the names of the winners, and presented the prizes as follows:

First prize for the largest fish, 2½-pound bass, won by E. Bjorkland, fish-pole donated by A. C. Gruendler; second prize for second largest fish, 1¾-pound bass, won by Charles Gustafson, take apart reel, donated by T. L. Loose; third prize for third largest fish, 1⅝-pound bass, won by Fred Adams, pair of dowie jacks, donated by E. M. Jackson.

After the dinner J. B. McNaughton took charge of the ceremonies as toastmaster. Letters of regret from President George M. Hendee, Vice-President Clarence A. Earl and Treasurer Frank J. Weschler of the company were read. Fishing experiences were related by the prize winners and by T. L. Loose, H. S. Barrows, Arthur Anderson, John Tinkham, Frank DeCormier, H. A. Caesar, Geo. Dowd, C. F. Evans and stories by H. C. Shaw, J. J. OConnor, W. G. McCann, Z. Godin and A. C. Gruendler. Recitations were contributed by Ernest Drake and John C. Otto.

In place of a program the guests had a humorous publication for their diversion, entitled Indian Bait Box, full of personal hits. The words were supplied all present for a number of popular songs, including "Dublin Bay," "Shandon Bells," "There's a Little Spark of Love Still Burning," Motorcycle Michael with Me," and others. V. S. Wrenn and J. R. Gould led the singing and provided the accompaniment.

### FIRESTONE FACTORY GROWING

Akron, Ohio.—An increase in factory space, in the shape of new buildings and additions, which will cost about $500,000, has been arranged by the Firetsone Tire & Rubber Company, in order to enable it to take care of its vastly increased business. Six new buildings are included in the plans for which permits have been issued, of which three will be four-story 60 by 125 additions to the present main building, and three will be separate structures. Joseph L. Stewart, of Cleveland, is the contractor of the construction work.

### TAKE ON WEED BACKREST

San Francisco, Cal.—The Bailey-Drake Company, of this city, has been appointed Pacific Coast distributors for the Weed Folding Backrest. The firm has found an increasing demand for this product since the first lot was sent to them a short time ago.

### BOSCH ISSUES TROPHY POSTCARDS

Over 3,300 postcards describing the Bosch Trophy for 1915 have been distributed to the trade and to motorcycle clubs by the donors, the Bosch Magneto Company, of 223-225 West Forty-sixth street, New York. These cards, which are of the folding type, have an excellent view of the trophy itself, the fifth one donated, on one of the inside pages, while details concerning the cup and the conditions under which it is donated are given on the facing page inside. Of the cards issued, three thousand have gone to the trade, while the remainder have been sent to clubs all over the country. The postcards were sent out in order that the Trophy should become more popular among amateur riders as well as among members of the trade who are interested in the Bosch Magneto.

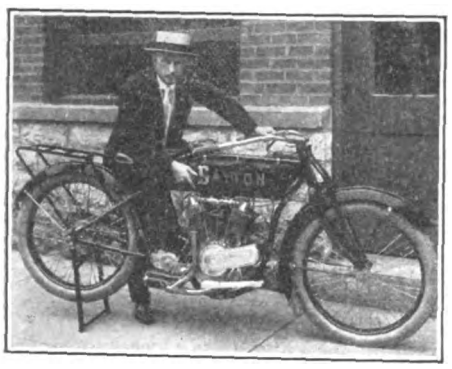
## ANOTHER DAYTON HUSTLER

Dayton, Ohio.—S. H. Ankeney, of Dayton, has been appointed advertising manager for the cycle department of the Davis Sewing Machine Company and will hereafter have charge of all advertising matter relating to the Dayton line of motorcycles and bicycles.

Mr. Ankeney is an experienced newspaper and trade journal man, having had



S. H. Ankeney

both editorial and advertising experience, and he is regarded as a valuable addition to the Dayton staff of live-wires. He secured his early training in the newspaper field at Des Moines, Ia., and was later connected with one of the large trade papers of New York City in the capacity of associate editor. He came to Dayton several years ago to take the position of publicity director for the Greater Dayton Association, the largest civic and commercial organization in the country.

Mr. Ankeney's particular duties will be to assist in making the Dayton motorcycle better known to present and prospective riders—in short, to assist the Dayton dealers in every way possible. The Davis Sewing Machine Company plans to make its advertising department one of genuine service to its agents, and it will be on this fundamental basis that all its advertising work will be conducted.

## REMY PLANT A MODEL

Anderson, Ind.—The movement noticeable in recent years to improve working conditions in factories has been responsible for a splendid transformation in many districts. Formerly the factory was likely to be a dingy, uncomfortable place where no effort was made to guard the health or add to the cheer of the workers. Today the employer is likely to consider the welfare and comfort of his employees as matters of importance for which he is in no small sense responsible.

As a result of this changed attitude, it is no uncommon thing to find a factory which, far from being an eye-sore, adds materially to the attractions of the locality in which it is situated.

A notable example in this respect is the factory of the Remy Electric Company, at Anderson, Ind. This company, said to be the world's largest manufacturer of starting, lighting and ignition devices, has a series of shops, assembling and testing rooms, etc., that might well serve as models for such establishments generally. The buildings are constructed around an attractive court, which is parked and beautiful with flowers, fountains, and winding walks.

This arrangement makes it possible to have every building open at both ends, giving an abundance of light and fresh air. In addition to the airy, roomy construction, each building is provided with a roof that consists for the most part of glass, the skylights being kept open when weather permits. Thus the employees have all the advantages that they could enjoy if they actually worked in the open air. Outside, the Remy plant is distinctively attractive. A stranger approaching it would be likely to suppose it to be a school or other public institution rather than a factory.

It is surrounded by wide well-kept lawns, embellished with flower beds and shrubbery, and the front has a classical appearance that is in strict conformity to the requirements of good taste. Altogether the Remy plant is one that any manufacturer who desires to make his establishment an attractive feature might do well to study.

## MOTOR WHEEL PICNIC ON AUGUST 14

Milwaukee., Wis.—Office and factory employees of the A. O. Smith Company, makers of Smith Motor Wheels, in this city, will be given a picnic on August 14 by the company at Waukesha Beach. Special trains will carry the picnickers direct to the beach. The entire Smith plant will close down for the day of the outing.

The Motor Wheel Run slated for July 25 to Donges Grove has been postponed and will be incorporated in the annual picnic on August 14. About 25 of the Motor Wheel office force will ride to the outing on that date instead of going by train. The program for the day will include baseball games, swimming matches, boating.

## USES STEVENS VAN

Edward Muller, a New York City dealer, at east second street, makes effective use of his Stevens bicycle delivery van by using it for transporting

The Stevens Van

Smith Motor Wheels from the freight station to his showroom. The van is capable of handling easily a 100 pound load.

## BOOTH SETS NEW RECORD

Word has been received by the Hendee Manufacturing Company, of Springfield, Mass., that Jack Booth, the Australian speedster, has set a new record for the Southern Hemisphere by covering the half mile in the mean average time of 22⅘ seconds, the equivalent of a speed of 78.94 miles per hour. Booth used an eight-valve Indian machine.

The record was made on a stretch of tarred macadam road near Werribee. It was taken as the mean time of four trials, all of which were checked and timed by the Victoria M. C. The first trial, going with the wind, enabled Booth to cover the half mile in 21⅘ seconds (82.57 miles per hour); the second trial, going against the wind, 26⅕ seconds (68.7 miles per hour); the third trial, with the wind again, 21⅘

Jack Booth

seconds (83.33 miles per hour); while the fourth, against the wind, resulted in his covering the distance in 24 seconds, or at the rate of 75 miles per hour. Booth feels that he can better this record when he learns the eight-valve better, as this was his first ride on the mount.

## HENDERSON CAPTURES A RACE

Detroit, Mich.—Henderson officials are elated over a telegram which they recently received from Butte, Mont., announcing that the Henderson machine won the ten-mile race on July 15. The time was 9:57 and the winner led the nearest rider by one-quarter of a mile. Because the Henderson factory has never made a point of speed, the officials are naturally greatly pleased that their machine stood up so well against a field of motorcycles widely known for their speed achievements.

## MOTOR BICYCLES GOING STRONG

Louisville, Ky., July 19.—The Dow Wire & Iron Works reports sales of five of the new Miami motor bicycles so far this season, and prospects are now in sight for the sale of about five more of the machines. When selling on time the machine is sold for $140 while if sold for cash the price is $125. Terms granted are $25 down and the balance in monthly installments of $15. The reason for charging the additional $15 on machines sold on time is to take care of additional expense which is always incurred.

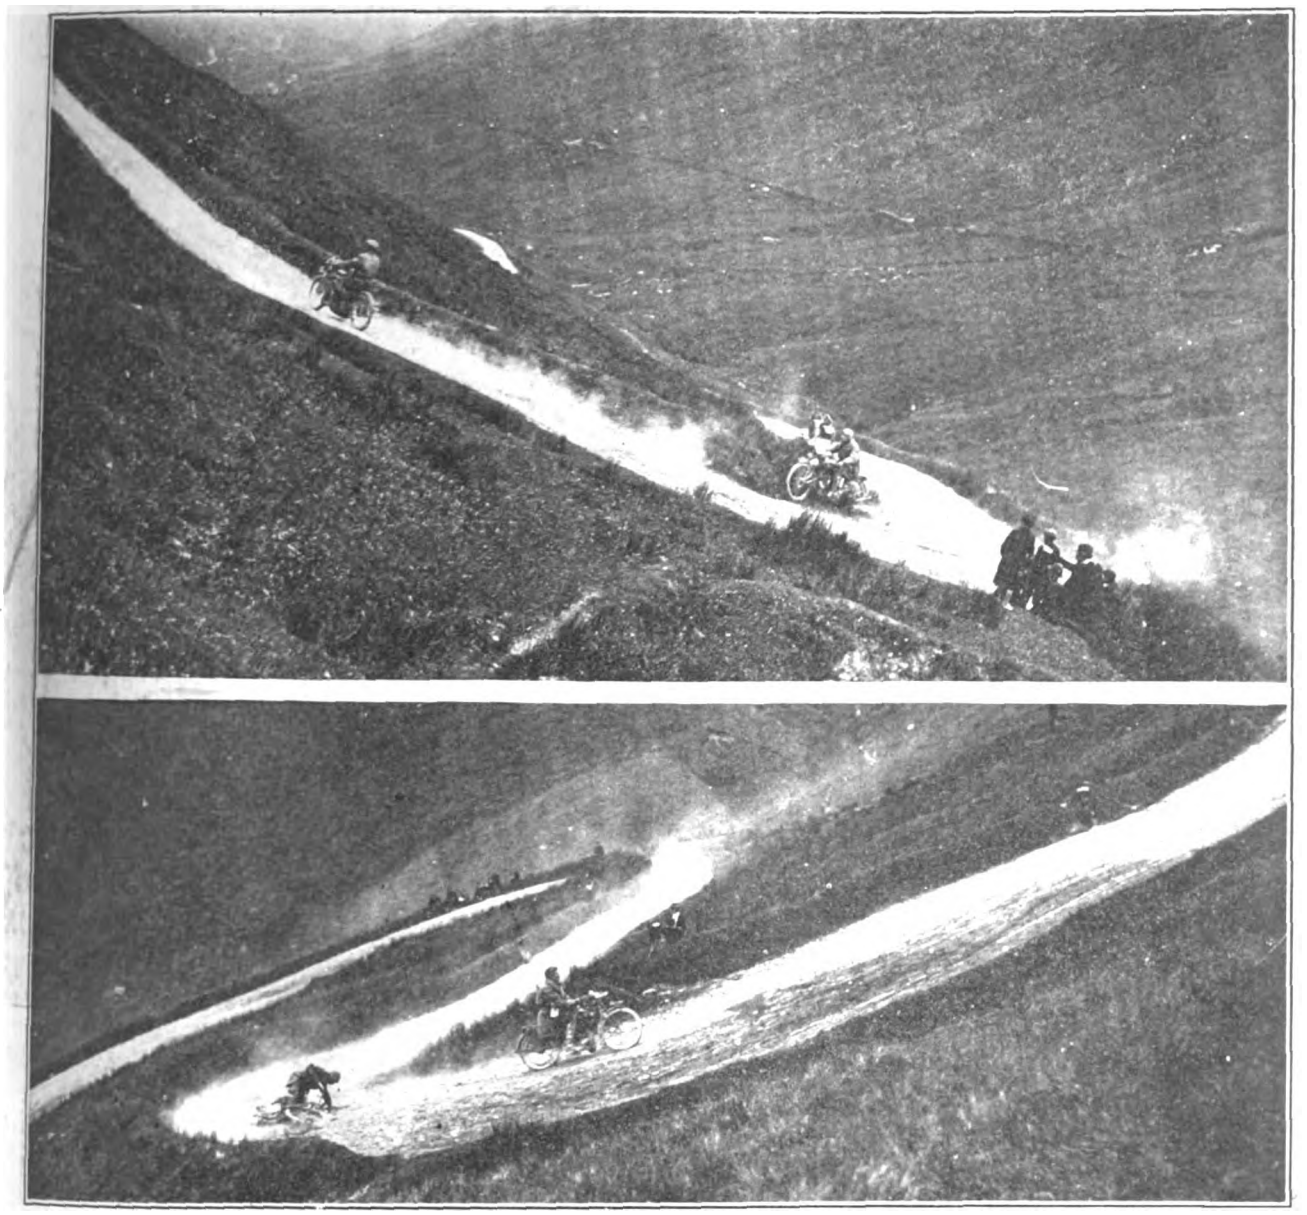
# Remarkable Hill-Climbing in Ireland's 24-Hour Trial



**Typical Road Up the Mountain Country. Hair Pin Curve at Glengesh That Downed Nearly All Riders**

THE 24-hour endurance run of the Dublin and Vicinity Motorcycling Club, Ireland, June 26, ended in a tie for first place between William H. Freeman on a 7 h. p. Indian and Mr. Toole on a 4 h. p. English machine. The course selected was through some of the most massive mountain country in Ireland, and the hairpin curve shown in the pictures downed nearly all who attempted it at Glengesh. Of nine motorcycles which were successful in rounding the turn and making the hill on the first trial two were Indians.

A gold medal was won by Mr. Swanton (3½ h. p. Indian) and silver medals by all the rest of the Indian riders. The team prize was won by a team of three in which two of the machines were Indians, those driven by Freeman and Franklin and the third machine from the British Isles. Freeman and Franklin were also two members of a team of four which won the inter-city team prize. There were thirty-five starters, thirty of whom finished, including the six Indian starters.

## NEW MIDDLETOWN COMPANY

Middletown, Ohio.—The Butler Cycle & Electric Company, with headquarters in Middletown, has been incorporated to deal in bicycles, electrical supplies, etc. The capital is given as $10,000 and the incorporators are as follows: J. A. Pratt, Gordon Gage and E. S. Speyer, all of Middletown.

## LETTER FROM RUSSIAN AGENT

V. A. Panchenko, P. O. Box 217, Kharkoff, Petrograd, Russia, announces in a letter received a few days ago that he is desirous of obtaining motorcycle and accessory catalogs giving full details concerning the products and their prices. The writer states that he is a contractor in motors and supplies to the Russian War Office, and that he recently became the representative of the Hendee Mfg. Company in central and southern Russia. He contemplates the early establishment of a branch in the Caucasus with headquarters at Bakon, and American manufacturers desiring representation in that district are invited to communicate with the agent at the address given above.

## MAGNETOS GUESTS OF CARBURETORS

Racine, Wis., July 22.—The victorious Magnetos were the guests of the Carburetors, the losing team in the recent membership campaign of the Racine Motorcycle Club, at a picnic held near Petrifying Springs. An elaborate program of entertainment was provided in which a feature was the baseball game between the Carburetors and Magnetos, won by the former, score 3 to 2. A band, specially organized for the occasion, was led by Fritz Simonsen. The club is making arrangements for its first outing in the near future.

# Of a Personal Flavor

Frank B. Rodger, publicity manager for the Harley-Davidson factory, left last Saturday on an extended tour of the southwest, taking in the F. A. M. convention at Sacramento, where he is a delegate of the Milwaukee Motorcycle Club besides serving in his official publicity capacity.

Mr. Rodger will visit the exposition at San Francisco and before returning to Milwaukee will stop at Fresno, Bakersfield, Los Angeles and other California points, Denver, Salt Lake City and Kansas City. Rodger has been hobbling around with a bum foot as the result of a little mishap at Dodge City. The injury was much improved before he left for the convention city.

---

L. H. Cornish, the well-known manufacturers' agent, has added the Weed Folding Backrest to his line of motorcycle and bicycle accessories. He reports a strong demand for this attachment from jobbers and dealers all over his territory.

Howard Weed, president of the Weed Folding Backrest Company, of Stamford, Conn., states that the backrest is selling like hot cakes. The factory is working full time to keep up with the orders coming in from all over the country.

---

Arthur Davidson will miss his first F. A. M. convention this year, important business matters at home and later in the East keeping him away from California at this time of the year. It will be remembered that Arthur was one of Coffman's biggest boosters at the St. Louis meet last year.

---

E. C. McKinney has joined the sales forces of the Champion Spark Plug Company, of Toledo, O., and will represent the company in New Mexico, Texas, Arkansas and Louisiana. He was formerly with the Splitdorf Electrical Company, of Newark, N. J., in the New York territory.

---

Otto Walker, winner of the Dodge City classic this year, paid a visit to the Harley-Davidson factory at Milwaukee, following the race. After a week's stay he left for his home in Oakland.

---

H. L. Schwind, of the Harley-Davidson Company, of Milwaukee, Wis., was recently in Louisville where he visited Kline Brothers, the local agents. Mr. Schwind made the trip to Louisville on a machine equipped with a side car. A trip was made by Mr. Schwind and Herbert Kline to Madison, Ind., sixty miles from Louisville, over very bad roads which follow the river.

---

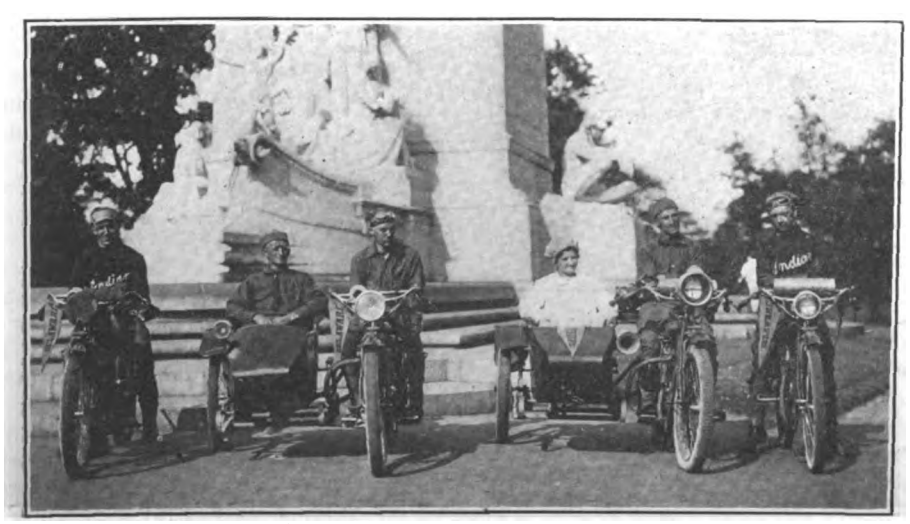
George H. Squires, formerly associated with the Cincinnati (O.) wigwam, is now in Cleveland, ready to affiliate with one of the big local motorcycle firms. He is making his headquarters with L. J. Mueller at present.

---

### PRIZES HUNG UP BY U. S. TIRE

Sacramento, Cal., July 19.—The Los Angeles branch of the United States Tire & Rubber Company wired the Capital City Club today that it will award special prizes for the national amateur and professional championship races which will be staged in connection with the National F. A. M. convention in this city. To the rider winning any amateur championship the U. S. people will give merchandise to the value of twenty-five dollars, if the rider wins on U. S. tires. To the winners of professional championship races riding U. S. tires, the following prizes will be given: First place, $50; second place, $15; third place, $10.

### WILMINGTON (DEL.) RIDERS ON LEISURELY RUN TO BOSTON



**From Left to Right: John Mountz, Harlan Rose and Charles Hayward, with Sidecar Combination; Mr. and Mrs. Harry McCall and Edward Barclay**

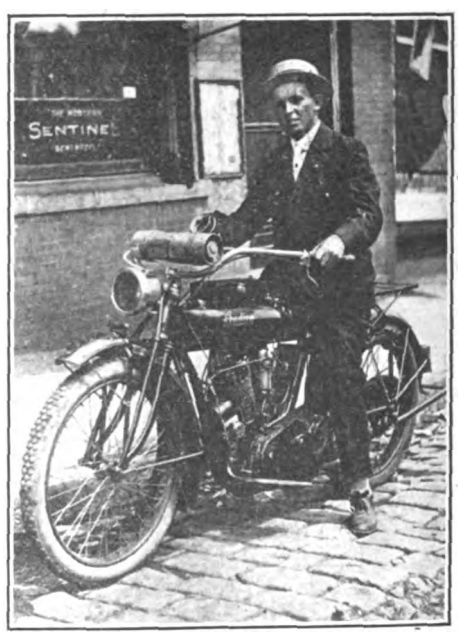
### TRACY-WRIGHT

Announcement is made of the marriage of Helen Alma Wright, daughter of Mrs. H. C. Wright, to Edward Haskell Tracy, well-known and popular in the motorcycle industry as the very capable manager for Louis J. Mueller, Indian and Henderson agent in Cleveland, Ohio. The wedding took place in Cleveland on Wednesday, July 14.

---

### NEWSPAPER SAVES MONEY

Arthur Reid, of Winston-Salem, N. C., finds he can cover a good deal more territory for the circulation department of the newspaper which employs him, *The Sentinel*, by the aid of the Indian motorcycle which the paper bought in the Spring than he could in the old days with livery rigs. His work takes him into eight counties adjoining the thriving Southern city, world famous as a tobacco mart, and a good deal



**Arthur Reid**

of it mountainous territory. The cost of operating, Mr. Reid reports, is nearly nothing as compared with the former way of traveling, his work lying exclusively in the country districts.

---

### FOWLER'S STATUS AT SARATOGA

In the July 8 issue of **Motor Cycle Illustrated,** in our report of the Saratoga rally, it was stated that "demonstrations of the flexible side car were given by L. E. Fowler, district distributor." This was a mistake, as Mr. Fowler is a school teacher and was spending part of his vacation at Saratoga.

It may be stated, however, that Mr. Fowler showed such expertness in manipulating a flexible that crediting him with being a representative of the company may be considered quite excusable.

---

### AN UNUSUAL PUNISHMENT

Escanaba, Mich.—After Albert Sveasin ran his motorcycle into a farmer's rig when the lights had gone out, July 15, the machine was confiscated by the farmer and is being held until damages of $50 are paid. Sveasin walked home six miles after his machine was seized.

# How Gasoline-Selling Strikes the Rider

## Latter Usually Likes to Deal With Agent Who Sold Him His Motorcycle

*By the Old Scout*

HAVING at one time been a motorcycle dealer, and being still an enthusiastic rider, I am interested in the articles which have appeared in **Motor Cycle Illustrated** relative to the wisdom of handling gasoline in a motorcycle agency. But I am not going to discuss the situation from the angle of the dealer; two writers have already done that, and the subject has been pretty well threshed out along those lines. I am going to ask that those who are interested in the existing conditions give their attention for a little while to the rider—the chap who makes the motorcycle agency possible.

It seems to me that it would be a serious matter for the average motorcycle dealer to give up the handling of gasoline at this stage of the development of the motorcycle industry. It is the aim of every wise dealer to encourage the riders to visit his shop as often as possible, no matter how trivial their errands may be, and it follows naturally that nothing gives the rider so many opportunities to drop in at the agency as the necessity for filling his tank with gasoline. But that's an argument for the dealer.

**The Motorcycle Dealer and Rider Have Interests in Common, But the Automobile Man is Frequently Hostile**

NOW let us think of the rider. Isn't it quite natural that a motorcycle rider should wish to deal with the man who sold him his machine—on all matters pertaining to that machine? Certainly. And isn't it a pretty safe bet that the motorcyclist who goes to an automobile garage or a big general gasoline station is going to receive just as little attention as can be given, incidental to separating him from his money? Naturally. There is nothing in common between the motorcyclist and the automobile garage man. They don't mix unless they are forced to—and that fact is known to both of them.

The motorcyclist often experiences some of the sensations of an intruder when he enters an automobile garage for gasoline, and the treatment he is accorded too frequently convinces him that he should have remained on the outside. I do not say that all automobile garagemen make a specialty of snubbing motorcyclists, but some of them do, and I know whereof I speak. I will deliberately ride past ten automobile garages, with their much-vaunted gasoline pumps and all the other trimmings, to buy my fuel from a modest motorcycle dealer on a side street, if I know that there is such a dealer in the vicinity. And I honestly believe that a great many other motorcyclists feel as I do.

It comes down to this: The motorcyclist does not feel at home in an automobile garage, even during the brief stop necessary to fill his gas tank, and I believe this feeling of uneasiness would react unfavorably upon the motorcycle dealers if the latter were to stop selling fuel. The rider would come to feel in a short time that the motorcycle dealer had deliberately shunted him off upon someone else because a certain phase of his patronage wasn't especially profitable, and it might easily come to the point where motorcyclists would show their resentment by going to automobile men for spark plugs, oil, and many of the other supplies and accessories which are kept in all establishments catering to motorcyclists. That would be serious.

ALL of which simply means that no motorcycle dealer can afford to open a breach—even a very small one—between his shop and the rider. He needs the rider's patronage, of course, and in my opinion it would be undiplomatic, to say the least, to create the impression that any dealer would like to have a certain part of a customer's patronage taken elsewhere. Say what you will, there is a sort of bond between the motorcycle dealer and the machine user, and it is wise to increase that bond.

It should also be remembered that there is a lot of sporting spirit among motorcyclists—considerably more than among automobilists, for example. And what is more natural than that a motorcyclist should enjoy exchanging a few words with other riders, or at least with a motorcycle

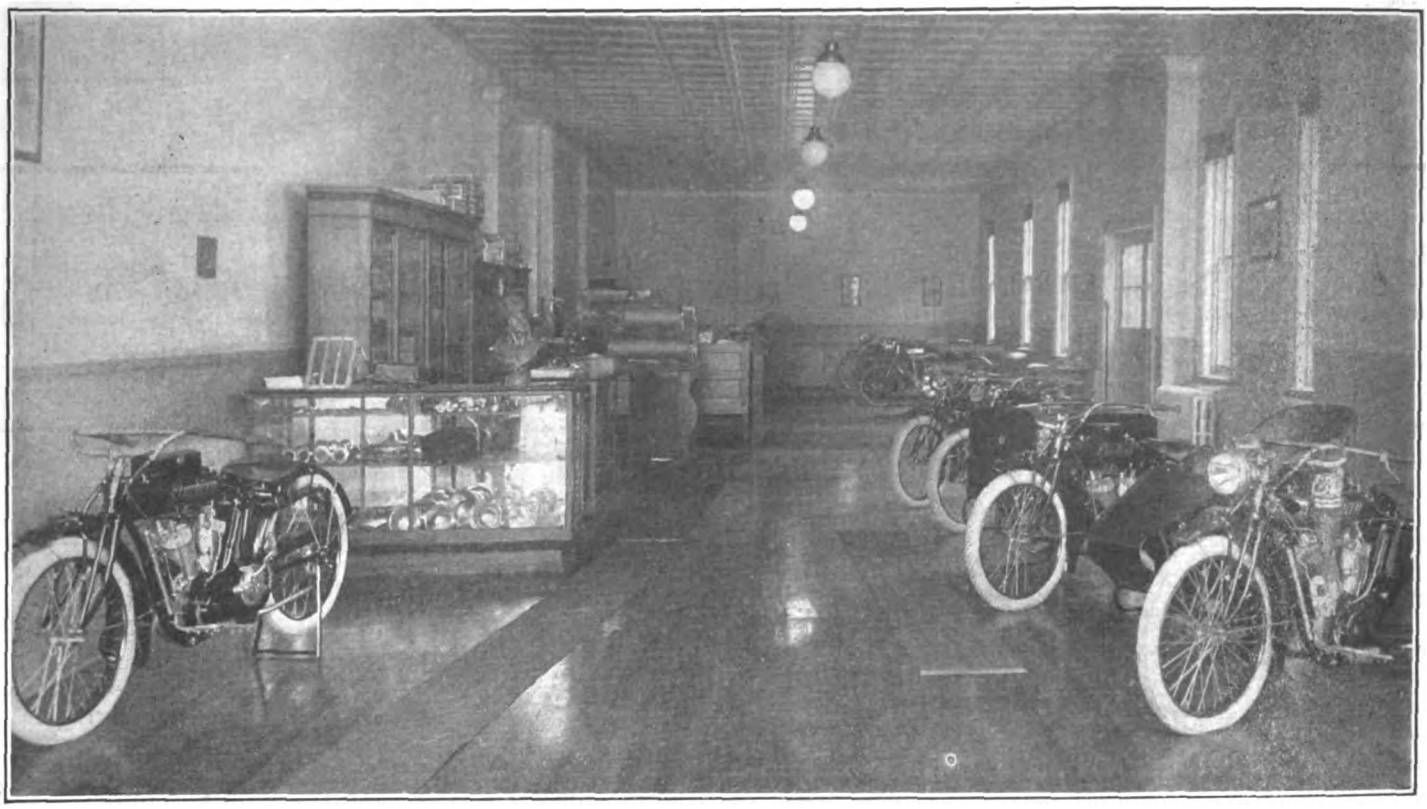
# DEALERS' SECTION



**Salesroom of Belt-Barr Motor Company, Central Ohio Distributor for the Indian at Fifth and Gay Streets, Columbus. Selected Polished Wood Floor Combined with White Walls and Oak Fittings Make This Establishment Particularly Attractive**

## HAYUTIN HAD PROSPEROUS CAREER

Denver, Colo.—Max Hayutin, who with his brother Morris forms the Western Supplies Company, at 1448 Larimer street, has had an interesting career as a bicycle and motorcycle dealer. He started in 1898 in a small shop at 1230 Larimer street, and remained in that location until 1902. He was then attracted by the vaudeville stage and sold out, following one of the Western circuits for six months.

The variety line not showing anything but bankruptcy ahead, Hayutin opened another shop at 1350 Larimer street, and commenced to prosper. He took the agency for the Mitchell motorcycle in 1906, but found that this make did not prove a success. He then took his brother Morris into partnership, giving him a chance to branch out on a large scale. In 1911, the Hayutins took the agency for the Minneapolis, and in 1912 took the Flying Merkel line for Colorado and Wyoming. The Reading-Standard was taken on in 1913 for the same territory and a mail order department was organized. Business grew by leaps and bounds, until today several hundred machines are shipped annually to all points of the United States and Canada. At present, a large jobbing business is done, and the Hayutins have a large staff of clerks and salesmen. They did a business amounting to $75,000 in 1914.

About January 1, 1915, the business was moved to the present location at 1448 Larimer street, occupying two entire floors. In the new building, club rooms are provided for the riders, the quarters having pool tables, reading rooms and fine lockers. Mr. Hayutin intends to make the club a real one in every sense of the word, and is of the opinion that the good will of the customer is the greatest asset of the company.

## NEW TIRE HEADQUARTERS

Louisville, Ky.—The Quick Service Tire Company has filed articles of incorporation, listing its capital stock at $10,000. The incorporators are Robert C. Kinkead, Owen D. Duffin and Robert F. Vaughan. A new tire house has been opened in the old motorcycle store of Ray Brothers at Third and Broadway. A large stock of goods manufactured by the United States Tire Company has been installed.

## BAKER & CO. ARE POPE AGENTS

Cheyenne, Wyo.—C. M. Baker & Company, of this city, have taken the agency for the Pope in Laramie County. So far, they have sold three twins. The firm is best known in this section by reason of the large bicycle business done, all Pope bicycle models being handled. The Smith Motor Wheel agency is also held by the company for Laramie County territory.

## STRONG DOING FINELY

Enid, Okla.—The Strong Motorcycle Company, local Harley-Davidson representative, has sold seven twin models to rural route carriers this season, as well as two delivery vans to local merchants.

## HORNE SOLD TWENTY-SEVEN

Greeley, Colo.—L. F. Horne, Indian dealer in this city, has sold a three-speed 1915 model to the Eaton Telephone Company for use of its "trouble man." Another model has been delivered to the Evans police department, for use in traffic regulation. These two sales are the latest made by Horne, and bring his total up to 27 Indians so far. He has prospects for a dozen more sales this season, he says.

## SELLING USED MACHINES

Louisville, Ky.—Clarence Fisher, local Thor agent, reports that in spite of alleged hard times and low prices for second-hand machines, he has managed to dispose of a number of second-hand machines this season and is getting good prices for most of them. In one case he sold a single-cylinder machine for $110, while the highest price obtained for a second-hand twin was $175 for a 1914 Thor.

## SOLD 29 IN ONE MONTH

Milwaukee, Wis.—In a recent letter to the A. O. Smith Company, makers of the Smith Motor Wheel, in this city, the proprietor of the Anakin Bicycle Supply Company, of San Diego, Cal., stated that he sold 29 Motor Wheels in as many days recently. He is promoting a race for bicycles fitted with the little motor attachments for the local exposition next month, and has eight entries already.

# DEALERS' SECTION

## MOVIES OF DEALER'S METHODS

Buffalo, N. Y., July 19.—Neal, Clark & Neal, Indian agents, have started a novel method of advertising the motorcycle. Motion pictures were taken of their motorcycle sales department, accessory, office and rest room, second-hand motorcycle and service station departments, showing just how they make a sale, also how they care for the mechanical defects of motorcycles, etc. Exterior views of the store were also taken so as to acquaint the public with the appearance of their place of business.

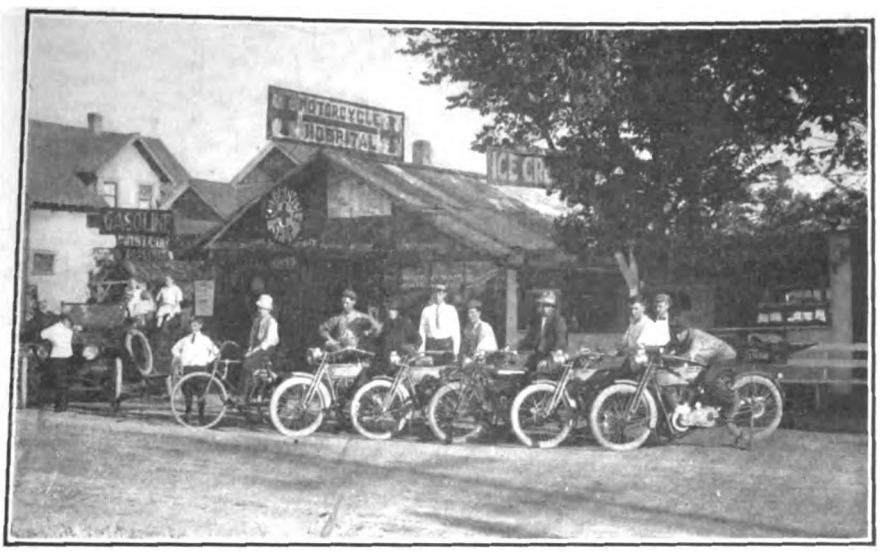
After the pictures have been properly arranged showing how the passer-by's attention is attracted, leading up to the actual sale and the service rendered in their repair department to the Indian riders, they will be shown at most of the local motion picture show houses.

## BERCKHEMER IS SITTING UP

Bronx, N. Y.—Ollie Berckhemer, who was injured in a collision with a mail truck near his store at 992 Washington avenue, is now sitting up in his room at the Lebanon Hospital and is in fine shape. The operation on his right hip, which was fractured in the accident, was successful, and it is expected that the big blond Indian rider will be on the job again in a month or six weeks. Victor Pelezzare, who manages the Berckhemer agency, reports a fine season to date and is kept busy giving demonstrations on both solo and sidecar machines.

## DUNCAN & HOLLEY BUSY

Springfield, Mo.—Duncan & Holley, who represent the Harley-Davidson in this city, report a big demand for the electrically-equipped models, and have delivered 17 so far to date. A number of twins and singles have been sold to business houses in the neighborhood from their establishment since the beginning of the 1915 season.



**W. T. Shaw's Establishment at Tracy, Cal., Where Riders Can Obtain Refreshments as Well as Prompt Repairs—a Stopping Place on Many Club Runs**

## 31 LIGHTWEIGHTS IN A WEEK

John S. Leng's Son & Company, of 33 Murray street, New York, are well pleased with the results so far obtained in their territory with the Schickel lightweight machine. One of their salesmen went on a trip through Long Island recently with a demonstrator and returned with 31 orders in six days. It is only recently that the firm commenced to push the lightweight, but the results of the one week's trip makes them feel sure that they will get equally good if not better results in other sections around New York which are included in the territory.

## SOLD TO TELEPHONE COMPANY

Colorado Springs, Colo.—The J. B. Glaskin Cycle Company, Indian dealers in this city, has just delivered two 1915 twins to the local telephone company and another to the Giles Mercantile Agency for collection service.

## THE LONG ARM OF ADVERTISING

Cincinnati, Ohio.—Both the power of advertising and the widespread popularity of the motorcycle are evidenced by a recent letter received by the Brendamour Sporting Goods Company., in reply to one of the ads. which it keeps standing on a local paper, advertising used machines for sale. The letter came from a little town down in the mountains of West Virginia and it offered either to pay for a machine in installments or to trade in a perfectly good organ on one. Naturally, the company could not accept either offer, but it regards the letter as additional proof of the usefulness of its advertising, which keeps its stock of used machines well cleaned up.

## CREDITORS HOLD MEETING

Detroit, Mich.—Abraham Halperine, bicycle dealer at 1033 Mack avenue, has been adjudicated a bankrupt. The first meeting of creditors was held July 20 to determine how and when the estate should be sold. The schedule filed shows unsecured claims of $4,241.49, and total liabilities of $4,260.49. Assets are $100 in stock, $640 in tools, machinery, etc., and $300 in bills due, totalling $2,273.

## BROWN BACK FROM LONG TRIP

Pipestone, Minn.—Cecil Brown, Indian dealer in this city, has recently returned from a 2,000 mile tour through Iowa, Illinois and Minnesota. He used a three-speed twin for the journey, and reports having had a fine time. "Indians are selling well in this section," says Brown.

## CONSOLIDATED IN NEW HOME

Indianapolis, Ind.—The Consolidated Motorcycle Club is now permanently located in its new quarters at 918 Massachusetts avenue, and has extended an invitation to every rider in Marion County to attend the big opening night on Friday, July 16. Special arrangements have been made to take care of the overflow of riders on this evening and an excellent program has been arranged for.

## FILLING STATION ORDINANCE

Columbus, Ohio.—A drastic ordinance relating to gasoline filling stations has been introduced in the City Council. It prevents the installation and operation of such stations in strictly residence districts nearer than 187½ feet of the street on any lot where the property on either side is used for dwellings. The section relating to regulation of filling stations provides for the removal of those which are objectionable.

The measure was drafted by the Columbus Chamber of Commerce on the recommendation of a special committee of the same, and was due to a general encroachment of filling stations in the residential sections of the city and much complaint on the part of property owners by reason of the stations affecting values on adjoining properties.

## MOTORCYCLE COP GOT 'EM

Detroit, Mich.—Detroit motorists who have been accustomed to enjoying spins over Oakland county roads are in for trouble unless they observe the state law regarding automobile speed. On Sunday, July 11, Deputy Loren Bird, on a motorcycle, corroled at least 12 luckless motorists, and each one was compelled to pay $30 fine.

## NEGROES CLASH WITH WHITES

Louisville, Ky., July 19.—Negro motorcycle riders are in bad odor with the white riders just now, due to members of the colored race going after white men's jobs. Some of the riders who have been handling light delivery work for druggists and others have been getting salaries of $16 to $20 a week for the service, but furnished all repairs, oil, gas, etc., and their own machines. The negroes are taking these jobs away by offering to give the same service for $10 a week. This is the first clash which has occurred in Louisville among the races as far as the motorcycle is concerned.

## TEAM THAT SCORED PERFECTLY IN RECENT WHEELING RUN

# SOME CHARACTERISTIC PICTURES OF BOB LAWSON WHO HAS LEFT SAN FRANCISCO AND IS PEDALLING SOUTH

Lawson has covered to date over 18,000 miles since last July. He is now in Los Angeles. Description of pictures: Left, Lawson at the Big Exposition. Above, In the California desert. Right, Before a bicycle store in 'Frisco.

### SHERMAN LEADS THE CRESCENTS

Baltimore, Md., July 19.—A sensational finish marked the end of the second club championship race of the Crescent Bicycle Club on Sunday, July 18, at a distance of ten miles, Welby Sherman, Langdon M. Sanborn and Fred. M. Sanborn finishing in the order named. Time, 29:30. The first three finishers cut out a hot pace from the start and remained bunched to the finish, F. M. Sanborn taking the lead at one mile from home, closely followed by Sherman and L. M. Sanborn, who challenged the leader at a third of a mile from the finish. In a nip and tuck struggle to the tape Sherman forced his wheel over first, with L. M. Sanborn second and F. M. Sanborn third. Owing to an accident the other starters did not finish. The summary: First—Welby Sherman, time 29:30; second—L. M. Sanborn, time 29:30⅕; third—F. M. Sanborn, time 29:30⅖; Wm. McAvoy, out; Wm. T. Wright, out; Walter Doersch, out; Jno G. Stricker, out.

### CYCLISTS ON VACATION TOUR

St. Louis, Mo., July 19.—Six members of the St. Louis Cycling Club, including President C. L. Barr, First Lieut. Lloyd Faidley, Second Lieut. A. Schreimer, G. Henry, L. G. Brod and A. Thompson, started on a two weeks' bicycle tour, on July 17. Their long trip will take them through Missouri to the State National Reserve, and to Ha-Ha-Tonka Park on the Mangua River in Camden County. The estimated mileage is five hundred. Some of the members have taken this tour before, and the tour is generally considered the most popular bicycle vacation.

### ANNUAL MONSTER PLEASURE RUN

The New York Division of the Century Road Club Association is now contemplating the holding of its third annual monster pleasure run and carnival of sports at Pelham Park, in the City of New York, on Sunday, August 22. The pleasure run will leave Columbus Circle at promptly 8:30 a. m., riding north along Broadway to 106th street, to Central Park West, to 110th street, and Seventh Avenue to Central Bridge thence to the Grand Boulevard and Concourse, in the Borough of the Bronx, direct to Fordham road and east to the Pelham Parkway, where the carnival of sports will take place.

Among the bicycle races which are scheduled for the day are: a one-mile open race, a three-mile handicap, a slow race, a novelty race, and a quarter-mile open race. The entry fee for the pleasure run and carnival is fifty cents, which includes entry to the races. Entries may be sent to Andrew N. Segal, chairman carnival committee, 1842 Seventh avenue, or at 110 Greenwich avenue, New York City.

### PLEASURE RUN OF C. R. C. OF A.

West Hoboken, N. J., July 20.—The New Jersey Division of the Century Road Club of America will hold on Sunday, August 8, a bicycle pleasure trip to Orangeburgh, N. J., and while at this destination a number of events will take place on the half-mile dirt track. The following races have been arranged: Two-mile handicap, one-tenth mile slow race, a ten-lap miss and out, a half-mile novelty. There will be prizes given out for each race. A silver cup will be awarded to each club having fifteen or more members.

The pace of the pleasure run will average ten miles an hour and the course will be over the best roads of New Jersey and New York. The entry fee is to be one dollar and all those who finish are to receive a silver medal. A large number of bicycle organizations has been invited to participate in the affair and send expert pacemakers.

# ROOT FIRST IN CHICAGO RACE

## Takes Two Out of Three Heats in Motor-Paced; Lawson Captures Half Mile Open

CHICAGO, July 19.—Sunday night at the Riverview Velodrome Eddie Root, the Boston Swede, defeated Martin Ryan, the Newarker, two out of three heats in a motor-paced race. The heats were at five miles, but the second heat, due to motor trouble, had to be stopped at two miles with Ryan a half lap in the lead. It was re-started with Root and Ryan in the same positions and Ryan won the three-mile event in 4:03. Root had won the first heat in 7:02 and he also won the third heat in 6:44, which bettered the record for the local track of 6:47⅕, made by Ryan two weeks ago.

The half-mile professional open race was a hummer. The race was run in four heats and two repechage heats. The winners of the heats qualified for the final, while the winners of the two repechage heats also were qualified for the final. Peter Drobach, Frank Cavanagh, Francesco Verri and Iver Lawson won the heats. Gordon Walker won the first repechage heat, which was reserved for second men in the trial heats, while John Bedell, through the disqualification of Lloyd Thomas for switching, was placed first in the heat reserved for third men in the trial heats. Drobach tried to run away with the final, but Walker caught him and just after the bell Drobach swung up the track carrying Walker and Verri with him. With plenty of room to go on the inside Lawson dived for the pole and set sail for home with Bedell trailing him. Verri tried hard, but the best he could do was to finish third. Lawson won with Bedell second and Cavanagh finished back of Verri.

By a clever bit of riding Lloyd Thomas won the two-mile handicap for the professionals. With a dollar a lap as an incentive the going was fast all the way. Al Krueger, the localite, gathered six of the iron men before he was caught. At the bell Bob Diefenbacher led, with Rudi-Russe tacked on, and the race looked easy for the Californian, when Thomas came from back in the field and copped, with Diefenbacher second, Gordon Walker third and Rudi-Russe fourth. Bobby McLean ran fifth, just beating out Eddie Madden. The time was 3:47⅘.

Ned Young, the Salt Laker who holds the Velodrome Brassard, successfully defended his money-making armlet against the attack of Gus Wohlrab, the Jersey City rider. After much tire trouble Young had to borrow Eddie Madden's bicycle, but managed to stave off the last stretch rush of Wohlrab and won by a foot.

Egisto Davini, the Italian, starting from the ten-yard mark, won the half-mile amateur handicap, beating out Bert Nelson, Charles Minnetti and Ernest Kockler, all Riverview Cycling Club men, in the order named. The unknown distance race for the amateurs furnished plenty of excitement. When the gun was fired for the last lap Ernest Kockler was back in the field, but by a great sprint he came out and won with Willie Kell following him across the line. Minnetti finished third and George Klasen fourth. Summary:

Half-mile handicap, amateur—Won by E. Davini, Italo-Am. C. C. 10 yards; second, Bert Nelson, Riverview C. C., 60 yards; third, Charles Minnetti, Riverview C. C., scr.; fourth, Ernest Kockler, Riverview C. C. scr. Time, 57 seconds. Unknown distance, amateur—Won by Ernest Kockler, Riverview C. C.; second, Willie Ke Chicago C. C.; third, Charles Minnetti, Rivervie C. C.; fourth, George Klasen, Danish-Am. C. Time, 3:07. Distance, 1½ miles. Lap prize wi ner, Louis Kuehl, Chicago C. C.

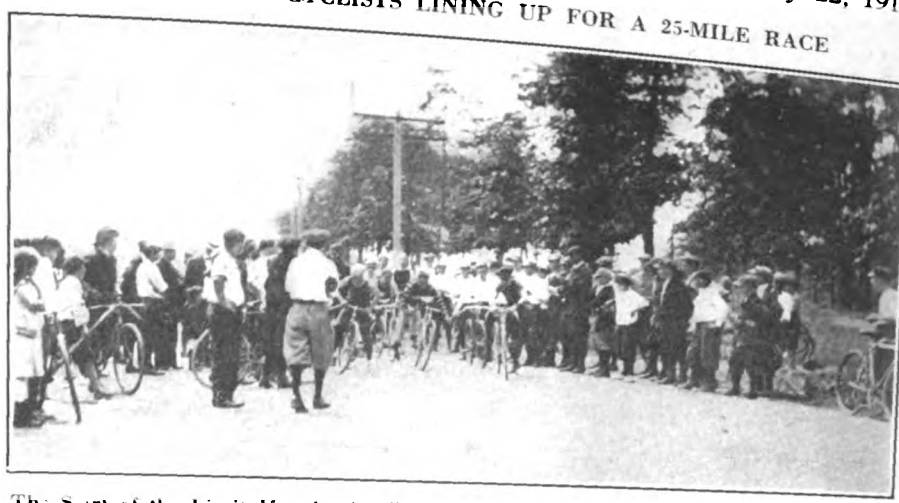
Half-mile open, professional—Won by Iv Lawson, Chicago; second, John Bedell, Lor Island; third, Francesco Verri, Italy; fourt Frank Cavanagh, Newark. Time 58 4-5 second

One-mile Brassard, professional—Won by Ne Young, Salt Lake City; second, Gus Wohlra Jersey City. Time, 2:58.

Two-mile handicap, professional—Won b Lloyd Thomas, San Francisco, 40 yards; secon Bob Diefenbacher, San Jose, 175 yards; thir Gordon Walker, Australia, 30 yards; four Rudi-Russe, Austria, 200 yards. Time, 3:47 4-5

Five-mile motor-paced race, professional—Wo by Eddie Root, Boston; second, Martin Rya Newark. Root won first and third heats. Time 7:02 and 6:44. Second heat (cut to three miles won by Ryan. Time, 4:03.

WASHINGTON CYCLISTS LINING UP FOR A 25-MILE RACE



The Start of the Limit Men in the Twenty-five-Mile Road Race Conducted Recently by the National Cycling Club

### NEW LOUISVILLE REPAIR SHOP

Louisville, Ky., July 19.—The Southern Motorcycle Repair Company has just been organized by Harry A. Phillips, William Kempf and A. Wassmann, to do a general motorcycle andd bicycle repair business. A shop has been located on York street, between Second and Third. Phillips and Kemp are old experienced Indian repair men, and Phillips has done a good deal of race riding, from time to time, locally and at Chicago and Indianapolis. The new company is not specializing on any one kind of machine, however, but will repair all makes. Tires, oil and gasoline will be retailed, and it is possible that an agency may be taken for some good machine not at present represented in the city.

WHERE BICYCLISTS TURN OUT IN BIG CROWDS FOR STIRRING RACES

The Start of the Recent Twenty-five Mile Bicycle Race in Wichita, Kan., Race Was Promoted by C. B. Hamilton, Local Dealer, Whose Store Is Seen in the Illustration. All the Riders Were Under Twenty-one Years of Age. The Prizes Amounted to $200

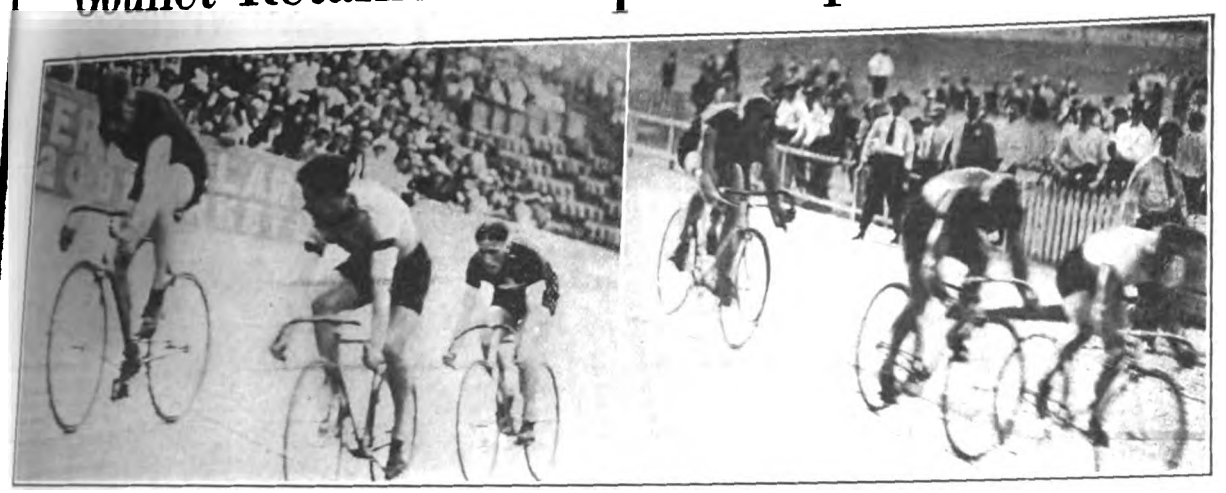
# Goullet Retains Championship Title Lead



At Left—Fogler, Hill and Egg Finishing Repechage. At Right—Kramer (in White) Appearing to Beat Goullet at Tape

NEWARK, N. J., July 18.—Alfred Goullet, the blond-haired rider from the antipodes, nipped Frank Kramer at the tape in the two-mile national championship race at the local velodrome on Sunday. The finish was one of the closest witnessed at the local track in years and Goullet's victory was won by a couple of inches. The automatic judge, a mechanical contrivance set up in the judges' stand to decide just such cases as this, gave the victory to Goullet. While the majority of the fans cheered "Goullie" for his great ride there were thousands who hissed and hooted the decision of the judges. Bob Spears was the third rider home and Alfred Grenda finished fourth. Kramer and Goullet had a great battle up the home stretch. Five yards from the finish Kramer was the leader, but it seemed as Goullet had the hardest kick in the last few yards.

### Goullet Five Points Ahead

The victory of Goullet gives him a lead of points for the national honors. He is now credited with thirty points. Frank Kramer, the present champion, has twenty-five. Grenda is three points behind Kramer with twenty-two points. Bob Spears, in fourth position, has thirteen credits. The victory of Goullet's was on the square, and teaming, which has been so evident during the last few years in the championship races have been entirely was missing.

Once more Reggie McNamara defended his title as holder of the Brassard belt in a one-mile match race against Oscar Egg. As the winning of the Brassard belt carries with it a prize of fifty dollars a week and McNamara has won it seven times, it is easily seen that the Australian has gathered in the neat little sum of $400. Egg led for five and one-half laps of the mile, but on the last half-lap McNamara shot by him into the lead. McNamara's victims include Dubois and Fogler twice and Kaiser, Moretti, Ellegaard and Egg each once.

### Stars Qualified for Criterion

All the stars qualified in the trial heats for the Criterion race, which has $1,000 up in prize money. The finals will be ridden on next Sunday afternoon with three riders competing. Kramer, Goullet, Grenda, Spears, Clark, McNamara, Moretti and Kaiser qualified in the trial heats, while Joe Fogler finished first in the final of the repechage heat against Fred Hill and Oscar Egg.

Ernest Ohrt easily took first place in the two-mile handicap race for the professionals. Ohrt had a handicap of 200 yards and at the crack of the gun he started off at a great clip to catch the scratch men. By the time the first mile had been covered, Ohrt was up on

Kramer, Grenda and Goullet Between Battles on the Track

Spear's wheel and from there on he had an easy time of it coasting into first place. Julius Schmidt, who had 230 yards, finished second, while Big Alf Grenda, who rode the race from scratch, was the third rider over the line. The summaries:

The Criterion (Professional) Trial heats at a half mile.—First heat won by Cesar Moretti. Time, 1m. 16⅕s. Second heat won by Alfred Grenda. Time, 1m. 9⅗s. Third heat won by Alfred Goullet. Time 1m. 18⅕s. Fourth heat won by Harry Kaiser. Time 1m. 31⅗s. Fifth heat won by Robert Spears. Time, 1m. 9s. Sixth heat won by Jackie Clark. Time, 1m. 4⅘s. Seventh heat won by Reggie McNamara. Time, 1m. 1⅗s. Eighth heat won by Frank Kramer. Time, 1m. 15⅕s. Final repechage heat won by Joseph Fogler. Time, 1m. 13⅖s.

Half-Mile Novice (Amateur)—Won by John Strands, Bloomfield; A. Anderson, Irvington, second. Time, 1m. 7⅘s.

One-Third Mile Handicap (Amateur)—Won by William Keller, Newark (60 yards); Eric Paetz, Germany (55 yards), second; Fred Taylor, Newark (scratch), third; William Jaroson, Newark (50 yards), fourth. Time, 37s.

The Brassad Race (Professional) at one mile.—Reggie McNamara, Australia, vs. Oscar Egg, Switzerland. Won by McNamara. Time, 2m. 43⅘s. Last eighth mile, 12⅗s.

Three-Mile Point Lap Race Invitation. (Professional.)—Won by William Hanley, San Francisco (25 points); Ray Eaton, Elizabeth (20 points), second; George Cameron, New York (13 points), third; tie for fourth between Alfred Halstead, England, Willie Coburn, Newark, and Norman Hansen, Denmark (5 points). Time, 5m. 57⅕s.

Two-Mile National Championship (Professional).—Won by Alfred Goullet, Australia; Frank Kramer, East Orange, second; Robert E. Spears, Australia, third; Alfred Grenda, Australia, fourth. Time, 4m. 25⅖s. Last eighth mile, 12⅗s.

Three-Mile Open (Amateur)—Won by Hans Ohrt, San Francisco; Eddie Kane, Newark, second; Fred Taylor, Newark, third; Thomas Grimm, Irington, fourth. Time, 6m. 36⅘s.

Two-Mile Handicap (Professional).—Won by Ernest Ohrt, San Francisco (200 yards); J. G. Schmidt Newark, (230 yards), second; Alfred Grenda, Australia (scratch), third; Willie Hanley, San Francisco (70 yards), fourth; William Coburn, Newark (115 yards), fifth. Time, 3m. 29⅗s.

---

Newark, N. J., July 15.—Frank Kramer, the national champion, ran away from Alfred Goullet, the Australian, in a two-thirds mile match race here on Wednesday night, July 14. Kramer outrode Goullet in both heats, beating him decisively. After winning the first heat, Kramer was given a rousing reception such as is seldom seen at the local track. Although Kramer was Goullet's master at match race riding, Goullet was the winner in the one-mile open race when given a pull of over a lap by Marcel Dupuy, the Frenchman. Dupuy was suspended indefinitely for his part in the teaming, but Goullet was let go scot free.

The one-mile national championship race for the amateurs brought Hans Ohrt, the San Francisco boy, through as a winner with Fred Taylor, of Newark, second. Tommy Grimm, of Irvington, came in third and Walter White, Newark boy, was fourth. Taylor is leading in the race for the amateur title with eleven points, while Ohrt is in second place with ten credits. Tim Sullivan, the New Haven cyclist, is third with six points.

# Wiley Shakes the Jinx at Revere

BOSTON, July 20.—In one of the most exciting motor-paced events held at Revere Cycle track this season, George Wiley, of Syracuse, on Saturday, July 17, defeated Bobbie Walthour, the Georgia veteran flyer; Elmer Collins, of Lynn, and Jimmie Moran, of Chelsea. Wiley apparently has shaken the jinx that, with broken sprockets, burst tires and slippery spills, has been pursuing him the past month.

The victory was clean cut, for Wiley, from the time he caught his pace at the start, rode in his perfect old-time form. Bobbie Walthour showed some of his famous speed in flashes and kept abreast of Collins in some of the fastest sprinting of the race for six laps in the 11th mile. Finally the Lynn rider was forced to slack up and the veteran Bobbie slipped by and made good in second place. Wiley led Walthour by five laps at the finish of the thirty miles, and Walthour in turn led Collins by more than a mile. Jimmie Moran finished nearly 2½ miles in the rear.

John Fardig carried away the five-mile open amateur event by stealing a lap on the field and holding the leaders with a lap to the good. In the last mile four of the fastest men did their best to get the lap back, but Fardig kept his place in the van. Tommy Connolly, of Everett, was given a two weeks' suspension on the charge of trying to knock Fardig from his wheel.

C. Robinson, in the first heat of the half-mile amateur handicap, collided with A. R. Cook, of Dorchester, and landed on his face. The physicians had to treat a broken nose. Willie Turville, of Revere, broke into the professional ranks in a special match race with Pat Logan, of South Boston. Logan won in straight heats, but the youngster pushed the veteran to the limit. Turville was given a great hand when he beat out the field in the miss-and-out race. Saturday night's summary:

Half-Mile Amateur Handicap Race—Won by Fred McKenzie, Revere (4 yards); L. C. Rollins, Everett (scratch), second; Tom Connolly, Everett (15 yards), third; Kenneth Plummer, Revere (110 yards), fourth. Time, 57⅕s.

Three-Quarter-Mile Professional Handicap Race—Won by Hardy Jackson, Revere (125 yards); Dennis Connolly, Everett (65 yards), second; Warren Holbrook, South Boston (55 yards), third; Ray Jones, Revere (110 yards), fourth. Time, 1m. 26⅕ s.

Half-Mile Novice Race—Won by Frank Keenan, Revere; Arthur Logan, South Boston, second. Time, 1m. 8⅘s.

Five-Mile Amateur Race—Won by John Fardig, Orient Heights; Ned Chandler, Boston, second; L. C. Rollins, Everett, third; Fred Herbert, Fall River, fourth. Time, 11m. 58⅘s. John Fardig, Orient Heights, winner of most laps.

Miss-and-Out Professional Race—Won by Willie Turville, Revere; Hugh MacPartland, Boston, second; Dennis Connolly, Everett, third; Frank Droback, South Boston, fourth. Distance, 1 mile 5 laps. Time, 3m. 17⅖s.

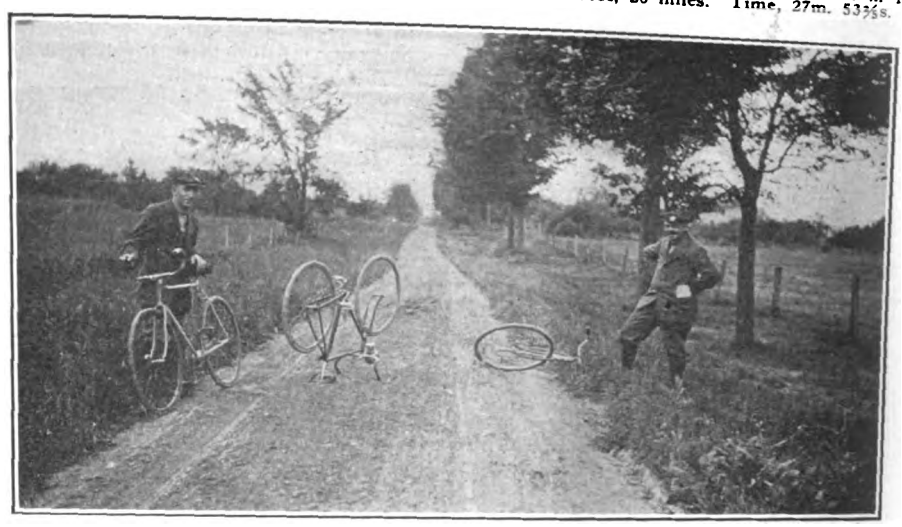
Special Sprint Match—First heat (half-mile), won by Pat Logan, South Boston; Willie Turville, Revere, second. Time, 1m. 36⅘s. Second heat (half-mile), won by Logan; Turville, second. Time, 1m. ⅖s.

30-Mile Motor-Paced Race—Won by George Wiley, Syracuse; Bobbie Walthour, Atlanta, second; Elmer Collins, Lynn, third; Jimmie Moran, Chelsea, fourth. Time, 42m. ⅕s.

Williams, Buffalo (55 yards), third; G. H. Boyd, Manchester, N. H. (60 yards), fourth. Time, 27⅖s.

Five-Mile Open Amateur—Won by Fred Herbert, Fall River; Willie Turville, Revere, second; Jim Sullivan, New Haven, third; Tom Connolly, Everett, fourth. Time, 11m. 32⅖s. John Fardig, Orient Heights, winner of most laps.

25-Mile Motor-Paced Race—Won by Victor Linart, Antwerp; Leon Didier, Paris, out in 16th mile. Distance, 20 miles. Time, 27m. 53⅖s.



Chicago Cycling Club Riders Enroute on Trip

### Linart the Victor

In the 25-mile motor-paced match for $1,000 sweepstakes on Wednesday night, July 14, Victor Linart, the Belgian, won a hollow victory over Leon Didier, who, when leading by nearly two laps, got a bad dump and was taken from the track with what was announced at the time as a broken collar bone.

The record crowd at the track were pulling for Linart early in the race, but they were silenced when Didier lapped the Belgian in the 12th mile. Didier seemed destined to lap Linart a second time in the 16th mile, but the Belgian put on more steam, and Didier was forced to give ground. The accident happened soon after.

Wednesday night's summary:

Half-Mle Amateur Handcap—Won by J. B. Rollins, Everett (50 yards); Tom Connolly, Everett (20 yards), second; L. C. Rollins, Everett (scratch), third; Tim Sullivan, New Haven (5 yards), fourth. Time, 57⅗s.

Mile Open Professional—Won by Pat Logan, South Boston; Harold Rollins, Everett, second; Saxon Williams, Buffalo, third; Frank Drobach, South Boston, fourth. Time, 2m. 32⅕s.

One and One-Half Mile Tandem Amateur Handicap—Won by L. C. Rollins and Tim Sullivan, Everett (scratch); Tom Connolly, Everett, and Fred Herbert, Fall River (25 yards), second; John Fardig and Edward Harrison, Orient Heights (110 yards), third. Time, 2m. 56⅘s.

Quarter-Mile Professional Handicap—Won by Frank Drobach, South Boston (20 yards); H. J. Reynolds, Forest Hills (65 yards), second; Saxon

### UNIQUE SIDECAR OUTFIT

Smith Motor Wheel Attached Between Bicycle and Sidecar

### ON TWO HUNDRED MILE TOUR

Chicago, Ill., July 20.—Three members of the Chicago Cycling Club—P. A. Rocklage, George Hewitt and Grover Nehls—are back from a two-day bicycle tour along the Wisconsin lakes. They started out on the boat to Milwaukee on Saturday night and reached that city early the next morning. Ocowanodawack was the northern terminus of the trip and this point was reached by 9 o'clock in the morning.

They visited some of the lakes on Sunday, and after arriving at Geneva at 8 o'clock the trio was well tired out and turned in for the night. Bright and early on Monday they pedalled their way to Lake Zurich, the home of fine bass, where they spent an hour fishing. When they reached McHenry they stopped for dinner. There were still many miles to travel, but they managed to get into Chicago on Monday night, when they had some interesting stories to tell of their experiences. The three cyclists travelled nearly 200 miles.

### BEDELL FIRST IN QUAKER CITY

Philadelphia, Pa., July 11.—Menus Bedell, of New York, carried his field so fast in the 30-mile motor-paced race on Saturday night, July 10, at Point Breeze Park Velodrome that they blew up one after another, and after the 19th mile it was evident that the New Yorker had supreme command. It was a fascinating race between Bedell and Columbatto for 10 miles, but in the 11th mile the Italian lost his pace. Bedell's fastest mile was the 29th, which he made in 59⅕ seconds.

### RAIN SPOILS SHEEPSHEAD RACES

Bicycle fans in New York were sore at the weather man for the rain that interfered with the races at Sheepshead Bay Velodrome on Saturday night, July 17. An interesting card had been arranged.

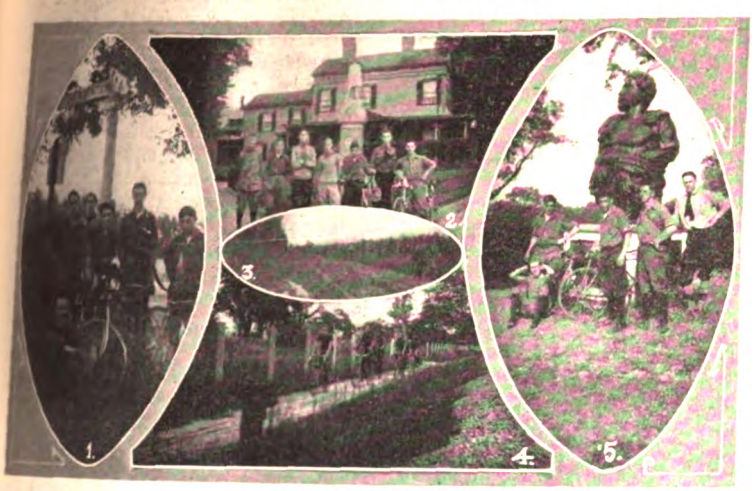
Digitized by Google

### C. R. C. A.'s FIRST SUMMER RUN

The first of a series of summer club runs under the direction of Captain George Steppello took sixteen members of the N. Y. Division of the Century Road Club Association on a rather novel ride to Jamaica, via the Queensboro bridge and Queens boulevard, thence to Springfield, L. I., and the home of Frederick E. Kirchner, a fellow-member and principal of the Public School 159 Evening Recreation Centre, on Sunday, July 18, 1915.

Next Sunday the cyclists will ride to Paterson, N. J., meeting at Columbus Circle, between 8 and 8:30 a. m., while in a short time the Annual Bath Run will be held at Woodland Beach, Staten Island, the program of the day calling for a baseball game between divisions, some bicycle races and then bathing.

Those on last Sunday's run were: Captain George Steppello, Miss Anna Harvey, A. R. Jacobson, Sylvain Segal, Joseph Naphtal, Harry Glotzer, Lucien Wetzel, Harry Naphtal, Max Naphtal, John Harvey, William Winquist, George Harvey, Alex Whytock, John Marquart and A. Feil.



1, An L. A. W. Route Post, Oakdale, L. I.; 2, In Front of Soldiers' Monument, Sag Harbor; 3, Bad Stretch of Road; 4, Famous Cycle Path; 5, At Conoe Path, L. I.

### INTERCLUB LEAGUE PICNIC

The annual picnic and games of the Interclub Amateur Cycle Road Racing League will be held at Hoffman's Park, Eastern Boulevard and Fort Schuyler road, Bronx, N. Y., on Sunday, July 24. There will be a number of athletic events and only one bicycle event, a four-man relay race. There will also be a voting contest for the most popular rider, who will receive a silver loving cup. Dancing will be a feature.

### MOTOR-PACING IS POPULAR

Toronto, Ont.—The amateur motor-pace bicycle game is booming in Toronto. Not only are a great many riders trying their hand at the sport with success, but the racing has made a hit with the crowds. For the race meet at the local saucer on Saturday night, July 17, no less than twelve entries were received for a three-mile motor-pace event and, after several exciting heats were run off, the eventual winner turned up in George Wright, the Classic Club expert, who won out from Gordon McMilian, the veteran cyclist, by a few feet in the final. Ed. Penny, a mere youngster, rode a grand race and finished third. The time for the three miles was 4.09 3/5. One of the pacemakers was Herb. Kipp, the famous Indian rider of Canada.

An unusual feature was the three-cornered clash for the Grand Prize of Toronto, in which the starters were Carl Esrisch on a Cyclone, Jimmie McNeil on an Excelsior and Brownie Carslake, the Australian star, on an indian. The Cyclone rider won out in the first five-mile heat in 3.16 4/5, with Carslake second and McNeil third. McNeil won the two succeeding heats of five miles, however, after the Cyclone went bad through a cracked cylinder. McNeil's best time was 3.09 1/5.

### ST. LOUIS CHAMPION RACE

St. Louis, Mo.—A one-mile race for the championship of the city will be the feature event of several two-wheeler contests that have been arranged for the celebration of Municipal Playday, July 24, in the Fairground Park. The races will be the first to be held under the auspices of the Municipal Athletic Association. There will also be a ten-mile handicap race for a cup to be presented by the St. Louis Cycling Club. The officials will be O. F. Hassemer, St. Louis representative of the National Cycling Association and secretary of the St. Louis Cycling Club; C. L. Barr, president of St. Louis Cycling Club; L. W. Brown, president of the Missouri Cycling Club.

### RIVERVIEW RACING DATES CHANGED

Chicago, July 12.—Until further notice racing will be held at the Riverview Velodrome on Wednesday and Sunday nights only, the Saturday night meet having been abandoned. The racing at the local track has been high class, but the weather has been against the promoters and as a result the patronage has fallen off. Last night, with fine weather conditions, the crowd showed a big increase over the last few meets.

### NEW REPAIR SHOP IN ST. LOUIS

St. Louis, Mo., July 19.—Everett S. Brown, the popular Missouri Cycling Club captain, has recently opened up a repair shop in this city under the name of the E. S. Brown Cycle Company, at 1000 North Grand avenue. The equipment of the shop is complete in every way for all kinds of repair work on cycles. A full line of parts and accessories will be kept. Mr. Brown is serving his second year as captain of the "Missouris," and is a good road rider and sprinter.

### C. R. C. A. MILEAGE STANDING

The second published list of the standing of the contestants of the Annual Century and Mileage Competition of the Century Road Club Association, issued July 10, shows several changes since the last list issued on June 15. The changes are the addition of Carl Bonhardt, of New York, N. Y., to 9th place; Harry Whiteman, to 22nd place; the advancement of George H. Segal to 8th place from 12th, and the advancement of one place of several others. The standing is as follows:

1—Fred M. Sanborn, Baltimore, Md. 2—William Winquist, Brooklyn, N. Y. 3—George Steppello, Astoria, L. I. 4—Sylvain Segal, New York, N. Y. 5—Charles F. Hansen, Jersey City, N. J. 6—Adolph R. Jacobson, New York, N. Y. 7—Adolph Weiner, New York, N. Y. 8—George H. Segal, New York, N. Y. 9—Carl Bonhardt, New York, N. Y. 10—Louis Zemo, Elberon, N. J. 11—Howard V. Carroll, New York, N. Y. 12—Joseph Caldwell, Brooklyn, N. Y. 13—Ray Caldwell, Brooklyn, N. Y. 14—Duane W. Moore, Bayonne, N. J. 15—Robert Wolfson, New York, N. Y. 16—Ralph W. Zarr, New York, N. Y. 17—Alfred Knipling, New York, N. Y. 18—John M. Mitchell, Greenwich, Conn. 19—George Harvey, New York, N. Y. 20—A. S. Thomson, New York, N. Y. 21—William F. Thompson, New York, N. Y. 22—Harry Whiteman, New York, N. Y. 23—Andrew N. Segal, New York, N. Y.

# Standardize Each Manufacturer's Bicycles

## Co-operation Among Maker, Jobber and Dealer Would Lower Production Costs

By E. J. LONN.
President, Great Western Mfg. Co.

THE question of the distribution and marketing of the bicycle is of vital importance.

It would not matter materially whether it is a high-priced or low-priced article. The dealer who is willing to sell during the season fifty high-priced bicycles and is satisfied to allow the other dealer, his competitor in the same town, to sell lower-priced machines, has undoubtedly studied the matter over and finds that there is a class of buyers for the medium-priced and low-priced bicycles. There is no doubt in my mind but what both of these dealers are essential to the good of the trade as a whole. The man who is obliged to buy a cheaper bicycle because he cannot afford a high-priced one is entitled to the best and most satisfactory bicycle he can secure for that money.

### Vast Saving Made

I am not going to enter into the argument as to the respective policy or the respective profits to the dealer in handling variously priced machines, but I wish to argue the point of standardization. There can be a vast saving in standardizing of bicycles, and benefits to the rider, as well as to the dealer and jobber.

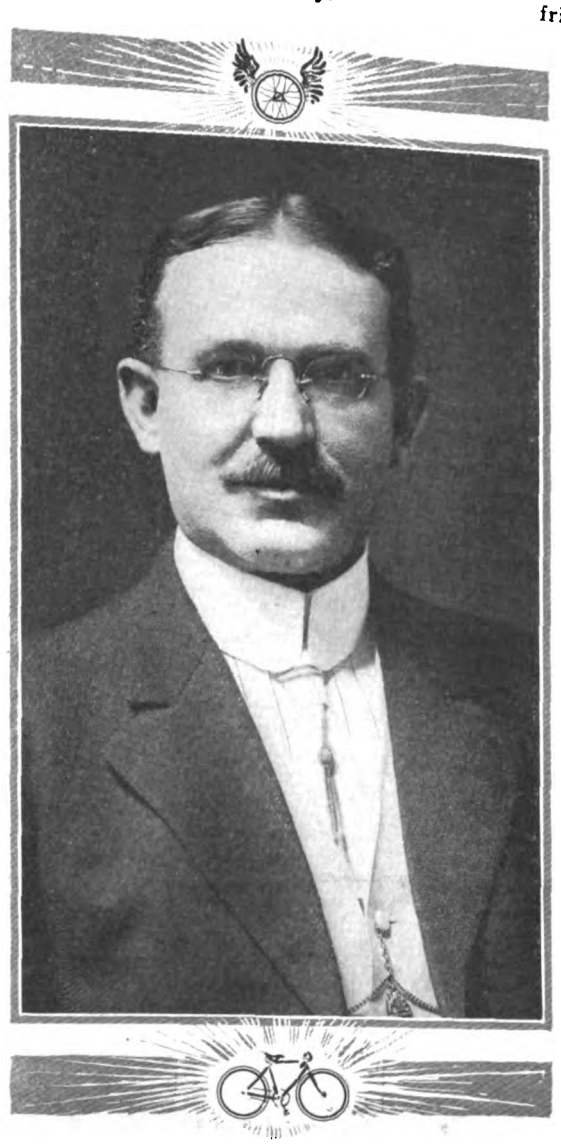
I do not believe that there is any other business in which there is such a diversified accumulation of parts as there is on bicycles. The manufacturer who attempts to furnish every kind of a tire, saddle, pedal and bar that every dealer might ask for reduces his output and undoubtedly put himself out of business.

I am going to make one reference to other lines. Do you think it would be possible for the Ford Company to manufacture 300,000 automobiles in one season if they made any special changes on their automobiles to suit the individual dealers? The answer is, No! The same thing is applicable to the bicycle business. These special changes create annoyance and delay. There has been in the past the constant changing not only of equipment and finishes, but oftentimes the coaster, hub and coaster brake.

### Let the Manufacturer Do It

I advocate that the manufacturer should manufacture good and satisfactory bicycles, and that the jobber or dealer, who handles his product, must do all in their power to sell them the way he makes them. *It can be done.*

This brings to mind a circumstance that I wish to repeat without any reflection on our jobbing friends. I called in a big city where there are five jobbers distributing bicycles in large quantities—two of them sold very large quantities. Of these, three of the buyers in each case told me they had to have a certain bicycle, certain finish, et cetera, because their customers required them. When I called on the third house and the buyer told me the same thing, I found by taking the catalog that the bicycles they handled were all different, especially the finishes. I can understand how everybody would want them as different as possible, but I, if I were a jobber, could have taken care of that by buying from a different manufacturer, which would have been the right way.



E. J. Lonn

Further investigation proved that these three jobbing houses really covered the same territory and in many instances sold the same dealers. I asked the third buyer, when I got his bicycles lined up, had them catalogued, and decided on what colors his company wanted, how he got his salesmen to understand the peculiar situation. His answer was very prompt. He said: "Our salesmen will sell those bicycles the way I buy them, the way we catalog them. If he sent in any orders not in our line, we would simply turn them down or get rid of the salesman."

That sounded very reasonable, so I asked him what his customers really had to say about it. I understood his customers had to have the kind of bicycles he prescribed. I really wondered what his customers had to do with it, and so I went back over the route and called on two jobbing friends and found that they handled the matter the same way. Inasmuch as they insisted that their customers required bicycles of the kind they ordered, I then wanted to know what the manufacturer had to say about it. They could not see wherein the manufacturer had anything to say about it. That being the case, I asked each of these gentlemen to tell me why they could not sell bicycles as I manufactured them, which would please a customer. What difference was involved? The answer was: There was no difference.

The dealer did not have anything to say about it, if anything, it was very little. He had to buy the type of bicycle the jobber got up. Our jobbing friends shift around the equipment in an effort to please the customer, but the customer winds up by getting exactly what the jobber wanted to sell him.

Does the jobber and buyer know more about making bicycles than the manufacturer? That is an important question. If they do, the manufacturer ought to quit. Inasmuch as every buyer seems to think he knows more, the manufacturer would be in somewhat of a quandry to have one of these buyers take charge of the production end of the factory.

### After He Got Behind the Scenes

It is only a short time ago that I had occasion to visit one of these jobbing buyers I refer to, who is now connected with a large manufacturing concern. I asked him if he had the same ideas now with reference to merchandise and the marketing of the manufacturer's product as he had for the few years previous as the buyer for a large jobbing house. His answer was frank and instant. He said that until he became connected with manufacturing, he could never appreciate and understand what a lot of trouble and a lot of delay a buyer of a large house can put on to a factory without intending to do so.

That is the real situation. The manufacturer cannot get out a maximum quantity on a daily output if he is going to manufacture and finish differently his product for every customer he has. Therefore, it is for the future benefit of the bicycle business that a standardization is arrived at: that the jobbers distribute in their territory the bicycles the

Digitized by Google

way the manufacturer makes them. It is necessary to have co-operation between the jobber, dealer and the manufacturer, and, unless there is co-operation and assistance, the business is going to gradually deteriorate. With co-operation it will be possible to manufacture good bicycles and at a reasonably low price. They can be redistributed in a satisfactory manner by the jobbers, as the distributers from the manufacturer.

### Present Method Wasteful

To continue along the lines that have been followed by the jobbers and also by the dealers, where any quantity of bicycles are considered, it would ultimately prevent the manufacturers from successfully producing their product at a minimum cost. There is nothing to be gained by the present method pursued. Is any manufacturer's bicycle better because the jobber puts his name plate on it, and then puts his trade-mark tires and saddle on, which he may buy at a special price or gets on for a special reason? Does that make a better bicycle? Is the dealer any better off? No! The riders know the jobbers do not make saddles and tires. They also know that the jobbers do not make bicycles, but they do know that the reputable manufacturer who puts his name on his product will stand by it.

The riders also know the tire manufacturer with their name on the tire will stand by the tires. Therefore, to me, this condition represents only a loss, double expense, double correspondence and also an endless amount of annoyance. The jobber who will distribute the manufacturer's product for him as his distributer becomes a part of his sales force.

### What Maker's Plate Means

The dealers who will only handle bicycles and tires and other goods, under the manufacturer's plate, will undoubtedly build a successful business for himself and will have back of his business the manufacturer of every article he sells —the greatest assistance he can have.

This will not injure the jobber in any way, because the jobber can become the distributer of some line of bicycles and tires that he is satisfied with and can make satisfactory arrangements for such distribution. I fail to see where there is any possibility of any gain by trying to built up a jobber's trade mark on any product, because he does not make it. I believe that in time it will not be permissible by law for any jobber or dealer to put his name or trade mark on an article *unless he does manufacture it*—which is only right and fair.

The method of selling bicycles, which I have outlined, will create confidence in the dealers and in the consumer and help build business. It will help to cut out the loss items, and will help to make better bicycles and make it possible to make good bicycles at a lower price. I recommend co-operation in this line, and I believe the manufacturers of bicycles in the United States are capable of making just as good a bicycle as any bicycle manufacturer in the world and are always open to suggestions. That is their business—they must be in touch with it. I know that the proper distribution of the factory's product under the factory's name and guarantee is the best and only successful way of marketing bicycles.

## HOW GASOLINE HANDLING STRIKES THE RIDER

(Continued from page 35)

for while his tanks are being filled? Every rider who has any human side to him likes to chat over the accomplishments of the mount, and to hear of what other motorcycles have done. In short, he enjoys being in a motorcycle atmosphere. If he didn't like that sort of thing he probably would not be a motorcyclist. He likes to be where he is understood, and where he is reasonably sure to find other men who are his frame of mind. He can't find these things in an automobile garage, or in a general gasoline station. At such places the motorcyclist and his purchase of a gallon of gasoline are very "small potatoes" while at the motorcycle agency the dealer assumes his proper relative importance. The latter amounts to something under the above conditions, and Gechosphat! don't we like to amount to something, now and then?

HERE'S another point: The dealer who was willing to have the gasoline business looked after by someone else might be just as ready to have the oil trade go the same way. And that's just about what would do in a short time. I know from personal experience that the average rider thinks of gasoline and oil as twin necessities and while oil purchases are naturally less frequent than those of gasoline it is a fact that most riders who fill the gasoline tank before starting on a trip will also fill the oil tank. The man who sells the gasoline is pretty sure to sell the oil also, and I know some motorcycle agencies for which the oil sales are quite important. I wish to go on record as one rider who hopes that the average motorcycle dealer will continue selling gasoline for some time to come. Perhaps at some time in the future we would not mind the change so much. But just now it seems that it would be unwise for the dealer to start such a policy, and I feel certain that a great many riders would find the new arrangement less pleasant than the present one.

## BIG MOTOR WHEEL CONTRACT

OTTAWA, Ont.—One of the largest contracts yet signed in Canada for Smith Motor-Wheels has been taken out by the Keyes Electric Supply Company, of Ottawa, who have made the usual arrangements to dispose of fifty machines, orders for six of which were taken during the first day's sale. The Eastern Canadian traveling representative of the A. O. Smith Company, of Milwaukee, T. F. Gaines, spent several days here last week, when he made calls on the local trade and finally closed with the Keyes company. He had the satisfaction of seeing three Smith Motor-Wheels in use by three of the military guards at the Dominion Parliament Buildings for patrol purposes.

Gaines has covered in the neighborhood of 700 mimles on his demonstrator in Eastern Ontario during the past ten days, during which time he has placed contracts for about two hundred motors.

At Kingston he appointed A. E. Treadgold the Smith agent. Treadgold secured one of the first Smith models last January —it was the first to be brought into Canada. Gaines also secured a contract from George Warwick of Brockville, who is a high-class hustler. Warwick signed for twenty-five. Other agents appointed included D. A. Woods, of Lindsay, and Banks, of Peterboro.

## HANDLING COMMERCIAL BIKE

Cincinnati, Ohio.—The Jones commercial bicycle is being handled locally by the Brendamour Sporting Goods Company; Mr. Brendamour thinks very well of the machine. Its special features, such as the big basket, hung on the peculiar frame, the motorcycle-type stand, and the heavy tires, make it ideal for the service for which it is intended, and it shows signs of taking well in Cincinnati. Already inquiries have been received from progressive firms regarding the adaptability of the outfit to their business.

# Our Canadian Letter

## What's Happening in Toronto Circles

TORONTO, Ont.—Canadian bicycle fans will miss the presence of the undisputed Canadian champion, Art Spencer, for the remainder of the present season for the reason that the young pedaller has made arrangements to compete at the Newark Velodrome and other American tracks in the amateur class. Spencer, who will be accompanied by his brother William, who has developed into a clever motorcycle rider, will leave Toronto about July 25 when he will be given a rousing send-off. Spencer is to represent Canada in the event of the Cycle Racing Association.

The first of the Canadian motorcycle despatch riders has been invalided home. The soldier is Private D. Armitage, of Toronto, a member of the Tenth Royal Grenadiers, who was struck by a sniper who had secreted himself in a haystack between the Canadian lines. Armitage was charged with an order from the headquarters in the rear of the firing line when the bullet shattered his leg, the shock throwing him from his machine. It was found necessary to amputate the limb, and Armitage has been discharged with a pension. He is to speak at a public meeting in Toronto this week.

A few days ago R. A. Fish, the traveler represening the John T. Wilson Company, makers of the Cyclemotor attachment for bicycles, rode over the difficult road to Hamilton, a distance of 45 miles, in three hours. His bicycle demonstrator is fitted with a motorcycle speedometer, the presence of which on the "motored-bicycle" makes a novel sight.

The war bicycles turned out by the Canada Cycle & Motor Company, Limited, have undergone examination by seven different investigating committees after they had received considerable usage, and no defects have been found, although the recommendation has been made that the bicycles be equipped with larger than the usual tires. present strength would be increased considerably.

Almost every member, to date, has his regular machine and five old cycles have been donated to the organization. The latter have been fitted up by the artificers for those who are temporarily without mounts for drill purposes. A call has been issued to owners of old or disused bicycles to donate the same for the use of the company, and a number of owners have signified their intention to respond to the call.

The company parades at the old drill hall on Richards street every Tuesday and Friday nights, while field manoeuvres are conducted every third Sunday in the outskirts of Vancouver. As yet neither uniforms nor rifles have been obtainable, but when the latter are issued the company will commence range-practice at the military butts at Richmond, Lulu Island.

### ODDS AND ENDS FROM LONDON

[illegible], Ont.—F. Benson, the local dealer, has removed to the better premises on Dundas street, has secured the agency for Harley-Davidson motorcycles. Fred T. Kerr, local agent for Smith Motor-Wheels, has also secured the selling rights for London and vicinity of Pullman motorcycles. He has already made deliveries of side-car. He has found a good demand for the Smith attachments.

W. M. Bassett, of London, is doing a big business with Yale motorcycles, while he is fast earning a reputation as a good salesman.

The small motordrome at Springbank Park is nearing completion, and races will soon be staged on the "cup."

Eight new members have been accepted by the London Motorcycle Club, which has been unusually active this season in the holding of pleasure runs. The local club is trying to arrange a joint run with the Hamilton and Toronto clubs. W. C. Keen has been elected Road Captain of the London organization.

### CYCLIST COMPANY GROWING

Vancouver, B. C.—The Cyclist Company of the Vancouver Volunteer Reserve now numbers 60 men and is steadily growing. The members are picking up the various details of drill with great rapidity, and considering the short time since the organization of the company, the corps gives every indication of being one of the most fit and efficient units of the volunteer movement. If the company had more spare cycles, its

### RODE NEW MOUNT HOME

Berlin, Ont.—Arthur McKelvie, of this place, went all the way to Chicago to get his new Thor motorcycle, and arrived home last week after a delightful ride, although he described some of the Canadian roads as being like a European battlefield after an artillery engagement. He did not have even a puncture during the run of almost 500 miles.

### GIRL RIDERS ON TOUR

Toronto, Ont.—A grand picnic, extending over a period of about a week, was enjoyed by two Toronto lady motorcyclists, the Misses Brown, when they joined a party of pleasure-seekers at Buffalo, N. Y., during the first week of July, for a motorcycle tour through New York State. The happy bunch merely sauntered along over the splendid highways and made a halt whenever desired, whether for scenery, meals or fancy.

### NIAGARA FALLS BULLETINS

Niagara Falls, Ont.—C. L. Robins has opened a motorcycle and bicycle repair shop at 740 Ferry street, Niagara Falls South, where he is in a position to look after the wants of the many International motorcycle tourists who pass through here.

The 1,200 employees of the Dunlop Tire & Rubber Goods Company, Limited, Toronto, will hold an excursion to Niagara Falls, N. Y., on Saturday, July 24. Last year they had a huge time at Olcott Beach, N. Y.

Private Arthur Nielson, of the Canadian Expeditionary Force, in training at Niagara-on-the-Lake, has been convicted of stealing a motorcycle and has been sentenced to one year's imprisonment in the Central Prison of Ontario.

### AFTER THE SPEED-FIENDS

Saskatoon, Sask.—Chief of Polic Donald, of Saskatoon, has instituted a campaign against speeding motorcyclists with the result that a number have appeared in court during the past two weeks. Previous to Chief Donald's step, the riders were allowed to run wild, and accidents were quite frequent. He has taken steps to have a by-law introduced providing for the examination of every person before he or she is permitted to drive a motorcycle. In this case, the riders as well as the machines would be licensed.

### SARNIA M. C. ELECTS

Sarnia, Ont.—The organization of the Sarnia Motorcycle Club has been completed and the officers are as follows: President, C. Bird; secretary, Charles Curran, and treasurer, Charles Hoskin. The directorate includes these officers and Fred Smith and Robert Simpson. Twenty riders have joined the club, the membership fee for which is only 50c. Tours throughout western Ontario are planned.

### MILLER TO MANAGE P. & C.

Victoria, B. C.—A. Miller has taken over the management of the P. & C. depot, this city, representing the Harley-Davidson. Both partners in the firm, Messrs. Pashley and Corbett, are now with the despatch riders' corps at Vernon undergoing training preliminary to being sent to Europe.

### ANOTHER INDIAN FOR PARK

Louisville, Ky., July 19.—Frank Marshall, manager of the Century Cycle Co., reports the sale of an additional Indian machine to the Board of Park Commissioners for use in Cherokee Park. This machine makes the fifth the board has purchased for use of the park's guards. The city is also using seven Indian machines in its various departments, making a total of twelve machines in all. Rainy weather has held back sales somewhat, but it now looks as if summer weather has come to stay.

### RUN TO LOYSBURG PARK

Altoona, Pa.—Last Sunday was an enjoyable one for the members of the Blair County Motorcycle Club who attended the sociability run to Loysburg Park, Bedford County. In all there were about thirty-five members on the run, accompanied by their wives, sisters and sweethearts, the female division of the party having provided the luncheon, which was conveyed to the grounds in several automobiles and sidecars.

### TO ADD FIVE NEW BUILDINGS

Akron, O.—Contracts have been placed by the Firestone Tire & Rubber Company, of this city, for immediate extension of three of the main wings on the factory building, as well as the doubling in size of a six-story separate structure and the erection of a restaurant. The latter structure will be three stories in height, with a basement, and will be about 150 feet square with a floor area of close to 90,000 square feet.

The new additions will bring 302,000 extra square feet of flooring to the present extensive factory area, and it is expected that the output will be nearly doubled as a result. Like the remainder of the Firestone plant, the new buildings will, w completed, be furnished with mod labor-saving devices and safety appliar of all kinds.

### REMARKABLE MAGNETO SERVICE

Few ignition performances of late h attracted more attention than that given a Dixie magneto, the product of the Sp dorf Electrical Company, on the Ind motorcycle which established a world's r ord of 1,600 miles in an 80-hour non-s run out of Christchurch, New Zeala The motorcycle was driven with a sidec as described in a recent issue of **Mo Cycle Illustrated**, and was obliged traverse all kinds of roads in vary weather. In spite of adverse conditions many points, and the continuous hea strain to which it was subjected, the Di magneto is credited in the official repo of the trial with a flawless performan When the 1,600 miles had been comple the motorcycle and sidecar were taken a hill-climbing demonstration, carrying passengers, and the motor and its equ ment continued to behave perfectly.

### RUBBER COMPANY'S NEW STORE

Cincinnati, Ohio.—The I. J. Cooper R ber Co., of this city, which controls se states in the distribution of Racine tir has just completed preparations for opening of a fully-equipped and up-to-d store in Dayton, Ohio, for the sale of full line of tires and accessories for mo vehicles, taking the place of the brar which has been doing business in that c for some time. The Cincinnati quarters the company have recently been enlarg and the new quarters for the Dayton brar are needed to take care of the compan business there.

### READING TRIP CALLED OFF

### WIDE-AWAKE MERCHANTS

Louisville, Ky., July 19.—The Taylor-Isaacs Drug Company is another concern which has taken up motorcycle delivery for the prescription department. The Newman Drug Company and other concerns have been using this form of delivery to advantage for months, and state that they could not get along without it. The Taylor-Isaacs Company hires a rider who owns and maintains his own machine, which happens to be a Yale.

### DENVER LIGHTING BILL PASSED

Denver, Colo.—The City Council of Denver has just passed a bill referring to lights on vehicles which requires all vehicles, including buggies, to carry a rear light. The motorcycle riders of Denver have been working to get this bill through for some time and are naturally pleased at its passage.

### THE INDIAN IN SPAIN

Indian motorcycle in Spain has been getting fresh distinction recently by performances on the road by two leading riders, Rodolfo Cardenal and Francisco Manzarraga. The first official road championship of Spain, which was held on the 20th of June, consisting of 335 Kilometers of twisted and mountainous road was won by Cardenal, second place by Manzarraga. The last kilometers were under pouring rain and blasts of wind, but Cardenal rode the course in five hours 31 minutes and 14 seconds. Manzarraga, the next man, covered it in five hours, 52 minutes, 7 seconds.

The same riders established new time for the road trip between Madrid and Bilbao, going together on a machine and sidecar in 10 hours, 21 minutes and 5 seconds, the best previous record being 11 hours, 47 minutes. There was only one stop, for lunch at Burgos.

### A SANTA ROSA ENTHUSIAST

Mrs. Henry Jenkins, of Santa Rosa, Cal., is one of the women motorcyclists who took up riding for the fun of it and prefers it now to automobile driving. She rides

**Mrs. Henry Jenkins**

her Indian morning and evening, being occupied through the middle of the day with work on the books and correspondence at her husband's store, and averages 50 miles a day. She is secretary and treasurer of the Santa Rosa Motorcycle Club and is welcomed to the ranks as much as any "reg'lar feller." Her husband is the Indian dealer at Santa Rosa.

## THE HENDERSON BOOSTING SQUAD IN LOS ANGELES

**From Right to Left: Hugh A. Fargo, O. A. Kupfer, Four Members of the Office Force and George A. Klapp, Salesman Extraordinary**

## KLAPP WITH KUPFER

Los Angeles, Cal.—George A. Klapp, one of this city's best-known riders and salesmen, has joined the forces of A. M. Kupfer, local Henderson distributors, as manager of sales. Klapp's usual place is on the sales floor in the Kupfer establishment, but he does not neglect riding both the short-coupled and Model D Hendersons by any means. He is an ardent booster for the four-cylinder mount and states that it has a great future, both for police work and touring in the West.

## GOING TO MILWAUKEE

Altoona, Pa.—William Noel and August Butz, of this city, are planning their summer vacation, which they have arranged to take on their motorcycles. The boys will ride to Milwaukee, Wis., where they will visit the Harley-Davidson factory. Mr. Butz covered 12,000 miles last season, and says he can beat that this summer.

## NEW MOTORCYCLE PATROL

Delavan, Wis., July 22.—The Delavan Lake Improvement Association has hired motorcycle policemen to patrol the lake road, a popular speedway, for the better regulation of traffic and elimination of accidents.

## BLAIR COUNTY SECRET TIME RUN

Thirty-two members of the Blair County Motorcycle Club of Altoona, Pa., participated in a secret time run held Sunday, July 18. The run covered a distance of 146 miles, being from Altoona to Lewistown, Pa., and return. The time for the entire trip was set at 7 hours 19 minutes, this time including getting dinner at the destination. None of the participants were aware of the time set for the run, there being three prizes offered for the riders finishing nearest the time set. Much enthusiasm was aroused among the riders, some of them going so far as to average the time at the rate of 20 to 25 miles an hour before they started. When the riders returned in the afternoon, their time was checked up to determine the winners, who were as follows: William Noel, time 7:16 (Harley-Davidson), first prize; Andrew Carl, time 7:15 (Pope), second prize; Jos. Wolfe, time 6:53 (Harley-Davidson), third prize.

ROGERS MANUFACTURING COMPANY CHICAGO

## —the vacation sidecar

Right now is the best time of all the year to push the Rogers.

Its beauty of line and finish fits the season. The comfort of its deep upholstery and spacious body is in keeping with the desire for ease and rest.

It is built stronger and 35 pounds lighter than any other sidecar—no strain on the frame of motorcycle or on the mind of the rider.

*Immediate deliveries on cars to fit and match any standard motorcycle*

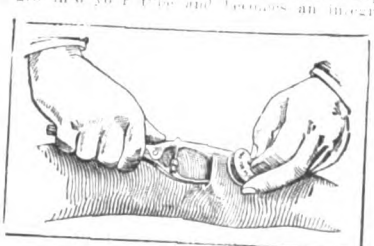
# It Becomes a Part of Your Tube

## Sampson FEATHER-EDGE Inner Tube Plug

Here is the minute and a half puncture repair plug that, once applied, merges into your tube and becomes an integral part of it. That part of your tube is forever puncture and leak proof. Note the word feather-edge? It means that the edges of the SAMPSON PLUG cannot cut the tube, they are of softer and better rubber than that of the tube. Just find the puncture, make a round, tear-proof hole with the tool, spread the edges, insert and screw down plug and the job's done. A permanent repair in a minute and a half. Cost of set, $1.50, including six plugs and drop forged tool.

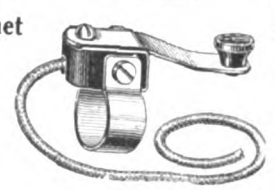


**Stevens & Co.**
**375 Broadway**
**New York**

**Simplex Magnet Cut-out**

A smooth and efficient brake in emergencies. Grounds your "mag."

Price, 50c.



---

# THE SAVAGE JERK OF THE BACK PEDAL

Do you ever stop to think of the terrific strain you apply on your pedal chain when you suddenly set your brakes in an emergency? Suppose that chain should snap at a critical moment? Are you SURE it won't? You can be, if you equip with

## "The Coventry" Chain

"The Motor's True Mate"

Built for the harsh service of motorcycle usage, tested to be 100% more efficient than necessary, sold with an iron-clad guarantee of quality and flawless perfection "The Coventry" Chain stands foremost in the ranks of transmissions. There are many good chains—we can't deny it—but by the exercise of judgment and discrimination you will find that "The Coventry" Chains are just a bit better. Write for our catalogue.

# Says Old Man Comfort:

*"There's many a bump 'twixt road and the seat, but there's only one saddle 'twixt you and extreme comfort—that's the King Comfort Motor Seat. It's the kind I use myself."*

## Persons King Comfort Motor Seat

The saddle that has taken the country by storm by reason of its common sense, shape-conforming, roomy and "ultra"-comfortable construction. Imagine it! A seat 18½ inches wide, thickly padded, with the famous DUPLEX SPRINGS that have distinguished PERSONS saddles for the past two seasons.

Write for full "dope" on the greatest saddle of them all.

# LONG HORN

## Gets You the Road

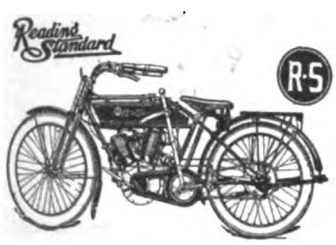
**Model "J. M."**

**$5**

**Complete with Fittings**

Out in the open country you need a Long Horn because it shouts a warning far enough and hard enough to clear the road for you. Down in the traffic-congested city you need a Long Horn because it makes itself heard above the most deafening din. Wherever you go your machine should be equipped with this efficient and reliable warning signal. It costs you nothing for current because it's operated by hand. It costs you nothing for repairs because it has nothing to get out of order. The materials and the workmanship are not to be duplicated in any other horn at this price. Model "J. M." is made especially for motorcycles. See it at your dealer's.

# R-S EXTREMES



**$150** **$250**

The lowest priced and highest powered motorcycle in the country. The R-S is the most complete machine of the day.

All orders filled same day received.

Bosch magnetos used exclusively.

Write for catalog and agency proposition.

**READING STANDARD COMPANY**
**501 Water Street** **Reading, Pa.**

# J-M (Mezger) Soot-Proof SPARK PLUG

## The Really Reliable Spark Plug

Why be pestered by leaky, sooty, trouble-making plugs when you can get big, hot, clean-cut sparks with unfailing regularity by putting J-M (Mezger) Plugs in your engine. They cost less than most plugs, notwithstanding the fact that they include features not to be found in any other plug. J-M (Mezger) double-chamber construction is literally soot-proof and no genuine plug of this name will short-circuit, leak or break down. Ask for "J. M's." at your dealer's and enjoy better ignition and longer service. Price 75 cents each.

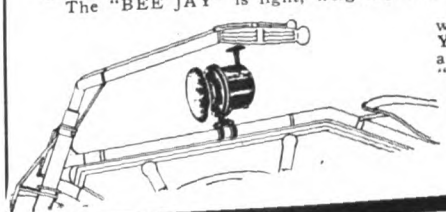
Finish Black & Bra or Black & Nick

Pat. Applied for.

## The "Bee Jay" Motorcycle Horn

Is the most astonishing horn value on the market.
It is so well made as to be almost unbreakable.
It is so well made as to be almost unbreakable. So simple is the BEE JAY that it can't get out of order. A spring release friction rack presses a ratchet against an adjustable diaphragm and presto—a harsh, growling roar is heard.
The price, $2.50, is the lowest for any mechanical warning signal made.
The "BEE JAY" is light, weighing only 21 ounces.



Dealers—get in touch with your jobber at once. Your horn sales will take a decided jump with "BEE JAY" in stock.

# CORBIN-BROWN SPEEDOMETER

*"The Speedometer of Absolute Accuracy"*

From the first to the last day of service the Corbin-Brown will return an unerringly accurate record.

In both principle and constuction it is best fitted to do this.

Its accuracy and durability have been tested and proved on roads in all parts of the country as well as in government laboratories and our own shops.

Its principle is one that defies the many inaccuracies caused by heat and cold—in any climate, at any season the Corbin-Brown is totally unaffected. Its construction is such as to withstand the wear and tear of rough, steady service, to minimize friction and meet the most exacting conditions of the roads.

To keep check of your tire, gas and oil accounts specify the Corbin-Brown. To know exactly how far and fast you have travelled and judge the power of your engine specify the Corbin-Brown.

Investigate it today.

Sold and equipped by dealers everywhere.

Catalog on request.

# Jones Valve Wings

are to take the place of the ordinary hexagonal nut furnished on the valve stem of motorcycle tires. The two wings make it easy for the rider to lock the valve stem firmly in place with his fingers, instead of using a monkey wrench or pliers. Should the nut become rounded the tools are practically useless.

**Time Savers**

They aid in pulling or pushing the valve through the rim. A convenience that will not be overlooked by the veteran motorcyclist. Riders are always losing valve nuts. Are you prepared to furnish them with a real convenience. "The Jones Valve Wing"? They are fastened on cards (24 wings to the card) which are specially made for counter display.

*Order from your Jobber or write to*

**JONES & NOYES,** 227-29-31 W. Austin Ave. CHICAGO.

# Bargains—Motocycle Tires

While some of these high grade motocycle casings are marked "second" and others have the serial number buffed off, they are, in most cases, regular in every way. Though not guaranteed, they are recommended as excellent value for the price charged. When ordering, please mention "JOB."

## Red Oilproof Tread BICYCLE TIRES

## For the Tire Wise Buyer

—the man or boy who demands something **extra**; who digs down into real tire **facts** before he puts his money on the counter.

He puts a proper premium on looks and lines and finish—and he values the trim, distinctive Vacuum Cup Tread, with its striking individuality of red rubber and triple rows of suction safety cups.

But the stout "insides"—the puncture proof 15½ oz. Sea Island Fabric; the oilproof composition; the strength and toughness that go clean through the tire; the skid-preventing efficiency—these are the things he seeks and values at their true worth.

Vacuum Cup Tires are endorsed by rough roads; by slippery pavements; by emergency stops—as the highest embodiment of bicycle tire excellence.

Sold on liberal full season guarantee that protects both dealer and user.

Our Best Knowledge and Experience are Built into These Tires.

### VACUUM CUP Oilproof MOTORCYCLE TIRES

Actual V. C. automobile tire construction throughout. The tires whose remarkable performance has proven that auto tire capacity in motorcycling is worth while.

Guaranteed 5,000 miles—and averaging over double above this figure. Oilproof—and effectively skid-safe on slippery surfaces.

# Every Bicycle Jobber and Dealer

It's all very well for the manufacturer to say in his advertisements to the dealer, "Insist-on-such-and-such a product being fitted on the bicycles you handle." But, if his advice were followed, every bicycle jobber and manufacturer would grow an abundant crop of gray hairs over-night.

STANDARDIZE, Mr. Dealer! Convince yourself, once and for all, by tests, by experience, by comparison, by inquiries, just what fitments on the bicycles you handle "go" best with your customers. Then **stick to these specifications!** Let it be known that your bicycles are fitted with the standard, time-proven, universally recognized accessories.

Result—quicker deliveries, easier sales, more satisfaction to the rider. And, when it makes you feel better or not, you know that the jobber from whom you order your bicycles is literally "tickled to death."

One of these standard accessories is the MORROW Coaster Brake. Years of honorable service on the country's leading bicycles has proven the MORROW to be the safest, easiest riding and easiest ***selling*** **standard** coaster brake on the market.

Remember these words, Mr. Dealer, when ordering your next allotment of machines.

MODEL L-15 (WITH POPE 15-4/10 H. P. ENGINE

# POPE MOTORCYCLES INVITE INSPECTION FRONT FORK TO REAR STAND

At every point of a Pope Motorcycle you will find a scientific reason for its design and application. Our machines are safe and sure.

The 15 4/10 H. P. Engine gives ample power. The double stem handlebars guard the rider on rough and sandy roads.

Our famous rear spring suspension keeps road shocks away from machine and man and gives real comfort.

Big gasoline and oil tanks make frequent stops unnecessary. Extremely low saddle position makes the last mile as comfortable as the first.

Pope Motorcycle metal is "made to order," not picked up in the open market, and is determined by engineers of broad experience and great knowledge.

Pope riders know they have the best which is made.

*To ride a Pope Motorcycle is to gain a new delight in life*

# Do You Buy Your Horn by Ear?

## Clero

Of course, sound and range power are the two most important considerations in buyin- a horn.

But—you MUST look to the construction of your purchase—find out—convince yourself—that this sound and range are a permanent, a reliable feature of the horn.

When you hear the CLERO you will say "Whew! That's some noise." You will like it—you will want to buy it. But examine first, please, its other strong features. Its simplicity. No gears. Just a worm actuating a large wheel which hits the diaphragm. Solid, honest construction throughout. It will outlast your motorcycle.

AND IT'S GUARANTEED—TO THE LIMIT. TEN DAYS' FREE TRIAL. Your money is on deposit with us until you're satisfied. Back it goes to you if you're not, and return the horn to us.

Fair, isn't it? We KNOW what marvelous value you'll get in the CLERO. And we back this knowledge with our guarantee.

# *Well Known Chicago Dealer Says: 4 Out of 5 Smith Motor Wheel Buyers Buy a Bicycle Too*

McKay, of the Lakeview Cycle Company, one of the oldest and largest cycle dealers in Chicago, says that 50% of his Motor Wheel sales have been to new riders; the average sale including Motor Wheel, bicycle and accessories has been $100. 4 out of 5 buyers of the Smith Motor Wheel buy a bicycle with it.

**Smith Motor Wheel**

(Detachable)

*"The Bicycle Booster"*

McKay has done a big business with the Motor Wheel. Whether you know him or not, if you want to know what it means to a cycle dealer to handle this wonderful, little business booster, just drop Mr. McKay a line and he will be glad to tell you what he is doing with it.

The Smith Motor Wheel attaches to any bicycle in 5 minutes, speeds up to 25 miles an hour, runs 100 to 125 miles on one gallon of gasoline and is fully controlled by one small thumb lever attached to the handle bars of the bicycle. Has a high tension Magneto, float feed Carburetor and Non-Skid, double tube clincher Tire.

Don't forget that the Smith Motor Wheel is manufactured by the largest manufacturers of automobile parts in the world—that means service, fair treatment and a product that "stands up" and delivers the goods."

We invite applications for territory from responsible, well established dealers who will mention make of Motorcycles and Bicycles now handled, volume of business done, etc.

More Blue Streak Victories at Toledo

Toledo, Ohio—All winners in the great speed events held here rode on Goodyear Blue Streak tires.

Results—5-Mile Final, won by Shorty Mathews; Meyers second; Coffey third; time, 5:34.

3-Mile Match Race, won by Mathews; Meyers second; time, 3:23.

25-Mile Final, Meyers first; Amos second; Coffey third.

## Terrific Tire Grind Proves Blue Streak Endurance

No need to argue which tire is best with such records as these before you.

The Motorcycle world stands amazed at Blue Streak's continuous triumphs.

On race tracks and cross country runs they hold all records for speed and endurance.

The 100 mile World's Record, the 200 mile World's Record and the 300 mile World's Record were broken in July on Goodyear Blue Streaks.

Remember, the famous Goodyear tire insures the same dependability for pleasure riders as for speed kings.

You deserve Goodyear Blue Streaks on your motorcycle—and you should see you get them. Any dealer can supply you Blue Streaks if you simply ask him for them.

**THE GOODYEAR TIRE & RUBBER CO., Akron, Ohio**

*Makers of Goodyear Fortified Automobile Tires*

Digitized by Google

GOODYEAR
AKRON, OHIO
Blue Streak
Motorcycle Tire

# King of All Racing Tires

## Now Made for Road Riding, Too

Blue Streaks have won and held the greatest victories for speed and endurance. In July alone they broke the world's records for one mile, 100, 200 and 300 miles.

Each month the Goodyear motorcycle tires are winning hosts of riders. Men can't resist their brilliant performance and appealing beauty.

Our experts have added new features that adapt them to every road condition. This year we are spending $50,000 extra for betterments. Yet we've cut our prices 15 per cent.

## Note These Tire Betterments

Note the swagger distinction of these big, creamy-white Blue Streak tires, surmounted by the All-Weather tread of shapely blocks and a racy blue circle running 'round the center. This tread is sharp-edged and extra wide, so it grips securely when sharp turns are taken. It is tough and extra thick, so it outwears other treads and lessens risks of puncture.

There is a special Breaker Strip between the tread and carcass. This protects the fabric and absorbs shocks.

The fabric is 4-ply—the same as used in the smaller sized automobile tires.

The Valve Spreader clutches the rim like a vise—so Blue Streak Tires can't creep.

The Inner tubes—built layer on layer, like Goodyear Laminated Tubes for automobiles—are 30 per cent heavier.

## Note Goodyear Selling Power

Then this is another significant fact. Three of every four new motorcycles are equipped with Goodyears. Riders, dealers and manufacturers agree on Blue Streaks in an overwhelming way. Goodyear Motorcycle Tires have gained a place no other tire has yet approached.

Then, combined with this great tire is a great advertising campaign. Tires like these Goodyears should be made known to all. Their matchless reputation now blankets the country.

These are the reasons why Goodyears sell the easiest—why most riders want them. A request from Dealers brings our high powered selling plan—with your prices and profits. Address Dept. 301.

Vol. 10 Thursday, July 29, 1915 No. 30

# Coffman Remains F. A. M. President With Pixley and Campbell Vice-Presidents

SACRAMENTO, Cal., Saturday, July 24. —At 9:50 a. m. the third business session of the convention was called to order.

Director William Johnson, as chairman of the special committee named to draw up an amendment to the constitution, providing for the election of first and second vice-presidents, submitted a report. It outlined an Eastern Division, embracing the New England, North Atlantic and South Atlantic districts, with Cuba and Porto Rico; a Central Division, embodying the Lake, North Central and South Central districts, and a Western Division, including the North Pacific and South Pacific districts, with Guam, the Philippines and the Hawaiian Islands.

### Vice-Presidents Also Directors

The drafted amendment also stipulated that the two vice-presidents must be elected to the board of directors, to avoid encumbering the board. It was also explained that the vice-presidents would be expected to discharge only such duties as were conferred to them by the president. The amendment includes a provision eliminating ex-presidents from the board of directors. Director Johnson moved the adoption of the amendment, which was seconded by Frank Fargo and carried.

Director C. S. Pixley then took the chair.

### Thanks for Boosters

President Coffman moved for a vote of thanks to the Hawthorne Manufacturing Co. of Bridgeport, Conn., for the lamps donated as F. A. M. prizes, and also suggested a vote of thanks for the Capital City M. C., of Sacramento, for the generous reception given visiting delegates and riders. Both motions were carried.

O. P. T. Daenitz moved for a vote of thanks to the trade journals, and Manager J. L. Donovan and William Cochrane, of Washington, D. C., for the co-operation given in connection with the trans-continental motorcycle relay. The motion was carried.

### Castle Asks for Help

Chairman Pixley presented a resolution from Gus Castle, of Atlanta, requesting that the South Atlantic district of the F. A. M. be sub-divided, as he is unable to handle it properly under the existing conditions. Owing to the fact that the resolution had not been published in keeping with the constitutional requirements, it could not be considered by the convention.

Director Johnson moved that the trade journals be requested to refrain from publishing reports of any personal attacks made by delegates on the floor of the convention. Seconded by Sullivan and carried.

### Constant Remains a Professional

Competition Chairman Donovan presented a petition from John U. Constant, of Brooklyn, requesting reinstatement as an amateur, and offering to pay back the professional prizes won. Constant gave as his reason for this action his desire to compete in amateur motorboat and basketball events from which he is now barred because of his professional standing in the F. A. M. It was voted that Constant should remain a professional rider.

President A. B. Coffman

Chairman Donovan raised a cheer by reading reports of the progress being made by the relay riders on their way to the coast.

### Another Round of Thanks

Another vote of thanks, called for by Director Johnson, included Mayor Thompson, of Chicago, and President Wilson, in appreciation of the interest shown in the relay by the Chicago mayor and the nation's chief executive. The motion was enthusiastically carried.

President Coffman added to the all-around congratulatory spirit by thanking the dealers, riders and convention officers for the help and co-operation given him during the year, and requested that even more enthusiasm be shown during the coming year, particularly in connection with the rounding up of new members.

## How the New Officers Were Elected

THE next order of business brought the convention to nominations for the presidency of the national body, and Chairman Pixley, after highly commendatory remarks concerning President Coffman's record in the office, placed his name before the delegates. William Holdecker, of Oregon, seconded, and J. P. Gorman moved that the nominations be closed. This was seconded, and Delegate Sullivan then moved that the nomination be made unanimous, which was done.

Secretary Gibson then put the vote, and President Coffman was unanimously re-elected. No F. A. M. president has ever been chosen to succeed himself with less red tape.

President Coffman's retention in the chair created a highly favorable impression, and several of the delegates took occasion to speak of the excellent results already obtained by the executive.

### Dealers Should Help, Says Coffman

President Coffman, in a short address, pointed out that the rider is the one most affected in buying motorcycle service,

Digitized by Google

which the F. A. M. alone can help him to get. In speaking of his personal sacrifices and of the time and money devoted to the interests of the F. A. M., the president explained that he felt amply repaid by the co-operation given him. He advised the dealer to do his share for the national body by telling each purchaser of a motorcycle of the protection and general helpfulness afforded by the federation, and to work at all times for the upbuilding of the organization's membership.

### Pixley First Vice-President

When the nominations were opened for first vice-president, Frank Rodger placed in nomination C. S. Pixley, incidentally paying him a tribute for the excellent organization results obtained on the Western coast. The nomination was seconded by Sullivan.

Director Johnson moved for suspending the vote on the nomination for first vice-president until the directors had been elected, this being a necessary procedure.

Chairman Pixley nominated Jess Campbell for director of the New England district, and William Holdecker seconded. It was carried by a rising vote. The secretary then cast one ballot for Mr. Campbell.

Bill Ash was then nominated for director of the South Central district in place of Pliny Simpson, and J. L. Donovan seconded. Frank Rodger moved that nominations be closed.

Chairman Pixley then nominated E. B. Holton, of Newark, to replace M. E. Gale as director for the North Atlantic district. Director Johnson referred to Holton's effective work in New Jersey and adjoining territory in the interests of the F. A. M., and stated that he always found him "on the job." Holton was accordingly O. K'd.

William Holdecker nominated O. P. T. Daenitz for re-election as director for the North Pacific district; Chairman Pixley seconded, and Daenitz was retained.

Frank Rodger nominated Pixley as director for the South Pacific district, and the Sacramento booster was elected.

Chairman Pixley then placed before the convention the name of Gus Castle for election to the directorship of the South Atlantic district, and the nomination was seconded.

William Holdecker nominated Director William Johnson to succeed himself as director for the Lake district, and the energetic Chicagoan was retained after eulogistic comments by several of the delegates.

Chairman Pixley nominated F. L. Hunt, of Minneapolis, for director in the North Central district, and there was no opposition.

### Pixley and Campbell Vice-Presidents

The election of the vice-presidents was then taken up. C. S. Pixley was unanimously elected to the office of first vice-president, while Jess Campbell was chosen with equal enthusiasm as second vice-president.

J. P. Gorman nominated Dr. G. B. Gibson for secretary-treasurer for a term of three years, and Paul Derkum seconded. The Westboro hustler was retained without opposition.

President Coffman took the floor to discuss the great need of interest on the part of the rider in F. A. M. literature, and als commented upon the necessity for impress ing upon riders the value of the F. A. M legal action service offered them. He aske again for the co-operation of all concerne in the motorcycle field and expressed cor fidence in the officers chosen.

### 1916 Convention Invitations

Secretary Gibson reported that the Sara toga Motor Carnival Association has ex tended an invitation to the F. A. M. t hold the 1916 national convention in Sara toga. Other invitations along the sam line were from the Illinois Chamber c Commerce, of Chicago, and from Ne York City. Action on these invitation will be taken later by the directors.

Chairman Pixley suggested that the con vention should be held at a cooler seaso of the year than July, and recommende whatever change in F. A. M. legislatio might be necessary to permit of this ar rangement. He also suggested that tw State commissioners be named for Califor nia, with a dividing line midway of th State, owing to the difficulty experience by one commissioner in doing justice to th vast territory involved.

Secretary Gibson stated that a preceden had been established along this line whe Texas was sub-divided as to the commis sioners' districts. The matter was referre to the board of directors. Frank Rodge moved that the directors be requested t take immediate action on the matter, an it was seconded and passed.

Later the delegates agreed to allow Mr Pixley thirty days in which to select southern California commissioner.

# Delegates in Spirited Sessions Launch Broad Movement for Greater F. A. M. in 1916

SACRAMENTO, Cal., Thursday, July 22.—Today's business session brought the F. A. M. delegates together at 10 a. m. when the meeting was called to order by President A. B. Coffman. Secretary-Treasurer G. B. Gibson read the minutes of the 1914 F. A. M. convention, which were accepted as read. Then came the report of President Coffman, which is published elsewhere in this issue.

The yearly report of Secretary-Treasurer Gibson followed. This report appeared in the July 22 issue of **Motor Cycle Illustrated**. Chairman John L. Donovan, of the Competition Committee, showed in his annual statement that he had issued 304 sanctions for competitive events during the twelve months, and that the net income through the Competition Office has been $1,029.65.

### Few Board Track Sanctions

Chairman Donovan explained that the competition receipts were greatly reduced this year because of the falling off in board track sanctions, and also through the reduction in the sanction fees from affiliated clubs. The gross profit from each board track was formerly $30 a week, with fifteen motordromes in operation, but for various reasons—chief of which is the lack of continued public interest in board track events—the returns from the board tracks have amounted to very little during the year.

The chairman explained his new system of classifying racers under F. A. M. rules, and stated that the fundamental idea was to gauge the riders according to their experience rather than on a basis of speed. It was pointed out in Chairman Donovan's report that flat track racing has increased about 100 per cent in the last year, which partially offsets the lack of interest in board track events, and the consequent loss to the F. A. M.

### The Venice and Derkum Cases

Chairman Donovan explained his position with reference to the $100 due Otto Walker for breaking the 300-mile record at Venice, and also his action allowing Paul J. C. Derkum the money awarded him in the Phoenix race. He upheld Referee Gates and Derkum by stating that he interpreted the regulations to provide for the awarding of the money to riders finishing in the Phoenix contest regardless of aid received along the way.

In connection with the Venice matter Derkum, who managed the big race, asserted that he could not turn over the special prize money due Walker until the city of Venice had received an official statement from Chairman Donovan. Donovan, on the other hand, did not understand what the Venice folks wanted him to do. The chairman explained that no blam should attach to Derkum in the case, an stated that the matter will be quickl cleared up.

The morning session was featured by heated discussion over the Walker an Derkum matters, the latter and Refere Gates taking exception to statements mad by Editor L. J. Berger in *Pacific Moto cyclist*.

### Legal Action Report

One of the most interesting reports wa that of Chairman William M. Johnson, c the F. A. M. Legal Action Committee. H explained that the scope of his departmer included a bureau of legal informatio provisions for political legal action, ar rangements for positive as well as persona legal action, and also a system of lega advice for other F. A. M. department The chairman summarized the work of hi committee and called attention to result obtained in Connecticut, Georgia, Illinoi Massachusetts, Nebraska, New Jersey, Ne York, North Dakota, Ohio, Pennsylvani and The Panama Canal Zone. He state that the work of the Legal Action Com mittee had resulted in savings to F. A. M riders as follows: Pennsylvania, $43,77 annually; North Dakota, $2,510 annually Panama Canal Zone, $800 (the Zone has 10 riders); New Jersey (prospective saving

Digitized by Google

$5 per sidecar. The chairman estimated that the total saving to Federation riders through the activities of the Legal Action Committee totalled $80,000 throughout the United States

**Personal Legal Service**

Chairman Johnson stated that 85 attorneys had been appointed to give individual service to F. A. M. members, and that 27 of these attorneys have given advice to 421 riders in the last four months. The total recoveries paid to riders as a result of these activities amount to $8,666. Uncollected verdicts amount to $1,200. Pending suits for riders involve $40,700. Two cases in which motorcyclists were successfully defended involved $2,700, and pending cases against riders, which the Legal Action Department is defending, foot up to $51,-000. It was pointed out that the reward offered for the recovery of one member's motorcycle in Chicago resulted in the recovery of fourteen machines which had been stolen from non-members not affiliated with the F. A. M.

**THE AFTERNOON SESSION**

THE afternoon session was called to order by President Coffman at 2 o'clock. The report of the Publicity Committee was read for Chairman Fred I. Willis, Mr. Willis not being present. The report showed that the committee has succeeded in obtaining 12,000 inches of newspaper space for motorcycle publicity in the last year.

When the matter of incorporation was taken up Director W. M. Johnson moved to defer action until a later date.

**Ladies Made Honor Delegates**

A motion to make the ladies attending the convention delegates of honor was carried. The following ladies were in attendance: Mrs. George Faulkner, of Oakland; Mrs. William Johnson and daughter, Marjory, of Chicago; Mrs. John L. Donovan, of Chicago; Miss Martha Tellier, of Vancouver; Mrs. Daenitz and Mrs. Gorman, of Portland; Mrs. H. A. Fargo, of Detroit; Mrs. Paul J. C. Derkum, of Los Angeles; Mrs. Perry, of Los Angeles; Mrs. M. Jones, of Los Angeles; Mrs. I. Schwinn, of Chicago, and the Misses Schwinn.

**Johnson's Amendments**

Director Johnson moved to amend the constitution with reference to ex-presidents of the F. A. M. remaining active directors, and to provide for assistants to the president by dividing the country into North and South Pacific sections, under a first vice-president to be elected at this convention. The North and South Atlantic districts would be under a second vice-president, and the Lake Central and South Central districts would be under the president direct.

The plan called for each section having the office of first vice-president in turn. It was also stipulated that the first vice-president could not be elected from the district in which the president resides. The motion was amended to refer to a committee, whose report will be found elsewhere in this issue.

**Nullify Hall's Election**

The report of New York State Commissioner J. A. Hall was accepted by the convention, with the exception of the reference to Mr. Hall's election at Saratoga as director of the North Atlantic District. Letters were on hand from E. B. Holton and Roy Pascal, of Newark, N. J., stating that members in the district had not been given proper notice of intention to hold the election by which Hall was placed in office. Hall's election was nullified by the convention on those grounds.

**A Letter from Campbell**

A letter was also presented from Jess Campbell, who had been elected director of the New England District at Saratoga. He stated that he did not wish to have his election go on record because of the fact that while a great many riders cast votes at Saratoga they were not all accredited delegates and could not properly be regarded as voicing the sentiment in his district.

J. F. Gorman, of Portland, moved to appoint a committee to call the attention of the National Government to the willingness of the F. A. M. to join in the protection of the country in time of war, and also to express recognition and thanks for the interest shown in the cross-country motorcycle relay.

**Schwinn's Prize Offers**

Ignatz Schwinn discussed the financial standing of the F. A. M. and advanced the opinion that none of the officers of the organization could be expected to give his full efficiency when his salary is in arrears. He argued that as an increase in dues would prevent the building up a large new membership it was necessary to obtain an immediate stimulus and secure a great many new members at once.

He called attention to the fact that there are 180,000 motorcyclists in the country, and stated that he will donate $500 towards the Federation treasury if the membership is brought to 20,000 at any time within a year. He stated further that he would give $500 if the organization is incorporated within a year. Mr. Schwinn's propositions were received with enthusiasm and he was given an ovation.

**Real Hustlers Needed**

After President Coffman had explained a general organization plan Mr. Schwinn commented on the type of men to secure as officers in the sub-territories. He suggested that it would be wise to name tire and accessory men as they are not interested in any particular make of motorcycle.

Mr. Schwinn's offer was formally accepted. He stated later that he would see that all his dealers become F. A. M. members without delay.

**Boosting Committee Named**

Chairman Donovan, of the Competition Committee, suggested the naming of a committee with "get the thousand" as a slogan, and argued that arrangements should be made for a "thousand dollar day" in which the membership campaign would be carried on broad lines throughout the country. The motion providing for this committee was carried. President Coffman appointed Sullivan, Donovan and Crist for the Central district; Derkum, Woodson, Pixley and Deanitz for the Pacific district; Jes Campbell, Stanley Kellogg and J. Leo Sauer for the Atlantic district.

Bill Ash, of the Chicago Cycle & Supply Co., pledged himself to bring in 100 new members before New Year's or make up the difference in membership fees.

**Support by State Bodies**

Director Johnson, taking up the matter of finances again, argued that the state bodies should support the national organization, instead of the reverse as at present, and pointed to the fraternal orders as examples of the successful working out of this plan. Mr. Woodson emphasized the necessity for localizing interest in the F. A. M. by creating intense state interests and holding live state conventions.

Hugh A. Fargo moved that the manufacturers in the motorcycle field be notified that they are on a committee to boost the membership campaign of the Federation, and the motion was carried.

**Delegates in Attendance**

The following delegates were in attendance: William M. Johnson, John L. Donovan and Ignatz Schwinn, of Chicago; George P. Faulkner, of Oakland, Cal.; W. G. Ash, of Chicago; Paul Pashby, of

## HIGH LIGHTS OF THURSDAY'S BUSINESS SESSIONS

### MORNING

**Reports of officers read. Chairman Donovan shows net income through his office in year was $1,029.65. Flat track racing has increased 100 per cent.**

**Paul Derkum explains that special $100 prize won by Otto Walker at Venice was held up pending formal notice from Chairman Donovan. Donovan explains position relative to awarding of Phoenix race prize to Derkum.**

**Legal Action report shows about $80,000 annually will be saved to F. A. M. riders because of recent legislative victories. Twenty-seven F. A. M. attorneys have given personal service to 421 riders in last four months.**

### AFTERNOON

**Report of Publicity Committee shows 12,000 inches of space obtained in newspapers obtained during year for boosting the motorcycle.**

**Ladies attending the convention are made delegates of honor.**

**Committee is named to consider amendments by which F. A. M. President will be assisted by first and second vice-presidents.**

**Election of J. A. Hall as director for North Atlantic District is nullified on grounds that members in district did not receive sufficient notice.**

**F. A. M. goes on record as being willing to aid National Government in case of war.**

**Ignatz Schwinn offers donation of $500 for F. A. M. membership of 20,000 within a year, and another $500 if the body is incorporated within a year.**

**Committee is named to launch boosting campaign and arrange for a "get the thousand" day. Tire and accessory men to be enlisted in membership work.**

**All manufacturers embraced in general committee to work for a greater F. A. M.**

# Visitors Attend Capital City M. C. Meeting

SACRAMENTO, Cal.—An enthusiastic meeting of the Capital City M. C. was held at the clubrooms on Tuesday, July 20. It was opened by President C. S. Pixley. Several Eastern visitors gave short talks. F. A. M. Secretary G. B. Gibson boosted the West, while chairman Johnson, of the F. A. M. Legal Action Committee, talked about the scope of his department. Chairman J. L. Donovan delivered himself of a few characteristic remarks and Bob Perry, Ray Creviston, Carl Goudy, A. W. Parry, of **Motor Cycle Illustrated;** Joe Esler and Bill Ash, of the Chicago Cycle & Supply Co., also expressed satisfaction over being "among those present."

During the meeting President Pixley presented three medals to members of the club. Captain Carter received the medal which is awarded each year to the rider who first makes the Lake Tahoe circuit within 24 hours. Carter made the run on Memorial Day in 18 hours and seven minutes.

The medal awarded to the rider making the circuit for the first time, regardless of the time consumed, was presented to Otto Links.

R. Orpinela was the recipient of the third medal, it having been offered and won in the summer of 1912, but the presentation being delayed until the present time. This prize was for the first bicyclist to make the run to Lake Tahoe, and Orpinela carried it off. His time was a little more than 18 hours. It should be explained that when the motorcyclists made the run the roads were covered with deep snow, which was not the case when the bicyclist made the trip for the roads were in good condition.

## COFFMAN OUTLINES THE WORK ACCOMPLISHED BY HIS OFFICE AND CALLS UPON RIDERS AND DEALERS TO LEND THEIR CO-OPERATION

*In reading his report to the F. A. M. delegates, in convention assembled at Sacramento, Cal., President A. B. Coffman called attention to the work accomplished by the F. A. M. during the past year and to the possibilities that lay before the federation of becoming a stronger factor in the motorcycle field. President Coffman said in part:*

"At the time of my election this organization was in very bad shape. My efforts have, therefore, been along constructive lines. I have conscientiously aimed to place the federation on a sound financial basis and to give every individual rider what he was entitled to. I have succeeded in showing the manufacturers just what organization does for the rider, and in return their response has been great.

"I am of the opinion that every dealer should be an F. A. M. booster—if for no other reason than that his riders—his customers—are helped. All my personal expenses in connection with the work of this federation have been defrayed by myself. I firmly believe that we are giving each motorcycle rider, who is a member of the F. A. M., more for his dollar than the American Automobile Association is giving its members for five dollars, except in such instances where the riders and the dealers are too narrow to lend their co-operation.

"I have done my utmost to practice economy. During the year the expenses attached to the president's office, including the touring bureau, were $1,025. Last year the expenses attached to the president's office and the touring bureau were $1,855. There has thus been a saving of $820 in the president's office. I have been successful in appointing competent and efficient State officers, but we are still in need of competent officials.

"A review of the advantages attached to membership in the F. A. M. proves beyond a doubt that the federation absolutely justifies its existence. It offers legal protection to every rider when dealers forget their petty jealousies long enough to select an attorney. Besides offering this legal service, it provides touring information free and affords splendid fellowship among riders. What organization, may I ask, gives more for a dollar?

"I wish to thank the Capital City Motorcycle Club, of Sacramento, for the splendid entertainment and hospitality that it has showered on its appreciative visitors. Their reception was certainly a credit to the fair name of the Golden State. Let's all go home routing with enthusiasm for the prosperous State of California, the beautiful city of Sacramento, and the hospitable Capital City Motorcycle Club."

# Trip Through Fruit Belt and Folsom Prison

SACRAMENTO, Cal.—Delegates to the National F. A. M. convention were taken on an interesting trip through the neighboring fruit farms and the Folsom prison, as the guests of the Capital City Motorcycle Club, on Thursday, July 22. Ten automobiles, filled with delegates, started out from the Travelers Hotel at ten o'clock in the morning, headed by President Pixley, of the local club, on a Harley-Davidson, and followed by the press car of the Federal Tire & Rubber Co.

The course lay over the Lincoln Highway, through Natomas. When Folsom prison was reached, the men of the party made an inspection of the place, while the ladies were invited by the prison official to a luncheon in the warden's office. Dinner was had at the Freeman Hotel in Auburn, where the Sacramento club acted as host.

At four o'clock in the afternoon the return journey was begun, after a tour of the highlands above the city of Sacramento. The delegates and their wives were taken through some of the fruit packing houses in Newcastle, and inspected the fruit farms.

Among those who participated in the trip were Mr. Schwinn and his family, Legal Actions Chairman and Mrs. Johnson and their daughter, Mr. and Mrs. John L. Donovan, George Sherman, Frank Rodger, H. C. Farner, Mr. and Mrs. E. L. Rettig and son, Frank Wood, Robert Sayre, W. J. Cameron, of the Goodyear Tire & Rubber Co.; Secretary Gibson, J. F. Gorman, O. P. T. Daenitz and wife, Bert Quayle, of the Standard Welding Co., and E. F. Merry, Excelsior distributor.

### PARADE AWARDS

Sacramento, Cal., Saturday, July 24.—Following are the awards made in connection with the parade of illuminated motorcycles tonight:

Best decorated motorcycle—Thor, ridden by Richard Stoneman, of Sacramento.

Best decorated motorcycle and sidecar—Pope, driven by J. R. Beard, of Sacramento. Second best decorated motorcycle and sidecar—Indian, driven by J. O. Preston, of Berkeley.

Best decorated motorcycle driven by a woman—Excelsior, piloted by Mrs. W. A. Better, of San Francisco.

Motorcycle carrying most people—Excelsior, driven by H. King, of San Francisco.

Neatest motorcycle and best drssed driver—Indian and sidecar, piloted by W. E. Haley, of Hayward.

Judges: Paul J. C. Derkum, of Los Angeles; J. S. Rodda, of San Francisco; F. M. Woodson, of Sacramento.

## F. A. M. Assures President Wilson of Co-operation

SACRAMENTO, Cal., July 26.—Below is the text of an interesting and significant message which has been forwarded to President Woodrow Wilson by Secretary G. B. Gibson and Director William M. Johnson in behalf of the F. A. M. convention:

WOODROW WILSON, President,
Washington, D. C.

**The Federation of American Motorcyclists, in its thirteenth annual convention at Sacramento, by a unanimous vote, has delegated to us the honor of transmitting to you an expression of confidence in your administration.**

**We are also instructed to say that from the thousands of members of this Federation, more than a hundred of whom are now completing by relays the delivery of your message across the continent to the President of the Panama-Pacific Exposition, volunteers will be immediately available, if necessary circumstances should arise, for the formation of motorcycle scout divisions to be used as you deem best.**

G. B. GIBSON,
National Secretary, Westboro, Mass.

W. M. JOHNSON,
National Counsel, Chicago, Ill.

## Competition Committee Considers Problems

SACRAMENTO, Cal., July 27.—At a meeting of the F. A. M. Competition Committee on Friday night the trade rider racing classification came up for discussion and was thoroughly threshed out. The suggestion that a racing division be set aside for trade workers who are still not professionals in the strictest sense of the word was rejected. The principal objection to it seemed to be that it would complicate the work of the Competition Committee without greatly remedying the present situation.

F. M. Woodson, acting for the Capital City M. C., offered a resolution to class all riders according to speed ability, but the committee disapproved of this scheme and the motion was withdrawn.

Hugh A. Fargo offered a motion to change the constitution so as to permit machines of more than 61 cu. ins. piston displacement to compete in road races, but the committee opposed this suggestion on the ground that it would tend to increase the danger in such contests. The motion was withdrawn.

The Competition Committee expressed a desire to bar ported machines from track races, but no definite action was taken along this line.

Further consideration will also be given the matter of re-classifying the trade workers who participate in races.

### EAGER FOR SAN JOSE MEET

San Francisco, July 21.—San Francisco motorcyclists are looking forward with eager expectancy to the race meet which is to be run at San Jose on August 1, under the auspices of the San Francisco and San Jose Motor Cycle Clubs.

Seven races are down on the card—a two-mile F. A. M. national championship, three open and three amateur events. Prize money aggregating $550 has been hung up for the various events and it is expected that a number of riders of national prominence who take part in the F. A. M. meet at Sacramento will be entered. The races will be staged at the San Jose Driving Club course.

### WILL RIDE HOME ON DAYTON

San Francisco, July 21.—George Lancey, of Rindge, New Hampshire, who has been visiting the exposition, has purchased a 2-speed Dayton machine, which he intends riding to Los Angeles and thence across the continent to his home. Mr. Lancey is a veteran rider who has been out of the ranks for some time, but since he came to the Coast he acquired the fever again and could not resist the temptation to take advantage of the fine roads.

Upper Left, B. Nuestadt, George W. Sherman of Hendee Forces, W. Johnson of Indian Frisco Branch; Center, Mesdames John L. Donovan and W. M. Johnson and Miss Gladys Johnson; Upper Right, Ray Creviston, Mrs. Marty Graves, Marty Graves and W. G. Collins of U. S. Tire Co.; Lower Left, Some Delegates and Trade Men; Right, Referee F. Woodson, A. B. Coffman, C. S. Pixley, Doctor G. B. Gibson and W. M. Johnson.

# Liggett Captures Bosch Amateur Trophy

## Wins With Total of Thirty-Five Points in Convention Programs at Sacramento; Leuders in Fatal Accident

SACRAMENTO, Cal., Sunday, July 25.—Following the second F. A. M. racing program today, it was announced that Tom Liggett, Indian rider, of Santa Rosa, Cal., is the winner of the Bosch amateur championship trophy, his total score for the two days of racing being 35 points.

Before a crowd of 3,000 race fans, Don Johns, riding a Cyclone, won the one-mile professional championship today, thereby shaking the jinx which has been trailing him of late. Creviston and his Indian carried off the other professional events. The jinx which was dropped by Don Johns apparently decided to devote himself to the Excelsior boys for their hard luck of the first day remained with them.

The second day's racing was marred by a fatal accident in the 25-mile National Amateur Championship when William Leuders crashed into the fence. Leuders had chain trouble and was trying to make an adjustment of some kind when his mount swerved into the fence and threw him. The machine swung back onto the rack and continued its way riderless for almost a quarter of a mile before it fell. Leuders survived only a short time.

### Close Call for Liggett

Liggett, mounting an Indian, was behind Leuders when the accident occurred and had a narrow escape from crashing into the wild machine. Zettle, on an Excelsior, ran into a loose board on the fence where Leuders had struck and injured his foot, but continued around the track to the starting point where he received medical attention.

As a result of the accident the seventh event, a 15-mile professional race, was called off by Chairman Donovan.

### Crevvy Wins from Fabian

In the 5-mile professional race for members of the Capital City M. C., using 61 cu. in. stripped stock machines, there were two entries, Ray Creviston and Emil "Dutch" Fabian. Creviston won, in 4:15.

The second event was a 5-mile free-for-all professional, with $70, $20 and $10 prizes. The entries were Creviston, Johns, Fabian, Stokes and Perry. First money went to Creviston, with Johns second and Perry third. Time, 4:07⅗.

In the 2-mile National Amateur Championship Leuders, Excelsior, was first; Liggett, Indian, second; Zettle, Excelsior, third. Time, 1:54⅕. Gold, silver and bronze F. A. M. medals were the awards. Two attempts to make a rolling start were unsuccessful and the event was finally run off from a standing start.

### 10-Mile Pro. Championship

The fourth event brought on the 10-mile National Professional Championship. The entrants were Johns, Goudy, Stokes, Fabian, Perry, Armstrong and Creviston. Creviston was the winner, with Perry second and Fabian third. Time, 9:08⅖. Armstrong went out in the third lap with dirt in his carbureter. Stokes went out in the third lap because of trouble with his goggles, and Goudy retired in the fifth lap when he ran short of oil. Don Johns was eliminated in the eighth lap with a flat rear tire.

Then came a National one-mile Professional Championship race. Johns was first, with Creviston second and Stokes third. Time, 49⅖. The winner received a gold F. A. M. medal and $25; second, a silver F. A. M. medal and $15; third, a bronze F. A. M. medal and $10. The riders got away on a rolling start after three attempts. Bob Perry was retired on the first start with his rear cylinder blown out.

### Hess Wins Amateur Event

The five-mile amateur event for members of the Capital City M. C., using 61 cu. in. stripped stock machines, went to Hess, Excelsior, with Heft, Pope, second, and Houghton third. Time, 5:03. The prizes were made up of merchandise, valued at $25, $15 and $10.

In the 25-mile amateur championship event Leuders, Hess, Zettle and Houghton were the entries. After the Leuders accident and the injury to Zettle when his foot struck the loose board in the fence the race was run over, with Liggett first and Hess second. Houghton did not finish. He had motor trouble in the 23rd lap. Gold, silver and bronze medals were the prizes.

The 15-mile professional event was called off. The prizes were valued at $200 and Chairman Donovan announced he would ask the Capital City M. C. to turn over this money to the Leuders family.

Leuders, who had made a remarkably consistent showing on his Excelsior throughout the two days of racing, had acquired a total of 33 points for the Bosch trophy and the national amateur championship, exclusive of the 25-mile championship event in which he was killed.

# Creviston Cleans Up Professional Events

## Indian Rider Sweeps His Division While Leuders (Excelsior) and Liggett (Indian) Prove to Be Strong Amateurs at Sacramento

SACRAMENTO, Cal., July 24.—Ray Creviston had things his own way in the professional division at today's races in connection with the F. A. M. program at Agricultural Park. Don Johns, on his Cyclone, made a promising start in the 25-mile event for professionals, but was retired in the 10th lap with magneto trouble. The Excelsior camp professionals bucked a persistent jinx.

In the first event, the 5-mile professional race for stripped stock machines, Creviston and his Indian took the lead and maintained it throughout. Perry, Goudy and Stokes threatened at the start to whoop things up with Crevvy, but could not work out their schedule.

### Hess Captures 50-Mile Feature Race

In the amateur class, Bill Leuders, of Chicago, mounting an Excelsior, proved to be the most consistent winner. Tom Liggett, of Santa Rosa, riding an Indian, was Leuder's closest competitor.

Hess, of Sacramento, captured the 50-mile National Amateur Championship. His mount did not appear to be as speedy as some of the others, but through excellent headwork Hess managed to avoid stops for mechanical trouble, his only delay being for oil and gas in the 37th lap. Hess was one lap behind Liggett when the latter was forced to drop out because of mechanical trouble in the 43d lap. From that time on there was nothing to it but Hess.

The attendance at the races was comparatively light, due perhaps to the fact that the heat was intense.

### Creviston and Leuders Set the Pace

Five miles, professional, stripped-stock, 61 cu. in.; Creviston, Indian, first; Perry, Excelsior, second; Goudy, Excelsior, third; time 4:17⅗.

Five-mile Amateur Championship, stripped stock, 61 cu. in.; Leuders, Excelsior, first; Hess, Excelsior, second; Zettle, Excelsior, third; time 4:27. Liggett took second place at the finish of this race, but was disqualified by Referee Donovan because he claimed ownership of an eight-valve machine, which he rode in this event, and also of a stripped stock machine. His place is held for him pending his proof of ownership of the machine used. The first prize in this race is an F. A. M. gold medal.

Ten miles, professional, stripped stock, 61 cu. in.; Creviston, Indian, first; Goudy, Excelsior, second; Perry, Excelsior, third; time, 8:41⅗. Stokes out first lap, carbureter trouble; Armstrong out third lap, spark plug trouble; Perry broke bearing in homestretch and took third place by pushing machine over line.

### Liggett Lands a Championship

One-mile National Amateur Championship stripped stock, 61 cu. in.; Liggett, Indian, first; Leuders, Excelsior, second; Hess, Excelsior, third; time 53⅕ seconds. Liggett started on an 8-valve machine, but was compelled by Referee Donovan to re-

**Leuders Scores Again**

...n miles, National Amateur Championship, stripped stock, 61 cu. in.; Leuders, Excelsior, first; Liggett, Indian, second; Hess, Excelsior, third; time 8:59⅕. Leuders' machine caught fire a second time after getting off the track.

The seventh event was postponed owing to the fact that there was only one entrant on hand.

There were only three entries in the 50-mile National Amateur Championship event, Hess and Leuders, both riding Excelsiors, and Liggett, Indian. The event was won by Hess in 54:30⅕, with Liggett second and Leuders, third. Liggett led to the 42d lap when he went out with engine trouble. Leuders retired in the 13th lap with magneto trouble. Liggett led by one and a half laps over Hess when he went out. First prize, F. A. M gold medal; second prize, F. A. M. silver medal; third prize, F. A. M. bronze medal.

**Officials in Charge**

The officials in charge of the race were as follows: John L. Donovan, referee; W. S. Collins, starter; F. M. Woodson, clerk of course; C. H. Minto, L. H. Thompson, F. Carroll, timers; J. H. Rodda, George W. Sherman and Bill Ash, judges; R. R. Rathbone, W. J. Cameron and E. L. Rettig, scorers; Gil. Elres, flagman.

**Some Equipment Features**

Following are some of the equipment details of the machines figuring in the races: Creviston's Indian carried Goodyear tires, Dixie magneto, Bethlehem spark plugs, Duckworth chains, Hedstrom carbureter and Mesinger saddle.

Leuders' Excelsior: Goodyear tires, Bosch magneto, Western Electric spark plugs, Renold chains, Schebler carbureter and Mesinger saddle.

Liggett's Indian: United States tire in front, Goodyear in rear; Hedstrom carbureter, Mesinger saddle, Duckworth chains, Hedstrom spark plugs, Bosch magneto.

Hess' Excelsior: Goodyear tires, Bosch spark plugs, Bosch magneto, Mesinger saddle, Renold chains and the Schebler carbureter.

# Capital City Club's Career Busy

SACRAMENTO, Cal.—The Capital City Motorcycle Club, which had charge of entertaining the delegates to the national A. M. convention, came in for a lot of praise at the hands of the visitors. Many of the guests of the local club were eager to learn about its organization and history, with the result that a number of interesting facts were brought to light.

The Capital City M. C. was founded in 1908 and in the same year it was amalgamated with the Capital City Wheelmen, a racing body which has been in existence since 1886. The first president of the combined clubs was H. Ten Bosch, during whose regime the club made splendid progress and soon became a strong influence throughout the State of California. C. S. Pixley was at the head of affairs during the succeeding year, while in 1913 Mark Wilcox was president of the progressive organization.

The club promoted a spring and fall race meet in 1913, and made a rousing success of each event. In April, 1914, a spring meet was pulled off which was full of thrills and well attended, for stellar riders from all corners of the country were on hand. The third annual spring meet was held last May at the Agricultural Park tracks.

Everybody enjoyed the club's hospitality and delegates were delightfully surprised to find how commodious and well appointed were the quarters in which the Capital City Club riders meet. They have rooms above the Sacramento Bank, which are adequately fitted up for social purposes. There is a large assembly hall, a card room, club room, billiard room, shower bath and a kitchen. The officers this year are: President, C. S. Pixley; vice-president, C. Hanson; treasurer, G. McCormick; secretary, M. F. Trebilcox, road captain, E. Fabian. Among other members of the Capital City Motorcycle Club who were responsible for the great success of the F. A. M. convention were: F. W. Woodson, Fred Pearl, H. L. Duke, H. Ten Bosch, T. W. Madeley, E. O. Putzman and Albert Elkus.

# Northwest Ramblers Arrive in Sacramento

SACRAMENTO, Cal.—The Northwest Ramblers, headed by Mr. and Mrs. P. T. Daenitz in a Harley-Davidson sidecar outfit, arrived at Sacramento Wednesday afternoon, July 21. Many of the riders who had planned to participate in the Northwest Ramble were deterred by weather conditions, but those who went through with the trip were loud in praise of the scenery along the route. In spite of considerable heavy traveling the tourists enjoyed themselves.

Among those who arrived here Wednesday afternoon under the Northwest banner were Clyde Fisk and Miss Martha Le Tellier, of Eugene, Ore., in a sidecar outfit, and Mr. and Mrs. C. E. Bowman, of Vancouver, B. C., who, by the way, expect to win the prize for the sidecar combination coming the greatest distance to the convention city. The first day's mileage out of Portland was 128 miles, to Eugene, where Fisk and his passenger joined. The Atlas M. C., of Eugene, gave the tourists a big dinner at the Osburn Hotel. On Friday the run was to Roseburg, a distance of 76 miles, the route being through Cow Creek and Pass Creek Canyons. On Saturday the party proceeded to Medford, 108 miles, part of this run being through the famous Rouge River valley and through Grant's Pass.

While the men were overhauling their machines at Medford on Sunday, the ladies of the party enjoyed an automobile trip through the orchard region for which the distinct is noted.

The tourists soon found themselves in the Siskiyou Mountains, where some rather hazardous climbing had to be done. The next night stop was at Dunsmuir, after a mileage of 104 for the day. On Monday night the party was about fixe miles from Kennett when darkness fell, and some of the machines were out of gasoline, so it was necessary to pitch camp. One of the riders went into Kennett and brought out supplies of food and gas, and on Tuesday morning, July 20, the travelers were under way once more.

The last day's run was through the lowlands of the Sacramento Valley, and the going was hot and dusty. The last twenty miles into Sacramento was made over a new levee. The mileage for the whole journey was about 800, and all things considered the motorcycles behaved wonderfully.

Haledon, N. J.—A midsummer dance of the Haledon M. C. will be held at the Haledon A. A. Park, Friday, July 30. A cordial invitation is extended to all riders.

# Pick-Ups Among the Conventionites

A. B. Coffman, president of the F. A. M., with Bert Quayle, of the Standard Welding Company, and E. F. Merry, of Frisco, came in at noon on Wednesday in Merry's motor car. Coffman said that about the only incident of note on the trip was Quayle's acquisition of a coat of tan.

W. J. Cameron, of the Akron office of the Goodyear Tire & Rubber Company, was the first trade man to show up at the Travelers Hotel. He went right to work, and soon the lobby of the F. A. M. official hotel was lavishly decorated with Goodyear pennants and banners.

George Bellis, Sacramento manager for the Goodyear Tire & Rubber Company, was kept busy extending the "glad hand" to all comers. He acted as a bureau of local information for the entire visiting trade, and could answer questions in rapid succession.

Bill Ash, of the Chicago Cycle Supply Company, came in with the Windy City aggregation Tuesday night. It did not take long for the "natives" to find out that there was another "live wire" on deck, for Bill can make himself handy at anything from piano-playing to taking orders for the company.

William M. Johnson, chairman of the Legal Action Committee, who came in Tuesday with Mrs. Johnson and a daughter, ran across an old acquaintance in Sam Anderson, secretary of the Sacramento Chamber of Commerce. They went right to work to discussing old times, as well as those occurring at present.

Stewart Slosson, Pacific Coast representative of the Firestone Tire & Rubber Company, was on hand early in the opening day, and soon Firestone brassards were being worn by most of the delegates. Slosson brought six pairs of racing tires with him, and was soon the center of an interested mob of riders, explaining things about their construction.

C. L. Smith, Pope distributor in Los Angeles, came in on Wednesday afternoon in time for the "big doings."

The ladies who attended the Convention enjoyed an automobile tour of the city on Thursday afternoon, while the male portion were engaged in F. A. M. business.

Many of the leading merchants of Sacramento decorated their places of business in a lavish manner. The Kimball-Upson Company's display, which included all prizes and trophies to be awarded to the racers and visiting riders, came in for the lion's share of the attention.

Edward Peterson and Paul J. C. Derkum were the delegates from the Los Angeles M. C. From the Bakersfield club came Fred Stoeckle, Ed. Tice and C. B. Slater. J. H. Meyer and F. F. Donovan, from Vallejo, represented the Solano M. C. and headed a large delegation of clubsters into the city.

H. W. Dangerfield, of the San Jose M. C., headed the delegation from that city. With Dangerfield came W. H. Bracher and Mrs. Bracher, San Jose Excelsior dealer; George Hellerman, Harley-Davidson distributor; Mr. and Mrs. Will Zettle; Leo Gantzler; Al Zettle, the amateur racer; and D. Sanderson, in charge of the San Jose wigwam.

**Attractive Show Window of Kimball-Upson Company, Pope Dealers in Sacramento, During Convention—All the F. A. M. Championship Prizes Were Exhibited**

The U. S. Tire Company was repre sented at the Convention by R. R. Rath bone, of the motorcycle and bicycle tir department; C. A. Gilbert, Pacific Coas general manager; C. H. Minto, San Fran cisco branch manager, and W. G. Collins who travels Northern California. A larg U. S. tire sign was soon in place in th Travelers Hotel lobby and was admire by all comers.

E. L. Rettig, Pacific Coast manager fo the Federal Tire Company, with head quarters at San Francisco, was a nearl arrival at the Convention. He was soo the center of attraction for both sexes as everyone wanted either a Federa badge or comb which he was passing ou as souvenirs.

John Roddy and W. Eagan, of the Sa Francisco branch of the B. F. Goodric Company, arrived at Convention head quarters on Thursday. Shortly after thei arrival, every delegate was seen with Goodrich cane and tire pennant.

Frank Woods, a director in the Harley Davidson Motor Company, of Milwaukee Wis., came in on Thursday and expresse himself as well pleased with the Conven tion. Mr. Woods has been touring th West for several weeks past and intend to cover some more territory before re turning to Milwaukee.

Putsman & Bowman, Excelsior distrib utors in Sacramento, rented an empt storeroom and turned it over for the fre accommodation of visiting motorcyclist mounts.

Bob Perry, who was on hand early i the week, gave a little talk to members o the Capital City M. C. on Tuesday nigh Among other things he said that th Sacramento track was almost too goo for him to ride on, as he had been o tracks that had lots of rough spots fo a long time.

Mrs. E. S. Perry, mother of Bob Perry the Excelsior star, arrived at Sacrament on Tuesday afternoon after a strenuou trip from Big Bear Valley, a mountai resort 100 miles from Los Angeles. Sh received a message from her son, afte his victory at Denver on the way to th F. A. M. meet, to go to Sacramento t meet him there. Fearing that there wa trouble, she came on to the Conventio City in great haste, riding all night ove mountain roads to Santa Ana, which wa reached at 5 a. m. On telephoning t this city, she found out that Bob wante to see her at the Convention meet, where upon she came in during the afternoon

Ben Bolt, the delegate from the Marys ville (Cal.) M. C., headed a party o riders to the meet. Among the delega tion were F. Rock and J. Young, bot motorcycle dealers; Auth Irving, J. E Nelson, Ira Hedges, Wallace Fetrow, A Galligan, D. Poole and B. Day.

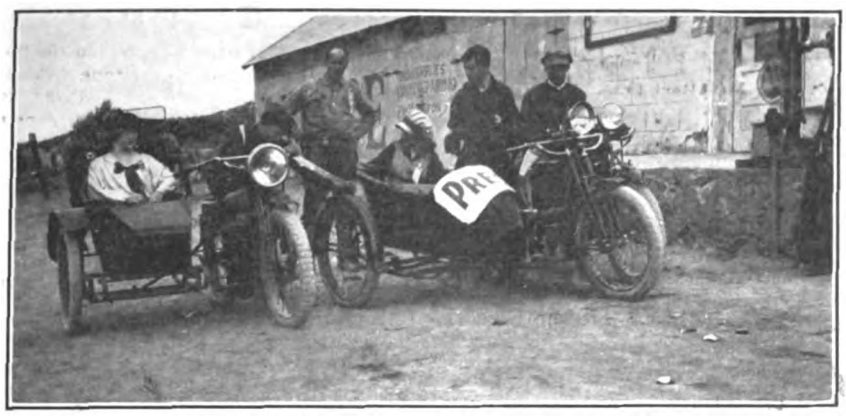
# Sunset Ramblers Visit 'Frisco Exposition

SAN FRANCISCO, Cal., July 26.—The Sunset Ramblers, who left Los Angeles on Sunday, July 18, and rode on motorcycles and sidecar combinations to the National F. A. M. Convention at Sacramento, have reached the Panama-Pacific Exposition today (Monday) on their homeward journey. After the convention closed they took the night boat down the Sacramento River to 'Frisco.

Reaching Bakersfield on their journey toward Sacramento on Tuesday morning, July 20, the merry ramblers welcomed to their ranks Edward Tice and a tandem passenger. Tice is a Harley-Davidson rider of note, and he was certainly a welcome addition to the party. Some of the boys of the Bakersfield Motorcycle Club rode with the ramblers until Delano was reached. The roads up to this point were very rough and sandy, while the heat was intense.

At Delano a short stop was made for water, and the tourists sought shelter from the sun. Into Tulare the roads were oiled and in much better condition than those encountered out a distance from Bakersfield. A dinner stop was made at Tulare. This city is the center of the grape belt, and it offered some wonderful attractions.

Near Goshen Junction the tourists were obliged to leave the State highway on account of the repairs which were then in progress, and hit some crude back-roads, which, though very poorly built, gave the ramblers an opportunity to get very impressive glimpses of this section of the Golden State. At Kingsburg connections were again made with the main highway. From that city there were twenty miles of well-paved roads into Fresno, where the ramblers entered a local garage at eight o'clock in the evening.



**Group of Sidecarists on the Sunset Ramble**

After sprucing up at the hotel, the riders sat down to a banquet which had been arranged by members of the Fresno Motorcycle Club at one of the French cafés. Later in the evening they were taken out to the amusement park, where visitors went in for a swim, bowled and enjoyed themselves thoroughly. This entertainment was furnished entirely by the Fresno boys, who were sincerely thanked by the ramblers for the fine hospitality which they had shown.

C. T. Smith, the Los Angeles Pope dealer, who had preceded the party in his car to Bakersfield and made a detour into the mountains for trout, met the ramblers in Fresno and invited them to a trout breakfast before they departed on Wednesday morning. The distance from Bakersfield into Fresno is 114 miles. Over that distance the only trouble encountered was on Paul Derkum's machine, the fork of which had broken. He had it brazed together and they came through in good shape.

Fresno was left behind at ten o'clock on Wednesday morning, July 21, and the road from there to Stockton was well paved. Arriving in the last-mentioned city at two o'clock the Sunset Ramblers had dinner and then left for Sacramento, which was reached at half past seven in the evening. One hundred and sixty-one miles were covered that day in a sweltering sun. At Sacramento the ramblers spent four delightful days participating in the F. A. M. convention.

# Skinner Wins in Colorado Hill Climb

OUT in the Pike's Peak region, where grades are steep and winding and difficult, the followers of the motorcycle have been forced to adapt themselves to the impediments of their mountainous roads. Hence, when the sacred circles of the faithful form at the headquarters of the various dealers in Colorado Springs, the discussion naturally revolves about "power" instead of "economy"—"gear ratios" in preference to "control types."

Now this essential quality, power, has long been a source of unsettled argument and keenest rivalry among Colorado adherents of the different makes of machines. Therefore, when a hill-climb was proposed recently as an official, final test of superior power, the plan was welcomed, and accorded hearty support by the Middle Western division of the "benzine bikers." Arrangements went forward with typical Western vim and enthusiasm. "Jones Hill," a steep gradient near Broadmoor, a suburb of Colorado Springs, was selected for the trials.

Sixteen of Colorado's finest speedsters were entered in the contest and tried their luck on the hill. One by one the riders hurled their big twins up the grade—treating distance and gravity, and even Father Time, in a really shameless fashion.

Those of us who have tried, know that an altitude of fifty-three hundred feet ordinarily kills compression, and knocks about four of our seven pet horses in the head. Therefore, to make fast time on Jones Hill, finer adjustment, better motor condition, more accurate gear ratio, and more skillful driving were necessary.

After each of the riders had taken his allotted three trials, the results were found to be as follows: First, Charles Skinner, Indian, time 15⅖ seconds; second, Emmett Knight, Excelsior, 15 3-5 seconds; third, Vanderhof, Harley-Davidson, 16⅕ seconds. It is a significant fact that Skinner twice made the climb in the same winning time of 15⅖ seconds—proving that his victory was no stroke of luck, but an evidence of real speed and power.

Price, a crack rider of the Excelsior stronghold, was the victim of misfortune. On his first official ascent he took a bad fall, which while not injuring him seriously, put him out of the running. He had been regarded as a strong contestant and his enforced withdrawal seriously crippled the Excelsior following.

Immediately after the regular program an elimination race was run off by the machines which had won the second and third prize. Vanderhof again rode the Harley, while George Flynn, a local dispenser of "speed-dope," mounted the Excelsior. Flynn won, after one of the most spectacular ascents of the day.

## AFTER AUTO RECORD

San Francisco, July 26.—Two San Francisco Bay Indian riders—Happy Alzina and C. Lutgens—the former connected with the local Indian distributing agency, and the latter Indian agent at Alameda, plan to go after the automobile record for the distance between Los Angeles and San Francisco. The attempt to wrest the honors from the automobile probably will be undertaken soon after the F. A. M. meet at Sacramento. One of the riders intends to take the Coast route and the other the valley. The details of the race against time have not been worked out as yet.

# Relay Message Reaches Frisco Sunday Afternoon, July 25, After Eventful Dash

SAN FRANCISCO, Cal., July 26.—After being chased twelve miles by an over-zealous motorcycle cop, who fired six shots at his tires without scoring a bulls-eye, A. Chelini, mounting a Pope machine, completed the last lap in the Transcontinental Motorcycle Relay and rode into this city at 4:30 yesterday afternoon with President Wilson's message.

Manager John L. Donovan's revised schedule for the dash across the country provided for the delivery of the message in San Francisco at 5 a. m. on Saturday, but considering the road conditions with which the relay riders had to contend, all the way from Buffalo westward, it is argued that the arrival of Chelini at 4:30 Sunday afternoon is a wonderful demonstration of the durability of the motorcycle and ample proof of the gameness of the messengers who participated in the coast-to-coast journey.

### Severe Obstacles Encountered

The complete story of the trials undergone by the relay riders and of the many ingenious schemes resorted to in order to traverse the route at all, would make up a fair-sized book, but it suffices to say that the worst traveling conditions conceivable under stress of war could not subject machines and riders to a more severe trial than that which has just been successfully completed.

Hampered at many points by motor-cops who were determined to uphold the prestige of their local department at any cost, and always facing the dangers incidental to high speed over bad roads—perils which were multiplied a hundredfold at night—the relay messengers stuck with admirable nerve to what at times seemed a hopeless task. At many places the roads had been under water for days, and several bridges were missing at strategic points. Riding railroad ties was a quite common expedient.

### Chelini Outrode Motor-Cop

Chelini, who had the honor of turning the President's message over to Mayor Whitney at the Presidio in San Francisco, received the precious document from "Dud" Perkins at Tracey, Cal., at 2:15 yesterday (Sunday). Perkins covered the relay from Sacramento to Tracey over roads which were cut up at many places by construction work, in one hour and thirty minutes.

Chelini got away from Tracey on the jump and made good time. It was at Hayward that he encountered the objecting motor-cop. Chelini was ordered to stop, but instead he let out another notch of speed. The motor-cop then took up the chase, using his revolver from time to time, and did not give up the pursuit until Chelini reached Oakland. The Pope rider completed the spectacular dash with his motor hitting on one cylinder.

He arrived in Oakland at 3:45 p. m. Sunday and was taken across the bay in 45 minutes in a launch furnished by the State Fish and Game Commission. He landed in San Francisco at exactly 4:30 and was then paced by a police automobile in his dash to the Presidio.

### Fast Trip by Emblem Team

One of the fastest runs on the cross-country dash was made on Relay 7 from Buffalo to Erie. This stretch was covered by the Emblem team in 2 hours 21 minutes for the 112 miles. The relay included a 12-mile ride through the city of Buffalo and suburbs, and there were other delays for which the riders were not to blame in the 100 miles between Buffalo and Erie. In spite of the fact that a slow pace was necessary while riding through the city, and over some of the patches of bad roads, the Emblem riders carried the message at a speed of 50 to 60 miles an hour.

While some road trouble had been experienced on the relays east of Buffalo, the most severe trials began after the messengers left Toledo for the run to Bryan. The message was carried out of Toledo by Alfred Oberwegner, escorted by Roy Carns and Bob Trowbridge, all using Henderson motorcycles. The roads had been flooded by heavy rains and some time was lost in reaching Bryan, but the riders on the next relay were started in what was considered good time for South Bend.

### Magill to the Rescue

The relay from South Bend to Chicago proved a heart-breaker. When the South Bend riders did not arrive at East Chicago, telephone inquiries brought the information that all the dispatch riders had been held up along the way. D. A. Magill, of the Hendee Mfg. Co., with Joe Dell, on an Indian motorcycle and sidecar, started out to the rescue. They found the relay riders stranded on the bad roads and trying desperately to make repairs, and the message was picked up and hurried into Chicago by Magill and his companion. The message reached Chicago at 7:15 a. m. on Wednesday, July 21, ten hours and forty-five minutes behind Manager Donovan's schedule.

The dispatch riders out of Chicago were Hawkins, Sawyer and Johnson, on Thor motorcycles. They got away at 7:16 a. m. Owing to the heavy rain which had fallen during the night these riders were compelled to take to the railroad ties for a good part of the run to Sterling.

### Excelsior Riders Lost the Road

The message arrived in Victor, Ia., at 3.25 p. m., on Wednesday, July 21, when Raymond Shay, William Novotny and Ray Holden, mounting Excelsior machines, pulled in after a hard struggle from Davenport. One minute later, or at 3:26, three Harley-Davidson riders, William Thul, Carl Larson and Vern Soderberg, started for Des Moines. The Excelsior riders lost the road on the way into Victor and were delayed 25 minutes.

Des Moines was reached at 6:05 p. m.;

Emblem Relay Riders, Buffalo to Erie: J. M. Warwick, Ward Hughson and Ray Frawley

Digitized by Google

Columbus, O., at 5:42 Thursday morning, Kearney, Neb., at 9:30 a. m., and North Platte, Neb., at 12:45 Thursday afternoon. The relay riders who brought the message into North Platte were C. O. Fisher and S. S. Nichols and Elmer Mermee, on Harley-Davidsons. They were delayed because of 10 miles of mud near Lexington and lost 45 minutes. The riders who started on the succeeding relay were Ralph Lutholz and George Easton, on Indians. They left at 12:45 p. m., Central time.

**In Rawlins 5:10 A. M. Friday**

The messengers reached Julesburg, Colo., at 3:10 p. m., on Thursday, July 22, Cheyenne at 8:05 p. m.; Pine Ridge station at one o'clock Friday morning, and Rawlins at 5:10 a. m. Friday.

Ogden, Utah, was reached at 9:18 p. m. on Friday, July 23. Twenty minutes was clipped from the allotted time between Salt Lake City and Ogden. Ray Kelton and Ray Shurtliff left Ogden thirty seconds after the arrival of the previous relay messengers, with Kelton as their first station.

Vern Claflin pulled into Elko, Nev., at 1:25 a. m. on Saturday, July 24, having made the run from Cobre in three hours and fifty minutes. Claflin gave a remarkable performance, but was fifty minutes behind the schedule laid out for the run between Cobre and Elko. He had a bad fall in Elko in turning a corner, but it is understood that his injuries were not serious.

**"Warhorse" on the Job**

E. G. Baker and Leo McCarthy picked up the message half a minute after Claflin's arrival in Elko and started to cover the relays, from Elko to Reno.

Baker, mud-covered and tired, but still very much in the game, roared into Reno at 4:54 Sunday morning, July 25. In covering the four relays Baker had traversed 347 miles of good, bad and indifferent roads in 16 hours and 40 minutes. McCarthy was still with the messenger as escort.

Baker covered the 84 miles from Elko to Battle Mountain in two hours and ten minutes, opening ten cattle gates on the way. He took on oil and gasoline at Battle Mountain and then rode 25 miles on the railroad ties and over a stretch of desert on the way to Winnemucca. Having covered 72 miles, he arrived in Winnemucca at 6:50 p. m. On the last leg into Winnemucca he encountered a cloudburst and traveled with the water only a little below his carbureter for a considerable distance.

**56 Miles of Railroad Ties**

Baker and his companion then rode railroad ties 56 miles, to Madera, where 45 minutes was devoted to taking on supper oil and gas. The messengers reached Lovelock at midnight, and later, when nearing Fernley, it was necessary to build bridges over a number of cattle-guards. In the alkali flats near Fernley it was impossible to travel more than 10 miles an hour for a time—and that on low gear.

The message-bearer and his companion reached Hot Springs at daybreak, having attained an elevation of 5,000 feet. They rode 25 miles of cobblestones into Fernley, and on leaving this place crossed a sand dune and traveled for five miles with the sand nearly hub-deep.

The run from Wadsworth to Reno was made in 55 minutes, the distance being 35 miles. In Reno a big crowd awaited the riders and they were given an ovation as they pulled up at the relay station. The total mileage covered by Baker and McCarthy on railroad ties was 137, practically all of it at night!

**The Message Reaches Sacramento**

Art Swan and Charles Clegg covered the relay from Reno to Colfax in 3 hours and 29 minutes, the distance being 84 miles. This beats the best automobile time by 15 minutes. The route was in bad condition, especially where the riders crossed the divide at an elevation of 11,000 feet.

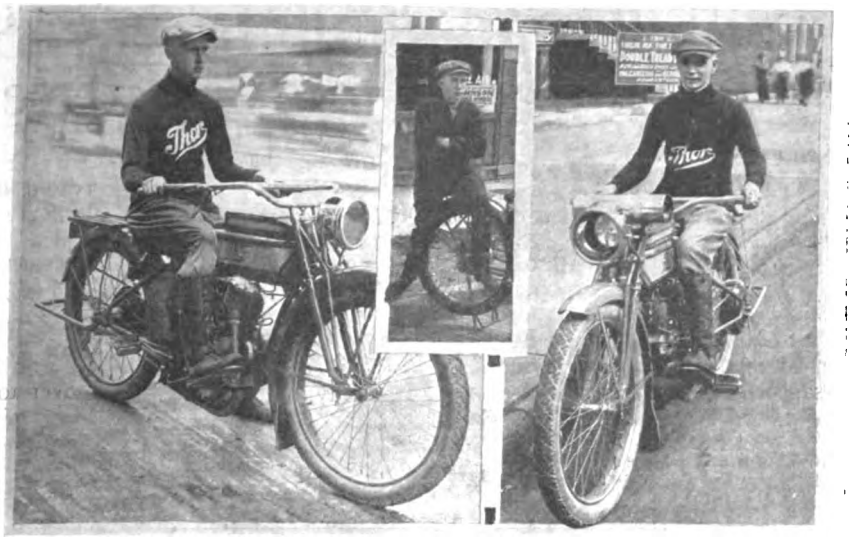
Schubert Heft carried the message out of Colfax at 10:15 a. m., accompanied by Arthur Trumbull. Trumbull blew out a tire five miles outside of Colfax, and Heft proceeded alone. He reached the capitol grounds in Sacramento at 12:15 on Sunday, having held his rear mudguard in position for the last 18 miles. It was broken in a bad rut.

From Sacramento to Tracey the message was carried by Perkins and Carter. They arrived in Tracey at 1:54 p. m. on Sunday, having covered the 70 miles in one hour 39 minutes. At Tracey the message was turned over to Chelini, and he rushed it on to San Francisco as described in the opening paragraphs.

**Machines in the Relay**

Following is the list of motorcycles used in carrying the President's message across the continent:

Relay A, Indian; B, Henderson; C, Flying Merkel. Relay 1, Excelsior; 2, Thor; 3, Emblem; 4, Excelsior; 5, Harley-Davidson; 6, Pope; 7, Emblem; 8, Dayton; 9, Indian; 10, Henderson; 11, Merkel; 12, Cyclone; 13, Thor; 14, Indian; 15, Excelsior; 16, Excelsior; 17, Pope; 18, Dayton; 19, Excelsior; 20, Indian; 21, Harley-Davidson; 22, Indian; 23, Excelsior; 24, Excelsior; 25, Excelsior; 26, Indian; 27, Harley-Davidson; 28, Harley-Davidson; 28-a, Thor; 29, Excelsior; 30, Harley-Davidson; 31, Indian; 32, Indian; 33, Indian; 34, Indian; 35, Harley-Davidson; 36, Indian; 37, Excelsior; 38, Harley-Davidson; 39, Pope.



**Thor Message-Bearers, Chicago to Sterling, Ill.; Sawyer, Hawkins and Johnson**

## CHICAGO RELAY BEAT TRAIN

Chicago, Ill., July 26.—The time figures made in the relay from Chicago to Sterling, which was ridden on Thor machines by Harry Sawyer, Hawkins and Johnson, has aroused local motorcycle fans to a high pitch of enthusiasm because the motorcycles crimped the fastest train time. The time of the relay from Chicago to Sterling was two hours and fifty minutes, whereas the fastest train time is three hours and five minutes, and the train distance is twenty miles shorter. The Thor relay averaged forty-two miles an hour, despite the fact that the roads were in the worst possible condition, due to the severe rainstorm which broke the previous day. Harry Sawyer, the Thor dispatch bearer, left the Windy City at 7:20 a. m., and arrived in Sterling at 10:10. Ten minutes behind Sawyer came Hawkins, while Johnson arrived fifteen minutes after Hawkins had entered Sterling.

## INDIANA RUN DIFFICULT

Indianapolis, Ind., July 26.—Though no official returns have as yet been received, six riders are believed to have finished the eighteen-hour Southern Indiana endurance run of the Indianapolis Motorcycle Club, held on Sunday, July 25.

Present indications point to the Indian team, composed of Nels Hodgin, George Vanstaden and Al Appel, as the winner of the team trophy. All are said to have finished with perfect scores and to have checked in at Gosport, the secret control, within forty-five seconds of the schedule time. Jack Carr, Indian; John Merz, Excelsior, and Ben Gilchrist, Excelsior, also claim to have made perfect scores.

The course was a stiff one with the result that most of the riders quit before half the distance of 305 miles was covered. There were twelve starters in the run.

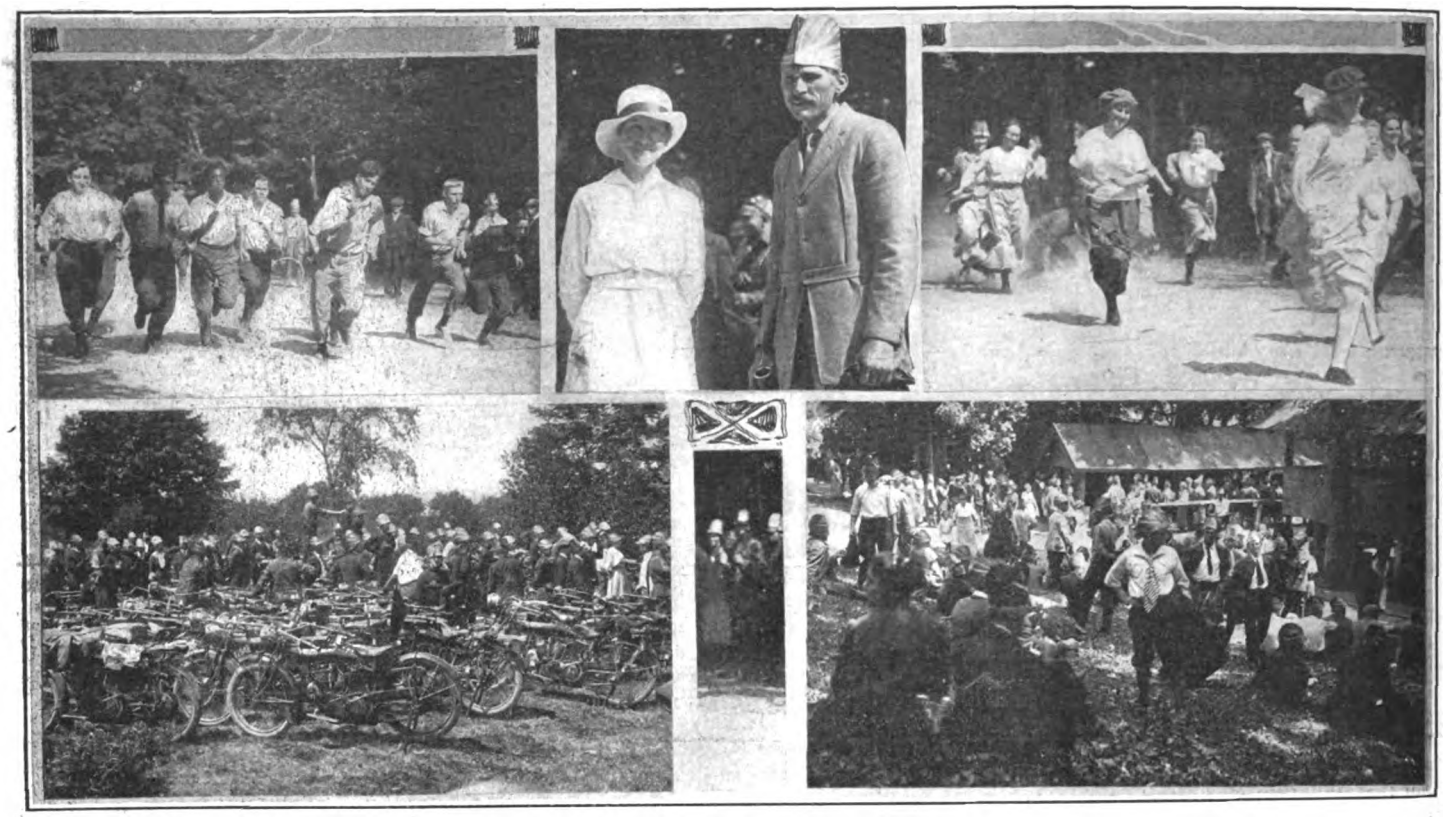
# Over Twelve Hundred at Swenson Picnic



**Upper Left, Robert Denney, in Center, Winning Lean Men's Race, Third Feature of Athletic Program; Center, Mrs. Swenson with Chieftain B. A. in War Bonnet; Upper Right, Miss Pearl Domler Crossing Line First in Tandem Girls' Dash; Lower Left, Part of Solo Mounts Parked Outside of Grounds; Right, Near Refreshment Booth.**

PROVIDENCE, R. I., July 26.—Those who traveled the roads in the vicinity of Providence yesterday morning, between the hours of dawn and noon, were astonished at the number of red motorcycles and sidecars speeding toward the Rhode Island capital. They came singly, in pairs, and as many as 30 in one group, and all were headed for Exchange Place to join in the 1915 annual Indian pow-wow and picnic given by B. A. Swenson, the Indian man. And they had the best of weather all day.

### Count Showed 602 Machines

From the early hours of Sunday morning until nearly 2 o'clock, the Swenson establishment at Broad and Friendship streets resembled the shipping department of a good sized motorcycle factory. The streets were lined with soloists with their mounts, sidecarists with their passengers and pennant-hung combinations and the inevitable tandem couples, the passengers in most cases being of the fair sex. As fast as the riders assembled, they were directed to Exchange Place, and from thence guides headed parties for the Palace Garden, seven miles out of the city, where the pow-wow and "eats" were to be enjoyed simultaneously. The guides left every half-hour from 8:30 until noon, and there were never less than 40 machines trailing each leader. When the mounts were parked at the Gardens and a count was taken at one o'clock, it was found that 134 sidecar combinations, one van, one sideseater, and 466 solo and tandem Indians were resting, awaiting those who were feasting inside the grounds.

Registration of guests of Chieftain Swenson was started with the arrival of the first party, but before the fifth squad arrived it was found necessary to abandon any idea of getting the names of all who attended. A count of coupons issued by B. A. Swenson in order to "check up" on the ice cream, soft drinks, chowder and sandwiches consumed, showed that 1,221 Indian enthusiasts participated in the picnic. Some of these had followed the guides to the Garden, but a large proportion had come in on their own, from as far away as New Jersey, Vermont, New Hampshire and New York. All New England, who owned or rode Indians, was well represented at the pow wow.

As fast as each guest passed the gates, he or she was given a war-bonnet and a ticket with coupons, entitling to the string of "eats" that is inevitable at all the Swenson affairs. The huge crowd overflowed the Garden and spread itself over the grassy lawns in the vicinity. Up the dusty road to the well-paved boulevards leading into Providence there was a continual stream of riders on red machines in the afternoon, both going and coming. Laughs went up frequently when riders struck the deep sand-stretches on this road and made desperate efforts not to come off. In spite of many spills there were not even scratches to mar the enjoyment of the skidding motorcyclists.

After all had eaten their fill, athletic sports were started. The races led off with a 100-yard dash for fat men, no times being taken. Amid cheers from the spectators who lined the course four deep, John Vincent, of Providence, crossed the line a winner, with B. Rose, Greenwood, R. I., second, and Louis Davis, of Providence, a good third. It was next the turn of the sidecar girls, nine of whom entered in a 50-yard dash. Seven only succeeded in finishing, the others falling on the way. Miss Elizabeth Orencole, of Providence, was the winner, with Miss Lillian Carpenter, of South Weymouth, second. Misses Mary Gauthier and Ethel Gerlach, both of Providence, obtained third and fourth places, respectively.

### The Lean Men's Race

Following the sidecar girls' sprint, came a 100-yard dash for lean men. It was a close contest, but Robert Denney, of Boston, crossed the line a winner by a head over John Davis, of Providence. R. Whitney, of Middleboro, Mass., came third and H. McLane, of Taunton, Mass., was fourth. The tandem girls—those who came on tandems—followed, Miss Pearl Domler, of Providence, coming first over the 50 yards of the course, with her sister, Pauline, second, and Miss Mary Taylor, of Peacedale, R. I., third. Fourth place went to Miss Helander, of Montello.

A 100-yard race for men followed. There were 40 entries and four heats had to be run, the first four in each to qualify for the final. The final heat showed Paul Balaise, of Hatfield, Mass., to be the best speedster, with O. Cornell, of Cranston, second, and R. Denney, of Boston, third. Charles Stedman, of Cambridge, Mass, was fourth. The race, for 50 yards, for tom-

Digitized by Google

...boys which was sandwiched in between the heats of the men's 100-yard, showed Miss Irene Dunley, of Cranston, to be the best lady sprinter, with Miss Pauline Domler, second, and Mrs. Helander, of Brockton, Mass., third. Miss Frances Loeb, of New York, came fourth. The final event was a two-mile run, which was won by C. A. Domler, of Providence, with L. M. Dohainson, of Somerville, Mass., second, and Harold Edman, of Eden Park, R. I., third. A. Marco, of Providence, was fourth. Each winner, in his or her event, was given a valuable prize, and at least four or five prizes were offered by Captain Swenson for the first four or five in each race.

The three-legged race, for mixed pairs, once more demonstrated the superior speed qualities of the Domler and Helander families. Paul Domler and his youngest sister came first, with Mr. and Mrs. Helander second. John Kay, of Providence, with Miss Pauline Domler, was third, while Roy Cobb and Mrs. Fuller were fourth. Miss Frances Loeb, of New York, and Jack Neiss, of Newark, N. J., were the fifth to finish.

The pow-wow was all over at 5:30 in the afternoon and the Palace Garden was once more deserted, the only sounds being the gradually-dying notes of the exhausts of the departing Indian machines.

## POW-WOW PERSONALITIES

The Hendee factory forces were represented by John J. O'Connor, of the publicity department; Eugene Madden, of the engineering staff; J. H. O'Brien, of the parts department, and J. B. Brady, of the outside advertising staff. Z. Godin and Mrs. Godin also came over, as did J. Barrows, E. Drake and A. A. Anderson.

E. H. Tracy, of Cleveland, Ohio, came with his bride in a sidecar combination. It is reported that the recently-married Mr. T. forgot to register his better half at the Narragansett Hotel, until reminded of the fact by the Godins. The Tracys came with the Indian "bunch" from Springfield on Saturday night, and left on Sunday evening for a final visit to the big factory.

For once, 'Gene Madden did not ride out of Springfield. He has a damaged rib, and therefore had "Long John" O'Connor do the honors with a sidecar. The scenery en route was reported as fine, except when it was marred by a stretch of tarred dirt road near Uxbridge, Mass.

J. H. O'Brien came over solo, and did a lot of sidecar driving while at the picnic. He had his New Jersey M. C. gold medal very prominently displayed where everybody could appreciate it.

J. B., otherwise "Old King," Brady, who is now taking it easy in Providence on his vacation, did good work in boosting the picnic with his sidevan. He acted as guide for a number of parties to the Garden.

Those who attended previous Swenson picnics missed "Eddie" Swenson's work as a sidecarist. Eddie is up in Maine in camp for the summer, and could not get home in time for the affair. "Gasoline Gus" Sundin, who is Eddie's touring partner, was right on the job all the time, however.

D. R. Walls, advertising manager of the Splitdorf Electrical Company, of Newark, N. J., came up in a sidecar with Jack Neiss, of the Splitdorf testing force, from Newark. Both showed the beneficial effects of their trip when they arrived on the grounds. They left for Springfield to visit the Indian wigwam on Sunday night.

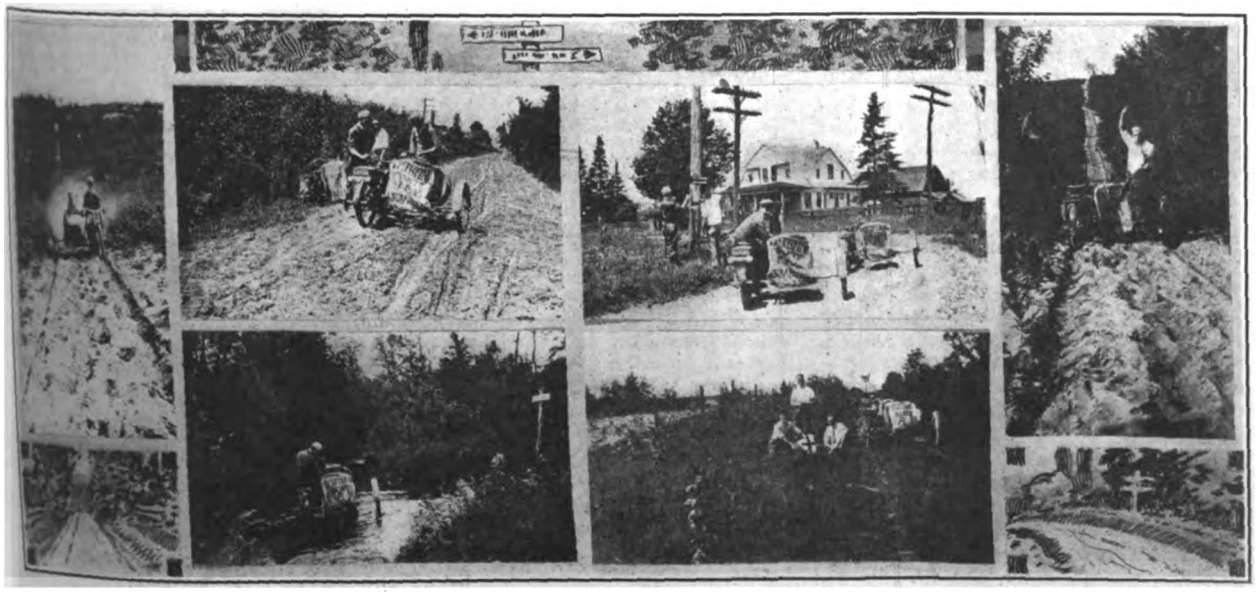
M. P. Sullivan, who represents the Benton sparkplug "everywhere," came up in his car from Willimantic, Conn., to attend the pow-wow. M. P. is a veteran motorcyclist, as well as an automobilist, and has a Ford runabout that can do 45 miles per hour on the road without whip-sawing. He demonstrated the fact to **Motor Cycle Illustrated's** representative.

# Pathfinders on Michigan Run Course

GRAND RAPIDS, Mich.—Byrne Hull, Charles Blakeslee, Tom Martin and Police Commissioner "Happy" Scherer, who composed the path-finding party for the Grand Rapids M. C., returned a few days ago from a five-day exploration trip over the rugged and unsettled country of northern Michigan. Their object was to map the course of the Michigan State A. A. M. endurance run, which will be held on July 31 and August 1, starting from this city. Their reports show that much of the trip will have to be made in middle and low gear.

The first leg of the course, Grand Rapids to Reed City, 78 miles, was over pretty good roads, according to the path-finders. From Reed City to Tustin, however, the course winds in and out through the woods, with lots of stumps and rocks jutting out of the sandy surface. From Tustin to Marion, only fair roads were encountered, but from Marion on it was a case of going through pine-slashings and shrubbery over the Michigan plains, all the way to Leota. Sidecarists will have trouble here, say the path-finders, as there are many stumps to dodge or pass over. A nice ford through Cranberry Creek—deep mud bottom—will also help to make things interesting on the stretch out of Leota.

More woods are met with after fording the creek; then comes Harrison, the noon control on the first day. The first afternoon leg leads to Gladwin over the dreaded 1914 Bay City M. C. course to Bay City, the night stop. At this place, the Bay City Club will handle the night control. From Bay City the run will go through Saginaw, Flint, Owosso, Lansing, St. John, Battle Creek and Kala-



Left, Typical Sand Road Near Leota; Next to Right, Tire Repairing on Highway; Pathfinding Sidecars in Big Rapids; Extreme Right, Part of Course Through Pine Woods; Lower Left, Fording Cranberry Creek; Lower Right, Near Tustin

Digitized by Google

mazoo, finishing at the *Herald* building in this city on Sunday night. The total mileage is calculated at 525, but official figures on this point have not yet been compiled.

The run will be thoroughly posted. Large letters "R" and "L" will be used to designate right and left turns, with crosses to indicate straight ahead. These symbols will be painted in red and white along the course. Checking stations will be established every 20 miles of the entire distance, and contestants will be required to check in on the minute, with a three-minute allowance for variation in watches. The run has been designed to demonstrate the endurance and stamina of both rider and machine, and on the performance of both awards will be made. There will be no secret checks, no awards for consistent running, and the element of luck will be eliminated as far as possible. A reasonable schedule is provided for.

The path-finders state that machines not equipped with powerful motors and two or three speeds will have difficulty in getting through the run. A long list of trade entrants, as well as of private owners, is assured. Entry blanks and general information can be had of Tom Martin, care of the *Grand Rapids Herald*, this city.

# Baltimoreans Picnic as Dealers' Guests

BALTIMORE, Md., July 26.—No motorcycle affair in this vicinity started off and ended with such a bang as the dealers' picnic, which was held under the joint auspices of the local and the county motorcycle dealers at the "Chick" Thomas Shore on Black River, Sunday, July 25. Leaving early in the morning the various groups of riders assembled at the stores of their respective dealers and then met at a central point from which they rode to Fort Howard.

Here a baseball game was held between the Indian and the Harley-Davidson team. Both teams were confident of victory and eager to vanquish their opponents. The game opened with Capt. French's men at the bat and Bert Heinz on the mound for the Harley-Davidson boys. Bill Randall landed on one of Heinz's curves, got a two bagger and the game was on in dead earnest. Heinz got busy. The next two men struck out. Then Bob French stepped up to the bat and walloped a single. Will Snyder, the next man, landed on Heinz's ball for a home run. The following man up struck out.

H. A. French, on the mound for the redmen, got some clever curves out of the old pill. He took three scalps in succession, in spite of the fact that his baseball training had been somewhat neglected the last few years. The second inning proved to be a good one for Heinz, who held himself together and didn't allow a single man to walk. Umpire Boyd, while cool and self-possessed, was hooted and howled at for playing favorites.

The heavy hitting of the Indian team in the third inning caused Heinz to retire and Meyers, who succeeded him, could not puzzle the batters for the remaining innings. The redmen got away with the game to the tune of eight to two. The Indian team now has three victories to its credit.

After the game was over, the picnicker saw the sights at Fort Howard and then made a bee-line for "Chick" Thomas Shore, where the hosts got busy. There were ice-cold beverages on tap and barrel after barrel of crabs were put up, together with sandwiches and plenty of fresh garden vegetables. Appetites were certainly keen, for everything disappeared from sight in short order.

The tug-of-war between the two teams, captained by Bob French and Charles Huber, proved to be a draw. The battle lasted half an hour, but neither the Harley-Davidson nor the Indian team would give in.

There were nearly three hundred motorcycles of all makes and descriptions on the grounds, and nearly five hundred picnickers were in the huge crowd. There was a generous sprinkling of ladies and a number of representatives of the two clubs in Washington, D. C. The dealers who were responsible for the success of the picnic were: Heinz Motor Co., Clayton Sandruck, Excelsior Motor & Supply Co., Maryland Cycle Co., and Howard A. French. The Maryland Motorcycle Club assisted in the arrangements.

# Ellis Takes Mississippi Championship

INDIANAPOLIS, Ind., July 24.—Johnny Ellis, of Indianapolis, copped the 100-mile race for the Mississippi Valley championship against a field of fourteen fast riders on the local track, July 24. Ellis rode a stock seven Indian and made two stops which cut his time down materially.

His time for the century was 99 minutes and 22⅕ seconds. This race established a splendid record for Ellis, as he has won three consecutive hundred-mile races on the local track against every good rider in the country inside of the last year. Ellis finished four laps to the good of Brier, Harley-Davidson, the second placer.

The riders took three laps to get started, and Montgomery, on an Excelsior, took the lead, which he held for ten laps. Wolters, riding a Harley-Davidson, took up the pace from here and led until he was forced out of the race in the seventieth lap by a spill caused from dodging a spectator. Wolters suffered a fractured ankle and injuries about the head. Brier struck Wolter's machine and fell breaking two knuckles, but regained control of his mount and finished in second place.

Montgomery went out of the race with bad tires about the eightieth lap. Jim Davis experienced trouble from the start. Time and again he got back into the race and reeled off laps at a dizzy pace, only to fall again with motor trouble. He finished the race in third position, while Shaffer, on an Excelsior, came in fourth.

The track was in poor condition, which accounts for the slow time of Ellis. He made the same distance last year in 94 minutes and 3 seconds. Sargent, on an eight-valve Indian, had a leaky tank to start with, but after getting fixed up rode like a madman and made the fastest time of the race. Sandman and Kempt, from Louisville, had mechanical trouble early and retired. This race was the first of the season promoted by the Indiana Racing Association, and was well attended. Summaries: John Ellis, Indianapolis (Indian), first; time, 99:22⅕. Bill Brier, Milwaukee (Harley-Davidson), second. Sam Davis, Columbus (Indian), third. C. Shaffer, Muncie, Ind. (Excelsior), fourth.

Bill Laurie, of the Consolidated Motorcycle Club, of Indianapolis, proved to be not only the fastest rider in the club, but the speediest eater in the five-mile novelty race, the curtain raiser to the 100-mile race of the Indiana Racing Association. He so far outclassed all competitors at the eating game that he was not forced to extend his Indian. George Spangler, on a Harley-Davidson, took second. He was not in Laurie's class as an eater.

### TO HOLD 300-MILE RACE ON SEPT. 5

Chicago, Ill.—The Speedway Park Association, of this city, announces a 300-mile race for September 5 on the new two-mile board track at Speedway Park. The race will be open to all comers using machines of piston displacement not exceeding 61 cubic inches. The field will be limited to 40 riders. Purses aggregating $2,500, have been offered, and a further inducement to the winner will be the title of "American Champion."

The new track at Speedway Park is considered by many to allow of greater speed than any two-mile track in the country. On June 24 an automobile race meet demonstrated that this track was exceedingly fast, and several new American records were set up on that occasion. It is expected that with a fast track and good inducements in the shape of big prizes, that the cream of the country's speedsters will be lined up on September 5, ready to start.

The list of prizes offered so far follows: First prize, $1,000; second, $600; third, $300; fourth, $250; fifth, $150, and sixth prize, $100. To the rider whose machine leads at 100 miles, a special prize of $50 is offered, and another of the same value to the leader at the 200-mile mark. Additional special prizes are expected to be offered.

### SILVER LAKE RACES POSTPONED

Akron, O., July 26.—The races which were to have been held at Silver Lake Park in this city on July 31 have been postponed until Sunday, August 7.

# THE F. A. M. ELECTIONS

WE congratulate the delegates to the F. A. M. National Assembly at Sacramento upon their work of last week, and have no hesitancy in predicting that the results will be thoroughly worth while. Our report of the business sessions, printed elsewhere in this issue, shows that there was practically none of the empty controversial stuff which has characterized so many preceding F. A. M. conventions. Instead, the delegates handled the situation as though they were determined to do some real constructive work, and it looks very much as though they had succeeded.

In the first place, the Convention did the expected, as well as the wisest thing, in re-electing to the presidency, A. B. Coffman of Toledo. The fact that Coffman was re-elected by acclamation proves his strength and popularity beyond all question. In view of the fact that his re-election took place something like 2500 miles away from his home town, and that those who elected him were, in many cases, total strangers, it is evident that Coffman's ability is recognized in all parts of the country, and that his efforts towards rebuilding the F. A. M. have given him a nation-wide reputation. He has earned this reputation, and can be depended upon to live up to it. He has steered the Federation away from the rocks towards which it was heading a year ago. With the entire situation well in hand, and with the backing of a capable Board of Directors, President Coffman is now in position to follow up his preliminary work with important results.

The new directorate is easily the strongest the F. A. M. has ever had. Supporting Coffman as President, Pixley, a Pacific Coast man, as First Vice-President, and Campbell, a New Englander, as Second Vice-President, we have a board which is thoroughly representative of the best there is in the organization. The most capable men in the old Board have been retained, while the new members are sure to add to its strength.

Easily the biggest task before President Coffman and his fellow officials has to do with plans for increasing the Federation membership. For years that has been its weakest point, and it is gratifying to note that the Convention adopted means which will undoubtedly lead to rapid membership growth. The F. A. M. cannot reach the 50,000 mark in one year, but every official and, in fact, every member, should do all in his power to double the present membership. There should be at least 20,000 or, better still, 25,000 members in good standing this time next year. It is by no means an impossible task, but at the same time, something which cannot be accomplished without a goodly measure of effort intelligently directed. During the past year, the F. A. M. has earned the good will and active support of every person who rides a motorcycle or is in any other way interested in the sport. If only one-tenth of those interested were members of the Federation, its revenue would be nearly double what it is now, and it would be in a position to take up and solve many problems which lack of the necessary funds, on account of too small a membership, places outside the reach of the officials of the national body.

The organization is now an excellent one and, with a moderate expense account available, the F. A. M. will soon be able to provide effective protection to the interests of the motorcycle industry and of every motorcycle rider in the United States.

## NEW LOWENBERG COAT

Riders who like to minimize their touring clothing requirements will be interested in the new Reversible Corduroy "Everdri" coat made by the Lowenberg Co., of 58 Colden street, Newark, N. J. This coat, which is the latest addition to the firm's line of sports clothing, is particularly adapted to cold, clear and stormy weather, by reason of its cut and design, as well as the nature of the material used in it.

The coat is cut double-breasted and has a high storm-collar. Wrist-tabs are fitted to protect the wearer against rain and wind, these tabs acting equally well for either face of the coat. The corduroy side is to be employed for cold weather wear, while on reversing it the garment becomes a corduroy-lined "Everdri" coat. This latter is designed to be used in rain or stormy weather.

The new Lowenberg coat, giving thus two garments in one, has been designed to eliminate the carrying of a raincoat or poncho. It is a companion of the firm's well-known combination motorcycle and hunting coat "Dridux," which is of Norfolk cut. Both this material and the "Everdri" are exclusive fabrics of the Lowenberg Co.

In view of the strong demand for the Lowenberg line of sporting clothing last season, L. N. Smith is making preparations for an early start in order to visit all the large cities east of the Mississippi. He will show the fall line of clothing, with its recent additions.

## LARGER BURD FACTORY

The Burd High Compression Ring Company of Rockford, Ill., is beginning the installation of machinery in an additional new factory building containing 30,000 square feet of floor space. This has been found necessary to enable it to make deliveries on its large contracts, and to start work on business that has been waiting for this factory increase.

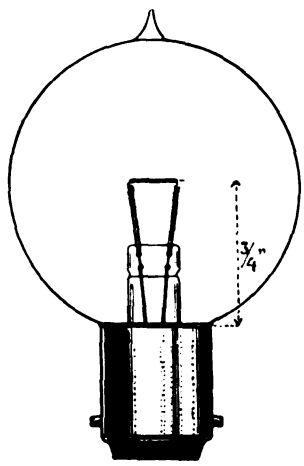
## HARLEY PRAISED AS INVENTOR

Milwaukee, Wis., July 28.—William S. Harley, the master mind of the Harley-Davidson engineering force, comes in for considerable praise in a recent newspaper article appearing in the Milwaukee *Journal*, dealing with the proposed advisory board now being formed by Secretary of the Navy Daniels and the fact that N. A. Christensen, inventor of air brake devices, a Milwaukeean, has been chosen for a place on the board.

"Perhaps no other city of its size has produced so many inventors," remarks the *Journal*, in commenting upon the part Milwaukee has played in the development of the country in the way of new mechanical improvements. In the list of prominent inventors that follow, Mr. Harley's name is second, preceded only by that of Mr. Bruno Nordberg, the veteran steam engine and air compressor genius.

## NITROGEN-FILLED JAEGER BULBS

In order to obtain the maximum of lighting power combined with the minimum consumption of electric current, the H. J. Jaeger Company, of Hoboken, N. J., has placed on the market a series of bulbs known as the "Jaeger's Nitros." These bulbs, which are especially adapted to use in motorcycle headlights, differ from the regular form of tungsten-filament bulbs in having a spiral filament surrounded by nitrogen and other gases, instead of having the filament glow in a vacuum.



**Jaeger Nitro Bulb**

The presence of the gases in the bulb allows of a higher incandescence of the filament without disintegration of the wire composing it, and the result is a brilliant white light. The form of the wire is such as to concentrate the light in a direction parallel to the axis of the lamp, thus rendering it of great value in motorcycle service where a powerful illumination is needed with a small output of current. The use of nitrogen gas further prevents blackening of the bulb and gives the lamp an efficiency of one-half a watt per candlepower, about double that of the ordinary tungsten lamp.

The Jaeger Nitros have a close focal adjustment. The filament is double, so that should one side break or be disabled from any other cause, the other side will still be available for use. These lamps are stated by the maker to take but half the amount of current for the same candlepower, as compared with vacuum tungsten lamps. The bulbs can be had in 21 to 30 candlepower, suitable for 6-7 and 12-14 volt current.

## ON VACATION TOUR

H. A. Stillman, of the export department of the Pope Manufacturing Company, is spending his vacation with his family, touring southern New England, and using a Pope motorcycle with sidecar. The trip includes Providence, Westerly, New London, along the Connecticut shore, thence up the fine highways by the side of the Connecticut River and back to Westfield. This is the second season Mr. Stillman has made a motorcycle vacation trip, choosing this method of travel in preference to any other.

## VAN SICKLEN BUSINESS SOLD

A report from Aurora, Ill., is to the effect that the Van Sicklen speedometer will hereafter be manufactured for the Van Sicklen Co., of Aurora, by the Elgin National Watch Co., of Elgin, Ill., and that an improved motorcycle model may be added to the line shortly.

## 50 MOTOR WHEELS GO ABROAD

Milwaukee, Wis.—The A. O. Smith Company, makers of the Smith Motor Wheel, has shipped 50 of the little attachments to various foreign countries during the week ending July 24. The machine went to Buenos Aires, Argentina; Santiago de Chile; Honolulu and Korea.

## VIRGINIA WELDING COMPANY

At Norfolk, Va., the Virginia Electric Welding Company has been incorporated to handle general welding. The company has a capital stock of $15,000. The officers are: J. A. Ridgewell, president; F. Tonnemacher, vice-president; and William Benseler, secretary-treasurer.

## MOHAWK DOUBLES FLOOR SPACE

The floor space in the plant of the Mohawk Rubber Co., in Akron, Ohio, will be doubled by an addition which has just been started. In the spring the company doubled its production facilities, but further extensions have been found necessary.

## WANTS USED SIDECARS

C. Gordon Parkin, post office Box 334, Montego Bay, Jamaica, British West Indies, informs **Motor Cycle Illustrated** that he is in the market for second-hand sidecars to fit 1913 and 1915 Indians. Manufacturers, dealers or others, who are in position to supply the wants of Mr. Parkin will do well to write to him at the above address.

## POPE SHIPMENT TO ITALY

One order received last week by the Pope Manufacturing Company was for 16 Pope two-speeds, Model R-15, which were ordered by cable to be shipped to Italy.

Digitized by Google

### CHAMPION PLUGS AT EXPOSITION

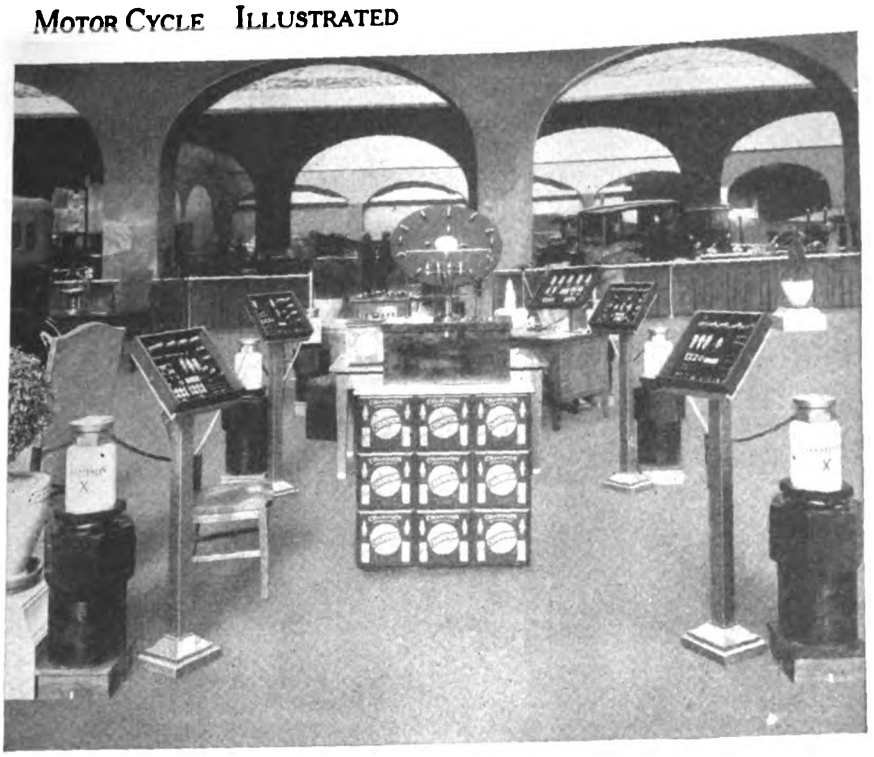
One of the attractive and instructive exhibits in the motor section of the Panama-Pacific exposition is that of the Champion Spark Plug Company, Toledo, Ohio, situated in block number 34 on the Zone Real, at the Palace of Transportation. The exhibit was arranged primarily to give the car owner and others interested in the mechanical details of the automobile, some idea of the way in which spark plugs are manufactured.

In the cases, which are placed on pedestals the various parts are shown which are used in the manufacture of the complete plug. In each instance the various parts are shown as they go from one operation to the other, i. e., the making of the shell, bushing and thumb nuts from solid bars of steel and brass, the assembling together of the center wires, the pressing of the copper asbestos gaskets from sheets of copper and asbestos and the final assembling of all these parts into the completed Champion spark plug. Another case shows the manufacture of the porcelain used in Champion spark plugs, how the various materials are manufactured and the name "Champion" burned on the outside.

The part of the exhibit which seems to create the most interest is the demonstration of the Champion Reliance "Waterproof-in-Water" plugs. Although the firing points of each plug are completely submerged in water they keep on firing a hot fat spark as regularly as if they were in a motor.

In addition to this complete mechanical display by means of a very comprehensive set of photographs, the visitor is taken through the entire factory of the Champion Spark Plug Company.

Two years ago the weekly output of the Champion Spark Plug Company was a little over four thousand plugs, now it is considerably in excess of thirty thousand Champion spark plugs each working day.



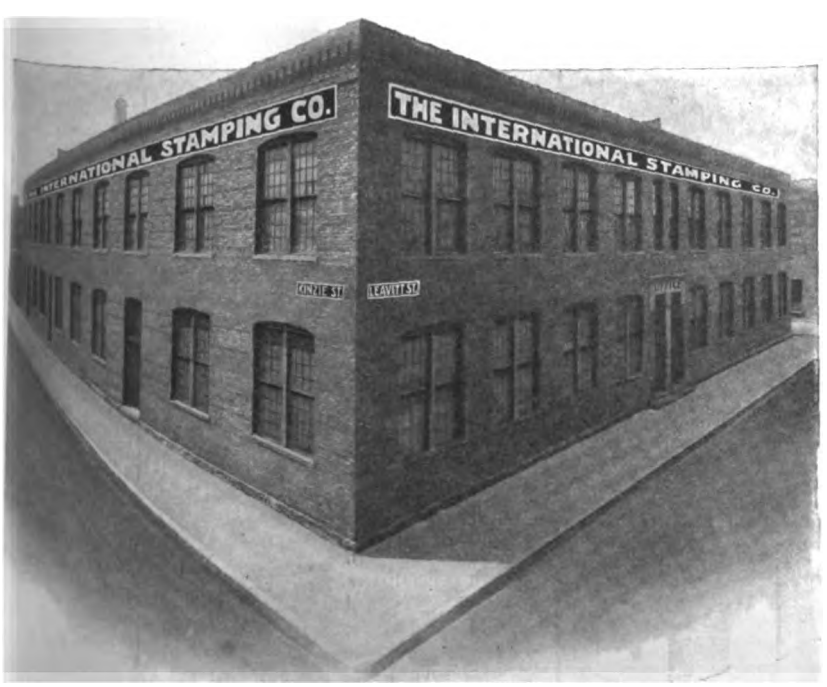
**Comprehensive Display of Champion Spark Plugs in Motor Section of Transportation Building at Panama-Pacific Exposition; All Parts of the Plug Are Shown**

### "INFO" FOR MANUFACTURERS

Manufacturers of motorcycles and accessories will be interested in two booklets compiled by the Bureau of Foreign and Domestic Commerce. Table 5, "Exports of Domestic Merchandise by Articles and Countries, 1910-1914," shows every line of merchandise and its record of growth or decline during the five-year period ending in 1914. Over 500 different articles are given separate consideration. Table 3, the second booklet, deals with importations.

These tables (No. 3, imports; No. 5, exports) are parts of "Commerce and Navigation of the United States, 1914," which sells for $1. To meet the present great demand the booklets are published separately, Table 3 being sold for 30 cents a copy and Table 5 for 35 cents. Orders are filled by the Superintendent of Documents, Washington.

## INTERNATIONAL STAMPING CO. DOUBLES FLOOR SPACE IN ITS NEW PLANT



**New Home of the International Stamping Co. in Chicago**

CHICAGO, Ill.—The International Stamping Company, of Chicago, is now moving into its new plant at 404-412 N. Leavitt street, where it will have greatly increased facilities for handling its rapidly growing business. The new plant has exactly double the space which was available in the old buildings, and the various departments have been laid out so as to take advantage of every opportunity for high-grade manufacturing on an economical basis. The company will add to its line a complete list of automobile tire-carriers and automobile tool and battery boxes.

Every modern facility for the rapid and economical production of stampings consistent with the nature of the company's product has been installed in the new factory. Particular attention has been paid to facility in the handling of raw and finished material.

During the last year the business of the International Stamping Company has grown to such an extent that it was found necessary to operate the plant day and night. An extra force has now been taken on to facilitate the handling of orders. A ten-year lease has been taken on the new plant, and new machinery will be installed.

Digitized by Google

## THIS SIDECAR COMBINATION IS USED ON KOREAN ROADS

MOTORCYCLE photographs from Korea are so rare that the occasional ones that come to hand are of special interest to followers of the single-tracker's progress the world over. The accompanying picture comes from Mrs. J. W. Lattin, wife of the Harley-Davidson dealer in Seoul, Korea, and shows the side-car combination with which the Lattins make their trips throughout the picturesque if sometimes hazardous country surrounding Seoul.

The houseboy appears at the right, and his attire is the correct thing for day wear; it is not his "nightie" as might be thought by the uninitiated. The chaps in the background are coolies—caught in the act of looking cool.

## Take Steps to Eliminate Pennsylvania Toll Roads

PHILADELPHIA, Pa.—The first effort of any importance to eliminate, or more properly, exterminate, the objectionable toll roads throughout the state of Pennsylvania has been undertaken by the new state highway commissioner. Negotiations to this effect have been opened by his department with a number of turnpike companies operating in various parts of the state.

It is believed that considerable progress in this direction can be made with the use of the $250,000 appropriated by the last legislature for the purchase of turnpikes. Where the turnpike companies ask too high a figure for their property the department will ask the counties in which they operate to come to its financial assistance. Otherwise the department will possibly undertake to open roads that run parallel with these turnpikes. The first offer of co-operation has come from the residents of Chester and Delaware counties who have agreed to give $50,000 for highway purposes. The fact that Pennsylvania is replete with toll roads and privately owned turnpikes has proved an obstacle to motorcyclists in all parts of the state.

### DENVER RACES WELL ATTENDED

Denver, Colo., July 20.—Bob Perry, Excelsior, accounted for the five-mile open which was run with other races on Saturday, July 17, at the one mile dirt track at Overland Park, this city. Goudy, Excelsior, was second and Stokes, Excelsior, took third position. The track was heavy and the time was in all cases very slow. Vard Rose, Excelsior, took the five-mile state championship. Frank Kunce, Thor, and John Walker, Flying Merkel, were second and third respectively.

### HONORS EVEN AT KOKOMO

Kokomo, Ind.—The race meet held here July 18 was considered a success, notwithstanding the fact that rain compelled the referee to call the riders off the track in the fourth mile of the biggest feature of the program, the 25-mile open. The honors for the day were about equally divided between Voss, Excelsior, who took two firsts, and Morrison, Indian, who also took two.

### NARRAGANSETT PARK SPEEDWAY

Providence, R. I.—Announcement is made that the new Narragansett Park speedway will be opened on September 18. After a year and a half of grading and general construction work, the managers state that a mile asphalt course, which will offer new opportunities in automobile and motorcycle speed work, is about ready.

## New Officers Put Ginger Int Washington Club

WASHINGTON, D. C., July 26.—Officers elected by the National Capital Motorcycle Club at its business meetin last January having permitted club activities to fall below the standard maintaine for more than seven years, a number the older members met on July 7 and declared all offices vacant. A new electio occurred on July 14, at which the followi officers were elected: President, E. Dodson; vice-president, L. G. Waldma secretary, Fred M. Mills; treasurer, H. Cohen; captain, George W. Beall; lieute ant, P. N. Moulden. These officers w serve out the terms of the expelled list, until the annual meeting next Januar Mr. Dodson served as president of t organization in 1912 and 1913, during whi time the club made the best progress in history.

Immediately following the election t club came to life with a snap, and has be showing its old-time ginger. A hill-clim has been arranged on August 7, and special committee is now competing a rangements for a race meet at Benni track on Labor Day.

The hill-climb will be held at Naylo Hill, Anacostia, where the club had a clim last Thanksgiving. Four classes have be placed on the program, all machines to limited to 61 inches piston displacemen An attractive list of prizes will be offere including medals, accessories and cash, a a big entry of local and out-of-town ride is expected.

The speed carnival at Benning track Labor Day will be the fourth annual eve promoted by the club. Strong efforts w be made to bring to Washington the b of the dirt track riders, and strong induc ments in the way of cash prizes will offered. The Excelsior people promise secure the entry of Emphfield, the Phi delphia rider who made a remarkable sho ing at Benning on May 30, 1913, and oth well-known Excelsior dirt-track stars w be entered. The Indian and Harley-Dav son local representatives will be entered all events, and it is expected that Ha Seamark will enter both the Thor a Flying Merkel. Local riders are bei urged to comply with the new F. A. registration rule so that they will be eligi to compete in all future contests staged the club.

### BURLINGTON RACES AUGUST 14

The Burlington (Iowa) Tri-State F Association will hold a motorcycle meet its half-mile track on August 14. F events will be staged at five, ten, fifte twenty and twenty-five miles. This m will be sanctioned and will be for 30 machines. For particulars, address G Holcombe, secretary, Burlington Tri-St Fair Association.

### SILVER LAKE RACES POSTPONED

The motorcycle races which were to ha been held at Silver Lake Park, Akr Ohio, July 31, have been postponed to A gust 7. Entries are now being receiv and the promoters promise a strong ca for the August meet.

# Goullet Wins Criterion After Dispute

NEWARK, N. J., July 26.—Wild scenes marked the running off of the criterion race at the local Velodrome here on Sunday, July 26, which was finally won by Alfred Goullet, of Australia. Cesar Moretti, of Italy, was second and Frank L. Kramer, of East Orange, the national champion, finished third. The race had to be re-run five times before the final outcome was settled. The first time Kramer punctured after riding two laps. On the second attempt Kramer was the winner, while Moretti crashed to the track on the last lap after hitting Goullet's wheel, getting a half dozen spokes out of it and damaging the tire. This all happened as the riders were entering the back stretch and after the accident Goullet was in condition to give battle to the champion who easily romped in a winner. Kramer was handed a bouquet of flowers and rode around the track in the victor's tour of honor.

Goullet with his trainer, Jack Neville, protested loud and long to the referee during the race stand as it was ridden but the referee turned a deaf ear to all the protests. He was under the impression that everything went in the event. A short time after it was called to his attention that he could order the race re-run at his own discretion. He then went down in the training quarters and had a talk with the three riders and it was agreed to run the race over.

Goullet took the lead away from Kramer a lap and one-half from home the first time the race was run. He held this into the last lap with Kramer on the rear of his wheel and Moretti trailing the pair. Going into the back stretch, Kramer swung high apparently to get room to jump by Goullet. As soon as he went up the track Moretti shot into third place and from here on the champion never had a chance to catch either of the leaders. Goullet finished about a wheel's length in front of Moretti, who was almost the same distance ahead of Kramer.

The Omnium race went to Alfred Grenda, the elongated Tasmanian rider, who led Reggie McNamara and Bob Spears home. Grenda rode back of McNamara and Spears for four full laps, but going into the fifth he took the lead and remained there to the finish. On the back stretch McNamara drew up on Grenda, while Spears was right alongside of Reggie, but neither rider could get to the front, with the result that they finished in that order.

Reggie McNamara at last lost his title as holder of the Brassard, being beaten in the special one-mile match race by Cesar Moretti, the Italian rider. Moretti is riding in rare form and the Australian fell a victim to the Italian's great speed. McNamara led for five laps and one-half, but on the last half lap he was passed by Moretti, who led him around to the tape. McNamara had previously won the Brassard eight times before Moretti defeated him.

Alfred Grenda was once more a winner in the ten-mile single paced race ridden against Oscar Egg and Jackie Clark. Grenda remained behind Egg for nine miles and five laps and in the last lap he raced away from the Swiss rider. Jackie Clark was fatigued after riding six miles and four laps and quit. The time for the race was 19 minutes 36⅖ seconds.

Hans Ohrt, who is leading in the race for the amateur championship, failed to get placed in either of the amateur races. In the two-thirds mile sprint for the "simon-pures," Tommy Grimm, of Irvington, was the winner, while Fred Taylor took first place in the three-mile open. The summaries:

Quarter-Mile Invitation Handicap (Professional)—Won by Frank Corry, Australia (35 yards); Edward Rupprecht, Newark (30 yards), second; Raymond Eaton, Elizabeth (10 yards), third; Donald McDougall, Newark (scratch), fourth; Joseph Reeber, Newark (25 yards), fifth. Time 27⅘s.

Half-Mile Novice (Amateur)—Won by Edward Bailey, Newark; William Rilling, Newark, second. Time, 1m. 5⅘s.

The Omnium at One Mile—Won by Alfred Grenda, Australia; Reggie McNamara, Australia, second; Robert E. Spears, Australia, third. Time, 2m. 55s. Last eighth-mile, 12⅖s.

Two-thirds-Mile Handicap (Amateur)—Won by Thomas Grimm, Irvington (20 yards); Edward Kane, Newark (10 yards), second; August Lang, Irvington (30 yards), third; Frank Whitney, New York Athletic Club (40 yards), fourth. Time, 1m. 15⅘s.

The Brassard Race at One Mile (Professional)—Reggie McNamara, Australia, vs. Cesar Moretti, Italy.—Won by Moretti. Time, 2m. 55⅖s. Last eighth-mile, 12s.

Three-Mile Invitation (Professional)—Won by Fred Hill, Boston; Harry Kaiser, Bronx, second; Menus Bedell, Lynbrook, L. I., third; Willie Hanley, San Francisco, fourth; Raymond Eaton, Elizabeth, fifth. Time, 6m. ⅘s.

Three-Mile Open (Amateur)—Won by Fred Taylor, Newark; Edward Kane, Newark, second; Thomas Grimm, Irvington, third; Hans Ohrt, San Francisco, fourth. Time, 6m. 29s.

Single-Paced Match Race (Professional)—Won by Alfred Grenda, Australia; Oscar Egg, Switzerland, second; Jackie Clark, Newark, third. Time, 19m. 36⅖s.

The Criterion at One Mile—Won by Alfred Goullet, Australia; Cesar Moretti, Italy, second; Frank L. Kramer, East Orange, third. Time, 2m. 43s. Last eighth-mile, 12⅘s.

## CHICAGO RACES POSTPONED

Chicago, July 26.—Owing to Acting Mayor Moorehouse's request to abandon sports and amusements yesterday on account of the disaster to the steamer *Eastland* in the Chicago river, Saturday, the management of the Riverview Velodrome called the races off that were scheduled for last night.

**Morretti, Kramer and Goullet at Start of Final Criterion Race**

# LINART WINNER OF REVERE RACE

## Belgian Tussles with Wiley in Forty-Mile Motor Paced; Turville Takes Race

BOSTON, Mass., July 26.—Victor Linart came into his winning streak again on Saturday, July 22, when he won the 40-mile motor-paced event in 54 minutes 37⅕ seconds, with George Wiley, of Syracuse, second; Georges Seres, the Parisian, third, and Percy Lawrence, of San Francisco, fourth.

Wiley had a return of his bad luck after leading for 25 miles, a puncture costing him five laps. A second puncture in the 34th mile set him back six laps more, and at the finish he was only half a lap ahead of Seres, who in turn was ahead of Percy Lawrence by 3¼ miles.

Throughout the race it was nothing but Linart and Wiley, although the erratic Seres, riding in spurts, gave the two leaders some stiff fights. Lawrence broke a chain early in the race, which left him so far in the rear that his case was hopeless.

The miss - and - out professional race brought the crowd to its toes, and Willie Turville, for the second time, won it, with Hugh MacPartland second and Pat Logan in the rear.

Saturday night's summary:

One-Half Mile Amateur Handicap—Won by Elmer Duncan, Everett (105 yds.); Lewis Hill, Revere (105 yds.), second; Fred McKenzie, Revere (35 yds.), third; Tom Panacy, Brockton (85 yds.), fourth. Time, 58⅕ secs.

Three-Quarter Mile Professional Handicap—Won by Saxon Williams, Buffalo (100 yds.); J. S. Grant, Lynn (75 yds.), second; Frank Droback, South Boston (50 yds.), third; Hardy Jackson, Revere (90 yds.), fourth. Time, 1 min. 29⅕ secs.

Mike the Barber Stakes (One Mile Amateur)—Won by A. Laskey, Topsfield, and William Cupit, Roxbury, three laps each; Kenneth Plummer, Revere, and Frank McKenna, South Boston, one lap each. Time, 2 min. 16⅕ secs.

Professional Miss-and-Out—Won by Willie Turville, Revere; Hugh MacPartland, Boston, second; Pat Logan, South Boston, third; Dennis Connolly, Everett, fourth. Distance 1 mile 6 laps. Time, 2 mins. 59⅘ secs.

Five-Mile Open, Amateur—Won by L. C. Rollins, Everett; Fred Herbert, Fall River, second; Ned Chandler, Boston, third; J. B. Rollins, Everett, fourth. Time, 11 mins. 29⅘ secs. Lorimer Winslow, Providence, winner of most laps.

One-Mile Professional Tandem Handicap—Won by Frank Droback, South Boston, and Dennis Connolly, Everett (65 yds.); Willie Turville and Pinkie Turville, Revere (45 yds.), second; J. S. Grant, Lynn, and H. J. Reynolds, Forest Hills (85 yds.), third; Harold Rollins, Everett, and Hugh MacPartland, Boston (25 yds.), fourth. Time, 1 min. 55⅗ secs.

Forty-Mile Motor-Paced Race—Won by Victor Linart, Antwerp; George Wiley, Syracuse, second; Georges Seres, Paris, third; Percy Lawrence, San Francisco, fourth. Time, 54 mins. 37⅕ secs.

George Wiley, the former middle-distance American champ, broke the Revere Cycle Track record in the great Brassard hour motor-paced race, Wednesday last, July 21, making 44 miles 2 laps, beating the old record of 43 miles 5 laps. Victor Linart, the Belgian, was second, nearly two miles behind; Clarence Carman, the present middle-distance champion, third, with 41 miles 6½ laps, and Elmer Collins fourth, with 39 miles 3¼ laps. It was one of the best wins in Wiley's career and was enthusiastically applauded by the fans.

Linart, the Belgian, was in the lead for the first 15 miles, and after that it was Carman for a short time, Linart slowing up and claiming that Carman's pacemaker had his coat open and flapping as he went by him. Wiley jumped into the opening thus made and regained the two laps he had been behind, and he was soon leading Carman a lap and a half, when the latter punctured in the 24th mile.

### CARMAN WINS AT POINT BREEZE

Philadelphia, Pa., July 24.—Clarence Carman, the world's champion, won the big international 50-mile motor-paced race, with Madonna, the Italian champion, second; Linart, the Belgian champion, third, and M. Bedell, of America, fourth, on Friday night, July 23, at the Point Breeze Park Velodrome. At the start of the race it looked as if Madonna, the Italian, and Linart, the Belgian, were going to make the Yankee ride the race of his career and show what he really can do. But after the 10-mile mark had been passed the foreigners commenced to have hard luck, Madonna losing his pace on the second lap on the eleventh mile, and later Linart lost his pace, and Jimmie Hunter, Carman's pacemaker, soon got busy and gained half a lap, and from that on it was Carman's race.

### RYAN LEADS AT CHICAGO

Chicago, Ill., July 26.—Martin Ryan, the Newarker, still leads the paced riders at the Riverview Velodrome in points in the table kept of the winnings of the riders. Ryan has four "firsts," three "seconds" and two "thirds" to his credit, and his total is 33 points. Eddie Root is one point back of the Newarker, while Peter Drobach, the South Boston cyclist, is third with a total of 27 points. John Bedell goes into fifth position with 17 points. The standing to July 20 is as follows:

| Rider. | 1st. | 2d. | 3d. | 4th. | Pts. |
|---|---|---|---|---|---|
| Ryan | 4 | 3 | 2 | 0 | 33 |
| Root | 3 | 5 | 0 | 2 | 32 |
| Drobach | 3 | 2 | 3 | 0 | 27 |
| Bedell | 2 | 1 | 2 | 0 | 17 |
| Lawrence | 2 | 2 | 0 | 0 | 16 |
| Kopsky | 1 | 2 | 2 | 0 | 15 |

# CYCLE LEAGUE'S ANNUAL PICNIC

## Merry Crowd Enjoys Games and Sport in Amateur Club Affair at New York

IT was a small but merry crowd that disported itself at the picnic and games promoted by the Inter-Club Amateur Cycle Road Racing League, at Hoffman's Park, Pelham Bay, on Saturday afternoon and night, July 25.

This was one occasion on which bicycles were not welcome, for the afternoon was given over to sporting events other than cycling, while after supper the voting contest, the wheel-of-fortne and dancing took up most of the time.

Quite a large crowd was attracted to the evening's dancing, and the arrival of another outing at the park added zest to the picnic. There was a spirited voting contest in which over 900 votes were cast in the last five minutes. It ended in a win for H. S. Issertell, who, in his suit of white linen, was known as "Phoebe Snow."

The athletic events were well contested. Miss S. Simmons made a clean-up in the ladies' events, while John J. Marquart, of the Century Road Club Association, accounted for two of the first prizes, and William Lock, of the Century Road Club of America, accounted for two other events. The summaries in part are as follows:

Three-legged race—1st, William Lock and A. J. Hubbard, Century Road Club of America, 17 3-5 seconds; 2nd, W. King and E. Aickelin, New England Wheelmen, 20 seconds; 3rd, E. E. Fraysse and L. A. Fraysse, Century Road Club of America, 21 3-5 seconds; 4th, J. J. Marquart and A. Whytock, Century Road Club Association, 24 2-5 seconds.

One hundred-yards race, ladies—1st heat, won by Miss K. Lambert; 2nd, Miss S. Feinner. 2nd heat, won by Miss S

Simons, 2nd, Miss M. Perell. 3rd and final heat, won by Miss S. Simons; 2nd, Miss S. Feinner.

One hundred-yards dash, men—1st heat (1), William Lock, C. R. C. of A.; (2), E. E. Fraysse, C. R. C. of A.; time, 13 2-5 seconds; 2nd heat (1), W. King, New England Wheelman; (2), A. L. Sprague, C. R. C. of A.; time, 15 2-5 seconds; 3rd heat (1), J. J. Marquart, C. R. C. of A.; (2), E. Aickelin, N. E. W.; time, 15 1-5 seconds; final heat (1), J. J. Marquart, C. R. C. of A.; time, 15 4-5 seconds; (2), E. Aickelin, N. E. W.; (3), E. E. Fraysse, C. R. C. of A.

### MISHAWAKA BICYCLE CLUB

Start of Recent Race in Mishawaka, Ind.

### COLUMBATTO IS WINNER

Philadelphia, Pa., July 25.—Columbatto, long-distance champion of Italy, won the big motor-paced Red Men's sweepstakes, the special event at Point Breeze motordrome, on Saturday night, July 24, with M. Bedell, second. Freddie Hallett of England, leading by over one lap at the eleventh mile, was thrown from his mount on the lower stretch, due to one of the tires bursting, and was badly injured. The plucky little Englishman, although suffering great pain, insisted on riding out the race, and was cheered. The largest Saturday night crowd of the season, which totalled 15,000 persons, was certainly pulling for the Britisher. Up to the time of the accident Halstead was riding one of the fastest races ridden at the "drome."

# CAVANAGH AGAIN CHICAGO VICTOR

## Newark Irishman Accounts for Two Mile Open; Australian Wins One Third Mile.

CHICAGO, July 22.—Frank Cavanagh, the Newark Irishman, proved to be the best among the professional sprinters at the Riverview Velodrome Wednesday night, July 21, when he beat Iver Lawson, John Bedell and the rest of the field in a strenuous two-mile open. With lap money as an incentive to make the race a fast one the patrons saw the two miles turned in 3:46⅘, and the lap chasers divided the money up fairly equal.

A half-mile from home Cavanagh was near the front and in a good position, closely followed by Lawson, Bedell and Lloyd Thomas. When the bell rang for the last lap Cavanagh unwound a great sprint and managed to have enough left to stall off Lawson and Bedell in the last stretch. Thomas finished fourth.

The professional handicap was at one-third mile and was run on the repechage plan. Ten riders lined up for the final with Cavanagh, Lawson and Francesco Verri on the honor mark, and the balance of the field stretched to sixty yards. Albert Crebs, on the forty-yard mark, looked like an easy winner, but lost out when Steve Senhouse, the Australian, came strong in the last few yards and nipped him. Carl Christensen, the Dane, ran third and Bob Diefenbacher was the fourth man to cross the tape. Eddie Root had an easy time in winning the paced race from Peter Drobach, he taking the event in two straight heats in 7:06 and 7:32.

Putting up one of the best finishes seen at the local track this season, Charles Minnetti, the Riverview star, annexed the amateur handicap at one and one-half mile. Minnetti started from the fifteen-yard mark and changing off pace with the other back markers was near the leaders at a half-mile to go. During a lull shortly after that mark was passed the back markers lost out a little, but when the bell sounded Minnetti jumped the field and set chase for the leaders, who were at least fifty yards away. Minnetti caught them in the last turn and, riding high on the bank, passed them one by one and crossed the tape a yard or so in the lead. The time was 2:59⅗. The two-third-mile invitation for the amateurs was won by Louis Kuehl, a member of the Chicago C. C., who beat Bert Nelson, Willie Wohlrab and Willie Kell in the order named.

### STIRRING PROFESSIONAL RACES RUN IN SWITZERLAND

Geneva, Switzerland, July 5.—The twenty-fourth annual Swiss Championship race was held over the course Geneva-Preverenges—Geneva—on July 4 and resulted in a win in the professional class by Marcel Perriere, of Geneva, who covered the 100 kilometres (62.1 miles) in 3:14:16⅗. In the amateur class, M. Gunther made the best time for the course, covering it in 3:04:10. The fastest time of the day was made by Riccardo Maffeo, who won in the visitors' class in 3:00:03⅗. The Velo-Club Aurore, of Geneva, with Demicheli, Zorloni and Gunther riding, made the best time, 9:11:41, in the interclub class of bicycle riders.

In addition to the three classes who covered the full distance, the Union Cycliste Suisse instituted a veterans' race, of 25 kilometres (15.5 miles), which was won by Alfred Pasche in 46:57. In this race, Laeser, a former short distance champion, came second, in 46:57⅕, with Golaz third, in 46:57⅗. There were only six entrants in the veteran class, and all finished.

Including the veterans, there were 67 entrants. Of these 13 were professionals, 28 amateurs and 16 visitors. The professionals were started off first, at 5:30 a. m., followed at 15 minute intervals by the amateurs, visitors and veterans. The total distance was covered only by eleven out of the professional class, the first four finishing as follows: Perriere, 3:14:16⅗; Guoyt, 3:14:16⅘; Suter, 3:14:17, and Lequatre, 3:14:17⅕. In the amateur class, the order of finish was Gunther, 3:04:10; Georges Pasche, 3:04:11⅕; Collet, 3:04:11⅗, and Galli, 3:04:23. In this class 22 completed the course.

It was the visitor Maffeo who set the best time for the course—3:00:03⅘. But a few minutes behind Maffeo came Demicheli, of the Velo-Club Aurore, in 3:03:45⅕. Third place was obtained by Zorloni, also of the Velo-Club Aurore, in 3:03:45⅗, while Martinet came fourth in 3:04:30. It was a case of ride with the visitors and their times compare favorably with the best of the Geneva professionals. In all 14 finished out of 16 starters.

When the combined times were figured out for the interclub scores, the Velo-Club Aurore was adjudged winner with 9:11:41. The Velo-Club Italien was second, with 9:22:28⅗, and the Velo-Club Excelsior third, with 9:25:49⅖.

# KRAMER AT BAY BEATS ITALIAN

## Carmen Victor in the One-Hour Motor-Paced Race at Sheepshead Bay Velodrome.

SHEEPSHEAD BAY, N. Y., July 26.—Clarence Carmen had an easy time winning the one-hour motor-paced Derby at the Sheepshead Bay Velodrome on Saturday, July 24. A crowd of 8,000 persons, the largest that has attended racing at the track since it opened, jammed the high stands and watched the riders whirl around the track in their long grind. Carmen covered forty and three-quarter miles in his ride.

At the start of the race the Jamaica rider quickly picked up his pacemaker, Moran. In the first mile Carmen lapped Collins, and in the second led Madonna by a lap. It was not until after the five-mile mark had been passed that Carmen was able to gain a lap on Bobbie Walthour, the veteran cyclist. Frequently throughout the long ride Collins and Madonna lost pace and dropped rapidly to the rear. Although they finished the race, they were hopelessly out of the contest after the tenth mile.

Collins sprinted in the last few laps and regained some of the distance he had lost, finishing nine and three-quarter laps behind Carmen. Walthour, who rode at the same dogged pace during the hour's grind, finished six laps behind the winner, while Madonna trailed along six miles in the rear.

Frank L. Kramer, of East Orange, defeated Caesar Moretti, of Italy, in two straight heats in the three-quarter-mile professional match race. The two riders fought hard for victory, and there was an exciting finish in each lap. In the first heat the Italian allowed Kramer to make pace for him all the way. Kramer went to the front at the start and maintained a yard lead over Moretti until the last lap. The Italian then sprinted and tried to pass the American champion, but Kramer was going at top speed and Moretti could not overtake him. The Italian's bicycle crept up slowly on that of Kramer, but the American flashed across the finish half a wheel's length in the lead. Kramer's time was 2:13⅗.

In the second heat Moretti led all the way until the last lap. The American hung on doggedly a few feet behind the Italian until the last lap, when Kramer shot up the track and speeding around at terrific pace gradually passed Moretti and won by a scant half wheel's length. The winner's time for this heat was 2:03⅗, and he covered the last eighth mile in 12 seconds.

Tom Bellow, of the Empire City Wheelmen, won the two-mile amateur race over a field of twenty-five riders, finishing a few inches ahead of Jerry Nunziata, a clubmate. Soon after the big field of riders started Bellow went to the front and held the lead throughout the last half of the race. Lester Bowker, of the Glencoe A. C., was third, and Anthony Attardi, of the Empire City Wheelmen, was fourth. Bellow's time was 4:19⅘.

The half-mile amateur handicap race was won by J. Britton, of Brooklyn, with a handicap of 60 yards, in 59⅘ seconds. Louis Hibian, of Inwood, with a 45-yard handicap, was second, and Harry Aron, of the Glunz Wheelmen, with 75 yards' handicap, finished third.

### FOGLER'S CONTRACT REVOKED

Newark, N. J., July 26.—Joe Fogler, the Brooklyn battler, has had his contract revoked by the Cycle Racing Association. He may race at the local track in the future but will receive no bonus money for doing so. Teaming is the cause of Fogler's downfall and his flagrant work last Wednesday night was the last straw. Fogler, it is said, never attempts to win a race and is satisfied if he can keep some other rider from coming through.

### WASHINGTON (D. C.) WINNERS

**W. Cauffman and L. Howell, 1st and 2nd Placers in Recent 25-Mile Race**

### THERE WERE OTHERS

An item appearing in a recent issue of **Motor Cycle Illustrated** with reference to the awarding of prizes at the Panama-Pacific Exposition has been found to give a false impression because of the statement that the Davis Sewing Machine Co., which was awarded a gold medal for its bicycle display, was the only exhibitor of bicycles. As a matter of fact, the Dayton company had three wide-awake competitors, one of them being a company which had on display a comprehensive line of Italian-made bicycles.

### SALT LAKE CLUB ELECTS

Salt Lake City, Utah.—The Meredith Cycle Club, of this city, has elected the following officers for this year: Road captain, Guy Snyder; road lieutenants, Fred Ballsee and Sherman Falkenrath. The club is sponsored by the Meredith Motor and Cycle Co., of Salt Lake City.

## Sanborn Starts Ten Day Vacation Trip Awheel

BALTIMORE, Md., July 26.—Fred M Sanborn, of the Crescent Bicycle Clu of this city, left Baltimore on Sunda morning at 9 a. m., July 25, for a ten-da trip awheel through Maryland, Pennsy vania, West Virginia and Ohio. Canto Ohio, will probably be the farthest poi west that Sanborn will reach, passi through Hagerstown, Bedford, Pittsbur on his outward bound journey and retur ing by way of Steubenville, Wheelin Washington (Pa.), Uniontown, Cumb land and Frederick.

Sanborn, who has been an enthusias cyclist for years, spends part of his vo tion each year in a bicycle tour of the s rounding states, but his trip this year w be the longest one he has ever undertak the mileage for the trip aggregating ab 800 miles. A good portion of this will over very mountainous roads, as it will necessary for him to cross both the B Ridge and the Allegheny Mountains on outward bound trip and again on his jo ney homeward.

Wm. T. Wright, of the Crescents, turned home last week from a trip thro Maryland and eastern Pennsylvania in company of his two sons and reporte very successful journey. Little trouble experienced by any member of the p though the roads in the section trave were found to be in very poor conditio

### CHICAGO VELODROME PRESIDE RESIGNS POSITION

Chicago, July 24.—P. T. Harmon the Riverview Velodrome, threw up sponge last night and quit the Velodr Company, of which he was the pres and manager. Harmon's decision to the company and the track follow bad run of business at the Velod and lack of harmony in the Velod Company. Walter Bardgett, who been acting as assistant manager, continue to run the track for the ba of the season.

Adverse weather conditions and troubles have had a bad effect on Velodrome and the track lost on meet that was run. The promofers, ever, continued, although they aban one meet a week. At a meeting o company this afternoon it was decid continue to September and then clo track until next spring. Contracts riders will be worked out to the of the season and they will be ente a six-day race, which will be held Coliseum in November.

### TEXAS BICYCLE CARNIVAL

Fort Worth, Texas, July 26.—On 30, the Fort Worth Bicycle Clu hold a bicycle carnival in which and parade will be the features. will be five events, ranging in di from five to fifty miles.

### SHADDLE HAS MOTOR WHEEL AG

Loveland, Colo.—F. B. Shaddle, ag Iver Johnson, Pierce and R-S bicycl taken the local agency for the Smith wheel.

## PIERCE CYCLE WORKMEN HOLD ANNUAL PICNIC AT BUFFALO GROVE

Buffalo, N. Y., July 26.—The Pierce Cycle Works held a picnic for their workmen at Lang's Grove on Saturday, July 24. The idea originated with Percy Pierce, Fred Brown, Charles Kaelin and the various department foremen. They first decided to foot the entire expense of the outing, but as soon as the workmen discovered this they sent up a howl of protest. So much so that the only way they could satisfy the workmen was to give them an opportunity to contribute what they wanted to.

Three hundred and fifty workmen all arrived on time at the Grove to participate in the various sports which were very carefully planned by Charles Kaelin, the factory superintendent.

The seventy-five-yard dash was won by Trumble, second Miller. The three-legged race was won by Trumble and Miller, while in the pie-eating contest Weiss took first place.

Simmons proved the master when it came to eating six feet of string, while Herring was more proficient in the sack race. Miller won the shoe race, after which a game of baseball was played.

Such prizes as a Stillson wrench, a set of handles, knives, watch fobs, bathroom sets, coat hangers, bicycle lamps and pumps, meat cleavers, match box holders, a bottle of wine and box of cigars were offered to the winners taking first, second, third or fourth place.

Between the various events, the consumption of bicycle workmen indulged in such refreshments as liquid and solid refreshments were plentiful. Percy Pierce, Fred Brown and Charles Kaelin were on hand to supervise things.

## LAWSON BEATS "THE FLYING HARP"

Newark, July 19.—Iver Lawson, the Iowa Swede, was the star of the professional ranks. Lawson met and defeated Frank Cavanagh, who is called the "Flying Harp" from Newark, in two straight heats of a two-third-mile match race on Sunday afternoon, July 18, and then finished up the meet by taking the three-mile open for the motor chasers. John Bedell finished second in the three-mile open, beating out Gus Wohlrab and Frank Cavanagh.

The match race between Lawson and Cavanagh did not produce the battle expected, since Cavanagh was peeved because Lawson rode him close in the first heat and he failed to put up a good battle in the second and final heat. John Bedell beat Norman Anderson in two straight heats of a five-mile motor-paced race in handy style. The professional handicap at a half-mile went to Eddie Madden, the Newarker, from the 35-yard mark. Summary:

Two-Third-Mile Point Race, Amateur.—Won by Ernest Kreidler, Riverview C. C., 14 points; second, Charles Minnetti, Riverview C. C., 9 points; third, Willie Kell, Chicago C. C., 3 points; fourth, between Bert Nelson, Riverview C. C., and Peter Dorsi, Italio-Am. C. C., 2 points each. Time, 1:21½.

Two-Mile Handicap, Amateur.—Won by Ernest Kreidler, Riverview C. C., scratch; second, Willie Kell, Chicago C. C., 45 yards; third, Charles Minnetti, Riverview C. C., scratch; fourth, George Bauer, Italo-Am. C. C., 70 yards. Time, 4:05.

Two-Third-Mile Match Race, Professional.—Iver Lawson, Chicago, vs. Frank Cavanagh, Newark. Lawson won in straight heats. Times, 1:42 and 1:59⅗.

Half-Mile Handicap, Professional.—Won by Eddie Madden, Newark, 35 yards; second, Joe Kopsky, Bohemia, 50 yards; third, Lloyd Thomas, San Francisco, 25 yards; Bobby McLean, Chicago, 60 yards. Time, 52⅕ seconds.

Three-Mile Open, Professional.—Won by Iver Lawson, Chicago; second, John Bedell, Long Island; third, Gus Wohlrab, Jersey City; fourth, Frank Cavanagh, Newark. Time, 5:59⅗. Lap prize winners: Ryan, 5; Wontrab, 2; Diefenbacher, 2; Madden, 2; Drobach, 2; Kopsky, 1; Krebs, 1; Young, 1; Piercey, 1.

Five-Mile Motor-Paced Race, Professional.—Won by John Bedell, Long Island; second, Norman Anderson, Denmark. Bedell won in straight heats. Times, 7:22 and 7:36.

## A PICTURESQUE BICYCLE STORE IN FRESNO, CAL.

**Interior View of Normart's Cyclery in Fresno. F. G. Normart, the Proprietor, Is Also a Taxidermist and Decorates the Store with His Work**

## RACES AT MIDLAND PARK, N. J.

Midland Park, N. J., July 24.—John Masculine, of Passaic, N. J., turned out to be the winner of the twenty-five mile race held here last Sunday. Masculine made the grind in record time and is looked upon to be one of the coming bicycle racers of the future. Following is the order of the finish:

| Name. | Make of Bicycle. | Prize. |
|---|---|---|
| 1—John Masculine | Iver Johnson | Silver Cup |
| 2—Rene Bract | Reading | Silver Cup |
| 3—John Steele | Iver Johnson | Silver Cup |
| 4—Abe Tebout | Pierce | Solar lamp |
| 5—Henry Terhune | Hudson | Bicycle tools |

## CYCLISTS REACH SACRAMENTO

Sacramento, Cal., July 25.—Sherman S. Carr, Harold J. Aldridge and Charles W. Carr, three messenger boys from Anderson, Ind., who are pedaling across the country, arrived in this city on Wednesday, July 21. They have not met with a mishap during the entire journey, though many privations were suffered en route. While crossing the Ute Plains they ran out of water and had to travel many miles before they were able to get something to drink. The trio undertook the trip to build up their health; when they entered Sacramento they appeared to be in splendid physical condition. Their destination is the San Francisco fair.

## PETTEE TAKES ON MOTOR WHEEL

Denver, Colo.—The Pettee Cycle Company, of this city, has taken the Smith Motor Wheel representation for Denver and vicinity. A sale of twenty of the attachments is reported to date.

## DAYTON MAY "BICYCLIZE" POLICE

Dayton, Ohio.—If plans now under way are carried out, Dayton's police force will be placed entirely on wheels, and the strolling, leisurely patrolman will be a thing of the past. With the success in Dayton and elsewhere of the "motorcop" for traffic and boulevard service, it has occurred to the city fathers that there is no reason why the value of the whole force should not be increased by mounting the men on bicycles. It is thought that the comparatively few and scattered patrolmen in the suburban residence districts would be especially aided if they were mounted on bicycles, enabling them to get around over a much wider district than is now possible, and it is entirely probable that this will be done.

## CLUB RUN TO PATERSON

Fifteen members of the New York Division of the Century Road Club Association were led by Captain George Steppello on the first of a series of weekly club runs, on Sunday, July 25, leaving from Columbus Circle, New York City, with Paterson, N. J., as the destination. Dinner was had at the regular stopping place of the club and later a side trip was made to the Passaic Falls. The return trip started at 3:15 p. m.

Those on the run were: Captain George Steppello, Adolph R. Jacobson, Ray Caldwell, Joseph Caldwell, Sylvain Segal, Harry Glotzer, Joseph Naphtal, George Harvey, Harry Naphtal, John J. Marquart, Max Naphtal, Henry Terhune, Lucien Wetzel, Alexander Whytock, and W. Kuno.

## TITLE RACES CHANGED

Newark, N. J., July 26.—Championship races for professionals in the future will be run with two riders in the final heat so as to eliminate teaming. The board of control of the C. R. A. made this announcement and stated that every member of the board voted in favor of the amendment to the rules, suggested by Manager Chapman, with the exception of Kramer. The champion would not vote on the question in which he was so vitally interested.

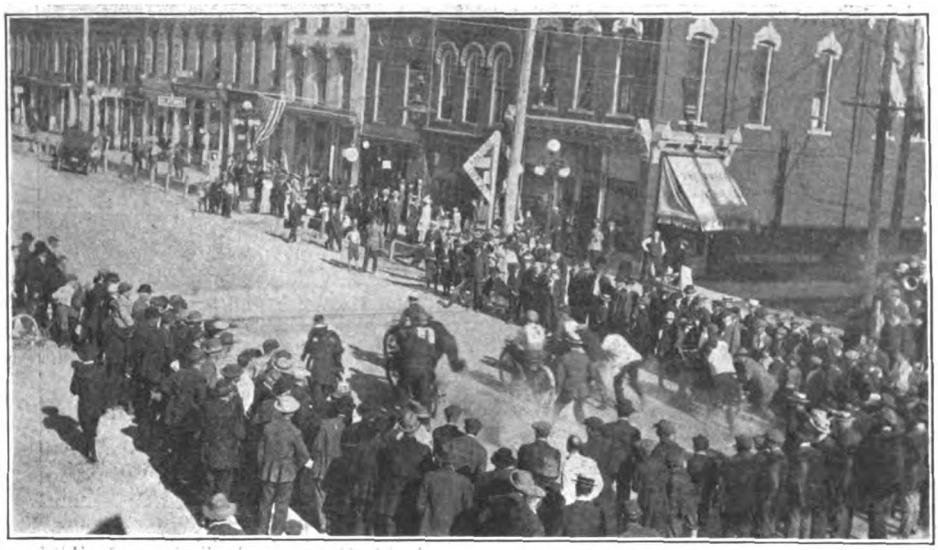
## WHEN RIDERS SPEEDED THROUGH TECUMSEH'S STREETS



**Start of Five Mile Race in Michigan City, June 22, in Connection With Bargain Day; Perry Satterthwaite on His Pope Won the Event**

### FAVOR GRADUATED TAX

Atlanta, Ga., July 26.—At a meeting of the State legislature committee on ways and means, which was held in Atlanta on Thursday, July 22, a number of automobile men and Gus Castle, representing the Atlanta Automobile and Accessories Association, strongly favored a bill, similar to the Jones bill, as a substitute for the present motor vehicle license tax law. The Jones bill provides for a graduated tax according to the horsepower of a machine. The automobile agents suggested that the horsepower upon which this tax is based be standardized.

The Jones bill provides that after a payment of $30 dealers may obtain all licenses needed for demonstration purposes by a payment of $2 each. The automobile agents suggested that agents be required to buy two tags at $10 each and purchase other needed tags at the rate of $2 each. This was regarded with favor by several members of the committee because of the fact that automobile agents have already to pay $250 State license tax and $50 county license tax to do business, besides paying ad valorem tax upon their stock.

The automobile men also suggested that a dealer's tag be differentiated from a regular license tag by color or design.

### RETURNS FROM LONG TRIP

Louisville, Ky., July 26.—William J. Schreck, of this city, has just returned after a long trip on his 1915 Yale. The trip took him through a part of Indiana, Illinois, Ohio and Eastern Kentucky and was several hundred miles long. Up to and including July 8 a great deal of rain was encountered, and Mr. Schreck was frequently forced to take to shelter into washed out roads. Leaving Mulberry, Ind., at 10:30 in the morning of July 8 he arrived in Chicago at 8:30 o'clock on the evening of the same day after covering a distance of 150 miles. He was held up in Mulberry for a day and a half. He stated that he averaged about sixty-eight miles to the gallon of gasoline and used a quart of oil to about every 130 miles. With the exception of bad weather no trouble of any consequence was met with and the trip was very pleasant. Stopovers were made at Toledo, O., and at Dayton, O., to visit the Yale and Dayton factories.

### BERNARD-LENKARD

Wheeling, W. Va., July 26.—What he considers to be the best prize that he has ever captured has just been won by Harvey A. Bernard, a traveler of the Hendee Mfg. Co., and a well-known motorcycle rider. His engagement to Miss Mignon Lenkard, of this city, has been announced. Miss Lenkard is the sister-in-law of the local Indian agent, Wesley T. House. The marriage will take place some time in August.

### TRACK WILL REOPEN

Cincinnati, Ohio.—Local speed fans who enjoyed the spectacular performances of the riders on the Lagoon saucer have received joyfully the announcement that the track is to be placed in good shape again, after the partial destruction which it suffered in the recent heavy storm. A fast bunch of riders will be seen on it shortly. It was at first thought that the damage could not be repaired in time for the resumption of operations this season, but fortunately this was not the case.

### MOTODROME FADING AWAY

Milwaukee, Wis., July 28.—Thirty arc lights and six racing machines are all that is left of the tangible assets of the defunct Milwaukee Motordrome Company, according to the notice of the circuit in the receivership proceedings. Alex Weil, receiver, held a public sale and received bids on the other assets of the short-lived saucer. He now awaits confirmation of the court to wind up the last vestige of a sport that did not take in this conservative community.

### INDIANA RUN TO DAYTON

Cincinnati, Ohio, July 26.—A large party of Cincinnati Indians took advantage of excellent weather last Sunday for a run to Dayton, Ohio, a distance of 52 miles each way, over first-class roads. With some real summer weather, of the sort which has been very scarce so far this season, the club is planning many such runs to various points in this vicinity.

### A SPEED-TRAP WARNING

South Norwalk, Conn.—Warning is given to motorcyclists riding along the Connecticut Turnpike of speed-traps in Darien and between Westport and Greens Farms. Autoists and motorcyclists have been 'pinched' galore during the last few weeks.

### BRONXITES AT OAKLAND BEACH

A successful outing of the Bronx Motorcyclists' Association was held on July 18 to Oakland Beach, Rye, N. Y. A large number of riders turned out, including ladies, and the trip proved a pleasant one throughout.

## MOTOR-WHEELERS SNAPPED AT UNIVERSAL CITY, CAL.

### SELLS BLUE MERKEL

[illegible]ville, Ky., July 26.—Coleman B. [illegible] who handles the Flying Merkel in [illegible] city, has ordered a blue Merkel for [illegible] Pettis, of the Pullman Company's [illegible] office. This will be he first blue Mer[illegible] ever seen in the city, and it is expected attract a good deal of attention. The ma[illegible] will be a two-speed twin of the latest [illegible] and will be fully equipped. The week [illegible] 12 was a banner one with Mr. Long, [illegible] sold two new machines and disposed [illegible] second-hand machines.

### NEW "X" AGENT IN IRONTON

Ironton, Ohio, July 26.—George Beatty [illegible] Henry Graber, of the Central Bicycle [illegible] have arranged to take on the local [illegible]resentation of the Excelsior, and ex[illegible] have things in good shape for next [illegible]. They will handle a few machines [illegible]ason, although the year is well [illegible] in order to get in touch with the [illegible]sive riders and familiarize themselves with the machine.

### A BUSINESSLIKE CIRCULAR

[illegible] of keeping its stock of second[illegible] cycles on the move, and also to [illegible] sales of new machines, the Knight [illegible], of St. Louis, Mo., issues at [illegible] intervals a four-page circular in [illegible] the firm's general business policy is [illegible] and prices and specifications of [illegible] are given. The prospect who re[illegible]s one of these circulars knows just what the company has in stock, both new and old models, and is able to do business by mail intelligently. The cost of the circular is comparatively small and the results are worth the outlay, say the Knight Motor folks.

### HAD TO SELL DEMONSTRATOR

Cincinnati, Ohio, July 26.—The motorcycle department at Brendamour's has worked to such good advantage so far this season that it not only has not a single used machine on hand, but had to let its window-display machine go last week, as it was the only one in stock. In addition, Joe Wandstrat wired to the factory for another machine for delivery to a rider who wanted one immediately.

### VISITING EMBLEM FACTORY

Hugh Baumgras, Emblem agent in Lansing, Mich., accompanied by L. Heck, is visiting the Emblem factory at Angola, N. Y. The pair rode their Emblem motorcycles to the plant and on their way back they will take in the sights in Niagara Falls and vicinity. They will make the full homeward trip on their machines.

### ESTERBROOK AND SMITH COMBINE

Sacramento, Cal.—D. E. Esterbrook and A. E. Smith have formed a partnership and taken the local agency for the Cyclone. They have opened a shop at 524 Twelfth street.

### COOK TAKES NEW JOB

Buffalo, N. Y., July 26.—A. D. Cook, who for years was the motorcycle department manager for Neal, Clark & Neal, local agents for the Indian, has resigned to accept a position as outside salesman for H. L. Peters, the Buffalo Harley-Davidson agent. Mr. Cook is also president of the Buffalo M. C. Previous to Mr. Cook's getting into the motorcycle business he used to run a Curtiss type of biplane at Hammondsport for the Curtiss Aviation Company.

### KLINES PLAN RUNS

Louisville, Ky., July 26.—Kline Brothers, Harley dealers, report that they have quit trying to get up Sunday runs for the time being, but expect to give runs practically every Sunday during September, October and November. A big run on Thanksgiving day will probably wind up the sport of the year as far as the Kline Bros. are concerned.

### McKALLIP AT BRAUNLICH'S

Wheeling, W. Va.—J. L. McKallip, of the service department of the Harley-Davidson Motor Company, has been at Braunlich's agency for several days recently. He co-operated with Braunlich in giving local riders of Silent Gray Fellows information on the operation and proper care of their mounts, especially on the electrically-fitted twin models.

## Brooklyn Dealer Says Gasoline Trade Is Worth Cultivating

EDITOR **Motor Cycle Illustrated.**—I have read the recent articles in your Dealers' Section concerning the advisability of handling gasoline in a motorcycle agency and would say that since I have opened my new branch store in Brooklyn, at 594-96 Jamaica avenue, I have put in a gasoline service. My aim in this was to supply my regular motorcycle customers and automobilists as well.

I started by selling about 25 gallons of gasoline a week and now after about a month I am selling about 100 gallons of gas a week and a barrel of oil in the same period. I can say that this gasoline service has been a great help to my business as distributor for the "Silent Gray Fellow" in Brooklyn and throughout Long Island. I make it a point to sell gasoline to the motorcyclist at one rate, regardless of whether he buys half a gallon or five gallons.

Handling the gasoline entails a little more trouble, but I feel that it brings a considerable amount of trade to me in the long run. I sell good gas and find that customers will come a long way to get it. There may be two sides to the question, as your contributors suggest, but as far as I am concerned I have found that the gasoline trade is worth cultivating.

Thanking you for the time you will devote to reading this letter and hoping that my remarks will be of value to other dealers who are puzzled by the gasoline handling situation, I am,

Very truly yours,

BOB BRAZENOR,

1157 Bedford avenue, Brooklyn, N. Y.

Views in Lon Claflin's Model Establishment: Top, the Well-Ordered Sales Room; Below, the Extensive Repair Shop

## Claflin's Record at Salt Lake City One of Steady Growth

SALT LAKE CITY, Utah, July 23.—The present season will be the seventh during which Lon Claflin, Indian distributor for the State of Utah, has been in the motorcycle business. Since his start at Cripple Creek, Colo., in 1908, as Indian and Reading-Standard agent, his growth has been a steady one, until now he is the proud proprietor of one of the model motorcycle establishments in the West. The photographs show several views in his present quarters at 75-77 West Broadway, this city.

Claflin continued his Indian and Reading-Standard representation in Cripple Creek during both 1908 and 1909, but in the latter year, having been offered a good sum for its sale, he disposed of it and entered the salt business in Salt Lake City. Finding that the actual returns from salt obtained from the Great Salt Lake were practically nothing, he secured a position with a Mrs. Carter, who held the Indian agency in this city at the time. After working about a month under Mrs. Carter, Claflin took on William M. Arkins as a partner, bought the agency from Mrs. Carter and opened a shop on West Temple street, early in 1910.

In the new venture, prosperity began to show itself. In the year 1910, Claflin a Arkins sold 35 motorcycles and about 1 Iver-Johnson bicycles. In the spring 1911, he bought out Arkins' interest a practically doubled his 1910 figures both the motorcycle and bicycle lines. 1912 he moved to his present establishme Claflin's books for that year showed 83 I dians sold, and in 1913 over 160 of t make went to customers. His bicycle sa for the period from 1911 to 1915 averag over 150 per year.

But during his successful upbuilding his Indian agency, Claflin did not limit

## THREE-SPEEDS IN DEMAND

"We have sold ten more Excelsiors than we had sold up to this date last year," write Putzman & Hoffman, dealers in Sacramento, Cal., "and sales in general have been beyond our expectations. This is a three-speed year and by far the greater part of our output has been so equipped. We have sold a three-speed Excelsior and delivery van to the Quality Laundry of this city, and they report excellent results from the outfit."

## SOLD TWO TO LIGHTING COMPANY

Colorado Springs, Colo.—B. P. McCromick, local distributor for the Excelsior, has just sold two twin models to the Colorado Springs Light Company for inspection purposes. McCormick has been selling machines to all Excelsior riders at practically cost price, and says that this move is a fine business-bringer.

## LYTLE OPENS HIS SHOP

Denver, Colo.—"Happy" Lytle, the well-knoown speedster, has opened a shop at 1329 Broadway, this city. Lytle will specialize in repair work.

## NEUBLING SOLD NINETY

Reading, Pa.—John G. Neubling, one of the biggest dealers in this city, states that he does not consider 1915 a poor season by any means. He has disposed of over 90 new models this season, as well as a number of second-hand mounts. Neubling does considerable re-building in his shop, but does not figure machines so put into condition in making up his list of sales. His bicycle trade has been brisker than in 1914, he says.

## LEWIS ENLARGES HEADQUARTERS

Stockholm, N. J.—George W. Lewis, Indian agent of this town, has enlarged his motorcycle garage by tearing down the partition that adjoined the old place. Lewis at the present time has sold more machine than he sold all last year.

## ONLY MOTORCYCLE AGENCY

Newton, N. J., July 26.—Mr. Wm. Sherin has opened a motorcycle shop on Main street of this city. Their being no motorcycle dealer of any kind in this town and he finds things coming almost too fast to keep in pace with the riders.

## SOLD MANY TO COLLECTORS

Joplin, Mo.—The Arnold Motor Company, Harley-Davidson agent in this city, has just sold a twin to the Home Telephone Company and another to the city Park Commission. In all twelve machines have been sold for collection purposes since the first of the year.

## BARGER IS HARLEY-DAVIDSON AGENT

Pittsburg, Kas.—O. D. Barger, one of the city's best known dealers, has taken the agency for the Harley-Davidson for Pittsburg and vicinity. He will open a shop in the near future.

# Our Canadian Letter

## Canadian Dealers Proceeding With Caution

TORONTO, Ont.—Interviews with the motorcycle and accessory dealers of Toronto with regard to the state of business at the end of the seventh month of the year may be taken as an indication of the general motorcycle and bicycle trade situation in the Dominion at the present juncture. The opinions of the members of the industry in Toronto represent the feeling among the distributors who know of the conditions throughout and whose responsibilities are greater than the average local agent. They are more alive to the presence of conditions which influence the market and, under the present circumstances, practically all era ready to admit that the war is making its impression upon trade. Very few actually mentioned the war when discussing the situation with **Motor Cycle Illustrated's** representative, but it was evident that every dealer was allowing the war's existence to be taken for granted without actual reference to it.

**Economy the Byword**

The consensus of opinion is that Canadian people are now very cautious in their purchases; dealers are wary of giving large orders for any goods; everyone is trying to be economical; the situation in the Canadian West is bad, but improvement in the market is expected as soon as the people "cash in" on the record crops which will be harvested this year; the motorcycle club spirit is waning and the used machine and repair business is good. Further, shipments of motorcycles and bicycles from England are practically nil and agents for English machines are keeping their expenses as low as possible because of the manner in which they are tied up.

The above sums up the situation in a general way, but the individual expressions of the dealers are far more explanatory and direct.

"We have been kept busy because we have been receiving so many small orders from outside dealers instead of the usual large orders," declared Mr. McKenzie, of the Humphrey Motor & Bicycle Company, of Toronto, wholesale distributors of bicycles and motorcycle and bicycle accessories. "The dealers are not giving big orders this year because they are using caution. The many small shipments make it more busy for us, but the volume of business is hardly equal to that of last year. The bicycle demand has been quite heavy and the sale of accessories has been well up to expectations. Payments are good."

**Second-Hand Machines Demanded**

"The situation is not the best," declared Percy A. McBride, the Excelsior and Henderson distributor, who explained further that so many young men had gone to war that the demand for motorcycles had been effected. "The motorcycle business may not equal last year's sales, but nobody can complain. The demand for second-hand machines is heavy and there is lots of repair work. Accessories are selling freely, however. The bicycle trade has been poor."

McBride has, however, just opened another store which is located next door to his present main store, and he has done this, he says, because he has faith in the future and because he believes that conditions will soon improve.

**Waiting for Western Crops**

The statement of Manager Ed. Buffum, of the Canadian factory of the Hendee Mfg. Company, is interesting. Mr. Buffum has just returned from an extensive business tour of the West. "The situation all through the West from Winnipeg to Vancouver is bad, but I expect there will be some improvement when the great crops are harvested," he says. "The factory here is busy, but not unusually so. We have sold about 100 Indian motorcycles to the Canadian governme some of which we have shipped to C tawa and some to St. John, N. B. W have not sold 500 machines to the go ernment, as has been reported, howeve

**Accessory Trade Lively**

W. J. Porter, one of the Toronto d tributors who has handled English m torcycles exclusively in the past, has j received the first shipment of one Brou motorcycle, the agency of which he cured last spring when he learned t he could not secure delivery of eit Douglas or Matchless machines. Beca of the lack of deliveries his business been quiet, although his stock of seco hand mounts has been cleaned out a his business in accessories is active.

"We cannot get any Triumph mot cycles out of England," declared H Greenwood, the Triumph agent at ronto. "We have had only one or t new models during the past eight mon Business is confined to repair work there is not enough of that to keep busy. Our expenses are light, howev

**Market for Lightweights**

"I cannot keep any second-hand torcycles in the store," declared Wa Andrews, of Toronto, who is the Ont representative for the Flying Mer "There is a steady, though light, dem for new machines, but I could sell m Miami lightweights if I could get d eries. I expect a good business in li weights next year and in the meantin am trying very hard to push the Those I have sold already are gi magnificent service and they have m a hit. I cannot get any B. S. A. s ments from England at all. The re business is good." Andrews has b making enough money, however, to mit him to take a nice trip by mo cycle into the States and he is not c plaining.

---

### TORONTO SPEED TRAPS

Toronto, Ont.—Toronto riders have discovered the existence of an unusually large number of speed traps in operation on all the main highways leading out of the city. In some cases the constables in charge of these traps are very careless in the manner in which they obtain particulars of offenses, but the motorists are practically helpless except when they raise strong objections to the police methods. The charge against one rider, Ernie McIntosh, was dismissed when the constable tried to argue that his numberplate had been twisted out of shape and yet that the rider had traveled so fast that he could hardly be seen.

### HOW ABOUT THIS, SPEEDSTERS?

Burlington, Ont.—This quiet Ontario town possesses a half-mile dirt track which would prove a puzzler for the most experienced motorcycle speedster in the sport for the simple reason that the short course has been laid out in the form of a figure "8." This plan was adopte number of years ago because there not sufficient room at the local grounds for a regulation half-mile The "criss-cross" track has never much of a success because of the fusion caused by the intersection in middle and because for half the dist the pole is on the right side. No mo cyclists have yet ventured to hold a on this track and none of the speedsters seem at all likely to to the big chance.

## The Two Millionth Bosch Magneto Has Been Made and Sold

THAT fact is the strongest evidence, the most convincing testimony to the superiority of Bosch Magneto Ignition.

The second million of Bosch Magnetos was sold within approximately two years, notwithstanding that other, though less efficient, ignition systems were procurable for less than half the price of a Bosch Magneto.

Merit, and merit alone, is responsible for the remarkable popularity and extensive use of Bosch Magnetos. No other ignition system is just as good.

Look for Bosch on the car you buy or sell—insist if you must.

**Be Satisfied. Specify Bosch**

### CO-OPERATE FOR CLUB HOUSE

Haledon, N. J., July 26.—The members of the Haledon M. C. and of the Haledon A. A. are drawing up plans for the construction of a model club house. The plans contemplated call for a two and one-half story building, 100 by 50. The ground floor is to have two sets of bowling alleys, three pool tables and a shuffle board, while the second floor is to have a full-sized basket ball court and dance hall, with two separate meeting rooms adjoining.

### MEMPHIS ENDURANCE RUN

Memphis, Tenn., July 26.—Motorcyclists of Northern Mississippi and Southern Tennessee are taking considerable interest in the good roads movements, and have arranged to hold a series of one-day endurance runs to various points within a riding radius of Memphis. The runs will be handled through the Memphis Motorcycle Club. The first run will be held on Sunday, August 1, and will be from Memphis to Jackson, Tenn. Checking stations will be arranged at Brownsville, Tenn., and at Arlington while controls will be opened at Jackson and Memphis. A lay over of one hour will be allowed at Jackson. The riders will leave Memphis at 6 o'clock in the morning, to return at 5 o'clock in the evening. A number of prominent men have been engaged to handle the checking stations and controls. The average speed maintained will be about twenty miles an hour. The mechanical condition of the machine will decide the winners in case of ties.

### RAVENNA CLUB CHARTERED

Alliance, Ohio.—The Ravenna Motorcycle Club, consisting of a large group of motorcycle enthusiasts in this vicinity, has taken out a State charter for permanent organization. The club has a capital stock of $2,000, which, when subscribed, will probably be used to furnish club-rooms. Emerson C. Eckert, W. N. Raach, Emery N. Weldin, C. L. Semon and George R. Cady are the incorporators.

### WANTS TANDEM PASSENGER

Jack Silver, of Cleveland, Ohio, in a letter received a few days ago, states that he is on the lookout for a tandem passenger to accompany him on a motorcycle trip from Cleveland to San Francisco. The passenger must not weigh over about 135 lbs., says Jack, and he will be expected to defray the running expenses on the way to the coast. Silver may be addressed General Delivery, Cleveland.

### INSTRUCTING A FAIR RECRUIT IN ENGLAND

### A WASHINGTON CLUB MEMBER

**Thomas O. Wansleben, Jr., Aged 27 Months, Youngest on the Rolls of Live District of Columbia Organization**

### DEMONSTRATES FOR CARRIERS

Topeka, Kan.—J. L. Seidell, Indian traveler for this section of Kansas, spent two days in this city during the recent annual convention of the Rural Mail Carriers. Seidell, who rode a 1915 three-speed with Indian generator equipment, demonstrated the ability of the mount for rural delivery service and was successful in interesting a number of delegates to the convention. He gave a lecture one night on motorcycles, to a crowded house, his audience being composed of carriers.

### 7,704 MACHINES REGISTERED

Boston, Mass., July 26.—Motorcycles are making a notable showing in the registration figures just issued by the Massachusetts Highway Commission. Up to the month of July, 7,704 motorcycles were registered. This is an increase of 21 per cent. over last year's figures for the same period. The commission estimates that at least 10,000 machines will be registered before the end of the year.

### MAY HAVE "SPEEDWAY WEEK"

According to announcements made during the last ten days New York City will celebrate the week of September 27 as "Speedway Week" in connection with the first racing on the new Sheepshead Bay Speedway. The first event on the course is slated for Saturday of that week, October 2. With 3,000 men at work on it the construction of the speedway is now proceeding at a rate which leads the contractors to believe that it will be finished about August 15.

### READING M. C. OUTING

Reading, Pa., July 28.—The Reading Motorcycle Club will hold an outing on a big scale at Berkeley, the city's water supply station, seven miles north of Reading, on Sunday, Aug. 1. A program of music, sports, and other amusements has been arranged and a large turnout is expected.

# Why?

"Why," you ask, "should I insist upon having on my machine a chain that is greater in strength than any other? I *may* never need this extra strength, so why should I pay an extra price?" Ah! "May" is a weak word, brother. That extra strength may come in mighty handy sometime.

## "The Coventry"

*"Strongest in the World"*

BECAUSE This extra margin of strength means absolute safety—always—*all* ways.

BECAUSE "The Coventry" Chains cost you less per mileage than any other chain made, because of their marvelous lasting qualities.

There are other reasons, to be found in our booklet—free on request.

**HERBERT F. L. FUNKE CO., Inc.**

No. 4 STANDARD RAT TRAP PEDAL

# THESE STRONG SUBSTANTIAL MOTORCYCLE TYPE PEDALS

have that sturdy look that comes only from correct design and first class construction.

THE NO. 4 STANDARD is a new type of rat trap pedal added to our line this year, making it the most comprehensive line of rat trap pedals offered to the trade.

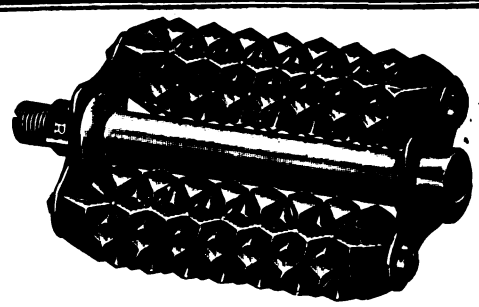
THE NO. 5 PIRATE has such big, soft, easy rubber cushions! It minimizes the jars and bumps. Try a pair and find out for yourself.

Our cycle parts and accessories appeal to the mechanical expert. They have been standard from the beginning, and mark the utmost in the industry.

Our products comprise: Diamond "E" trade mark brand, Spokes and Nipples for Bicycles, Motorcycles. Tricycles, Velocipedes, Invalid Chairs, Sulkies, Carriages, Cyclecars and Automobiles. Pedals for Bicycles, Tricycles, Velocipedes and Motorcycles. Toe Clips for Bicycle Pedals. Emergency Axles for Pedals.

**THE STANDARD COMPANY, Torrington, Conn.**

200 X



No 5 PIRATE PEDAL

"OLD SOL" No. 53 Search Lamp is larger than any other bicycle electric search lamp and is equipped with a silver plated parabola reflector and focusing bulb. Gives a white diffused ray of penetrating light. Bracket "O" allows for three different positions on the handlebar stem and extension. *Battery Box* is equipped with secret snap lock illustrated below and the construction is very solid. Finish, handsomer than any other box on the market. It stays where placed and will not break or rattle loose. "OLD SOL" Bicycle electric outfits are backed by the "OLD SOL" reputation. Be sure you purchase "OLD SOL" and then you will have that feeling of satisfaction which goes only with a quality product.

## *Lowest Saddle Position—*
## *No Sidesway--Air Springing*

No saddle made contains such remarkable quality features as does the MESINGER. Positively the lowest saddle position of any saddle made—by fully one inch. A center compression that deflects saddle back an equal distance on each side—all sidesway eliminated.

# MESINGER
## Air Cushion Saddle

And, finally, a springing system unique in its remarkable ease and comfort. Powerful coil springs enclosed in a steel barrel, with air space at the bottom, which effectively cushions all jars.

Write for detailed information or "Ask the Rider and Watch Him Riding"

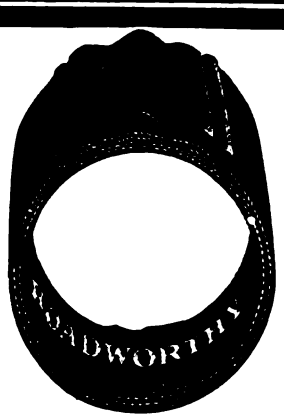
# Cash In On This Opportunity



Bicycle Dealers, don't let this chance get by you. It only costs a letter to investigate it, remember. If you could only see these tires which we are offering at such remarkably low prices you wouldn't hesitate a moment to cash in on this unusual opportunity.

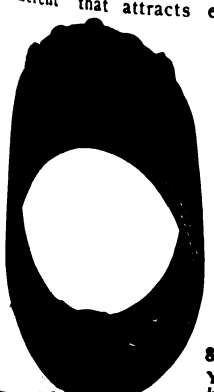
By reason of our purchasing a huge quantity of Diamond-Goodrich Bicycle tires direct from the factory we were able to buy them at extremely low prices and so can afford to sell them at prices that you will probably never be able to duplicate. There are 14 different brands, all strictly first quality. You can re-sell them or use them for replacement and make a nice snug profit either way.

If you are a live dealer you will write us on your letter head, immediately, for our Tire Special. When you get it and see the prices, we will leave it to your own good judgment about ordering. Get Busy.

# The MILLER TRIPLEX SIDE SEAT

opens up so many selling schemes that it might be called an auxiliary salesman. You cannot beat it for demonstrating purposes, for it puts the prospect in the right position for hearing every argument and seeing every demonstration. It has a high-class appearance and attracts and holds the interest of prospective buyers. It is something entirely different and it is this "something different" that attracts every motorcycle rider and makes of the Triplex such an exceptional seller.

Price $25



If you have any doubts about the wonderful possibilities offered by the TRIPLEX you are not thoroughly acquainted with it, and so ought, at least, to find out about it just to convince yourself.

*Every Mile an Accurate Mile on the*

**CORBIN-BROWN SPEEDOMETER**

*"The Speedometer of Absolute Accuracy"*

From the first to the last day of service the Corbin-Brown will return an unerringly accurate record.

In both principle and construction it is best fitted to do this.

Its accuracy and durability have been tested and proved on roads in all parts of the country as well as in government laboratories and our own shops.

Its principle is one that defies the many inaccuracies caused by heat and cold—in any climate, at any season the Corbin-Brown is totally unaffected. Its construction is such as to withstand the wear and tear of rough, steady service, to minimize friction and meet the most exacting conditions of the roads.

To keep check of your tire, gas and oil accounts specify the Corbin-Brown. To know exactly how far and fast you have traveled and judge the power of your engine specify the Corbin-Brown.

Investigate it today.

Sold and equipped by dealers everywhere.

Catalog on request.

MOTORISTS' ACCESSORIES CO

Ashland, Ohio

**Jones Valve Wings**

are to take the place of the ordinary hexagonal nut furnished on the valve stem of motorcycle tires. The two wings make it easy for the rider to lock the valve stem firmly in place with his fingers, instead of using a monkey wrench or pliers. Should the nut become rounded the tools are practically useless.

**Time Savers**

They aid in pulling or pushing the valve through the rim. A convenience that will not be overlooked by the veteran motorcyclist. Riders are always losing valve nuts. Are you prepared to furnish them with a real convenience. "The Jones Valve Wing"? They are fastened on cards (24 wings to the card) which are specially made for counter display.

# VACUUM CUP

## Red Oilproof Tread BICYCLE TIRES

## For the Tire Wise Buyer

—the man or boy who demands something **extra**; who digs down into **real tire facts** before he puts his money on the counter.

He puts a proper premium on looks and lines and finish—and he values the trim, distinctive Vacuum Cup Tread, with its striking individuality of red rubber and triple rows of suction safety cups.

But the stout "insides"—the puncture proof 15½ oz. Sea Island Fabric; the oilproof composition; the strength and toughness that go clean through the tire; the skid-preventing efficiency—these are the things he seeks and values at their true worth.

Vacuum Cup Tires are endorsed by rough roads; by slippery pavements; by emergency stops—as the highest embodiment of bicycle tire excellence.

Sold on liberal full season guarantee that protects both dealer and user.

Oilproof

Our Best Knowledge and Experience are Built into These Tires.

### VACUUM CUP Oilproof MOTORCYCLE TIRES

Actual V. C. automobile tire construction throughout. The tires whose remarkable performance has proven that auto tire capacity in motorcycling is worth while.

Guaranteed 5,000 miles—and averaging over double above this figure. Oilproof—and effectively skid-safe on slippery surfaces.

# EMBLEM

## Team Makes the Fastest Run in Transcontinental Relay

From Motorcycle Illustrated:

**Fast Trip by Emblem Team**

"One of the fastest runs on the cross-country dash was made on Relay 7 from Buffalo to Erie. This stretch was covered by the Emblem team in 2 hours 21 minutes for the 112 miles. The relay included a 12-mile ride through the city of Buffalo and suburbs, and there were other delays for which the riders were not to blame in the 100 miles between Buffalo and Erie. In spite of the fact that a slow pace was necessary while riding through the city, and over some of the patches of bad roads, the Emblem riders carried the message at a speed of 50 to 60 miles an hour."

# The New "X" Made Good

**In the races at the F. A. M. meet at Sacramento.**

The New Model 16-S. C. Short Coupled Stock "X" amply proved our claims that it is the fastest stock motorcycle ever built.

In the professional events in competition with open ported specially constructed machines, it easily beat everything but one special bunch of valves and in the amateur events simply walked away.

Results in thirteen races, EXCELSIORS win six firsts, seven seconds and eight thirds and in only one event was an EXCELSIOR beaten by more than one machine of other makes.

EXCELSIORS win twenty-one places out of thirty-five, there being only two finishers in some events and in the fifty mile championship, one "X" was the only machine to finish.

It is consistent quality in real stock products that interests the buyer, not speed in special machines attained at the expense of practical serviceability.

The New Model 16-S. C. Short Coupled Stock is now ready for delivery if you want Speed, Reliability and Consistent Service.

See the "X" dealer or write for complete details of this, the latest and fastest EXCELSIOR.

MODEL L-15 (WITH POPE 15-4/10 H. P. ENGINE

# POPE MOTORCYCLES INVITE INSPECTION FRONT FORK TO REAR STAND

At every point of a Pope Motorcycle you will find a scientific reason for its design and application. Our machines are safe and sure.

The 15 4/10 H. P. Engine gives ample power. The double stem handlebars guard the rider on rough and sandy roads.

Our famous rear spring suspension keeps road shocks away from machine and man and gives real comfort.

Big gasoline and oil tanks make frequent stops unnecessary. Extremely low saddle position makes the last mile as comfortable as the first.

Pope Motorcycle metal is "made to order," not picked up in the open market, and is determined by engineers of broad experience and great knowledge.

Pope riders know they have the best which is made.

***To ride a Pope Motorcycle is to gain a new delight in life***

# Keep your hands cool!

Style No. V-4920 $3 to $4.50
"Rist-Fit" style, ventilated or unventilated, stiff cuffs of smooth strap leather, beautifully finished. Reindeere or black coltskin. Unventilated, lined with wool fleece, knit gloves, lambskin, Russian squirrel, etc.

The famous Grinnell "Grip-Tite" with corrugated, double, non-slip palm. Great for motorcycling over rough roads or when speeding. Allows muscle relaxation without risk. Ask for
Style No. 4827. $3.00

Grinnell "Limp-Kuff"—the year's sensation! Loose, limp cuff—so soft it wrinkles down naturally on wrist or may be pulled over sleeve. Rolls, crumples or folds up without losing shape. Ask for
Style No. 4446 $2.50 to $3.50

## Grinnell Gloves

*"Best for every purpose"*

## are ventilated!

In hot, sultry weather your gloved hands will be cool, dry and clean.

Rows of cleverly-cut little vent-holes evaporate perspiration yet exclude grime and grease—an *exclusive* Grinnell feature.

### What do YOU know about Grinnell Gloves?

Do you know that they are made from soft, velvety coltskin tanned to wear like rawhide—that they are unaffected by water, heat, oils, greases, gasoline, dirt, etc.—that they wash and dry like new—that they are guaranteed not to crack, peel, shrink or harden?

Do you know about the many exclusive Grinnell styles—such as "Grip-Tite" (illustrated herewith), "Limp-Kuff" (also illustrated), "Rist-Fit," that keeps your glove and gauntlet from slipping down, "Rezistol," etc.?

Do you know that Grinnell Gloves hold their shape better and usually outwear several pairs of ordinary gloves?

At most good dealers—otherwise on approval, prepaid.

Glove Book, telling all about Grinnell Gloves—free, with leather samples. Give dealer's name.

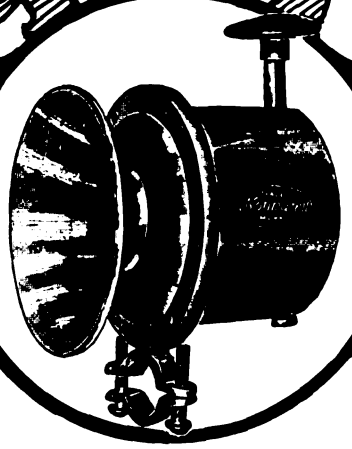
# Value!

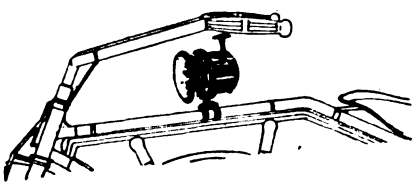
# BEE JAY



**$2.50**

**With Regular Bracket**

***No motorcycle or automobile warning signal made can come anywhere near the BEE JAY in real, solid, substantial value for your money.***



**With Top Bar Bracket**

**$2.75**

The BEE JAY is ***the-horn-of-the-year!*** The extraordinary compactness, the solid, durable construction, the high grade of materials employed in its manufacture, makes almost unbelievable the price we ask, $2.50.

Vanadium steel, highly tempered, glass-hardened tool steel—these are the materials that go into the making of the "BEE JAY." Simplicity — only one large gear wheel, actuated by the tool-steel ratchet, which strikes against the vanadium steel diaphragm, producing a hoarse, powerful call—a call that wins respect.

Then, too, the weight of the "BEE JAY"—21 ounces, less than a pound and a half—is just right. Not too heavy, yet "hefty" enough to stand the jolts and jars of riding.

***Dealers—give your customers what they want — horn satisfaction. They get it at the lowest possible price in the "BEE JAY". Write for prices to-day.***

***Riders — let your dealer show you the "BEE JAY". You'll immediately feel that you cannot afford to be without this little wonder-worker any longer. Your dealer carries it or will shortly.***

First Smith Motor Wheel Club Run, Los Angeles, Cal.

# Rhode Island Dealer Orders 16 Smith Motor Wheels in 5 Days

On June 5th, Ellis Hanna, Central Falls, Rhode Island, ordered 3 Smith Motor Wheels by express. Before this shipment reached him, he wired for 13 more—3 by express and 10 to come by freight. Central Falls is a small town.

This is what one dealer did and his experience has been duplicated by hundreds of other dealers. The

**Smith Motor Wheel**

(Detachable)

**"The Bicycle Booster"**

attracts buyers of all ages and from all classes. The Motor Wheel is fast reviving bicycling, the greatest outdoor sport American people have ever known. To the consumer it means all the pleasures of bicycling with the work left out. Safe, cleanly, rapid and comfortable fresh air transportation — all for an occasional nickel's worth of gasoline. To the dealer it means a constantly increasing volume of business—mostly cash, a quick turn over of stock and a steady advertisement of his store.

The Smith Motor Wheel attaches to any bicycle in 5 minutes, speeds up to 25 miles an hour—runs 100 to 125 miles on one gallon of gasoline and is fully controlled by a small thumb lever attached to the handle bars of the bicycle.

**High tension Magneto, float feed Carburetor, Non-skid, double tube clincher tire.**

We invite applications for territory from responsible, well established dealers who will mention make of Motorcycles and Bicycles now handled, volume of business done, etc.

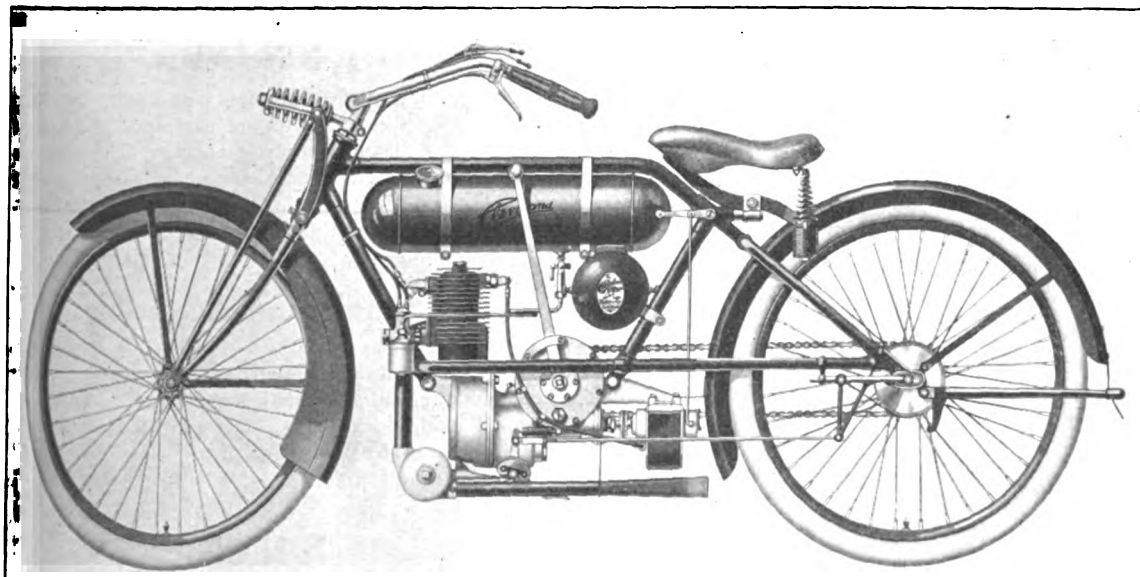
# $150

## The New Motorcycle Idea



**Light Weight** **Low Cost**

**Silent** **Clean**

**Moderate Speed**

Digitized by Google

Cleveland

# $150 A Motorcycle For Every Man

This announces the Cleveland Light Motorcycle—*the first real light weight, low cost motorcycle placed on the American market.*

The Cleveland establishes an idea which is *entirely new* in this country. Yet it follows closely the type which has proved the *biggest motorcycle success* abroad.

More than 40 large English manufacturers have successfully designed, built and marketed motorcycles of this type—*but at a much higher price.*

By eliminating many pounds of costly bulk and producing these machines in large quantities, we have developed a truly high class motorcycle to sell at the remarkably low price of $150.00.

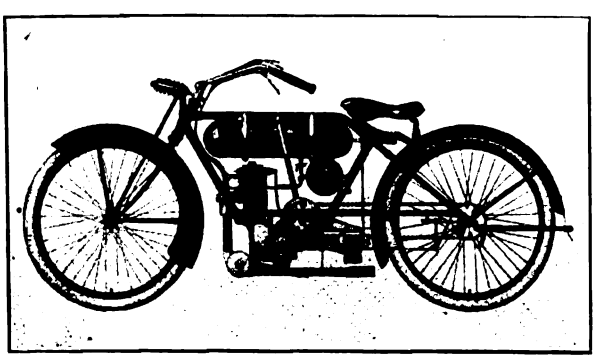
## Weight 145 Pounds

Careful refinement of superfluous weight and the use of light, durable materials, have enabled us to produce a sturdy, high-grade motorcycle—perfect in balance—with a total weight of 145 pounds.

All parts are of the highest quality the market affords—drop forgings, steel stampings, aluminum castings, full ball bearings. Alloy steels used in all vital parts.

## Runs Like a "Twin"

The single-cylinder, two-stroke motor, highly popular abroad, is used in combination with two speeds and free engine clutch in the Cleveland for the first time in any American motorcycle. It is highly efficient, giving an explosion **at every revolution.** It produces a full, even flow of power—all the smoothness of a two-cylinder, four-cycle engine, minus its many disadvantages.



## It Is Noiseless

The Cleveland motor runs with a low, gentle hum—a startling contrast to the unpleasant disturbances created by many motorcycle engines. The exhaust is carefully muffled. There are no valves or cams to make mechanical noises. A remarkably efficient worm driven countershaft and chain drive to the rear wheel adds to the silence and smoothness of operation.

## Simple and Accessible

The number of parts has been reduced to a minimum. This means simplicity and economical maintenance. Careful and studious arrangement has made all parts readily accessible. The entire power plant can be removed by taking out two bolts. The cylinder can be removed for cleaning without disturbing any other parts.

## It Is Clean

No moving parts of the power plant are exposed except the driving sprocket, all other moving parts running in an oil bath in dust proof aluminum housings. The long muffler tail pipe carries the exhaust well to the rear.

## Speed 35 Miles

The Cleveland Light Motorcycle is essentially a vehicle for utility and pleasure. It is not designed or built for speed. Attaining a maximum of 35 miles per hour, it runs always in the same smooth, perfect manner.

# Read These Specifications

# Cleveland $150

**Unit Power Plant**--Single cylinder, 3-port, 2-stroke motor, 2½" bore and 2¾" stroke, air cooled.

**General Dimensions**—Wheelbase 53". Ground to top of saddle 29". Ground to crankshaft center 10"

**Frame**—Heavy gauge seamless steel tubing with drop forged fittings. Low, substantial and effective spring fork.

**Transmission** — Two speed spur gear and free engine clutch

**Carburetor**—Float feed single jet type.

**Drive**—Final drive by roller chain from counter shaft to rear wheel.

**Ignition**—Bosch High Tension Magneto.

**Lubrication** — Motor lubricated by mixing oil in gasoline. Gears lubricated by running in oil bath.

**Brake**—Contracting band operated by foot pedal.

**Wheels**—Steel clincher rims, heavy spokes, dust proof hubs.

**Tires**—Extra heavy, double-tubeclincher, 26 x 2¼ anti-skid.

**Control**--Bowden wire control from handlebar to compression release, throttle and auxiliary air. Spark position controlled through linkage from lever conveniently located on frame. Gears shifted with right foot.

# Hundreds of Dealers Will Grasp This Big Opportunity

The Cleveland Light Motorcycle is a *money maker for dealers.*

It will prove to be the *biggest business sensation the motorcycle industry has ever seen.*

You can see, at once, the unlimited possibilities for selling. The low price of $150, combined with the unusually small upkeep expense and great utility of the Cleveland Light Motorcycle, point out a vast market heretofore untouched.

Thousands of men and boys who have never before owned a motorcycle are ready for the Cleveland. They want it. *It will sell itself!*

The Cleveland Light Motorcycle gives you the opportunity for big sales volume and big profits you have always wanted.

And our extensive factory facilities enable us to put out the big production necessary to meet the demand.

You know what that means to dealers.

We believe—frankly—that this is *the one big opportunity* for motorcycle dealers. It is *your* opportunity.

We want good, live dealers in every city and town in the country.

Do not overlook this chance—the really big money-making proposition in the motorcycle field.

Get into line before someone else takes it away from you.

Write us at once. Do not delay.

# He "Guessed" His Tires Were Properly Inflated

He was going at the rate of 35 miles an hour. His tire blew out—Bang! He woke in the hospital, all "shot to pieces." Not a pleasant thing to think of, is it, friend rider? But—think a minute—are YOU sure that such a thing will not befall you? No matter how good your tire may be, if it is under-or-over-inflated, you run chances. Don't guess, be sure.

# THE TWITCHELL GAUGE

This is the gauge that ***locks,*** showing true pressure or none. It is the one sure way of keeping the correct air pressure in your tires at all times. There's no sense in punching the inflated tire with your thumb—you can't tell the true pressure that way.

Inflate your tires to the pressure prescribed by your tire maker and test the pressure in them by means of a TWITCHELL GAUGE.

There is no other SAFE way of doing it.

Blue Streak
Motorcycle Tire

# Speeding Toward BLUE STREAK Motorcycle Tires

## Thousands of Riders Are Headed This Way

Blue Streaks have won and held the greatest victories for speed and endurance. They made a clean sweep at the *F. A. M.* meet in Sacramento, with but one or two exceptions. In July alone they broke the world's records for one mile, 100, 200 and 300 miles.

This year we are spending $50,000 extra for betterments. Yet we've cut our prices 15 per cent—due to multiplied output.

## Note These Tire Betterments

Note the swagger distinction of these big, creamy-white Blue Streak tires, surmounted by the All-Weather tread of shapely blocks and a racy blue circle running 'round the center. This tread is sharp-edged and extra wide, so it grips securely when sharp turns are taken. It is tough and extra thick, so it outwears other treads and lessens risks of puncture.

There is a special Breaker Strip between the tread and carcass. This protects the fabric and absorbs shocks.

The fabric is 4-ply—the same as used in the smaller sized automobile tires.

The Valve Spreader clutches the rim like a vise—so Blue Streak Tires can't creep.

The inner tubes—built layer on layer, like Goodyear Laminated Tubes for automobiles—are 30 per cent heavier.

## Note Goodyear Selling Power

Then this is another significant fact. Three of every four new motorcycles are equipped with Goodyears. Riders, dealers and manufacturers agree on Blue Streaks in an overwhelming way. Goodyear Motorcycle Tires have gained a place no other tire has yet approached.

Then, combined with this great tire is a great advertising campaign. Tires like these Goodyears should be made known to all. Their matchless reputation now blankets the country.

These are the reasons why Goodyears sell the easiest—why most riders want them. A request from Dealers brings our high powered selling plan—with your prices and profits. Address Dept. 301.

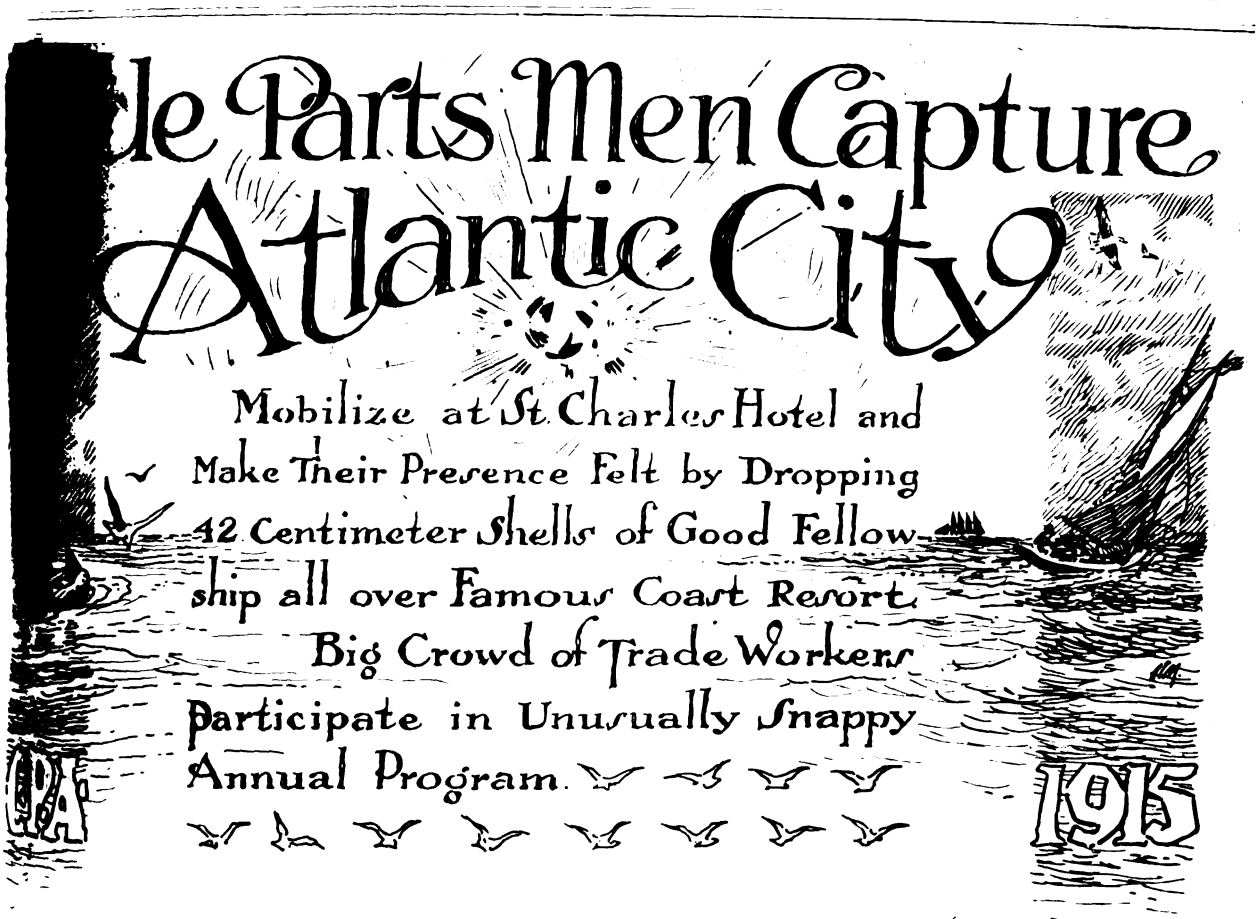
# Cycle Parts Men Capture Atlantic City

## Mobilize at St. Charles Hotel and Make Their Presence Felt by Dropping 42 Centimeter Shells of Good Fellowship all over Famous Coast Resort. Big Crowd of Trade Workers Participate in Unusually Snappy Annual Program.



ATLANTIC CITY, Wednesday, August 4.—After being drenched by a semi-deluge of rain, lashed by one of the bitterest young gales that ever came down the Jersey coast and finally, at noon today, being hung out to dry, the traditional enthusiasm of the Cycle Parts conventionites and allied trade workers was just as good as new. Enthusiasm that wears as well as that deserves more than passing mention. It has shown itself proof against the worst dismal weather that Atlantic City has known in years—take it from the oldest inhabitant—and when the sun came back on the job today you couldn't find a single wrinkle in the good nature of the big crowd.

As this is written there is considerable uncertainty regarding the advisability of attempting the second round on the golf links this afternoon, owing to the general sogginess of the grounds, but it is certain that the water polo contest will be staged according to schedule at 3 p. m. These two features make up this afternoon's social program, and tonight the bowling contest will be held. Attractive prizes and a lot of friendly rivalry among the knights of the alleys will make this one of the most interesting features of the convention.

Tomorrow at 10 a. m. the baseball game will be staged and at 2 p. m. there will be more golf. At 3 o'clock a joint meeting of the cycle trades associations will be held, and a theatre party is due at 8:30 in the evening. When the convention visitors leave the theatre they will proceed to the Hotel Islesworth cafe, where a cabaret program will top off the night.

A sailing party is on the cards for 10 a. m. Friday, and the finals in the golf tournament are slated for 2 p. m. Then come the bicycle races at 3 o'clock, and to say that the conventionites are looking forward to these events with interest is putting it mildly. The entry list is a very creditable one, there are prizes galore and it will not surprise some of the bike fans if a new road race record is set up. The race officials are now putting the finishing touches to the preparations.

At Left, W. G. Schack and Percy Pierce; at Right, Messrs. Horton and Griffith

## Jobbers Will Help to Fight R. F. D. Order

ATLANTIC CITY, N. J., August 4.—That the cycle jobbers will cooperate with the manufacturers in an effort to rescind the recent order of the Post Office Department, prohibiting the use of motorcycles and bicycles by the carriers of the Rural Federal Delivery, was assured by the passage of a resolution to that effect at today's session of the Cycle Jobbers' Association.

To combat this Post Office order, a committee was appointed, consisting of Keyser Fry, Fred Willis and John Henry, who will immediately launch an effective campaign. The jobbers were all requested to write not only to their Congressmen and Senators, but also to Postmaster-General Burleson, strongly urging that the objectionable order be withdrawn or at least modified.

The annual election of officers was held with the following results: President, Keyser Fry, of Reading, who succeeds F. I. Willis; vice-president, F. I. Willis; secretary-treasurer, John Henry. Five directors were appointed, to hold office for the ensuing year: J. W. Grady, C. A. Wigmore, Fred Grubb, Charlie Elyea and J. G. Swindermann. To draw up suitable resolutions on the death of Mr. W. P. Swartz, of York, Pa., Messrs. Fry and Willis were appointed as a committee.

The members of the association voted as being in favor of standardizing parts just as rapidly as possible. They approved of the action taken and the committees appointed at the Tuesday joint session of the various organizations constituting the convention. An important resolution was passed to discourage the use by dealers of syndicate catalogs.

---

Wm. A. Owens, of Coggins & Owens, is the second "section" of the "grand stand committee," the first being W. H. Grover. We discovered them laying bets as to who would sell the largest number of bags of peanuts at the ball game.

## C. P. A. Approves Plan for Standardization

ATLANTIC CITY, N. J., Aug. 3.—At the opening of the first Cycle Trades joint session, on Tuesday afternoon, Chairman Printz explained that the two-meeting plan had been adopted in order to give the various committees time to act upon the different suggestions made during the first meeting, with a view to making their recommendations, for definite action, particularly in regard to the standardization of parts, at the final meeting on Thursday.

Tuesday's speakers, and the topics on which they spoke, were as follows:

"From a Jobber's Viewpoint," Keyser Fry; "Co-operation," Louis Schwab; "The Bicycle," E. Julius Lonn (delivered by A. B Coffman); "The Standardization of Motorcycle and Bicycle Equipment," L. M. Wainwright.

### Standardization the Keynote

By reference to the above addresses, which are printed elsewhere in this issue of **Motor Cycle Illustrated,** it will be noted that standardization of parts was the principal and predominant thought in the minds of most of the speakers. Attention was also called to the ever-recurring question of credits; the practice of giving spring datings on goods delivered as early as September first; the necessity of making the yearly conventions of increasing practical value, particularly with reference to the relations between manufacturers and jobbers; the name plate problem, and the advantages recited by Mr. Lonn, of retaining the manufacturer's name plate and trade mark; the wonderful opportunities which the standardization of motorcycle and bicycle parts will open to the manufacturers, in view of the fact that, as mentioned by Mr. Wainwright, England, and France produce

Parts makers—"Marty" Stokes, Clinton ...well and L. M. Wainwright.

Mr. Fry announced that the committee would meet at 2:30 Wednesday afternoon. At the suggestion of Mr. Quine, provision will be made to carry on the work of standardization until that task has been fully completed.

## This Year's Motorcycle Prices to Be Maintained

ATLANTIC CITY, Wednesday, August 4.—In attendance at today's session of the Motorcycle Manufacturers' Association were President Henderson, Treasurer Davidson, Manager Coffman, Secretary Harden and Messrs. Hurley, Schack, Weschler, Huffman, Quinlan and Jackson.

A committee, composed of F. J. Weschler, H. N. Kirk, Walter Davidson, Fred Mathis and T. W. Henderson, was appointed to confer with the R. F. D. carriers at their convention in Detroit next week and do all in their power to enlist the co-operation of the carriers in an endeavor to have Postmaster General Burleson's recent order modified so as to make provision for motorcycle and bicycle delivery vans in the R. F. D. service.

The ninety-day guarantee was approved.

It was decided to hold the next meeting of the association in New York in October during the independent motorcycle and bicycle show.

Some of the New Departure Representatives at Atlantic City

Digitized by Google

While no action was taken at this morning's meeting, it was the consensus of opinion that this year's prices on standard motorcycles be maintained.

The meeting was adjourned until Thursday morning.

A synopsis of Legal Action Chairman Johnson's F. A. M. report was read by Manager Coffman. It recited a number of cases in which riders had been benefited through the work of the department, and also pointed out that members in many states will save considerable money in license fees. At the suggestion of Mr. Jackson, Chairman Johnson was requested to take up the five-dollar motor wheel license fee in Connecticut, with a view of having it materially reduced.

## Printz Retained As President of C. P. A.

ATLANTIC CITY, Wednesday, August 4.—Today's session of the Cycle Parts Association was attended by forty-eight members, and a number of matters of more than ordinary interest received attention.

D. F. Printz was re-elected president by acclamation and M. C. Stokes was chosen vice-president. W. J. Surre and C. E. Moorehouse were again selected for treasurer and secretary, respectively.

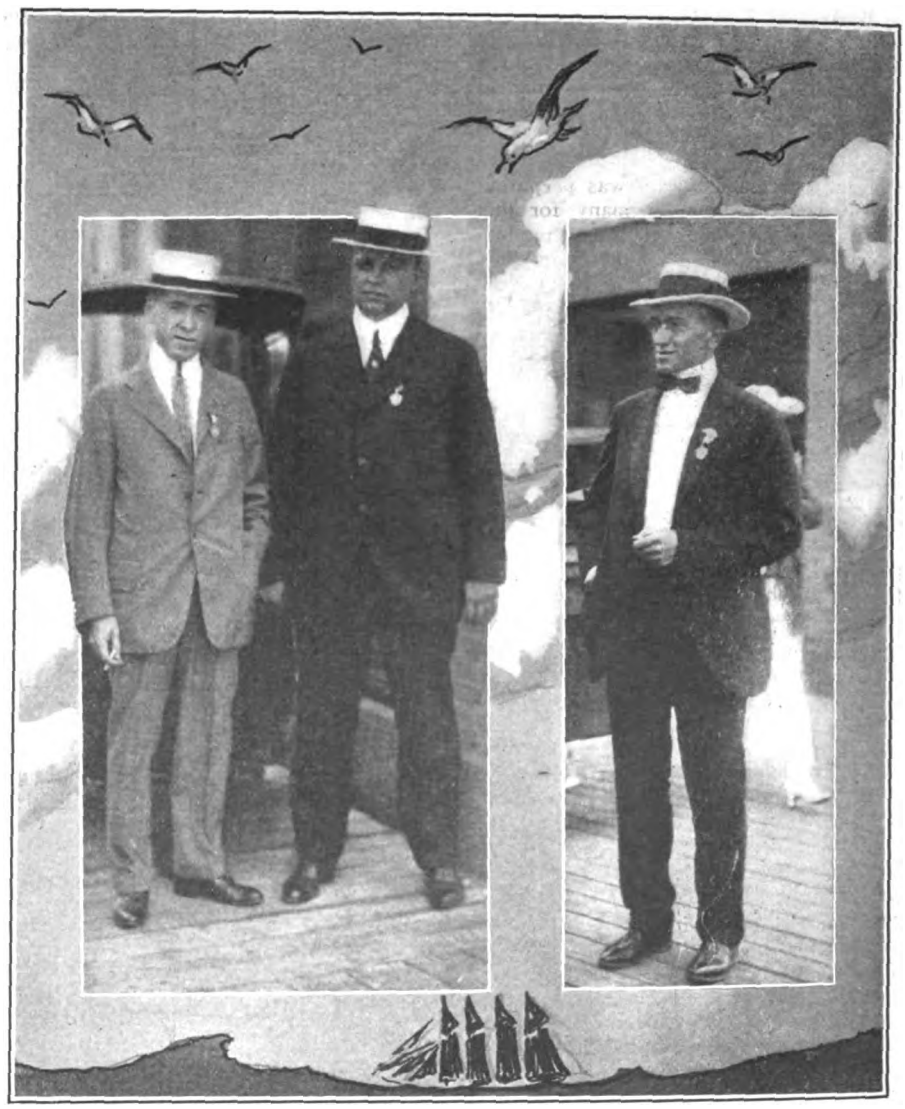
New members elected since the last meeting of the association are the Emil Grossman Manufacturing Company, Fitzgerald Manufacturing Company, Lovell-McConnell Manufacturing Company, Prest-O-Lite Company, and Wheeler & Schebler. The following new members were elected at today's meeting: Forsyth Metal Goods Co., Wald Manufacturing Company, and Endurance Tire and Rubber Company. Messrs. Wainwright, Schwab and Tuttle were chosen as the nominating committee.

On recommendation of Messrs. Githens, Brandt and Lyman, the committee to consult with the other associations, it was decided that the midwinter meeting of the Cycle Parts Association will be held in New York during the week of the annual motor show. A fund was set aside for the entertainment of members and guests during this meeting.

In accepting his re-election President Printz expressed the hope that the members would co-operate even more earnestly than in the past to the end of making the association one not only for social intercourse, but also to bring about beneficial results. He dwelt upon the varied opportunities open to the cycle parts trade and gave it as his opinion that practical and consistent co-operation will bring to light hitherto unexplored channels for the activity of the members.

## Paragraphic Snapshots at Convention Doings

ATLANTIC CITY, Tuesday, August 3.—A six-hour downpour which at times had the appearance of a genuine cloudburst, greeted or, rather, threatened to drown the early-comers to Atlantic City Monday evening for the ninth annual convention of members of the cycle trade industries, under the auspices of the Cycle Parts and Accessories Association. Tuesday dawned threateningly, but the overcast skies failed either to keep down the attendance or dampen the enthusiasm of the crowd. On the contrary, the superheated condition of the cities in the East caused many to travel shoreward earlier than had been their wont.



At the Left, Messrs. Stokes and Hogg; at the Right, L. B. Lyman

### Nock Headed the List

First to sign his name to the register was the veteran George Nock, of Philadelphia, who was accompanied by Mrs. Nock.

Buffalo was exceedingly well represented among the early arrivals, an examination of the register Monday afternoon showing that something like 30 per cent. of those registered at that time came from the Bison City.

W. G. Schack, of the Emblem Mfg. Company, fully equipped with bathing suit and bowling slippers, looked extremely fit to show his mettle both in the sea and on the alleys.

Jack Brandt, who preceded Dave Troxel to the Convention City, reported a steadily increasing export trade in Troxel saddles. H. T. Roberts, the third of the well-known Troxel trio, did not come East, as he is soon to start in the other direction for the Pacific coast on his annual fall tour.

### PARTS MAKERS TRIM 'EM

Atlantic City, N. J., August 4.—The finals in the water polo contest, played here this afternoon, were won by the Parts Manufacturers. This team first played the Traveling Men, winning by a score of 2 to 0. The game between the Motorcycle Manufacturers and Jobbers was won by the Jobbers, the score being 2 to 0. The finals were won by the Parts Makers after 8½ minutes of play, Strickland scoring the goal. The teams were as follows: Motorcycle Manufacturers, Percy Pierce, W. Schickel, Horace Huffman, Bill Schack, Arthur Davidson. Parts Makers: E. H. Strickland, H. L. Funke, O. A. Jones, Geo. Briggs, Jim Spray. Travelers team: Ledyard J. Brandenburg, Geo. Masten, Tom Hemingway, M. R. Brown. Jobbers team: Howard French, Roy Bowen, J. L. Nicholson, L. N. Southmayd, J. W. Grady.

### IN NEXT WEEK'S NUMBER

**Copies of the Convention addresses delivered by Louis Schwab, of the Stevens Co., New York, and T. W. Henderson, of the Henderson Motorcycle Co., Detroit, were received too late for this issue. They will be published in full in next week's number.**

Digitized by Google

**Brake and Tire Men in Force**

True to tradition, the largest delegations came from the coaster brake and tire companies. In fact, these two types of manufacturers were better represented than ever before.

---

A most delightful surprise was prepared by the Eclipse Machine Company for the ladies, more than fifty of whom attended the reception Tuesday afternoon. Each one was the recipient of a two-pound box of Booth's choice chocolates, and it was plainly evident that the Eclipse gifts were highly appreciated. Among the men in attendance at the convention, the Eclipse Company distributed leather-covered memorandum books and very nifty pocket combs. The Eclipse delegation was one of the largest at the convention.

---

**Diehl Boosts for Earl**

William E. Diehl, of the Corbin Screw Corporation, who had long been associated with Clarence Earl, expressed himself as delighted with the announcement that Mr. Earl had accepted a vice-presidency and partnership with the Willys-Overland company. "I shall miss him when visiting Springfield," said Mr. Diehl, "but there is no one whose success could give me greater pleasure. Clarence has earned it, in every sense of the word."

---

H. H. Wetzel, who recently became assistant manager of the Mott Wheel Works, Utica, N. Y., is attending his first cycle trade convention, and appears to be thoroughly enjoying his experience.

---

President Henderson announced that there would be a conference of motorcycle manufacturers at Detroit during the convention of the rural mail carriers, with a view to getting some action relative to the recently announced postal order prohibiting the use of cycles by R. F. D. carriers. It is confidently expected that the order will be modified, if not rescinded.

---

The effervescent George Briggs, of Wheeler & Schebler, accompanied by Jim Ash, of the Miami Cycle & Mfg. Company, accompanied one another to the convention, arriving Tuesday afternoon.

---

**Baker in Form Again**

Fred Baker, almost recovered from the effects of a recent injury to his ankle, drove down from New York with Mrs. Baker, as did also J. I. Brandenburg, with Mrs. Brandenburg.

---

At three o'clock Tuesday afternoon Chairman Surre predicted that the attendance would probably reach three hundred. This would break all previous records.

---

**After Schack's Title**

Henry Horton, Jim Ash, Percy Pierce, T. R. Palmer and other alley experts looked in excellent trim for giving W. G. Schack a hard tussle for the individual bowling honors.

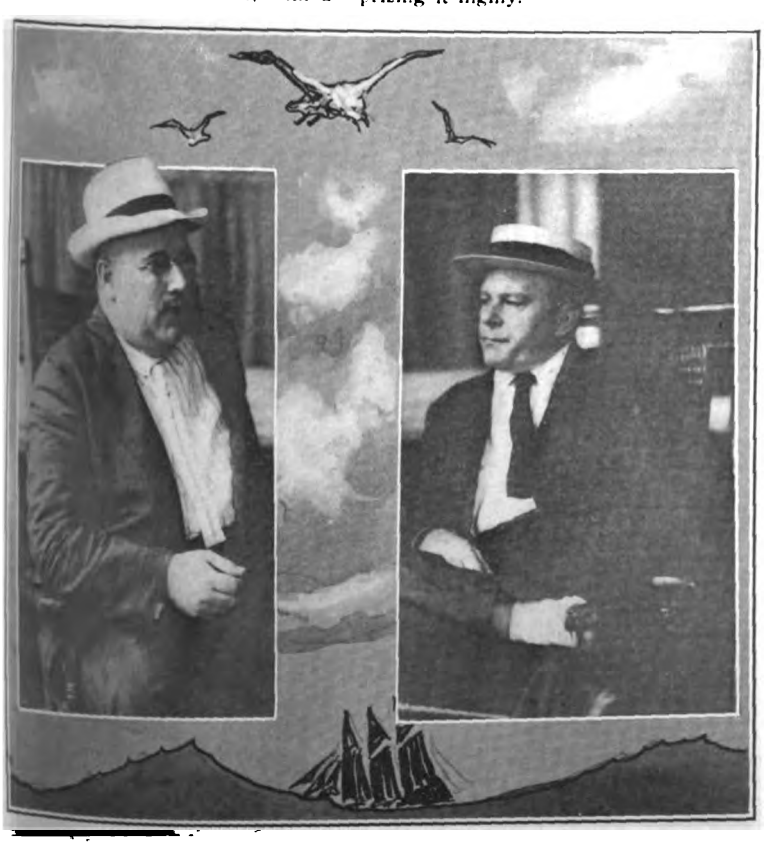
---

T. S. Hemingway, of the Ericeson Mfg. Company, of Buffalo, N. Y., was the first magneto representative to reach the convention town.

---

**Canes Were Plentiful**

Handsome canes, appropriately labelled "Stick to United States Tires," made their second annual appearance at 3:30 Tuesday afternoon, and at 3:35 everybody had one, prizing it highly.



At Left, Keyser Fry; at Right, W. H. Grover

**The Ladies' Reception**

A reception for the ladies took place Tuesday afternoon. Nearly fifty were present, being received by Mrs. W. J. Lurre, Mrs. C. E. Morehouse and Mrs. Keyser Fry. Bridge was played, and the favors were dainty handkerchief cases.

---

After the reception all the ladies attending the convention received a second box of chocolates, with the compliments of Mr. Lovell, of the K. & C. Mfg. Company.

---

Quinlan and Neracher, of Cleveland, were among the first motorcycle manufacturers to put in appearance. They had with them one of their lightweights, demonstrations of which attracted very favorable attention.

---

Charlie Weaver, as chipper and debonair as a decade ago, furnished capable representation to the interests of the Kelly Handlebar Company.

---

The handsome pencils distributed by Jack Brandt, of the Troxel Mfg. Company, sharing popularity with the aforementioned U. S. canes, and the Eclipse souvenirs were in big demand throughout the week.

---

## PLEASING MOSSBERG GIFTS

The Frank Mossberg Company contributed largely to the prevailing gaiety by distributing chains and whistles to the men visitors and friendship bracelets to the ladies. The distribution of both souvenirs was made by Frank Chase, who was naturally besieged by eager delegates and guests for the handsome articles. The whistles were intended to be attached to the watch-chain, but the recipients carried them in a variety of positions and on all sides were heard shrill toots from those who had interviewed Chase. The bracelets were of course the latest thing in that line, consisting of three links mounted on a ribbon, one having the Mossberg emblem, while the other two were left to be engraved and

Frank Chase is responsible for the following inscription which accompanied the Mossberg whistles: "Frank Mossberg Company are sorry you are in such a wicked place as Atlantic City, but as long as you are here—might's well have a good time.

"This chain is really for your watch, but we added the whistle for 'identification' purposes during your sojourn here.

"All Mossberg men are pledged to give all assistance possible when hailed by 3 short blasts (meaning 'Help' in a faint voice).

"Carry the whistle with you while you're here and show your appreciation of speeches, good jokes, pretty girls, etc., by tooting.

"('Altogether now, boys, lets give her a toot.')"

"Finally, take it home for the Missus to call the kiddies to dinner."

---

## DEMONSTRATING VAN ZILE DEVICE

G. S. Dalgleish, who has been demonstrating the Van Zile Deflector for motorcycles ever since its introduction, is at the convention with a machine fitted with the attachment, ready to prove its advantages to all comers.

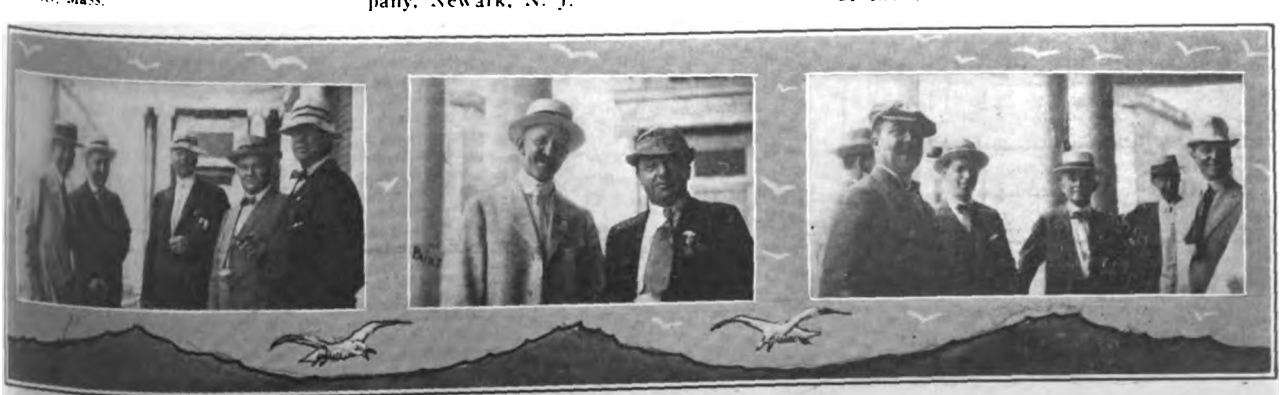
### Claims Peanut Selling Championship

W. H. Grover, of Norfolk, one of the convention's stand-bys, seemed eager to prove that the genius which he displayed in selling peanuts, et cetera, at the baseball game last year was not a flash in the pan, and although this is written in advance of the aforesaid diamond battle, we have a faint suspicion that Grover will repeat with great credit to himself, Thursday morning.

Clinton Lovell, of the K. & C. Mfg. Company, of Hennicker, Mass., shared with Mr. Nock the veteranship honors of the convention.



At the St. Charles Hotel: **Left, J. Brandt, J. Henry, W. Emerson, M. J. Horton and S. Wilson; Center, Messrs. Woody and Cabana; Right, F. Chase, F. Van Cleef, "Watty," and G. Wagner**

# Nameplate Juggling Hampers Manufacturer

## *President of Great Western Mfg. Co. Expresses Belief That Each Bicycle Should Bear Name and Trademark of the Maker*

FOLLOWING is the text in full of a paper prepared by President E. J. Lonn, of the Great Western Mfg. Co., and read at the Cycle Parts convention. Mr. Lonn was unable to attend the convention, but in forwarding the paper he expressed the hope that "the arguments I have set forth will be of benefit and be the means of accomplishing some good." Mr. Lonn's subject is "The Bicycle." The paper follows:

It is with sincere regret that I must say I am unable to be with you at this meeting, but matters beyond my control made it impossible for me to be with you and enjoy meeting not only your company but the pleasures of the week. Therefore, I must ask you to be kindly satisfied with the reading of my paper on the subject that has been assigned to me—"The Bicycle."

Gentlemen, on this subject, which is of so much vital importance to us all as jobbers and manufacturers, I ask your indulgence and permission to talk plainly.

There is a future for the bicycle business if properly handled, but it necessitates the elimination of all items and actions that are a detriment to the bicycle.

My jobbing friends, we need you to help the distribution of the bicycle for the manufacturers, and also we need your co-operation in doing so.

### Handling the Loss Items

To me it appears as if what we call the loss items in the business are multiplied because of the misunderstandings and the lack of co-operation. All such loss items are constantly watched and eliminated by the manufacturer in the plant and in the production of the goods. The loss items seem to be multiplied in the distribution through the present method of handling them. I want to call particular attention to my theory in that respect.

There is no doubt but what all the manufacturers in the United States today are making good bicycles, and they are making them sufficiently different and plenty cheap enough, so that each of you jobbers in the distribution can find a satisfactory line made by a responsible manufacturer. Therefore, there cannot be any necessity for some of the present methods of selling stripped bicycles—the constant changing of the details often the construction of the bicycles, and constantly on the finish and on the name plates. These are all loss items and you, my dear jobbing friends, are paying these loss items.

### Juggling the Trademarks

It is my contention and belief that in the future in view of the many difficult problems the government has met with in the matter of trademarks, the future will compel by law every manufacturer to put his name and trademark on every article he manufactures. It is right that he should do so, because he does make them. I say to you that in this connection you and the dealers are losing by your present methods one of your best assets.

When you take off the manufacturer's name from the article—the bicycle tire, saddle or whatever it is, you have gained nothing and added nothing in value, but you have added an expense item that becomes a loss item, and it is unnecessary. Then, too, one of the greatest things you are losing, and one of the biggest assets in the bicycle business is lost, namely:—advertising and publicity.

It is impossible for the manufacturer to advertise bicycles except in a very small indifferent way with the present method. Why? If he sells one hundred jobbers and large dealers he has one hundred different name plates on them. Therefore, he cannot advertise anything of any value or moment. Let us eliminate this condition; let us be fair; let us get the benefit of co-operation and the benefit of judicious advertising; then you get and are entitled to the multiplied results—in other words, compound interest on your investment.

### Benefits of Co-operation

Do you want it? Then, it is necessary for you to change your present plans and co-operate with the manufacturer and become the distributer of his product in the territory you desire and cover. Then by such co-operation, the results will be—prompt service, good goods, better bicycles, better friends, more profit, more satisfaction, and a building of a future bicycle business for you and for the dealer, because the manufacturer then can advertise and spend his money to bring before the buying public and general business the virtues, utilities and benefits of the same, because it is backed by his name plate, as the manufacturer.

Also the equipment carries with it the name of the maker. The tire man's name is on the tire and his guarantee goes with it. The same with the pedals, bars, saddles, and coaster brake? What is the result? The advertiser is a benefit to the distributor because the dealer he has established in the town gets the multiplied benefit of that publicity. Therefore, he can push that line of bicycles, the more bicycles he sells the more advertising he gets, and the more advertising the manufacturer will do. In other words, if the bicycles are sold under the manufacturer's name he can afford to spend (for argument), say, 50c. or $1.00 per bicycle for advertising, which benefits the jobber who distributes his goods and the dealer who sells them to the consumer. The consumer has the multiplied benefit of knowing who made the bicycle, tires, saddle and pedals.

Gentlemen, is it not worth while to consider this carefully?

### The Guarantee of Good Faith

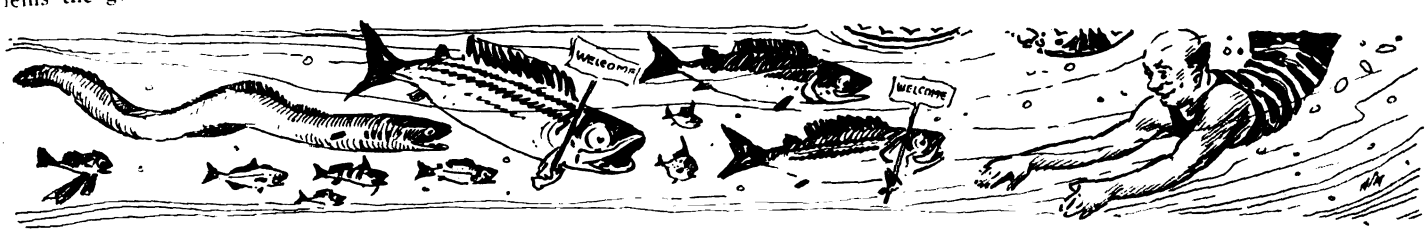
Do you realize that the Government requires on all patented articles the trademark and the patent number? Quite right! The new era of business laws will require that the manufacturer put his name and trademark on every article he makes, whether patented or not. That is the guarantee of good faith to the public that ultimately consumes or accepts the articles. Let me illustrate: Would you ask the New Departure Manufacturing Company to sell you coaster brakes without their name on them? The answer will be, No! It is just as applicable to any completed vehicle.

Would you buy an automobile, from the highest price down to the cheapest, without the marker's name on it? What would you think if you went into a store and wished to buy a Knox hat or Hanan shoe, and when they handed it out to you the name was not on the article? You would refuse to take it. Is it not just as applicable to the bicycle? Is it not a fact that you may possibly have been working on the wrong lines in marketing bicycles? I do not wish to bother you on this subject, but it is of so much vital importance to the trade that I ask you to consider it.

### Why the Jobber's Name Plate

If an article with the maker's name on it is made better for the jobber and dealer, plus the maker's advertising and with the maker's guarantee, why do you persist in selling bicycles and tires with any old name on them, and with your own name plates? Do you hope to go into a town where there are a number of dealers and sell a number of dealers in that town and sell under different names? That is a thing you would not let the manufacturer do to you. Why should you expect to do it?

The tiremaker should never sell a tire without his name on it. If he sold a cheap, not-guaranteed tire, he should sell it to you with the understanding and specific agreement it is not guaranteed. The words "not guaranteed" should be on the tire. He need not be ashamed of it. By the time it has gone through the jobber's hands and his salesman's hands, and into the dealer's store, I anticipate there are some not guaranteed tires sold with a pretty liberal promise. Then, the word "Guarantee" is some-



Digitized by Google

what of a misnomer. The legal word as used is "warranty." If you want the warranty, the benefit, the advertising, publicity and co-operation of the manufacturer, then it is your duty to lend your co-operation, and I promise you every manufacturer with whom you take this matter up will do his part seriously.

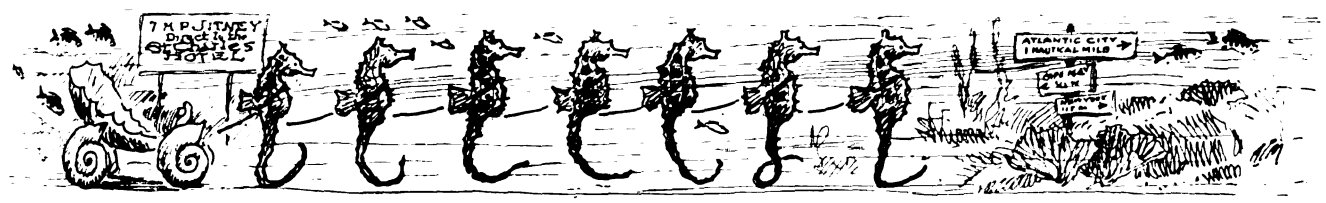
**Make Manufacturer's Publicity Possible**

I beg of you in behalf of the business, if we hope to build a better business, to lend your co-operation; cut out the loss items and make it possible for the manufacturer to give some publicity to the bicycle business, which it is surely entitled to

I repeat, stripping the manufacturer's name plate from the bicycle strips it of its warranty and all its benefits; strips it entirely of its publicity and entirely of the possibility of advertising by the manufacturer. Is it worth while to maintain that condition? The constant losses that are multiplied by the present process when eliminated and put into profits items will more than take care of some publicity and advertising that will increase the bicycle business 50 per cent. Persisting in doing as you are now can only ultimately decrease the bicycle business.

**Results Will Follow**

Add initiative, effort, advertising and publicity to the bicycle business and you will get results, and you will collect the compound interest you have heretofore simply been losing, because you did not thoroughly investigate and understand that in business you can only get out of it in proportion to what you put into it. Back up your business with a reason for profit and you will get the profit; accept the benefits that are yours at the hands of the manufacturer of bicycles, tires, saddles, coaster brakes, etc., by lending the co-operation that the industry and business deserves.



# F. A. M. Needs 20,000 Members, Says Coffman

## *Federation Chief Talks of Work Accomplished and Makes Plea For Generous Support of All Trade Men at Cycle Parts Convention*

PRESIDENT A. B. Coffman, of the F. A. M., in his address at the Cycle Parts Convention in Atlantic City briefly reviewed the work that has been done by the Federation during the last year in behalf of the rider, dealer and manufacturer and made a plea for the generous co-operation of all trade workers in the motorcycle field. He spoke as follows:

The F. A. M. is the national body of motorcycle riders, dealers and manufacturers organized September 7, 1903, for mutual benefit and protection.

Its purposes are to protect the motorcycle rider's interests throughout the country by guarding against and defeating unjust legislation, collecting his just claim in case of accident and defending him when unjustly accused or unfairly treated in court.

Its Legal Action Department appoints lawyers wherever possible, in every section of the country, whose duty is to carry out this purpose; it pays a reward of $25 for recovery of any member's stolen machine and conviction of the thief; it encourages touring, governs all racing and endurance contests, guaranteeing every F. A. M. member and the public at large clean, healthy sport, which is a tremendous boost to the motorcycle industry and promotion of good fellowship.

**Advantages Are Far-Reaching**

As the rider is the ultimate user of the motorcycle, you can readily see that when his interests are safeguarded, the dealers and manufacturers are also benefited, thus the connection is established beyond question.

The F. A. M. has accomplished much. It has defeated unjust registration laws in many states, but I am not going to take up your time to give in detail just what it has done; but I will say, since the first of the year the Legal Action Department of this organization has saved the riders of the United States in the neighborhood of $80,000 by successfully defeating unjust registration laws.

In addition to this, many machines have been recovered, restored to their owners and $25 reward paid. The F. A. M. has furnished reliable touring information and correct maps to many hundred motorcyclists, enabling them to tour in comfort and safety. It controls track racing and endurance contests, assuring racing men prompt delivery of prizes and eliminating every possible chance of accident. Some, however, occur regardless.

**Manufacturers Are Boosting**

These benefits cost the individual member $1.00 per year, which is less than 2 cents per week and less than 9 cents per month. Pretty cheap, I think, for what they get. However, it has been pretty difficult in some sections to convince the dealer that the F. A. M. was beneficial in any way, but the motorcycle manufacturers realize today what the F. A. M. means to the industry and they have given it hearty support, as well as their representatives and have instructed their agents to do everything possible to help build up the organization, which has been my particular job since accepting the presidency on July 18, 1914.

We have many good state organizations, branches of the F. A. M., but we need more. Our membership is nothing to what it should be considering the benefits accruing, and it is up to the motorcycle dealers and riders to build up the membership to no less than 20,000 in the next twelve months. With this membership, the organization can successfully defend the rider's rights all over the country.

I have talked to dealers and riders in every section of the country in an endeavor to get them to join, and in many cases I have been successful. But so many have the idea that—"I am all right, so to hell with the other fellow." This idea must be eliminated. We are living in an age of co-operation and we have got to get together for the great good of all.

**Benefits Outweigh Cost**

The expense of belonging to this organization is so slight that the rider does not miss it and the benefits are equal to those given by the 3-A's, membership in which costs $10 a year.

It has been quite difficult in a great many instances for our Legal Action Chairman to get the dealers and riders in the various town together to select a suitable lawyer to represent the F. A. M. and its members in their particular city. This is easily done when the dealers and riders forget their petty jealousies and stop knocking each other and their machines long enough to select an attorney. Mr. Johnson will attend to the balance.

Now, I could talk about the F. A. M., its purposes and accomplishments all day long, but I am not going to. What I want to say is: The Federation of American Motorcyclists is an organization that protects the rider, which protection benefits the dealer, accessory jobber and the motorcycle manufacturer and boosts motorcycling in general.

**Trade Men Wield Influence**

Nobody in this world, with but few exceptions, cares to do work without some remuneration, and in this particular instance when the dealer, manufacturer and accessory jobber helps the F. A. M., they are helping themselves.

Now we have got to have more members in this organization and it is up to the people most benefited by the up-building of the motorcycle industry to get these new members—to join themselves, if nothing more. I want to see everyone in this meeting join the F. A. M. for the simple fact that by joining, you stamp your approval of our efforts and acknowledge its benefit to the entire industry.

# Greater Standardization Would Help Industry

## *Bicycle Expert Asks That Manufacturers Agree Upon Types and Sizes and Thus Help Jobbers as Well as Themselves*

ATLANTIC CITY, N. J., Aug. 3—Mr. Keyser Fry, of Reading, Pa., read the following address, entitled "From the Jobber's Viewpoint," at the Tuesday session of the Cycle Parts Convention:

Each year we have our conclave—meet old friends, have a jolly good time, listen with varied interest to the papers that are read, argue a bit about one thing or another, appoint a committee from each association to confer about the next year's meeting place, when Atlantic City is again selected. Then after four strenuous but most pleasant days we start homeward gladdened by the meeting of old friends and by the new acquaintances we have made, enriched by associating with men who have made their impress on the times particularly in the cycle industry. Yet with all this, we have missed our opportunities in that we have failed to dovetail our ideas with one another, as we should have, for the upbuild of an industry that we are all proud to be engaged in.

### Buy American Products

Our first duty, aside from our home ties, should be loyalty to our country, and in assuming that duty we should feel the need of buying home products and encourage the members of the Cycle Parts Association, our genial hosts, to manufacture those articles called for by the trade; and even though the cost may be greater, we should market the articles and help ourselves to better business by helping the other fellow.

Most of you here recall the days in the bicycle industry when conditions prevailed similar to the automobile and motorcycle business today when each year saw new models and every machine made had some special feature. For instance: the threads varied to such an extent that it is necessary even today for a well appointed bicycle repair shop to have on hand 20, 22, 24, 26, 28, and 30 thread front and rear bicycle axles, cones, and nuts; to carry in stock plain and various colored enameled rims drilled with 28, 32, 36, and 40 holes, which also means the carrying of coaster brakes similarly drilled.

### Room for Improvement

The bicycle of today is pretty well standardized as compared with conditions that existed fifteen to twenty years go, yet there is still room for much improvement. That we may all leave here feeling that some real good has been accomplished and that we have benefited someone else as well as ourselves, I propose to point out some improvements that are possible from a jobber's viewpoint.

To get the greatest good out of anything we should size it up from a different angle than our own. The purpose of this paper will be for each of us to learn how the other fellow will be most benefited and how he will be least handicapped under certain conditions. Let us arrive at some understanding; get together on some common ground that the greatest good for the largest number may be accomplished.

Handle bar stems were variously made in ¾, 13/16, and ⅞ inch sizes. There is no reason, however, why a ⅞ inch standard cannot be adopted. This applies quite as well to seat posts which might be made in 13/16 inch size as a standard. There seems to be little variation in the size and threads of pedal axles, as well as bicycle forks, and inasmuch as front and rear hubs are generally being made with 24 threads to the inch, on axles, cones, and nuts, the only change in sight would be the adoption of a uniform drilling of all bicycle rims of 36 holes, which would mean that all hubs as well as coaster brakes would be similarly drilled.

### Considering Tires

It is unfortunate enough to be compelled to carry in stock not only 20, 22, 24, 26, 28 and 30 inch tires, but it seems highly unnecessary to have most of these in 1¼, 1⅜, 1½, 1⅝, and 1¾ inch sectional diameter, when a 20 rim and tire of 1⅜ inch sectional diameter might be adopted for the smallest made. Then have 24 and 26 inch rims and tires with 1½ inch diameter as the accepted juvenile standard for 16 and 18 inch frame bicycles, respectively, while for the regular machine as made today, let 28 inches be the standard wheel with 1½ inch sectional diameter as its standard for rim and tire with rim drilling of 36 holes.

### Eliminating Chain Troubles

Let us ask for this standard in chains: 3/16 inch wide either block or roller with 1 inch pitch, we can do away with the troubles for the chain maker, the sprocket producer, and ourselves as jobbers, by eliminating ⅛ inch and ¼ inch bicycle chains in either ½ or 1 inch pitch and ignoring altogether the ½ inch pitch for the 3/16 inch wide chain.

What I would propose, therefore, in order to bring these matters to the attention of the parties most vitally interested, would be the suggestion that the president of the Cycle Parts Association appoint a committee of three to act in conjunction with a similar committee of three from among the bicycle manufacturers, which he can also appoint, and a committee of three to be appointed by the President of the Jobbers' Association.

Much can be accomplished by co-operation, and if the dating evils and catalog troubles of the jobbers can be at least partly eliminated, then this Atlantic City convention will go into history as one that not only gave us the benefits of social intercourse with the busiest and jolliest set of men in this broad land of ours, but also brought us results of lasting value. Now for a few suggestions:

Each manufacturer has a different time in the year to close his business year and seek new contracts for the new season, and this gives the jobber much concern because starting with July 1 new prices go into effect first with one article and then with another. If, therefore, the jobber has his catalog issued by March 1 he must start revising in the course of a few months and begin work on his **next** year's edition with dim prospects of getting most of the necessary changes in prices before the new year has begun.

### Getting an Early Start

Now if cycle shows are to be held in the early Fall, why isn't it possible for the manufacturer to get his prices lined up by October 1, or within some period between September 1 and November 1, when business is at its lowest ebb with the jobber? In that way the manufacturer can make it possible for the jobber to get his catalog under way and do his buying so that the factories can make deliveries to the jobbers starting with December 1 on a dating basis, and the jobber in turn can give dating starting with January 1 and limit the period to April 1.

There are some sections of the country where this would not apply but what worthwhile rule is there that does not have its exceptions? Some of the parts makers are generous enough to give the jobbers liberal dating on the goods sold them, while others give no dating whatever and insist on payments being made in ten days to get the benefits of discounts during the period from December 1 to April 1. This means that the jobber carries merchandise on the dealer's shelves on dating while in the other case the manufacturer who grants dating carries the burden. This is manifestly unfair to the manufacturer who is liberal in his terms, and some remedy might be applied by the Cycle Parts Association that will distribute this burden—make it less difficult for the manufacturer to bear and ease conditions for the jobber.

### List of Questions

There will be passed to each of you a list of the principal items touched upon here, and at to-morrow's separate meetings each of you can hand in this list with proper answers and suggestions, which will greatly aid your officers and the committees to be appointed in an endeavor to better conditions in the cycle industry.

# Hagaman Wins Newark Double-Century

NEWARK, N. J., August 1.—Percy Hagaman and his little old 1913 single-cylinder Indian won the first annual double century run of the New Jersey M. C. today. Incidentally, he gathered in the 1915 Indian twin that was offered as first prize with his high score of 978 points.

In all, 57 Jerseyites, on 30 solo mounts, 12 sidecars and one tandem machine, braved the intense heat during the morning and splashed their way through tropical thunder showers in the afternoon.

The contest was held over a 45-mile course that had to be covered four times by each rider, with a check in Morris Plains and Newark on every lap. After the run the rate of speed per round was determined by drawing a slip from a hat for each separate lap. Eddie Durning, the club's mascot, officiated in this detail. He drew 21 for the first lap, 19 for the second, then 20 and finally 18. Contestants' scores were then compiled by penalizing one point per minute for being early or late at each checking station.

Although the entire course was over macadam or equally good roads, much tire trouble was reported by the riders.

Campbell, Thor, was retired in Bloomfield on the first round by a bad blowout, while Reilay, of the sidecar entrant, suffered a like fate in Maplewood on the second round.

Bill Lawrence, of Red Bank, who used his Hawley-Davidson sidecar outfit as a "jitney" and carried Frank and Charles Hammer as passengers, used seven tubes in a vain effort to keep circles of air around his wheels.

These were the only troubles noted during the first three rounds, but on the last lap practically 30 miles were ridden amidst the vivid flashes of lightning, the sharp crack of thunder and a deluge of rain. Riders, blinded by the rain, splashed and skidded their way along, with Newark as the goal.

Cash, with an Indian sidecar, discovered his magneto on this lap. Peattie, Excelsior, got his belt so wet it stretched beyond the holding point; "Les" Wintsch on an Indian, Johnston on an H-D, and Thompson on an Indian sidecar, concluded they knew enough to go in or out of the rain—and did so.

**Percy Hagaman, the Winner**

Bergfels, H-D, had his sparkplug "short" from water which charged the whole machine, shocked "Bill" and threw him off. Going some, eh, boys?

Keil, Indian, along about this time, must have lost some important part of his mount (up to this he had shed all his minor parts), for he was not reported in at the finish.

Mrs. E. B. Holton, who accompanied her husband via sidehack, says that she now appreciates the name some folks give the sidecar—"bath-tub." She had plenty of water inside the car today.

The four-horse single Indian on which Hagaman won has been ridden 22,000 miles in the service of the National Cash Register Co., for whom Hagaman works as collector.

Beside the motorcycle as first prize there were more than 25 accessory prizes, such as tires, tubes, chains, brakes, tandems and sparkplugs for the finishing riders.

## The Contestants and Their Final Scores

| *Rider.* | *Motorcycle.* | *Points.* |
|---|---|---|
| Percy Hagaman, | 4-hp. Indian | 978 |
| Karl Segelbach, | 7-hp. Indian | 972 |
| Fred W. Cordes, | 7-hp. Indian | 965 |
| Frank Gross | 8-hp. H-D | 963 |
| Walter Goerke, | 7-hp. Indian (sidecar) | 960 |
| Orie Steele, | 7-hp. Indian | 955 |
| Fred Fine, | 7-hp. Indian | 954 |
| Wm. H. Bergfels, | 8-hp. H-D | 954 |
| Alf. Spanner, | 8-hp. H-D | 953 |
| John Steele, | 7-hp. Indian (sidecar) | 952 |
| Jos. B. Werner, | 8-hp. H-D (sidecar) | 950 |

### FIRST "MYSTERY RUN"

Indianapolis, Ind., Aug. 2.—The Consolidated Motorcycle Club of Indianapolis held its first "Mystery Run" of the 1915 season with about fifty riders making the ride. The country home of Harry Dipple, Harley Davidson dealer of this city, was the objective point of the run, although but few of the riders knew the run was headed when the president, Harvey Davis, led the riders away from the club house at 918 Massachusetts avenue, Sunday, July 25.

When the farm was reached the riders and their fair passengers enjoyed a full day's round of pleasures, possible only in the country. White river nearby afforded the motorcyclists a great deal of pleasure, and some spent the entire day in Mr. Dipple's motor boat while others fished.

The next event on the club's calendar will be the Indiana F. A. M. endurance run on August 7 and 8, the local end of which the club has in charge. The club will enter a team to compete for the Indiana Clubs' championship.

### READING OUTING A MAGNET

Reading, Pa., August 2.—The Reading Motorcycle Club held its annual outing at Berkeley, near the city water supply station, seven miles north of this city last week. One hundred and thirty took part.

### EXCELSIOR FILES PROTEST, CLAIMING HESS WON BOSCH TROPHY

Claiming that Hess, who mounted an Excelsior motorcycle at the F. A. M. races in Sacramento, Cal., is entitled to the Bosch amateur trophy and the championship title, the Excelsior Motor Mfg. and Supply Co. has filed a protest with the Competition Committee against the awarding of the trophy to Liggett, an Indian rider.

According to the original returns from Sacramento, Liggett was credited with 35 points and Hess with 33. It is now claimed that Liggett was credited with four more points that he should have received and that his score under the Bosch point system was really 31.

A wire to a representative of **Motor Cycle Illustrated** in Sacramento on Monday afternoon, August 2, requesting Chairman Donovan's final decision brought the following reply:

"Donovan's decision gave Liggett Bosch trophy by two points. His total was 35."

Advertising Manager A. H. Bartsch, of the Bosch Magneto Co., made strenuous efforts to get at the bottom of the situation before leaving for Atlantic City to attend the Cycle Parts convention, but was obliged to take the problem with him to the coast resort.

### NEW READING TRACK

Reading, Pa., August 3.—Because of the unsafe condition of the old Reading fair grounds track District Attorney Harvey F. Heinly opposes motorcycle racing there. The new fair grounds track, two miles north of the city, will be built for motor vehicle racing and is to be finished early in September. If ready by Labor Day, there may be races on the track by the two motorcycle clubs, the Berks and the Reading.

### REGISTERED REPAIR SHOPS

Secretary Gibson, of the F. A. M., reports the following new registered repair shops: Muell Cycle Company, 1802 North avenue, Milwaukee, Wis.; John M. Raedel, 1507 Bushwick avenue, Brooklyn, N. Y.; Power City Repair Shop, 130 North Main avenue, Sioux Falls, S. D.

### DALLAS M. C. ORGANIZED

Dallas, Tex., August 2.—At a meeting of the motorcycle enthusiasts of Dallas county at Dallas, July 21, the Dallas Motorcycle Club was organized and John B. McCraw was elected chairman pro tem. McCraw is chiefly responsible for getting the riders together to form a club. He is the organizer of the Dallas Automobile Club.

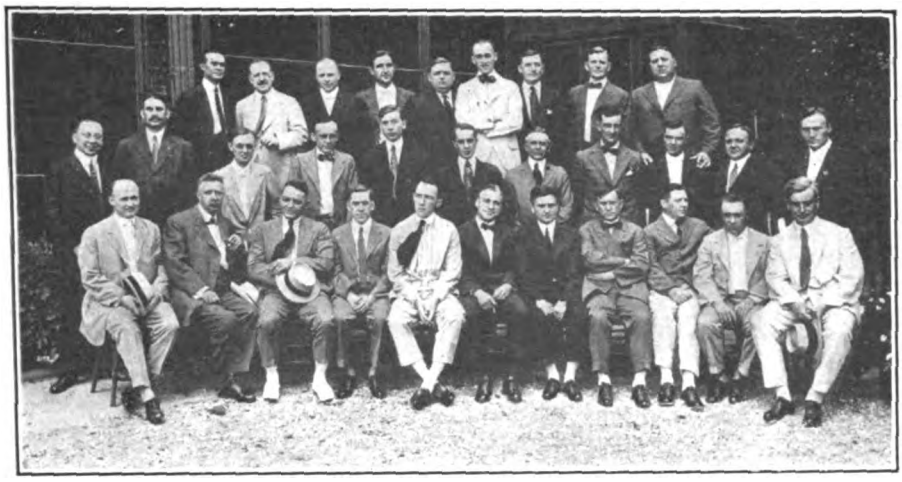
# U. S. Tire Salesmen in Big Conference



INDIANAPOLIS, Ind.—The largest and most enthusiastic conference of motorcycle and bicycle tire salesmen ever held by the United States Tire Company took place in this city on July 14, 15 and 16. The big plant of the G. & J. Tire Company was the scene of the conference. Representatives from all over the country attended and the result was that much valuable information and many useful ideas and suggestions were obtained by all.

The G. & J. plant is specializing in the production of motorcycle and bicycle tires and is the largest factory in the world devoted to the manufacture of these lines. Samples of the 1916 U. S. tire products were displayed in the building, and there was emphatic approval on all sides at the various lines offered. The U. S. Tire officials are confident that if the company's future business can be measured by the amount of interest and enthusiasm displayed by all the men, the coming season's sales will be the largest in the history of United States tires.

In speaking of the meeting, M. C. Stokes, manager of the bicycle and motorcycle tire department said: "This was the most enthusiastic and effective conference I ever attended. The men were eager to get down to business and voluntarily assembled each day at 9 a. m. sharp. This earnestness was kept up for two days and one half. At the dinner given the men, each one present had something of interest to say to the assemblage."

Those who attended the conference were: M. C. Stokes, manager of the Bicycle & Motorcycle tire department, at New York; J. J. Hanse, assistant manager of bicycle and motorcycle tire department; C. E. Stoutenburg, W. B. Harding, T. A. Jordan and J. H. Stombaugh, of the Indianapolis factory; J. W. Volz, of Atlanta; W. C. Price, of Cincinnati; H. H. Hubbard and G. W. Manchester, of St. Louis; E. W. Bailey, of Cincinnati; G. W. Culp, of Kansas City; E. L. Dolan, of Pittsburgh; Fred C. Haist, of Denver; N. C Kreischer, of Syracuse; J. J. Alexander, of Chicago; J. A. Visconte, of Boston; E. C. Madden, of Rochester; G. H. McLin, of Chicago; E. D. Hensley, of Dayton; F. J. Ratterman, of Omaha; J. M. Ward, of Indianapolis; R. T. Davis, of Indianapolis; P. H. Goodall, of Cleveland; W. C. Standish, of Detroit; E. H. Johansen, of Washington; G. C. Gaillard, of New York; J. B. Tower, of Export Department, and H. H. Colbath and F. A. Drake, of Philadelphia.

### TO MAKE ACETYLENE GENERATOR

Knoxville, Tenn.—Application for papers of incorporation for the Knoxville Acetylene Company, with a capital stock of $15,000 has been filed in the office of the county clerk. Those who seek incorporation for the new lighting company are Charles W. Holm, E. C. Camp, Alex P. Watson, Mrs. J. C. Fritz, and N. B. White. The new concern is to manufacture and sell an acetylene generator for individual use.

### FIRE AT FISK PLANT

Chicopee Falls, Mass.—A fire following a gasoline explosion recently caused the loss of $15,000 worth of building materials and four freight cars at the plant of the Fisk Rubber Company, in this city. The origin of the explosion is not known.

### BERNARD TO TAKE PARTNER

Louisville, Ky.—Harvey Bernard, Kentucky representative for the Hendee Manufacturing Company, was in Louisville for several days last week, leaving on July 28 for Grand Rapids, Mich., to take part in the endurance run. From Grand Rapids he will return to Wheeling, W. Va., where on August 16 he will be married to Miss Mignon Lenkard, of Wheeling. The young couple will spend a short time in Pennsylvania, and at Mr. Bernard's home in Chicago, after which they will go to Benton Harbor, Mich., to spent the greater part of September in a summer cottage belonging to Mr. Bernard's parents. Mr. Bernard originally met Miss Lenkard while calling on Westley T. House, the Indian agent at Wheeling, and later he performed in various motorcycle endurance runs, races, etc., which were staged at Wheeling. Mr. Bernard has just completed a trip through Kentucky and visited the company's various agencies.

### SIDE-SEAT ENTHUSIASTS

**C. W. and Mrs. De Puy, of Brooklyn, N. Y. —Note Specially-Padded Backs and Skirt Guard on Attachment**

### LOCAL F. A. M. COMMISSIONERS

New local commissioners of the F. A. M. have been appointed by State commissioners as follows: Bruce B. Keller, 120 Penn street, Scranton, Pa.; W. O. Rhoads, 224 Spruce street, Shamokin, Pa.; James Mayo, 222 Penn street, Reading, Pa.; E. B. Wagner, 23 Hazel street, Wilkes-Barre, Pa.

### A BALANCING STUNT

S. F. Houseknecht, of the firm of Miner & Houseknecht, motorcycle and bicycle dealers in Batavia, N. Y., is the driver of the sidecar combination which

is performing stunts in the accompanying photograph. The combination was traveling at the speed of 35 miles an hour when the picture was taken.

### NEW PLAN FOR TOLEDO RACE

Toledo, O., August 2.—To be conducted on a new plan that not only interests by its novelty, but insures speed never made before on a half-mile track for such a long grind, the 100-mile relay race to be run here next Sunday is arousing wide interest.

In many respects the system is similar to the ordinary relay race, but has the advantage of keeping the very best riders and machines in action most of the time, rather than having half of them retired while the other members of the two-man relays are riding.

The rules of this race call for only one entry from each contestant. However, each man who starts must be provided with a relief rider, with whom he can make any arrangement he chooses. The point is that no rider can be on the track for more than 45 consecutive miles.

# M. M. A. TO COMBAT BURLESON ORDER

## Right of R. F. D. Men to Use Cycles Will Be Considered at Special Detroit Meeting

SECRETARY E. F. HALLOCK, of the Motorcycle Manufacturers' Association announces that a special meeting of the M. M. A. has been called for the morning of August 10, at the Hotel Pontchartrain, Detroit, for the purpose of considering the recent order of Postmaster General Burleson prohibiting R. F. D. carriers from using motorcycles or bicycles on their routes. It is the intention of the M. M. A. to launch a movement, if possible, which will result in reconsideration of the matter by the Postmaster General, and perhaps to bring legal pressure to bear in behalf of the carriers affected.

It is pointed out that a great many R. F. D. carriers have been using motorcycles and bicycles with uniformly good results on their routes, and that the new order involves a hardship on the carriers as well as upon the cycle agents who are deprived of this promising field for their wares. A question has been raised, in other than M. M. A. circles, as to the scope of the Postmaster General's authority relative to the vehicles used by the carriers, it being asserted that as Uncle Sam neither provides the R. F. D. motorcycles nor helps defray their upkeep he can hardly expect to issue orders concerning them.

The Postmaster General's objectionable order is taken very seriously by the Motorcycle Manufacturers' Association, and it is the aim of that body to make a vigorous stand against the official ruling on the ground that it is not justifiable from the standpoint of economy or fair from the viewpoint of the R. F. D. carriers.

The Detroit meeting of the M. M. A. will be held just prior to the opening of the annual convention of R. F. D. men, which is to be held in Detroit, and an effort will be made to get at the bottom of the matter. The Postmaster General's order is to go into effect January 1 next.

An appeal is made to all concerned in the motorcycle and bicycle fields to bring whatever pressure is possible to bear upon the Postmaster General's office in order that the prohibitive order may be revoked or at least modified in some way. Dealers or jobbers who wish further details, or who have a suggestion to offer, are invited to get in touch with Secretary Hallock of the M. M. A., at 1482 Broadway, New York City.

### CLAIMS ON WHICH POSTMASTER GENERAL BASES HIS ORDER AGAINST MOTORCYCLES

Washington, D. C.—Postmaster General Burleson's order prohibiting the use of motorcycles and bicycles in R. F. D. service is based on these claims: "That it is difficult to protect the mail in bad weather, that poor roads in stormy weather offer greater drawbacks proportionately to the motorcycle than to the automobile or horse and wagon and that the use of the motorcycle tends to discourage parcel post shipments, presumably because it is believed that the packages would not be fully protected."

However unreasonable these claims may be, they afford the basis of the order. It is not stated that complaints have ever been filed by users of the mails—parcel post or otherwise—against the motorcycle, and those who have given the matter much thought begin to believe that the automobile men have more than a passing interest in the Postmaster General's edict.

# PARKHURST WINS AT MILWAUKEE

## Carroll Protests His Victory In 100-Mile Feature Event—Verrill Gets Five Mile

MILWAUKEE, Wis., Aug. 1.—Red Parkhurst, riding a Harley-Davidson, is credited by the official timers with having won the 100-mile feature event of the race meet held here this afternoon, under the auspices of the Milwaukee Motorcycle Club. His time was 1:31:30⅕.

Immediately after the race Teddy Carroll protested Parkhurst's victory, claiming that he was a lap in the lead when he spilled in the ninety-eighth lap and Parkhurst passed him. At a meeting held in the evening in the effort to straighten the thing out, it was decided to put the whole affair up to Chairman Donovan of the competition committee. The five-mile event went to Verrill on an Indian and Carroll on the same make of red speeder captured first in the 10-mile.

The results:

Five-Mile.—First, Verrill, Indian; second, Carroll, Indian; third, Janke, Harley-Davidson, and fourth, Stokes, Excelsior. Time, 4:21⅘.

Ten-Mile.—First, Carroll, Indian; second, Janke, Harley-Davidson; third, Davis, Indian; fourth, Parkhurst, Harley-Davidson. Time, 8:44⅗.

100-Mile.—First, Parkhurst, Harley-Davidson; second, Stokes, Excelsior; third, Carroll, Indian; fourth, Montgomery, Excelsior; fifth, Janke, Harley-Davidson. Time, 1:31:30⅕. (First place protested by Teddy Carroll, Indian, the protest to be settled by Chairman Donovan.)

### R. F. D. MEN OBJECTING

Louisville, Ky.—Motorcycle dealers and rural free delivery carriers are considerably upset over the recent order of Postmaster General Burleson who states that bicycles and motorcycles cannot be used for rural delivery after January 1, 1916. There are a number of motors now in such service throughout Kentucky, and the prospect was for an increase in this line of the trade. It is contended that the Government hardly has a right to give orders on what kind of delivery vehicle shall be used, so long as the Government does not pay for the vehicle, or contribute anything towards its upkeep. It has been proven in Kentucky that the rural motorcycle delivery men have managed to deliver all parcel post packages and first class mail on time even during the worst weather. When traffic has been and the delivery men report that the system is far superior to the old wagon or buggy formerly used.

# EARL TO LEAVE HENDEE MFG. CO.

## Vice-President and General Manager of Indian Wigwam to Join Willys-Overland Co.

ATLANTIC CITY, Aug. 3.—The most interesting, in fact, startling piece of news circulated at Atlantic City this week was the announcement that Clarence A. Earl, general manager of the Hendee Manufacturing Company, had accepted the vice-presidency and a directorship of the Willys-Overland Company. It was stated that Mr. Earl would join the big Toledo automobile manufacturing concern some time next October.

The offer came from the Willys-Overland Company to Mr. Earl entirely unsolicited by him and is regarded by his many friends as a fine testimonial to his abilities as a manufacturing executive and organizer. Mr. Earl's work in Springfield has won for him a wide recognition among big manufacturer in allied lines, although the announcement of this prospective change comes as a tremendous surprise to folks in the cycle trades.

Mr. Earl's rise to a position of nation-wide prominence in the motor industries has been nothing short of phenomenal.

Clarence A. Earl

Having established an enviable record for himself during his association with the Corbin Screw Corporation, about a year or so ago, Mr. Earl became identified with the Hendee Manufacturing Company, at first as assistant manager to Mr. Hendee. Shortly afterward, upon Mr. Hendee relinquishing some of his former duties in the active management of the Springfield plant, Mr. Earl succeeded him as general manager. Mr. Hendee retaining the presidency and continuing to act in an advisory capacity in the conduct of the important business of the company. This is the present situation and the impression was general that it would remain so indefinitely.

No announcement as to who will succeed Mr. Earl has been made by the Hendee Manufacturing Company.

## DREADNAUGHT TIRE ENJOINED

Wilmington, Del.—Judge Edward G. Bradford, of the United States District Court for the District of Delaware, has decided in favor of the Pennsylvania Rubber Company, of Jeanette, Pa., in a suit brought by the latter against the Dreadnaught Tire & Rubber Company, of New York. The suit was brought to restrain the Dreadnaught firm from selling its "second" tires with the words "Vacuum Tread" thereon and from stating that the Dreadnaught "second" tires were "seconds" of the Vacuum Cup tires of the complainant company.

The reading of the decision, made on July 24 by Judge Bradford is as follows: "The complainant is entitled to a degree enjoining and restraining the defendant from selling or furnishing for sale, or permitting to be sold, its 'seconds' of the Dreadnaught Vacuum Tread tires without the words 'Made by the Dreadnaught Tire & Rubber Co.' in raised letters on the side of such tires, unless the words 'Vacuum Tread' be first removed and obliterated, or from directly or indirectly stating or holding that its 'seconds' are the 'seconds' of the Vacuum Cup Tires of the complainant."

## GOODRICH SUES NORWALK TIRE

Hartford, Conn.—Suit has been brought by the B. F. Goodrich Company, of Akron, O., against the Norwalk Tire & Rubber Company, of Norwalk, Conn., in the United States District Court for the District of Connecticut. The litigation has arisen over a form of tire made by the Norwalk firm that resembles in appearance the Goodrich Company's cord tire to a degree that in the view of the complainant company constitutes "unfair competition."

The Goodrich cord tire has a black tread and white side walls, the tread being ribbed in a characteristic manner. The complaint alleges that the Norwalk firm is making tires so like the Goodrich cord as to infringe the Goodrich trade rights. The usual injunctions and damages are asked.

## SUIT AGAINST SUN-LITE CO.

Louisville, Ky.—An injunction suit has been filed in this city by the Prest-O-Lite Company, of New York, against the Sun-Lite Company, of Louisville, and the officers of the latter company, namely, Thomas K. Hackett, the president; C. A. Tucker, vice-president; J. J. Moran, manager, and M. Moran. The suit refers in part to refilling the Prest-O-Lite tanks by the Sun-Lite firm, and both temporary and permanent injunctions are asked, together with an accounting of profits and damages.

The complainant firm alleges that the Sun-Lite people sell tanks filled with acetylene gas from a large number of stations established throughout the country, and exchange the exhausted tanks for refilled ones. It is further charged that the Sun-Lite stations have refilled exhausted Prest-O-Lite tanks, afterward selling them with the old trade-mark covered over. The preliminary hearing will be held on August 3.

President Hackett stated that he could not see that the Prest-O-Lite firm had any grounds for a suit. That company, he said, sold their tanks outright to the purchasers and he held that in selling them, without any refilling contract, any acetylene company had a right to refill or exchange them for others of its own make. Regarding the refilling of the complainant's tanks, Mr. Hackett said that his company did so with no intent to deceive the purchaser. He held, further, that the owner of a gas tank had a right to have it refilled wherever he chose, as he would an oil can, lard bucket or other container.

The Sun-Lite firm sells its tanks and charges for refills at a slightly lower figure than does the Prest-O-Lite company.

# Schwinn Discusses Outlook in Cycle Industries

SAN FRANCISCO, July 27.—A very interesting and enlightening talk on the past, present and future of the motorcycle and bicycle industry was indulged in today by Mr. Schwinn, president of the Excelsior Motor Manufacturing and Supply Company, of Chicago, and the local representative of Motor Cycle Illustrated.

### Schwinn Very Busy

President Schwinn, who came to the Pacific Coast to attend the F. A. M. meet at Sacramento, is sojourning for a few days at the World's Fair city. While he is a very busy man these days, combining, as he is, considerable business with as much pleasure as he can consistently sandwich in, he very courteously replied to a few leading questions concerning matters that are of great interest not only to builders of motorcycles and bicycles, but also to the dealers of these machines and users.

President Schwinn agrees with President Davidson, of the Harley-Davidson Company, who was quoted in these columns a few weeks ago in reply to the assertion of Henry Ford that when a lightweight motorcycle is produced at an attractive price more of them will be sold than Ford cars. Mr. Schwinn coincides with the opinion of Mr. Davidson that the three-speed machine has come to stay and that its price cannot be lowered without sacrificing quality of materials and workmanship. He maintains, as Mr. Davidson, that all the talk that is heard about the big demand for a lightweight machine to take the place of the present three-speed does not really exist; that in reality what is meant is that there is a demand for a lower price on the three-speed, which it is impossible to grant and at the same time maintain the present standard of quality and workmanship.

### Favors Juvenile Lightweight

President Schwinn forsees, however, the necessity of bringing out an entirely new type of lightweight motorcycle for boys and young men who have not yet reached their full physical development and for whom the present three-speed is altogether too heavy and a positive danger. The demand for this type of machine is so urgent, he believes, that it will have to be met; and while he did not say it in so many words, the inference seemed plain that he has in mind the turning out of this particular specimen of machine.

As to the standardization of motorcycles, Mr. Schwinn expressed the belief that the present three-speed Excelsior is as near standard as it is likely or possible to become, except for electrical appliances. In that respect he admitted that there is room for improvement not only in his own product, but in that of all motorcycle manufacturers. The difficulty of providing electrical equipment of satisfactory quality, in the small sizes necessary for motorcycle building, has been the great drawback and is responsible for this feature not keeping pace with the development of the other parts of motorcycle manufacture. He believes that this difficulty will be overcome, however, and when it is, the day of standardized motorcycles will have arrived.

Mr. Schwinn does not fear the bugaboo of the low-priced automobile, for he insists that the motorcycle has a field all to itself which the automobile can never hope to fill. Anybody who has ridden a motorcycle will bear him out in his opinion, he says. There is an indescribable fascination about motorcycle riding, he asserted, that cannot be satisfied by any other means of locomotion. This consideration, coupled with the speed and economy of operation of the motorcycle as compared with the motor car, makes it altogether improbable that the automobile will ever supersede the two-wheeler in its field.

Mr. Schwinn is most decidedly not in favor of motorcycle racing—at least not as at present conducted. He believes that it does the industry more harm than good. He says there is altogether too much racing and he favors holding only two or three race meets a year in the various sections of the country. He would eliminate the short distance events and would replace them with long distance races, increasing the three century races to five hundred miles. His reason for the suggested change is that only in the long grinds is the true worth of the motorcycle demonstrated. Most any sort of a thrown-together machine can withstand the strain of a short race, but it requires a staunchly built machine, from engine to the smallest parts, to withstand the terrific strain of several hundred miles at top speed. He would place more safeguards around motorcycle racing, as there are far too many accidents as now conducted, to the detriment of the industry.

The recent announcement that the postoffice department had decided to place an embargo on the use of motorcycles and bicycles in the delivery of mail did not disturb Mr. Schwinn at all. He declared that the constant broadening out of the field for the motorcycle would overcome the loss of the postoffice business and that there was no occasion for worry over such a small matter.

### Bicycle Outlook Good

Most optimistic, indeed, is President Schwinn's opinion of the outlook for the bicycle industry. He declared it to be his firm conviction that the bicycle was to come into its own again and be in as high favor with all classes as it was in the good old days of the so-called "bicycle craze," when the man of wealth rode side by side with the workingman. His reason for this belief is based on the necessity of the people obtaining more out-of-door exercise. People of the cities are beginning, he said, to realize that they do not get sufficient exercise and are turning to the bicycle as the most pleasant and beneficial means of obtaining it. Even the automobile owner and the motorcyclist are in need of more exercise, for they do not get it riding about in ease and comfort on their machines. They, too, will take up bicycling and swell the bicycle brigade until it resembles in point of numbers the "good old days." Already he perceives an inclination on the part of the general public to take up bicycling and points to the increased sales of bicycles by his company this year as justifying his opinion.

**Ignaz Schwinn, with His Family, Taken at the Sacramento Convention**

## PARDINGTON PASSES ON

Detroit, Mich.—Arthur R. Pardington, vice-president and secretary of the Lincoln Highway Association died at the Parker Hospital in this city on July 28. He had been ill for a long time with cancer of the stomach, but nothing serious was indicated until about two weeks ago. Mr. Pardington was well known for his active interest in motor racing events for the past ten years and was one of the founders of the Motor Parkway, Long Island, New York.

## McGOOKIN'S CHANGE

Earl McGookin, long associated with the Stewart-Warner Speedometer Corporation as factory representative in Michigan, retires on August 1 to start his own business. Mr. McGookin is well known to the accessory trade in both the motorcycle and automobile fields.

## ENTHUSIASTIC SIDECARIST AT 87

Columbus, Ohio, August 2.—Mrs. Nora Thompson, of Columbus, who is a well preserved woman 78 years of age, has become quite an enthusiastic sidecarist. Recently she took a trip in a sidecar, driven by her son, from Columbus to Cleveland, a distance of 150 miles. The party left at 6 a. m. and arrived at Cleveland at 2 p. m. Resting the remainder of that day and the whole of the next she returned on the third day.

## MUST HAVE TAIL LIGHTS

Louisville, Ky.—A number of the small magistrates in the vicinity of Louisville, who collect most of their revenue from enforcement of "piddling" rules, have started a campaign against the motorcycle owners of Louisville who fail to carry tail lights. Several owners have been arrested and fined, and the magistrates are having a nice time collecting the fines. This is the first time that any attempt has been made to enforce the law.

# Tells of Riding Conditions in Panama

## Motorcyclists Are Quite Plentiful There Despite Stringent Regulations

W. M. TAUL, of Birmingham, Ala., who is on his vacation from the Electrical Division of the Panama Canal Commission at Balboa, Canal Zone, and who has been an Indian rider for nearly a year on the Isthmus, says that conditions in some respects are favorable and in others make it hard to enjoy motorcycling.

"The climate makes carburetion perfect and starting the engine easy," said Taul, in an interview at Springfield, Mass., a short time ago, "but there are only 50 miles of ridable roads on the whole Isthmus and these are so narrow that if an automobile and a motorcycle want to pass, one has to go into the jungle and let the other by. There are about 75 Indian riders in the Canal Zone, notwithstanding.

"The motorcycle cops are strict on speeding, but the limit is so low, eight miles an hour, that it is hardly fair to the riders. The minimum fine for speeding is $25. I was out riding one day and a motorcycle cop who had been laying for me, instead of getting out and chasing me like a good sport, headed for a cut-off at a loop in the road and waited for me to come around the loop, taking my time, 35 miles an hour, as evidence. The limit seemed so low that I took the chief out one day and rode with him at 20 miles an hour, showing him just how slowly we were moving at that gait and as a result I understand that the motor cops got instructions to allow the boys a little more leeway.

### Uncle Sam Willing to Help

"Employees in the government service have a fine chance to save money in getting a motorcycle on the Isthmus, as anything in the way of personal property of a government employee, up to 500 pounds, can be shipped from the States for a charge of one dollar. Gasoline costs 22 cents a gallon and the best oil we can get is Monogram marine oil.

"The license fee would surprise riders from the States accustomed to a small State tax, as we have to pay $11 in the Canal Zone and $2 to the Government of Panama, making a yearly charge of $13 for the privilege of riding. We go back and forth quite freely between the Canal Zone and the adjoining Republic of Panama. In the City of Panama they have bullfights on Sundays and are altogether more free and easy than in the Canal Zone, which is under strict military authority.

"I left the Isthmus June 17, coming home by way of Cuba, where we spent a week in riding about the Island. Cuba has such fine roads and there are so many advantages to the motorcyclist in climate and so on that there should be more riders. There is no speed limit and the police of Havana and other places treat the riders well. You wonder what kind of a motorcycling paradise you've got into when you see them holding up cars and street traffic for you to go by. The people of Cuba everywhere treat the Americans fine, showing quite a difference in this respect from the Panamanians.

"A rider going to the island with his machine should be prepared to get a consular invoice, as otherwise he will have to do a lot of chasing around to get matters straightened out, as I did in an automobile for two or three hours. The customs and brokerage fees cost me $21, and I also had to deposit a bond of $200 while I was there. The young lady who is now my wife came back to this country at the same time I did, our marriage taking place at New Orleans, and the people in Cuba ran to their doors in surprise when she went by, driving my machine. She learned to ride while we were in Panama. When we were in Cuba we made one trip from Matanzas to Havana, 72 miles, in two and a half hours.

"Up to the time I got to Atlanta I had ridden 8,600 miles in Panama, Cuba and this country without taking the motor down or touching the Duckworth chains."

**W. M. Taul with Mrs. Taul as Tandem Passenger on His Two-Speed Indian Twin in One of Balboa's Principal Streets; Both Are Touring Enthusiasts**

Mr. Taul started from the Hendee Branch in Atlanta Friday, July 16, at 12.30 noon, and rode to Hartwell, Ga., that afternoon, 158 miles. The next day's route was Hartwell to Salisbury, N. C., through three States, 303 miles. On the third day from Salisbury to Roanoke, Va., Taul rode 225 miles. On the fourth day, July 19, he rode out of Roanoke through the Blue Ridge Mountains to Williamsport, Md., 220 miles. The next long jump was from Williamsport, Md., to New Rochelle, N. Y., 315 miles over somewhat better roads, and the final lap from New Rochelle to Springfield was covered on the morning of the 21st, 150 miles. Mr. Taul, after a short visit in the North, expects to return to Balboa.

### RODE 11 LAPS, SAYS CREVVY

EDITOR.—In the ten-mile National Professional Championship, 61 cubic inches, at Sacramento last Sunday, it was reported that I won the race in 9 minutes and 8 seconds. As a matter of fact, I rode eleven laps of the track instead of ten, and made the eleven laps in nine minutes and eight seconds. This can be verified from Charles Fuller Gates, who was checking all the riders at the race.

My only reason for writing this letter is to set the records correctly before my motorcycle friends. RAY CREVISTON.

### EDUCATING THE RIDERS

Sheboygan, Wis., July 28.—An educational motorcycle run is a new stunt which is being tried out in this city with great success. Alfred Goedke, proprietor of the North Side shop, is the originator. The object of the educational run is to show riders participating correct driving hints. Each rider is given a number and is supposed to hold the same position in the run which takes in all of the principal streets in the down town district, followed by a little jaunt into the country and lunch afterward.

### SIGNS UP RACERS

Cincinnati, Ohio.—Manager M. E. Trimble, who had charge of the racing at the Lagoon motordrome, went to New York shortly after it was determined to rebuild the track, and has returned to take charge of it, with some speedy riders, including the popular "Pickles" Witherspoon, Eddie Gordon, of South Chicago, and several others. Nine riders have already been engage to furnish the contests, of which there will be six or seven each evening. Several bad spots in the track as it originally stood have been eliminated.

### FAIR TO HAVE MOTORCYCLE DAY

Streator, Ill.—The directors of the Northern Illinois District Fair, which will be held here during the latter part of August, have set August 30 as motorcycle day. They are putting up $400 in cash prizes for the racing on the afternoon of that date. The various events will be conducted by the Streator M. C.

# Sunset Ramblers Nearing Home

*SANTA MARIA, Cal., August 1.—After four days of sightseeing in San Francisco those who were left of the Sunset Ramble party started homeward by motorcycle over the famous Pacific Coast Highway at 11 o'clock Friday morning, July 30. A vote was taken to decide whether the tourists would travel southward by steamer or ride their machines, and the motorcycle won out. As Charles Fuller Gates is going to remain in San Francisco for several weeks, it became necessary for Paul Derkum to abandon his motorcycle and sidecar and drive the U. S. Tire relief car. Mrs. Derkum is riding with him.*

The others in the party are Mr. and Mrs. Hugh Fargo, Harry Crandall, of Phoenix; Ed Peterson, of Los Angeles, and Mr. and Mrs. Christianson, who joined with their Indian and sidecar at San Jose.

The riders on leaving San Francisco went over the beautiful Peninsular Boulevard, passing through Burlingame, San Mateo, Redwood City and Palo Alto, the latter being the picturesque seat of Leland-Stanford University. The first leg, to San Jose, meant a ride of 51 miles. There the tourists had lunch.

Getting under way again at 2:30 the riders proceeded to Saratoga and then over the long heavy climb, through the Santa Cruz mountains into the famous California Redwood Park.

The Ramblers got into Santa Cruz at 7:30 and arranged to spend the night there, having covered about one hundred and ten miles of mountain passes. They got away at 10:30 the following morning. Paul Derkum had worked way into the night on the truck motor, "The Rock Crusher," to repair a broken pump bearing. The tourists rode 24 miles over hills and came in view of the beautiful Pacific. They then went to Watsonville, inland 20 miles to Salinas, whence it was concluded to make a side trip to famous Monterey, 20 miles southwest to the ocean.

After taking the world-renowned 17-mile drive to Carmal Mission and Pebble Beach, the Ramblers drove through the Presidio, one of the great homes for Uncle Sam's soldiers, and an inspection of the famous old Spanish landmark concluded the visit. They arrived back at Salinas at 7 o'clock, and on Sunday, August 1, they made a much earlier start, for they were compelled to cover 108 miles to Santa Maria. Leaving at 8 a. m. the tourists traveled a rough sandy road to King City, 50 miles south, in the fertile Salinas valley, then over the steep treacherous Jolon Pass. At Jolon they were surprised to find Duck, of motorcycle fame in the early days, running a general store. Duck built and marketed "The Duck," a two-stroke, in Oakland, in 1907. He also has several motorcycle patents in use to his credit at present. The Ramblers encountered very rough roads, but beautiful scenery clear through to San Miguel, where they had lunch, a few miles north of Santa Maria. They experienced the first mechanical trouble on the homeward journey when Edwards landed in one of the innumerable deep treacherous chuck holes and broke a fork. Peterson did the same thing and broke a bracket. Both got into San Miguel, O. K., and by some quick branch service Edwards had a new fork meet him on Sunday from San Miguel to Santa Maria. Derkum and his reliable old "Rock Crusher" saved a great loss of time in carrying both machines and riders.

Leaving San Miguel at 3:40, the Sunset Ramblers continued over bad roads into Paso Robles and Templeton, cutting through Atascadero Colony, a colonizing venture attracting nation-wide attention. Then they went over the famous Santa Marguerite pass into San Luis Obispo. They had ridden from Templeton to the crest of the pass of the new-paved highway. It is impossible to give a true conception of what wonders this coast highway holds in store; this pass, with its 15 per cent. grade and its numberless horseshoes and many railroad tunnels, is beyond description in its beauty, elevation and magnitude. From the performance of the Ramblers' motorcycles and sidecars on these very steep and very long grades, motorcyclists need no longer fear any elevation. The Ramblers visited both San Miguel and San Luis Obispo missions, and were en route then up to Pismo Beach, after 15 miles of very rough going. They entered Santa Maria last Sunday evening and spent the night there.

### TAKES SPRINGFIELD CENTURY

Springfield, Ohio, August 1.—C. F. Pineau, of Middletown, riding a Flying Merkel, won the one hundred-mile motorcycle race at the Clark county fairgrounds half-mile track on Saturday afternoon, July 31, going the distance in 2 hours, 10 minutes and 19 seconds.

Leonard Coffey, of Los Angeles, Cal., on a Harley Davidson machine, finished second in the derby, nearly seven miles behind Pineau. Johnny Ellis, of Indianapolis, on an Indian, came in third, being about six miles back of Coffey. The three riders, out of a field of eight starters, were the only ones to finish the 100 miles, the last two finishing after the crowd had gone home.

Among the local riders to take part in the event were: George Heine, riding a Pope; "Rube" Forbes, on an Excelsior, and Paul Wilkins, on a Harley-Davidson. On account of engine trouble, Heine was out of the race on the fourth lap. Forbes dropped out after going about 55 miles, while Wilkins continued 75 miles before he quit the game. Among the other riders were: "Bo" Amos, of Canal Dover, on a Merkel, and Fritz Myers, of McGrawville, Ind., on an Indian. Amos dropped out after going about eight miles, while Myers raced 25 miles before retiring.

# Grand Prize

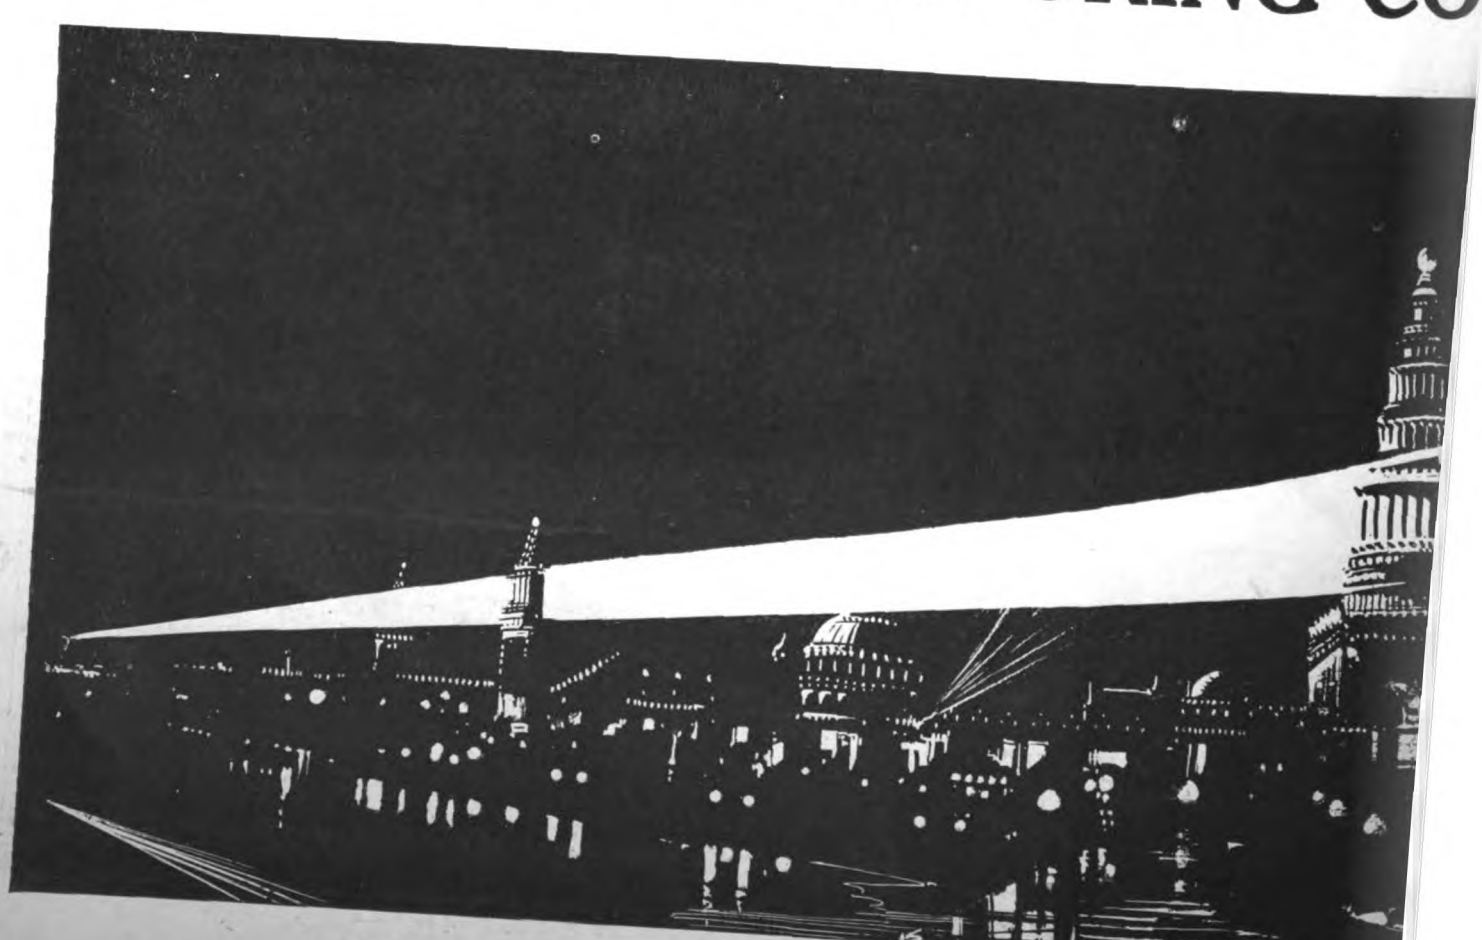
## Receives Highest Award Poss

A little over a month ago Indian announced that it ha been given a Medal of Honor at the Exposition and state that this was the highest honor earned by any motorcycle *This was a true statement.*

Yet other motorcycles claimed either directly or by inference to have attained equal or higher rank than Indian.

*Now Indian by winning the GRAND PRIZE sweeps aside all doubt and confusion thus created.*

## HENDEE MANUFACTURING CO



Digitized by Google

# For Indian!

## At Panama-Pacific Exposition

**By reason of a re-classification wherein motorcycles are now grouped by themselves—and not with automobiles as heretofore—the Indian is awarded by the superior jurors the highest possible honor within their power to bestow.**

***There is but one Grand Prize. There is but one Indian. What more natural than that they should go together?***

**NOT ONLY DOES THE GRAND PRIZE SUBSTANTIATE THE INDIAN CLAIM OF A MONTH AGO THAT IT HAD WON HIGHEST EXPOSITION HONORS, BUT IN DOING SO IT LIKEWISE SUPPLIES AN EXAMPLE OF THE CAREFULNESS OF INDIAN ADVERTISING STATEMENTS.**

**'ANY** (Largest Motorcycle Manufacturers in the World) **Springfield, Mass.**

# Stiff Going in Grand Rapids Run

GRAND RAPIDS, Mich., Aug 1.—The second annual two-day endurance run of the Grand Rapids Motorcycle Club came to a close on Sunday night, August 1, when eighteen dust-covered and exhausted riders pulled up in front of the Livingston Hotel in this city. The run was the most gruelling that had ever been staged in the State of Michigan.

### Hard Knocks on Tap

The committee in charge of the run picked out the worst roads imaginable. Hardly had the contestants left the city and approached the first control when they struck some very hard going. Everything that could possibly make an endurance run difficult was on tap, including rain, sand, hills and cuts through "jungles."

Twenty-one riders started from the Herald office at 4:01 on Saturday morning, leaving the city at intervals of one minute. The first control was at Howard City, at which point all the riders arrived seven minutes before the schedule. The real trials began after Howard City was left behind. Most every man had a spill between that city and the second control which was twenty-four miles distant.

### Following Frontier Trails

Charley Blakey on an Excelsior had a freak spill between Reed City and Tustin, when he was stalled in the middle of the road with both wheels high in the air. Joe Rex, astride a Henderson, also experienced some engine trouble in the early part of the run. While approaching Marion the contestants had to follow a frontier trail which abounded in tree stumps, with the result that there were several more spills. Cranberry Creek, right out from Marion, proved to be the stumbling block of more than one rider.

State F. A. M. Commissioner Scherer had some very bad luck at the creek and was forced to retire because of a broken frame. Scherer knew the course perfectly, having been over it several times. Coming into Leota, Foster Good, on an Indian, met with a bad mishap which caused him considerable injury. Harrison was the noon control and all the riders who were still in the running sat down to a hearty meal.

### Sweet Dispositions Lost

Three riders were missing at the dinner stop, they being Scherer, Bernard and Blakey. It was interesting to hear the contestants swap experiences, for all of them vowed that they had never gone through such a harrowing ride. Hats, coats, sweaters, mudguards and sweet dispositions had been lost by the roadside. The next control was at Gladwin and it was made without any serious accident. F. Martin, an Indian rider, had lost his saddle and finished out the first day's schedule minus a comfortable seat.

The stretch from Panconning to Bay City, the night control, consisted of twenty miles of fairly good road and was comparatively easy riding. On checking in at Bay City, the riders were welcomed by members of the local club. It was found that all but the three contestants who dropped out earlier in the day had entered the city and as far as it was possible to learn there were six perfect scores up to the time Bay City was reached.

### Second Day Easier

The second day's schedule provided much better going. Almost all the roads were in the boulevard class, with the exception of about twenty-five miles. Early on Sunday morning the Bay City club fellows saw the endurance riders out of their city and headed for Saginaw. Warren Vellman, on a Henderson, got confused at Saginaw and was unable to find the checking station, with the result that he was put out of the running.

Rolf Storts, Excelsior, took the worst spill of the run on the second day when he struck a clay bank and was thrown beneath his machine. Vandenberg, who was feeling his way through, came to the rescue. Later in the day the rescuer himself got into trouble when he skidded and bent his forks. From Kalamazoo into Grand Rapids the boys made record time and arrived one hour ahead of the schedule, all of them ready to drop from exhaustion.

### Hard Course Demanded

The reason given for picking out the hard roads was that a majority of the Grand Rapids Club members had complained that the courses followed on previous runs were entirely too easy and that every entrant could finish in good shape. That the course followed by the run which ended last Sunday was one which tested the courage and the endurance of the riders was evidenced by the fact that a number of the factory men said that they would never have entered had they known how gruelling the grind was going to be.

Those who participated in the affair were as follows: H. D. Immel, Henderson; Chas. Blakey, Excelsior; T. Martin, Indian; E. F. Seydelle, Excelsior; N. Vanderberg, Harley-Davidson; Ray Chipmer, Harley-Davidson; Rolf Storts, Excelsior; Joe Rex, Henderson; John Foster, Harley-Davidson; H. Bernard, Indian; Ransom Heth, Excelsior; M. Hull, Harley-Davidson; M. J. Clark, Excelsior; E. C. Starr, Excelsior; Jim Long, Indian; Chas. Drude, Henderson; Foster Good, Indian; J. A. Jacobs, Indian; Wm. Dovery, Henderson; Commissioner Scherer, Harley-Davidson; Warren Vellman, Henderson.

---

### FIRST SPEEDWAY RACES

Tacoma, Wash.—The first motorcycle events on the new Tacoma Speedway will be held on August 15, according to latest advices. The track was thoroughly tested out on July 4 by the automobile events and is now in first-class condition. Practically all dealers in Tacoma are supporting it.

Digitized by Google

# Fast Time Between Showers at Toledo

TOLEDO, Ohio.—After spoiling the program a week ago, and causing the race meet of the Interstate Racing Association to be postponed, the weather man threatened to repeat yesterday afternoon, and it was only by snatching an interval when he wasn't looking that the events were held.

Rain the night before had left the track very wet, and it was necessary to drag the surface considerably before it could be ridden. However, when the riders did get on, it was fine, as the moisture served to pack the dirt beautifully. And as a result, the fastest time that has been made on any half-mile track in the country since 1913 was reeled off in the five-mile final heat, when Shorty Matthews turned the five laps in 5:34⅘.

Verrill scored his only win of the day in the first heat. Jumping away from the pace with Jones, Merkel close behind, he gained a safe lead on the rest of the bunch in the first lap. Jones pushed him hard all the way, trying to crowd past the leader, but while that margin was small it proved sufficient, and the two shot over the finish line still in the same relative positions. Wilkins was third man in, on his Harley-Davidson.

Fritz Meyers, Indian, stepped to the front right away in the second heat, with Coffey, Indian, second, and Goudy third, with the cyclone on the first lap. Goudy let out a few links and slipped past Fox into second position in the next lap. But Shorty Matthews, who had been back in the ruck at the start, was coming up fast now. He rounded past Fox in the third mile, taking third place, and rolled on and nipped Goudy in the next lap.

Then he hitched his wagon to a star and set sail for Meyers, who had pried off a good lead. Shorty was riding dike a monoplane in the war zone, seeming to risk his liberty and pursuit of happiness at every turn. Slowly he pulled up on Meyers, but the distance remaining was too short, and the checkered flag signaled the finish with Meyers still a dozen feet ahead. Coffey on a Harley-Davidson finished third.

The five-mile final heat was a battle royal. Meyers and Jones jumped to the front at the start, with Matthews coming up from behind in a hurry. On the second lap Matthews streaked past Jones, and tried to collect Meyers' scalp, but the Ft. Wayne pilot held him off and refused to be passed. Then there was a regular race. Some at wide-open speed, they ripped off the laps side by side, neither giving an inch. The deciding point came when Meyers struck a damp spot on the upper turn, skidded clear across the track into the grass, and had to slow down to keep out of the fence. By the time he got straightened out again, Matthews had slid past on the pole and gained a lead of fifteen feet, which was quite enough to win the race. But the pace had been so fast and the skirmish so hard-fought that at the time the watches showed 5:34⅘ for the five miles, which is "some" time.

In the 25-mile free-for-all sweepstakes, Matthews again took up the pace-maker job at the sendoff, with Meyers and Amos close behind, and Coffey rolling fourth. But Shorty's motor expired in the fourth mile, putting him out of the race. Whereupon Meyers grabbed first place, and Coffey, making a strong bid, moved up and grabbed second place away from Amos. So it was as Meyers, Coffey and Amos at five miles.

Amos pranced forward again in the seventh mile, and went past Coffey, but Coffey couldn't get the idea, and moved up into second place again on the back stretch of the same lap. Then started the real race between these two, with second place as the object. Hanging close together, they argued the matter out with great earnestness, neither giving anything away.

At ten miles it was still Meyers, Coffey, Amos, but Amos was coming up now, and in the second lap of that mile he squeezed past Coffey for second position. In the eleventh, Amos began increasing his advantage, slowly drawing away from his rival. At 15 miles the story read Meyers, Amos, Coffey, and with all three reeling off the laps steady as clockwork, they raced on past the 20-mile mark.

Then the rain, which had been threatening all afternoon, began to get action, and the first warning drops dribbled down. With 21½ miles covered Referee McConnell stopped the race, the time for that distance being 24:07⅖. Summaries:

First heat, five miles—Won by Verrill, Indian; Jones, Merkel; Wilkins, Harley-Davidson. Time, 5:51.

Second heat, five miles—Meyers, Indian; Matthews, Indian; Coffey, Harley-Davidson. Time, 5:38.

Final heat, five miles—Matthews, Indian; Meyers, Indian; Coffey, Harley-Davidson. Time, 5:34⅘.

Consolation race, five miles—Amos, Merkel; Stohan, Yale; Temple, Indian. Time, 5:56.

Match race, two miles—Matthews, Indian, Meyers, Indian. Time, 3:23.

Twenty-five miles, free-for-all, sweepstakes—Meyers, Indian; Amos, Merkel; Coffey, Harley-Davidson. Race stopped on account of rain at 21½ miles. Time, 24:07⅖.

## AFTER OPEN-MUFFLER FIENDS

Covington, Ky.—With the coming of the dog-days the usual medley of needless noises has got on the nerves of Chief of Police Schuler, especially in view of certain ordinance requirements, and he is hot on the trail of owners of motorcycles and automobiles who ignore that part of the traffic ordinance which provides that open cut-offs are illegal.

## ONE-HOUR RACE FOR NARRAGANSETT PARK ON SEPTEMBER 18

Providence, R. I.—The Narragansett Park Speedway, Inc., announces that a one-hour professional race will be held on the new Narragansett Park Speedway on September 18. The race, which is for machines having a capacity of 61 cubic inches or less, will be limited to 20 starters. There will be six cash prizes offered, totaling $1,000. The winner will get $500, the second man $250 and the third man $100. Fourth, fifth and sixth prizes are respectively $75, $50 and $25. The entry fee is $10, the closing date being September 8. Post entries, at double fee, will be received up to noon on September 18. Those interested should address the promoters, care of P. O. Box 1494, Providence.

The Narragansett Park Speedway is a mile track with sheet asphalt surfaces and concrete foundation. The turns are equal in length to the straights. The home stretch is 75 feet wide, while the turns are 70 feet wide with a 17-foot emergency apron. The track is banked for speed and great care has been taken to ensure the safety of both riders and spectators.

## POPULARITY OF SIDECARS

Newark, N. J., August 2.—Figures that show the wonderful popularity of the sidecar outfit were revealed when an actual count of the number owned by New Jersey M. C. members was shown to be 32 out of a total membership of 98 riding members. Rarely a club run is held that sidecars do not constitute one-half of the total number, and all this has happened during 1915.

# CREVISTON IS 2-MILE CHAMP.

## Indian Star Wins National Pro. Event at San Jose Meet—Johns Takes Two

SAN JOSE, Cal.—Ray Creviston and Don Johns each took two out of the four pro. events at the San Jose Driving Park yesterday, the occasion being the meet held jointly by the San Jose M. C. and the San Francisco M. C. Johns, who joined the Indian racing crew before the meet, took the five-mile free-for-all and the ten-mile pro. events. Creviston however, captured the two-mile F. A. M. Pro. Championship race, and a five-mile event with ease. Liggett, the National Amateur Champ., carried off both amateur races, and Zattle, Excelsior, took the five-mile novice event.

The opening race was the five-mile pro., with Creviston, Johns, O'Berg and Tores, all on Indians, as starters. It was Creviston first, Johns, second and O'Berg third in this event. A five-mile amateur race, with four entries, showed the amateur champ. Liggett to be the best sprinter, with Winkler, Cyclone, second and Swale, Excelsior, third. Ward, Indian, finished fourth. The time was 4:51⅕.

### Championship Hotly Contested

The two-mile F. A. M. Championship was hotly contested for by Creviston, Johns, O'Berg and Gibson, the latter on a Cyclone. Creviston and Johns came in one-two with Gibson a close third. The time was 1:38⅗. A second five-mile amateur event was won by Liggett, Indian, with Zettle, Excelsior, second and Swale, Excelsior, third, in 4:42⅕. The next race, a five-mile novice, went to Zettle, with Warner, Indian, second and Swale third. The time was 5:03⅕.

In the ten-mile pro. stripped stock, all entrants rode Indians. Creviston led up to the seventh mile, but lost a push-rod and dropped out. Johns won, with Torres next and O'Berg third. The time was 8:21. The next event, a ten-mile free-for-all, was cut to five miles after Creviston struck a rock in the seventh lap and came off. Johns came in first, with Creviston, second and Gibson, Cyclone, third. Time, 4:10⅗. The track was in good condition and a fair crowd saw the races. Among the trade men present were Stewart Slosson, of the Firestone forces; C. H. Minto and W. G. Collins, of the U. S. Tire Company; F. L. Ryan, of Goodrich sales staff; B. L. Anderson, E. G. Baker, Happy Alzina, Doc. Carlson, Mose Leavitt of the Hendee Company.

A hard fight for position made it very interesting.

WHERE THE LADY RIDERS ARE NOT OVERLOOKED

CONTROLLING COMPETITION AT GALESBURG, ILL.

**Captain Yates (in White Suit), Veteran Illinois State Commissioner, Waiting for Start of Pro. Race at Meet on July 5, at Which He Refereed**

### SPERL WINS BRIGHTON DERBY

Brighton Beach, N. Y., July 31.—George Sperl, riding a Harley-Davidson, won the 30-mile Brighton Derby at the initial meet at the Motordrome last night. Sperl's time was 24:11⅕. George Hamilton was second and Stephano Quaccinelli, third. Hamilton won two heats out of three in a two mile match against Sam Henderson, his times being 1:37 and 1:39⅕. Arthur Chapple, the veteran, was matched against Sperl in a three-mile event and won in 2:14, using an eight-valve machine.

The Brighton Derby had six starters, Chapple, Sperl, Henderson, Quaccinelli, Bill Brown and George Hamilton. From the start it looked like Chapple's race, as he rapidly lapped the field up to the ninth mile. He then stopped for oil, losing his lead of two laps thereby. Hamilton then led with Sperl second. Brown went out at the twelfth mile. Chapple was entering his twelfth mile and had one lap to the good when he experienced a front tire blowout. In spite of his skill, he came off, but escaped with a few abrasions only. Quaccinelli went out for oil in the twelfth mile and did not resume for some time. Sperl and Hamilton fought it out for first place until the last two laps, the former finally winning by a wheel length. Quaccinelli was third with 24 miles to his credit.

The Motordrome is now being run by the A. H. Patterson Amusement Company, with Edward Harvey as manager. This was the first meet under the new management, and the crowd of 2,500 who attended augured well for the successful future events.

### MEMBERSHIP CAMPAIGN WINNERS

Buffalo, N. Y., Aug. 2.—During the recent membership campaign of the Buffalo M. C., Fred Schutt and A. D. Cook won the prizes for bringing in the largest number of new members. Goodyear tires were given as prizes.

### BUFFALO RIDERS CELEBRATE

Buffalo, N. Y., Aug. 2.—The members of the Buffalo M. C. and their friends had a "blow out" at their club rooms recently to celebrate the success of the last race meet. This affair netted them over $150.00.

## WITH HIS TWO RECORD-BREAKERS

**Erwin G. Baker Between His Indian and Stutz Machines, on Both of Which He Crossed the Continent**

## YES, GOING SOME!

Wilmington, Ohio.—Thurman Miller, the local paragraph writer, is looking forward eagerly to his vacation, which is to be spent very largely on his motorcycle, touring hither and yon. Mr. Miller, who is familiarly known as "Dusty," has for some time nursed an ambition to cross the country to the Exposition on his two-wheeler, but there are grave doubts cast on his ability to make the trip, although he does not appear to consider it very difficult. His belief in the speed and powers of his machine appears from the following remark on his proposed trip, as he recently set it forth in the paper: "It is our plan to leave early some Sunday morning, while the rest of the folks are at Sunday school, and if nothing should go wrong we ought to be back in time to get our share of the cold fried chicken and apple pie for supper." Which would certainly be going some, even for Miller!

## TROUSERS AS TOW-LINE

Freeport, N. Y.—That the ingenious man can overcome what may apparently be insurmountable difficulties is proved in the recent case of an automobilist and a motorcyclist who met on the Merrick Road in the late afternoon. The automobilist found that he could not get his machine to run, so appealed to the passing motorcyclist for aid. The latter finally decided to tow the four-wheeler into this town, but the necessary rope was unobtainable.

Night coming on, the car driver finally supplied a tow-line in the shape of a pair of trousers, which he slipped off for the purpose. The motorcyclist whose name was Verbeck, then towed the four-wheeler to its owner's home over back streets. The trousers used as a tow-line survived the operation.

## USING MOUNTS FOR DESPATCH WORK

Mason City, Iowa.—Quite a number of Mason City riders who are members of the Iowa National Guard are now using their mounts for despatch work during the manoeuvres at Camp Mahoney. The staff officers find the machines very valuable in transmitting messages both in the field and when in camp.

## LOCAL PENNA. COMMISSIONERS

Local commissioners for the F. A. M. in the State of Pennsylvania have been recently appointed by Commissioner E. A. Robertson, five having recently assumed their duties. They are: Bruce B. Keller, Scranton; James Mayo, Reading; H. E. Sechrist, Harrisburg; W. O. Rhoads, Shamokin, and E. B. Wagner, Wilkesbarre.

## KELLOGG HANDLING RACES

The Danbury Fair Association, of Danbury, Conn., is arranging a program of motorcycle events to be held on Monday, October 4, on the track at the fair grounds. The program is in the hands of Stanley T. Kellogg, of State street, Bridgeport, Excelsior distributor, and will be announced shortly. There will be cash prizes to the amount of $365, and merchandise for the amateur winners.

# BRONX ASS'N TO HAVE BIG RALLY

## Many Clubs Have Been Invited to Participate in Program at Savin Rock on Aug. 22

BRONX, N. Y.—On Sunday, August 22, the Bronx Motorcyclists' Association will hold a social run to Savin Rock, Conn., and there stage a general rally for the motorcyclists of New York and vicinity. Invitations have been extended to all the clubs within a radius of a hundred miles of the Rock, and from present indications every organization in the district will be represented. Under favorable weather conditions it is expected that about 800 riders will be on hand.

Tours are being arranged from the various districts, and will probably be captained by the following clubs:

Northern Section—Providence M. C. Leave Providence, R. I., at 6 a. m., passing through Narragansett Pier, New London, Westbrook and New Haven. Distance, 128 miles.

Middle Section—Worcester M. C. Leave Worcester, Mass., at 7 a. m., passing through Springfield, Hartford, Meriden and New Haven. Distance, 114 miles.

Western Section—Poughkeepsie M. C. Leave Poughkeepsie, N. Y., at 8 a. m., passing through Stormville, Pawling, Danbury and Bridgeport. Distance, 80 miles.

Main Section—Bronx Motorcyclists' Association, consisting of clubs from New York City, Brooklyn and other Long Island points, Staten Island and New Jersey. Leave Columbus Circle, New York City, at 8 a. m., passing through New Rochelle, Stamford and Bridgeport. Distance, 75 miles.

Savin Rock is three miles south of New Haven and can be easily located owing to the fact that the roads are well posted.

It is the aim to have all the clubs gather at Savin Rock at noon and have lunch, which can be obtained at very reasonable rates, and then pose for a photograph. The rest of the time prior to the start on the homeward runs will be devoted to getting acquainted and to such games as the riders may wish to indulge in.

Clubs on or near the route of any tour are invited to join the party from that district at the nearest convenient point. As the average running time will be 20 miles an hour, no one need fear that the outing will become an endurance contest. It is a purely social undertaking.

Further details may be obtained by communicating with Wallace Stuart, secretary-treasurer of the Bronx Motorcyclists' Association, at 1010 Washington avenue, Bronx, New York.

### MARYLAND M. C. EXCURSION

Baltimore, Md.—The annual excursion of the Maryland M. C. to Atlantic City left for the noted New Jersey resort on July 24, with over 20 members and guests in the ranks. The cortege soon left the city limits and were well out on the Belair road, speeding on their way to Wilmington, at which city they arrived in due season. From the Delaware capital they went over via Penns Grove and finally established their headquarters at the Hotel Whittle, New York avenue, in Atlantic City.

The Belair road has been completed and so the tourists reduced the time to Wilmington, Del., considerably as compared with the time in the 1914 annual excursion. Among the party were Mr. and Mrs. William Snyder, Gus Heinz, Mr. and Mrs. Edward McDonnell, H. E. Snyder, Mr. and Mrs. W. S. Standiford, Mr. and Mrs. F. O. Boyd, C. Hubert, C. Frank and Ferd Lautenbach, Jr.

**Indian Stretcher Sidecar Belonging to Australian Red Cross Which Attracted Great Attention in Recent Benefit Parade; Representative "Teddy" Hastings Is in the Saddle**

# CHICAGO INDIANS ENJOY POTLATCH

## Seventy Members of the Chicago Indian M. C. Dine at the New Club House

CHICAGO, July 26.—The Chicago Indian M. C., located at 1150 Jackson Boulevard, gave a banquet to its members last Saturday evening, July 24, in its new club house. More than seventy members in good standing enjoyed the good eats, music and talks.

Plans were made at the banquet for the next club run to be given August 15, when all members will again strive for a perfect score. Much interest is being shown in these monthly runs, as Mr. Schiller has offered a $60 gun for the rider who comes through the six months with the best score.

This club is managed somewhat on different lines from other local clubs and is one of the livest in the Windy City. The club rooms, which are the largest in the city, are all well furnished. The first floor is used for storing machines while the second floor is devoted to sleeping apartments where any motorcycle club rider from out of town may spend the night, if he can show proper credentials. Top floor is given over to a gymnasium.

### FINAL INDIANAPOLIS SCORES

Indianapolis, Ind., August 3.—Final returns on the 18-hour endurance run of the Indianapolis Motorcycle Club last week show that the six finishers in the run completed with perfect scores. Geo. Von Staden of the Indian team has the highest score, as he checked best at the secret control near Gosport. The Indian team won the trophy for team entries. The members of the Indian team were Nels Hodgin, Geo. Von Staden and Al Appel. The individual riders finishing with a perfect score were Jack Carr, Indian; Johnny Merz, Excelsior, and Don Gilchrist, Excelsior. Glen McCleay on a Pope, riding as a member of the Indianapolis team, got within fifty miles of the finish with a perfect score and was forced out of the run with motor trouble. McCleay was the only rider of a single speed motor who was able to ride up the "Knobs," Indiana's steepest hill. The riders started from the Indianapolis club house at one minute after midnight on July 25. Thirteen starters left the club.

### SWIFT RUSH FOR "BACON"

Rochester, N. Y., July 31.—In order to win a wager of seventy-five dollars, H. C. Kretz, of this city, recently rode from Rochester to Buffalo, a distance of seventy-six miles, in one hour and forty-two minutes on his Thor machine. Kretz left Rochester at 7 a. m. and arrived in the Bison City 8:42 a. m., having made two detours and two stops for road information. Upon his departure from Rochester, Kretz received a sealed letter bearing the time of his leaving and when he arrived in Buffalo this note was handed to E. C. Carpenter, who then announced the time in which the journey was made.

Digitized by Google

# With the Manufacturers

### ON A 1,000-MILE TOUR

Among the recent visitors to the Pope factory at Westfield, Mass., was Frank Lockwood, of New Bedford, Mass., who was completing a two weeks' trip of 1,100 miles covering the territory from New Bedford through Maine, New Hampshire, Vermont, Massachusetts and back to his home. Mr. Lockwood is an enthusiastic motorcyclist, and says a motorcycle tour is the finest way to see the country, and that in seeing the country tourists should not forget New England. Mr. Lockwood has ridden 15,000 miles during the two seasons he has had his Pope machine, and in this riding has required less than $2 worth of repairs, aside from tires, which have cost, as he expresses it, "as well as could be expected."

### JULY ISSUE OF THE "DEALER"

Much of the first part of the July issue of the *Harley-Davidson Dealer*, the house organ devoted to the interests of the Silent Gray Fellow, is given over to photographs and descriptions of the victory at Dodge City, Kan., on July 5. The race at La Grande, Ore., is also treated at length and is as well illustrated as the classic in Kansas. Unique uses of sidecars and vans are shown, and there is an excellent article on the care of the storage battery, such as is used in the 11-J models. A short chapter on the county fair as a publicity means closes the book.

### SEEK AMERICAN PRODUCTS

The Albert Harman Company, manufacturers of cycle and motor materials, tools and hardware sundries, at 26 Hamilton Road, Ealing, London, Eng., announces that it has taken on the agency of representing American manufacturers of cycle and motor accessories. Those who are interested in extending their export trade are invited to take the matter up with the Harman Company, addressing Mr. Harman, manager.

### "SEE AMERICA FIRST" GUIDE

Of interest to all who tour is the publication issued by the B. F. Goodrich Company of Akron, O., entitled "See America First." This book is descriptive of the main scenic features from the Atlantic to the Pacific Coast and each route and important place is well illustrated. Accompanying these are short talks on road conditions, etc.

Goodrich not only through the tires and accessories, but also through its touring bureau and guide posting service, has done much to popularize the "America First" movement. The book can be had by sending a two-cent stamp to the company at the Akron address or by personal application at one of the many Goodrich branches.

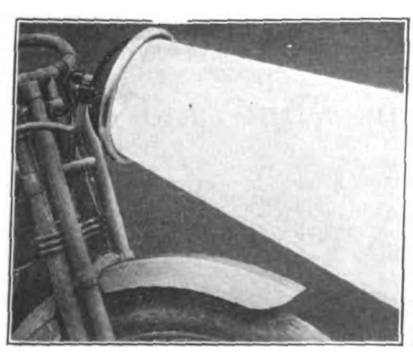
The latest addition to the many individual tour books issued by Goodrich is the Michigan route book, dealing chiefly with Chicago to Cleveland and reverse. This can also be had by application to any of the Goodrich branches or by writing to the Akron office, care of Touring Bureau.

### SCHWINN ENTERTAINS AT DINNER

Sacramento, Cal., Saturday, July 24.—Ignatz Schwinn, president of the Excelsior Motor Manufacturing & Supply Co., gave a dinner at the Sacramento Hotel tonight at which the following guests were present: Mr. and Mrs. Edward Merry, Bert Quayle, Tom Girton, the Misses Helen and Marguerite Schwinn, Mr. and Mrs. J. L. Donovan, Mr. and Mrs. Bob Perry, William Leuders, Carl Goudy, Glen Stokes, A. B. Coffman, Bill Ash and Mr. and Mrs. Schwinn. Bill Ash acted as toastmaster and made a good job of it.

### NEW ELECTRIC HEADLIGHT

The Pittsburgh motorcycle headlight, illustrated herewith, will be of interest to motorcyclists whose machines are not equipped with an electric lighting system,



**Pittsburgh Headlight**

for the reason that its low current consumption (1 ampere) makes the ordinary dry-cell battery a satisfactory and economical source of current supply, thus giving the advantage of an electric headlight without any outlay for a lighting system beyond the small expense for batteries.

The lamp is designed to use as a searchlight for automobiles, as well as a headlight for motorcycles and affords ample light for either machine by the use of powerful focusing lens in connection with an 8-inch parabolic reflector, which gives a strong beam of light with extended thrust. The bulb is a 6-volt Mazda, and the lamp can therefore be used with a 6-volt lighting system as well as with dry cell batteries. It is manufactured by the Pittsburgh Electric Specialties Company of Pittsburgh, Pa.

### WALKER HEADS POPE SYNDICATE

Westfield, Mass., August 3.—Latest developments in the sale of the Pope plant reveal the fact that Wilbur A. Walker, for twenty-five years connected with the Pope company, is at the head of the New York capitalists who have recently purchased the plant and general business of the Pope Mfg. Co. A complete announcement will be made when the transfer of the property takes place.

It is stated that probably one or two well-known New England manufacturers will be on the board of directors. These men are said to have a wide experience in the bicycle industry. Mr. Walker has for ten years managed the selling end of the Pope company and he is widely known to all Pope dealers throughout the country.

### GOODYEAR'S TIRE POLICY

Akron, Ohio, July 31.—Mr. E. R. Stilwell, manager of the bicycle tire department of the Goodyear Tire & Rubber Company, in recently calling attention to the fact that his company was the pioneer in attempting the standardization of a 1¾ inch single tube bicycle tire, spoke of the larger production and corresponding reduction in price which was made possible in thus standardizing bicycle tires.

"We, some time ago," he said, "launched the policy of making only one type of bicycle tire. It has been realized by bicycle tire makers that too many sizes have been manufactured to insure economical production. It is obvious that if all men could wear the same size of clothes, a standard size could be produced in large quantities and the cost of production could be materially reduced. The standardization of one size in the bicycle tire has enabled us to use all our equipment at one time. The idea is in conformity with the standardization of the bicycle wheel size by bicycle manufacturers. The benefits of our policy to the dealer are apparent. There is no overstocking, and tires can be ordered in small lots and secured quickly."

### A. S. BOWSER IN ALBANY

A. S. Bowser, formerly secretary of the S. F. Bowser Company, makers of fuel storage systems, at South Bend, Ind., is now assistant manager of the Albany, N. Y. branch of the company.

### HANSE TO RETURN MONDAY

J. J. Hanse, of the motorcycle and bicycle tire department of the U. S. Tire Company, of 1790 Broadway, New York, will return to his office Monday next. He has been on a two weeks' vacation, resting up from a hard season.

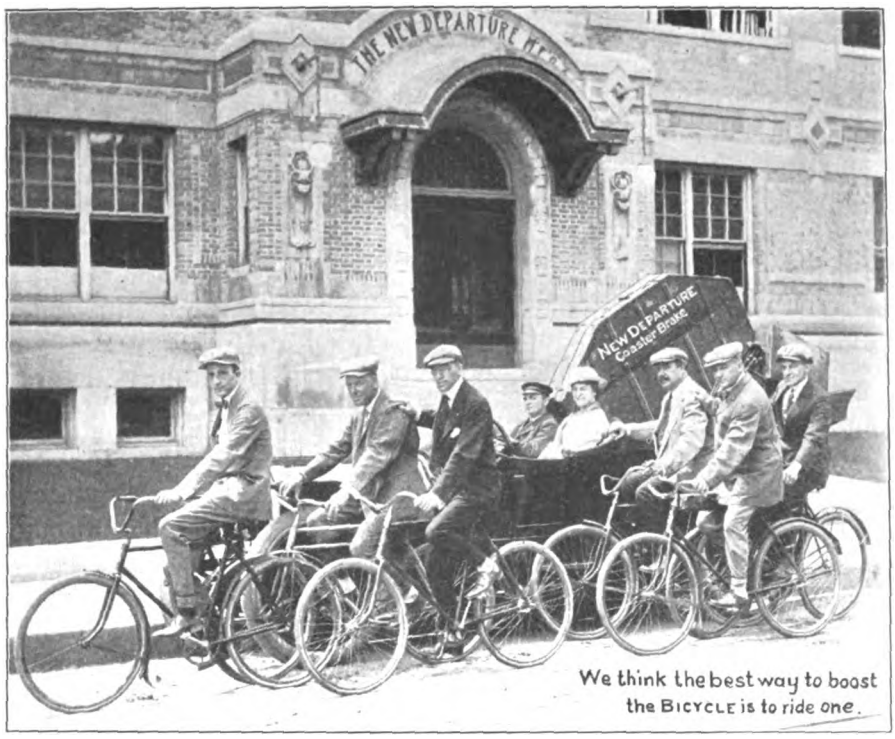
## New Departure Boosters Off for Atlantic City



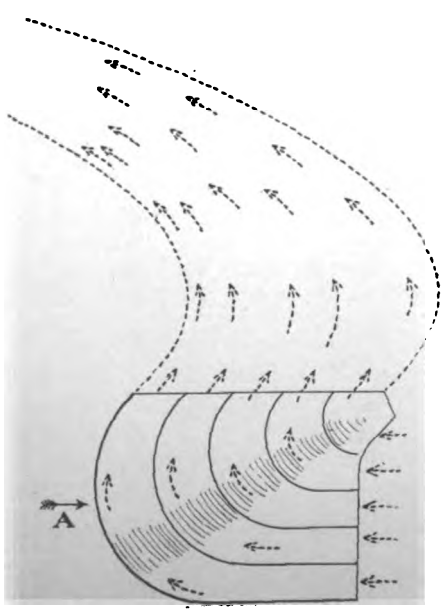
BRISTOL, Conn.—The New Departure Manufacturing Company, of this city, has been sending out an attractive postcard to the jobbing and manufacturing trade, advertising the start of its representatives for the Atlantic City convention of the Cycle Trades Association. The postcard is a reproduction of a photograph taken in front of the firm's offices and shows General Manager Dewitt Page with five of the sales staff, all being on New Departure-fitted bicycles. Accompanying the cyclists is Mrs. Page in a motor car.

At Atlantic City, the special "Red Book" bicycle boosting campaign, which has been conducted for the past year by the New Departure folks, will be strongly emphasized at the New Departure headquarters. This campaign has been devoted to bringing out all the talking points for the bicycle and illustrating these in printed folders, booklets, signs and the like which are furnished to dealers in large quantities.

In the photograph, seen above, reading from left to right, the riders are: Lester G. Sigourney, A. E. Griffith and Edward Mink, salesmen; General Manager Page; Milo J. Horton and C. P. Weldon, salesmen. Mrs. Page is in the automobile at the right. A cycle trunk is carried in the car.

## Keeps Riders Free From Wind and Dust

IN order to give the motorcyclist the maximum of protection against dust and wind with a minimum of resistance to travel, the Van Zile Ventilating Corporation, of 39-41 Cortlandt street, New York, has brought out the Van Zile air deflector, a number of views which are here shown. This deflector is designed to fit on a special bracket above the handlebars, and by reason of its construction deflects all air passing through or above it so as to clear the rider's head, leaving him in practically still air at all times.



The Van Zile apparatus has been the outcome of much scientific calculation, coupled with exhaustive experimenting in order that the maximum effects could be secured. Its action can be seen from the drawing herewith. The curved solid lines represent metal pieces or vanes, which are arranged in side plates to form the deflector. These vanes are parabolas, each having an angle of 135 degrees. When the deflector is moved in the direction of the arrow A, the air passes through the front of the deflector as shown by the darts, is deflected over the surfaces of the vanes and leaves them at the upper edges of an angle of 45 degrees.

Air coming along above the deflector strikes the currents of air emerging from the apparatus and both currents mingle, taking an inclined course as shown. As the deflector is mounted above the handlebars, the mingled currents of air pass over the rider's head, leaving him in still air. The speed of the air leaving the apparatus is equal to the speed of the air coming over it, no matter what the speed at which the machine and deflector are traveling, so that the rider is protected at all times.

What has been said about air applies also to dust coming toward the rider at or above the lower edge of the deflector. Consequently, the rider needs no goggles when this apparatus is used.

The deflector is particularly valuable for winter riding by reason of its action. The rider being in still air, of a temperature equal to that of the air surrounding the machine, he can stand more exposure than would be the case where he is subjected to cold winds at high speed. This means that the season of comfortable riding will be longer in the case of a machine fitted with the Van Zile apparatus.

**Van Zile Deflector in Use**

The deflector is mounted on a strap metal bracket, whose lower sections attach to the handlebars. It is positioned as to be about 12 inches below the rider's chin, and so placed will not interfere with the view at all. The bracket clips to the crossbar as well as to the handlebars, so as to give greater rigidity. In cases where a sidecar is used, the deflector can be fitted to a bracket on the sidecar body, or a second deflector can be permanently fitted to the sidecar. The apparatus is of such size as to make it adaptable for use in either vehicle.

Riders who have used this deflector state that at first they could not tell how fast they were travelling by reason of the fact that the wind was not striking their faces. They could light their pipes or cigars while travelling at quite high speeds without difficulty. Both of these statements are good demonstrations of the effectiveness of the Van Zile deflector.

# May Export Business Favorable

THE export figures for the month of May, 1915, show a gain in some of the shipments, which is offset by a loss in others, but the month's business can be looked upon favorably. Of the three American possessions, Hawaii makes the best showing, the figures for this year being in excess of 1914, although less than for the month of April, 1915. Both Porto Rico and the Phillipine Islands show a loss when compared with last year and April of this year.

### Gain in Motorcycle Shipments

Shipments of motorcycles to foreign countries, however, show a gain over both last year and April of this year, with the one exception that while less machines were shipped in May, 1915, than were shipped in April, 1915, the valuation for May is greater. Shipments of bicycles are most encouraging, the month of May showing a decided gain over the months of May, 1914, and April, 1915. Imports of motorcycles and bicycles show a slight gain over April, 1915, but the figures are considerably below those for May, 1914. The eleven months period ending in May shows 1915 to lead in the number of motorcycles shipped, but the valuation is slightly less than for the period ending in May, 1914, although considerably in excess of the period ending in 1913. Bicycles for the eleven month period show 1915 to be below both 1914 and 1913.

### 1,392 Machines Exported

During May, 1915, there was shipped a total of 1,392 motorcycles valued at $256,334 to foreign countries. In April of this year a total of 1,455 machines was shipped, but the valuation was only $244,485, thus placing May to the lead when computing on a valuation basis. May, 1914, shows 1,079 machines shipped, valued at $203,235. For the eleven month period, ending May 31, 1915, a total of 6,033 machines was shipped with a valuation of $1,104,212. The same period ending in 1914 shows 5,814 machines shipped, valued at $1,114,767, while the period ending in 1913 is far behind with but 3,446 machines shipped, valued at $640,606.

### Bicycle Exports Jump

Shipments of bicycles took a decided jump in May, 1915, when shipments reached a valuation of $57,299, as compared with $33,025 for the month of April, 1915. The month of May, 1914, had a valuation of $47,673. During the eleven month period, however, 1913 shows the greatest valuation, the figures being $657,753, as compared with $567,934 for 1914, and $391,331 for 1915.

Imports for the month of May, 1915, show a gain over April, 1915, the figures being $5,077 for May, and $3,311 for April. The month of May, 1914, is considerably in excess of both April and May of this year, the figures for that month showing a valuation of $24,990. The eleven month period shows 1914 to be leading with a valuation of $240,597, as compared with $172,095 for 1914, and $77,340 for 1915.

### No Foreign Machines Exported

There remained in the warehouses as of May 31, 1915, motorcycles and bicycles valued at $610. These figures are in excess of both May, 1914, when the valuation was $498, and April, 1915, showing a valuation of $343. There were no motorcycles and bicycles of foreign make exported from this country during May, 1915. During May, 1914, the valuation was $448, and for April, 1915, it was $30. For the eleven months ending in May, 1914, the valuation shows $1,076, as compared with $713 for the same period ending May, 1915.

Shipments of motorcycles and bicycles to the Hawaiian Islands show a gain when compared with May, 1914, but a loss when the figures are compared with those for the month of April, 1915. During May, 1915, a total valuation of $5,234 covered the shipments, as compared with $3,659 for May, 1914, and a valuation of $7,216 for April, 1915. Both 1913 and 1914 are in excess of 1915 in the eleven month period, the former showing a valuation of $99,602, with 1914 following with $75,222, and the figures for 1915 being last with $51,719 valuation.

### Loss in Philippine Business

The shipments of motorcycles and bicycles to the Philippine Islands show a loss in every way. May, 1914, had a valuation of $2,202. April, 1915, showed $3,314, while May, 1915, had a valuation of but $767. This is also reflected in the eleven month periods, 1913 leading with $79,056, followed by 1914 with $76,902, and 1915 with but $26,445.

Porto Rico also shows a loss, the month of May, 1915, being behind the months of May, 1914, and April, 1915, and the eleven month periods showing 1915 behind 1913 and 1914. May, 1914, shows a valuation of $3,900, as compared with $2,023 for April, 1915, and $1,868 for May, 1915. The eleven months period ending May 31, 1913, shows a valuation of $48,226. That of 1914 shows $41,361, while the period ending in May, 1915, shows $24,555.

## CRUDE RUBBER IMPORTS STEADY

Crude rubber imports for the months of May, 1914, and May, 1915, are practically the same, although both months are below the figures set during April, 1915. During May, 1914, a total of 16,271,140 pounds was imported, as compared with 16,350,431 for the month of May, 1915, and 20,425,334 for the month of April, 1915. The largest portion of the shipments during May, 1915, came from the United Kingdom, which shipped 8,693,294 pounds, as against 5,498,237 pounds during May, 1914. An increase is also noted from the East Indies, the figures being 3,101,339 for May, 1915, and 2,645,142 pounds for May, 1914. During the eleven months ending May 31, 1915, imports of crude rubber reached a total of 153,282,616 pounds, being in excess of the same periods in 1913 and 1914, the former showing 104,466,431 pounds imported, and the latter 122,567,042 pounds.

## GASOLINE SHIPMENTS FALL OFF

While the total shipments of gasoline for the month of May, 1915, are below the figures for the month of April, 1915, the loss in shipments to France and the United Kingdoms is astounding. The total number of gallons shipped reached 9,022,425 during the month, as compared with 10,071,792 for April, 1915, and 18,923,126 for May, 1914. France, which received 5,163,297 gallons during May, 1914, and 4,104,367 gallons during April, 1915, only received 60,000 gallons during May, 1915. While no gasoline was shipped to the United Kingdom during April, 1915, there was a total of 4,571,099 gallons shipped in May, 1914, and 2,177,257 gallons shipped during May, 1915. The shipments to Canada were steady, being 3,110,790 gallons for May, 1914, and 3,939,352 gallons for May, 1915.

## FEWER BEARINGS IMPORTED

A loss of imports of anti-friction balls and bearings during the month of May, 1915, is noted, when comparing the month of May, 1914, and April, 1915. During May of this year the valuation was $59,618; during May of 1914, it was $180,910, and for April, 1915, the valuation is shown as $109,486. The eleven-month period ending May 31 shows the year 1913 to lead with a valuation of $2,163,707, as compared with $1,742,397 for 1914, and $1,419,526 for 1915. There remained in the warehouses as of May 31, 1915, balls and bearings to the value of $387,474, as compared with $476,040 for May, 1914.

## Ralph Smith, Veteran Salesman, Passes Onward

DORCHESTER, Mass.—Ralph Smith, traveling representative for the Fisk Tire Company, of Chicopee Falls, Mass., died in this city on July 13, of pneumonia, contracted while on an automobile trip through Maine. The funeral services were held at the Smith home in this city and interment took place in Maine.

Ralph Smith first became connected with the motorcycle and bicycle industries in October 1907, when he joined the forces of the Pope Manufacturing Company as a bicycle salesman. During his first season he traveled in the firm's interests through Ohio and Michigan and later covered New Jersey and New York. In January, 1914, he severed his connection with the Pope company and entered the employ of the Miami Cycle & Manufacturing Company, at Middletown, Ohio, later affiliating himself with the Fisk Rubber Company, with which firm he was associated at the time of his death. It was during the return trip from Maine last month that he caught cold and developed ptomaine poisoning, this turning into pneumonia, from which he did not rally. His death is widely regretted by the trade.

From the office of the F. A. M. Competition Committee comes the announcement that seventeen sanctions for competitive motorcycle events were issued from July 7 to July 29, inclusive.

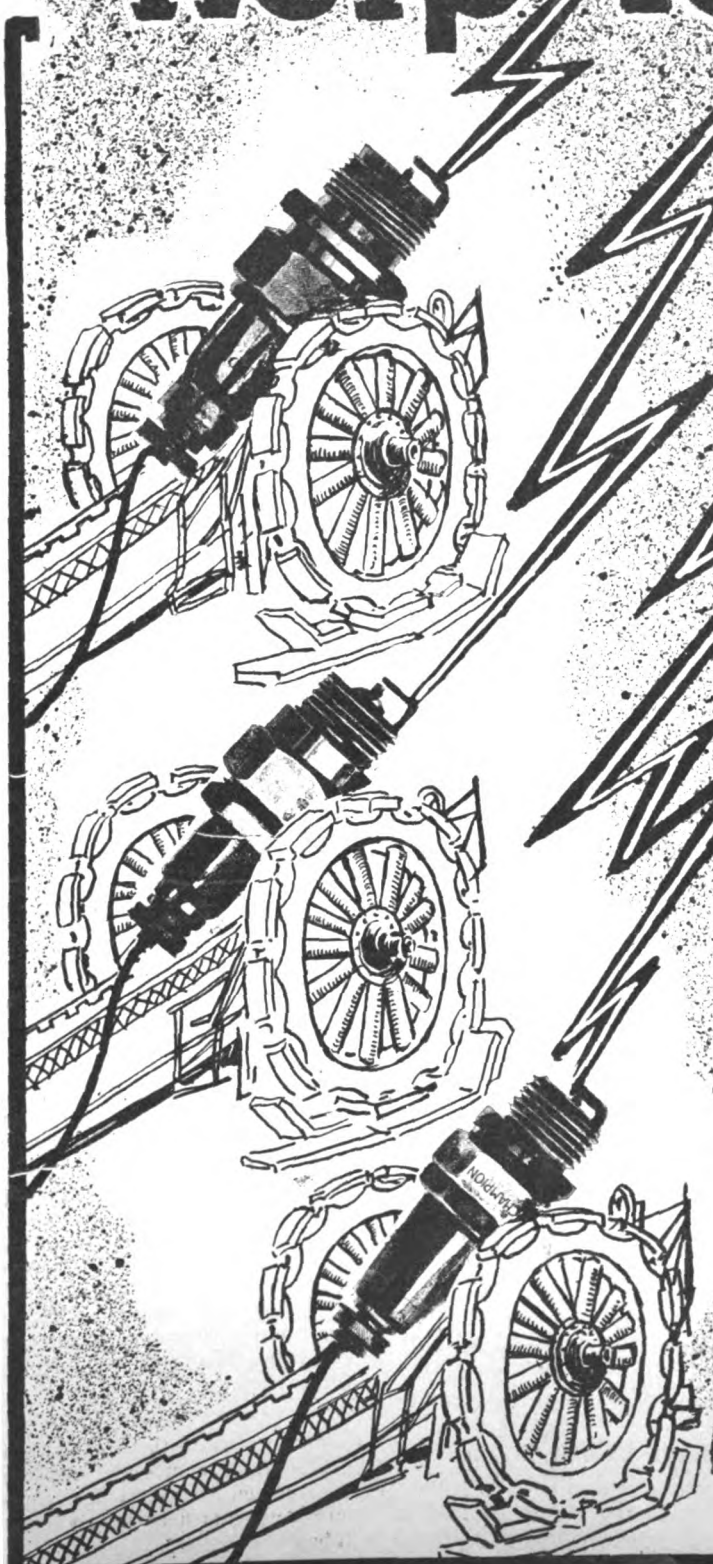
# Champion Help You Win



Champions win road battles for thousands of motorcyclists every day.

They enable you to "shoot" over the roughest country roads with never a worry about a "dead" engine.

They "stand the gaff" under all conditions. They give you entire freedom from petty spark plug troubles.

**CHAMPION SPARK**

You get quick results from advertisers when you mention MOTOR CYCLE ILLUSTRATED.

Digitized by Google

# Spark Plugs the Road Battle.

We have developed Champion Reliability by putting these plugs through the most gruelling tests we can give them in the motorcycle motors they are intended to serve.

We have applied every speed—every brake load—every conceivable trial.

This testing has resulted in the utmost reliability, dependability, endurance.

We **know** Champion Motorcycle Spark Plugs are right, long before we offer them to you. We **know** that they will give more power, more speed to your motorcycle engine than you can get without them.

You don't know the real capabilities of your motorcycle until you have tried it out with Champion Spark Plugs.

The remarkable success of Champion Plugs has brought many imitators. But imitations always fall short of the real, genuine article.

Don't let exterior appearances deceive you. Look for the name "Champion" on your Spark Plug porcelains. We have put it there to guide you.

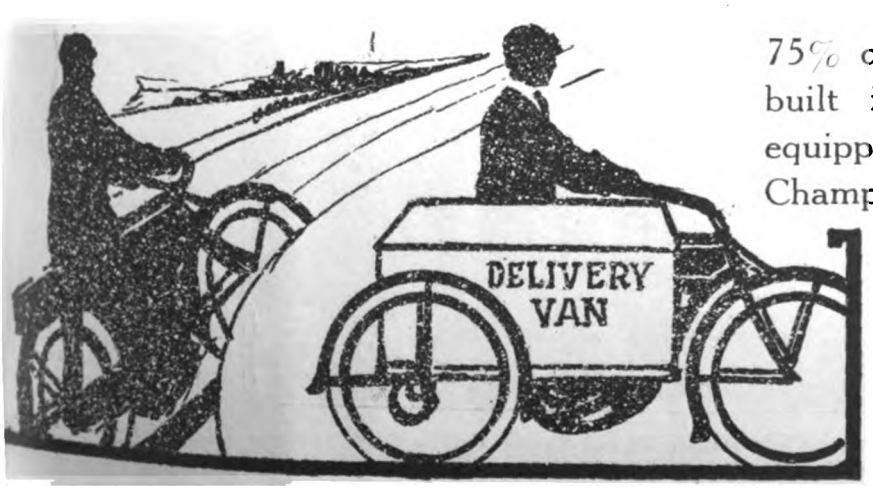
Keep your motorcycle engine equipped with Champions. Your dealer has them.

Demand the best—Champion Spark Plugs.

**THE CHAMPION GUARANTEE**

Complete satisfaction to the user—free repair, replacement or money back.

## PLUG COMPANY, 2309 Upton Ave., TOLEDO, OHIO



75% of all gasoline motors built in this country are equipped at the factory with Champion Spark Plugs. To accept a substitute is to disregard this most definite expression of scientifically determined expert opinion.

The advertiser wants to know—Therefore mention MOTOR CYCLE ILLUSTRATED.

## Cyclists Strike at Toronto Saucer

TORONTO, Ont.—Owing to a strike of all but one bicycle rider who have been competing on the local board saucer before the regular racemeet held on Saturday night, July 31, only five of the fourteen scheduled events were run off and considerable of the interest in the program was removed. Exactly twenty-six cyclists refused to go to the post and the only man who appeared on the track was Fred. McCarthy, a reinstated amateur, formerly of Stratford, Ont. He covered one lap of the saucer and was awarded the National quarter-mile championship title of Canada, which was the feature of the evening. The riders walked out when Manager Hughes announced to them, it is declared, that a cut had been made in the value of their prizes. This was the second reduction this season, the riders claim.

In connection with this strike, the announcement was made by a responsible citizen that the Toronto Railway Company had entered upon plans for the erection of a six-lap velodrome at their park, Scarboro Beach. The bicyclists declare that they will go to this track in preference to riding at the reconstructed motordrome. They claim that they cannot be suspended or disciplined for their walkout, because none of them signed any sort of an entry blank for the night's races. With only one or two exceptions, the officers of the Canadian Wheelmen's Association are stockholders in the board track company.

The immediate result of the strike was that the program was limited to five motorcycle events, two of which were matched contests between J. A. McNeil, of Omaha, on an Excelsior, and Larry Fleckenstein, of Denver, Col., riding the fast Cyclone. Fleckenstein was the easy winner in both clashes, although McNeil's machine was rolling fast enough to make the two flights exciting and spectacular. Fleckenstein's best time for five miles was 3:12 4-5.

The ten-mile motorcycle handicap was spoiled through one puncture. After cutting down the 3½ lap lead which had been given to a number of the starters in this drive, Fleckenstein was dashing ahead in spirited fashion when his rear tire blew. McNeil's machine also went wrong, so that Brigham Young, of Salt Lake City, on an Indian, was able to win out in 6.38. Burtschaell, of Atlanta, finished a close second and Doherty, of Detroit, rode a good third. Brigham Young also annexed the six-mile Sportsmen's Sweepstakes by covering the distance in 4.18 4-5.

### NATIONAL CYCLE EXHIBIT

Toronto, Ont.—Manufacturers of Motorcycles, bicycles or accessories who seek an ideal avenue of introduction to the whole Canadian trade would do well to make use of the splendid facilities afforded at the annual Canadian National Exhibition, which will be held this year during the two weeks following August 28. Last year's attendance, which was drawn from all parts of the Dominion, reached the magnificent total of 850,000. This was the number of paid admissions. Motorcycle and bicycle dealers from all provinces yearly attend this great fair for the purpose of seeing the latest in wheeldom. The motorcycle and bicycle exhibits are concentrated in a section of the Transportation Building, which is one of the largest permanent structures on the grounds.

Already the Canada Cycle & Motor Company, Limited, have taken considerable space for a comprehensive display of bicycles and accessories, and other Canadian firms will be represented, including the tire manufacturers.

### RACES AT WINDSOR FAIR

Windsor, Ont.—Motorcycle racing each day will be one of the added features at the Windsor fair this year, which will be held on the three days, September 1, 2 and 3, The events will be open to Canadian and Michigan riders and it is expected that a number of fast men from Detroit will compete. Secretary Winter has arranged a program consisting of two events each day, one for two miles and the other a five-mile race. The sum of $150 has been appropriated for the six motorcycle contests which will be staged on the local half-mile dirt track.

Transportation Building Where Motorcycles and Bicycles Will Be Shown at Forthcoming Canadian National Exhibition in Toronto

### RAIN CAUGHT TOURISTS

Saskatoon, Sask.—To be caught in the same rains and floods which bothered the riders in the Transcontinental relay was the experience of Bob Franks and George Morley, the pair of Saskatoon boys who left this city early in June with the intention of riding the 2,500 miles to New York city. Before they arrived in Minneapolis on July 8 they were delayed eighteen days by floods and then they struck more water and gumbo when they reached Iowa, Illinois and Indiana. Their Harley-Davidson and sidecar are standing up well under the ordeal, however, and they had only one puncture in the first 1,200 miles.

### CYCLIST HEADED COASTWARD

Hamilton, Ont.—The last report heard from Bruce Cornell, the Hamilton bicycle rider, was from Lincoln, Neb., where he was going strong after a good 1,200 miles' pedalling. Cornell is headed for the Panama-Pacific Exposition.

### DUNLOP ADDITION

Toronto, Ont.—That the Dunlop Tire & Rubber Goods Company, Limited, are not feeling the burden of war depression is evidenced by the fact that they have taken out a permit for the erection of a $30,000 addition to their large factory here. Less than a year ago they added another story to a portion of their works.

For the purpose of doing their bit for Canada in the great European war, the Dunlop people have donated a machine gun which cost $950, and twenty members of the factory staff enlisted in order to make up the section to man the gun.

These men are being trained by a regular drill-sergeant.

The staff of the Canada Cycle & Motor Company have contributed the sum of $2,300 for the purchase of a Red Cross Motor Ambulance.

## You Are Judged By Your Stock

"Good-will" is an intangible thing, yet a necessary asset if you would do business. It is a practical evidence of the faith people have in your goods when they buy of you.

The very presence of the PIERCE Bicycle in your show window is evidence of the fact that you carry the best in the bicycle line. You can readily see how this causes the buying public to have the same faith in your other stock as they have in the PIERCE.

For it is an acknowledged fact that PIERCE BICYCLES are supreme. We have never been able to satisfy the demand for PIERCE bicycles, despite the fact that we have steadily increased our production insofar as was possible without deviating the slightest hair-breadth from the rigid standard of quality we set many years ago.

Dealers—you should link the PIERCE reputation to your line—write us for full literature.

## *Jack Brady, Veteran Traveler, Hands Out Some Pointers on the Value of a Live-Wire Club*

"HOWD'YE, howd'ye, ole top?" Jack Brady saluted John Mort, the Burlington bicycle dealer, as he deposited his valise on the floor of the latter's establishment and wrung Mort out of his snooze by a vise-like grip.

"Oh, fair to middlin', I guess," yawned Mort, pulling his pipe out of his mouth. "Business ain't what it might be though. The fellows in this town don't seem to be riding bicycles as much as they used to."

"Hum," murmered the ripened old traveler, "That's funny. I just saw Jones up in Hagersville and he told me that business is coming around splendidly. Sold more machines this year than last—and they were all first-class bicycles."

"Not that way in this section," said Mort, leaning against the showcase and crossing his legs slowly. "I wonder how Jones does it?"

"He told me all about it," began Brady, settling down into a chair and lighting a cigar after handing one to Mort. "You see, I have been tipping Jones off to what some of the successful dealers have done and he decided to do a little experimenting. He merely formed a bicycle club and that's why he's doing a bigger business this year."

"BICYCLE club? Huh!" grunted Mort, while the traveler smiled. "That's the old line of gab. I don't see that a bicycle club in connection with my store is going to do me any good. It may turn out to be a big expense."

"Well, Jones has made a success of it," replied Brady, "and there's no reason in the world why you can't do the same thing. Just let's thresh this club business out and see where it'll lead you. Stop to consider what a group of husky bicyclists in a club of yours could do. They would meet in your establishment often and give it the wide-awake atmosphere it ought to have.

"Ever pass the store that always looks deserted and dead? Did you feel like buying anything there? Jones has the boys meet in his place to talk of the trips and runs they are planning. He turned over a certain section of his store to them, and stipulated that they were not to gather in front of the salesroom—that's the selling sanction and they readily understood why he doesn't want them in there. Jones' place is now attracting attention—it's alive."

"Is that the only advantage of a bicycle club?" asked Mort, rubbing some of the dust off the showcase with his hand.

"NO—not by a long shot!" howitzered Brady. "There were lots of boys in Hagersville who had quit riding their bicycles. When they saw the crowd at Jones' it gave 'em sort of homesick feeling for the trusty bike and they hauled their dusty mounts out of the cellar. They found that their bicycles were in need of new tires, lamps, etc.; and when they joined Jones' club they naturally bought their supplies from him.

"I've never seen a better lot of bicycles boosters than the fellows in that club," continued Brady, noticing with a grin that Mort's cigar had gone out. "I happened into Hagersville one Sunday and decided to spend the day there. After tucking a nice little breakfast under my belt, I sauntered up Main street, when lo and behold! Jones' club—over forty strong—was starting out on a run. Gosh that sure was some sight—every one of the fellows was neatly dressed in cycling costumes and their machines were trim and shining. I wasn't the only one who stood still and watched. Everybody on the street looked as though he were impressed."

"WHAT if they were impressed?" asked Mort, chasing a fly off his nose.

"What if they were?" repeated Brady, welcoming the chance to make his argument clear. "Here's what impressing them meant to Jones. He found that interest in cycling was being stirred up among boys and girls who had never dreamt of riding a bicycle. There was more than one home in which the subject of Jones' club was eagerly talked over. And business men in Hagersville started to take an interest in bicycles. They had noticed some of Jones' club fellows using their bicycles on errands and noted the facility with which they carried the parcels home.

"Now what was the net result of the bicycle club to Jones' business?" Brady continued. "He not only had people interested in bicycles but also in his store. The old riders who were won back bought their supplies from Jones', the novice who had just fallen in love with the idea of cycling got a machine from Jones, and the live merchants who marked the merits of the bicycle for deliveries purchased commercial outfits. So you see, when Jones woke up at the beginning of this season he also woke up the town of Hagersville. The bike club did it."

"I guess there's something in that," admitted Mort.

"Don't 'guess' it!" shot back Brady. "It's absolutely so. And for good measure Jones is having a corking fine time going on Sunday and holiday runs with the club."

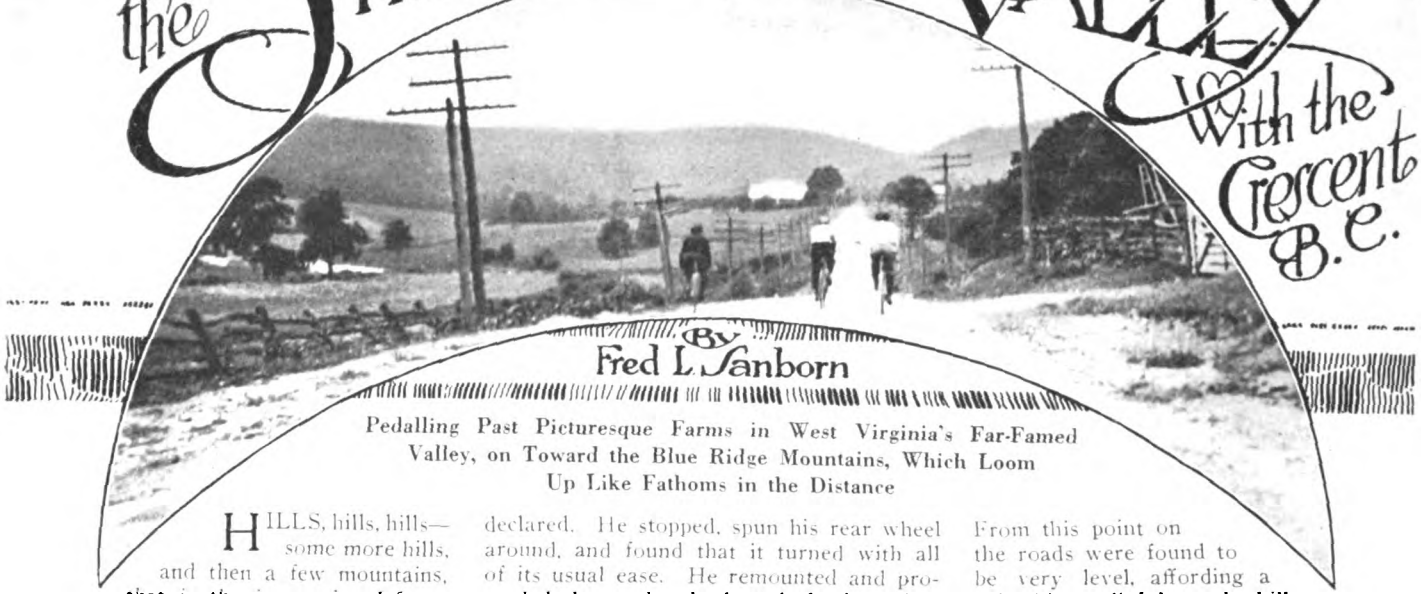
# Through the Shenandoah Valley With the Crescent B. C.



By Fred L. Sanborn

Pedalling Past Picturesque Farms in West Virginia's Far-Famed Valley, on Toward the Blue Ridge Mountains, Which Loom Up Like Fathoms in the Distance

HILLS, hills, hills—some more hills, and then a few mountains, that is the impression left on the mind of a cyclist after he has pedalled his way from Baltimore to the beautiful Shenandoah Valley in Virginia. But despite the realization that there would be all these steep hills to conquer, fifteen sturdy members of the Crescent Bicycle Club were enthusiastic and in high spirits as they merrily wheeled themselves out of the city of Baltimore early on the morning of the glorious Fourth when the sun had just crept above the horizon.

### Responding to Artillery

Armed with several pistols and boxes of "blanks," they celebrated the holiday with great gusto in passing through each little village on the route. A stop was made at Mayfield to quench the thirst of the cyclists, and while there a discharge of artillery brought forth an immediate response. A window went up and a masculine voice demanded to know if the celebraters were aware that there were people asleep in the village. Evidently they were not, for when all thirsts were slacked, the cyclists wheeled off with a parting salute, amid an outburst of profanity from Mayfield.

A few more miles along the route the merry wheelmen encountered two motorists fast asleep in an auto by the roadside. One of them roused himself as the crowd approached, but the other was evidently sleeping the sleep of the just, for a dozen shots failed to bring him to life. A few more miles of uneventful riding and the puncture fiend started to get in his deadly work. After a few punctures sustained by various members of the party, Frederick was reached at 10 A. M. Here the hungry riders sat down to their second breakfast, and thus fortified started over the twenty-seven miles of mountain road to Hagerstown.

### This Made 'Em Laugh

Then ensued one of the most amusing incidents of the trip. The party had hardly started up the winding grades leading to Braddock Heights, when one of the riders declared that there was something wrong with his wheel. "It didn't run right," he declared. He stopped, spun his rear wheel around, and found that it turned with all of its usual ease. He remounted and proceeded about a hundred yards further when he found an examination again necessary; but, as before, this Crescent could find nothing wrong.

By this time, those "in the know" were in a gale of laughter. Though the puzzled rider is a veteran cyclist and a mileage rider of note, he had never before encountered any "real" mountains. The long, unvarying grades of the state road over the South and Catoctin Mountains are very deceptive in their grades to the inexperienced eye. The grades don't look hard, but they certainly are difficult. However, everything comes to an end at last, and the summit of the Catoctins was reached, and as the leaders started to make the descent the

At Fairfax Hotel, Winchester, W. Va.

deceived veteran whirled past at a forty mile an hour clip, announcing that "something had loosened up" on his machine at last and he had returned to his usual form.

### The Populace Wondered

After fifteen more miles of mountain roads had been crossed, the tourists wheeled into Hagerstown amid the wondering gaze of a populace that seldom has the opportunity to feast its eyes upon the sight of a bunch of "regular cyclists." Dinner number two was next in order and the riders, who were now in the Shenandoah Vailey, continued on their way to Williamsport, where the Potomac River was crossed. Here a short halt was made to enjoy the view and allow the camera man of the party to get a couple of pictures. From this point on the roads were found to be very level, affording a refreshing relief from the hilly and mountainous roads previously traversed, although the West Virginia style of repairing roads, by dumping down a load of crushed stone wherever needed, did not make a hit. Martinsburg, W. Va., one hundred miles from home, was reached at 5:30 p. m., and after a short stop for refreshments was made, the journey was continued on to Winchester, which was reached at eight o'clock in the evening.

### Supper at Winchester

Then came supper at the Fairfax Hotel. How those boys did eat—they surely did keep the waiters on the move. At the conclusion of the meal the table looked as if swept by a cyclone. Darkness had already fallen by this time and sightseeing was deferred till the morrow, the pilgrims contenting themselves with the purchase of a few souvenir post cards. Five o'clock was the hour set for breakfast next morning, and the breakfast hour found the rain pouring down. It eased up a little after breakfast and a little sightseeing was enjoyed, as there are many historic sports in and about Winchester, reminiscent of the early campaigns conducted by Washington against the Indians and of several hard fought battles of the Civil War.

### Starting the Return Trip

Despite the lowering weather the cyclists finally decided to attempt the trip back to Baltimore awheel, and after repairing some of the ravages of the loose stones encountered the day previous, the start was made at 10 A. M. The return route was over an entirely different course than the outward bound journey, the roads being found very good as far as Berryville, Va., but getting into West Virginia, much loose stone was again met with, necessitating many stops for repairs. No one was rendered hors de combat, however, and the travelers continued happily on their way till Harper's Ferry was sighted, thirty-five miles from Winchester. At this point the Potomac River cuts its way through the solid rock wall of the mountains, and it is indeed a beautiful sight at a distance of five miles or so.

Digitized by Google

The Potomac was safely crossed, but on reaching the Maryland side one cyclist's admiration for a fair damsel, passing in an auto, put an end to his joyful trip awheel, for a while at least. He turned his head to follow the course of the machine and collided with a large, sharp stone, putting a nasty gash in his tire seemingly impossible of repair. The official "tire doctor" of the club fortunately happened to be nearby, and a little of his professional assistance put the punctured tire in good condition again, and then all of the tourists were again able to resume their journey together.

**Singing and Jesting at Night**

The climb over the mountain on the Maryland side of the ferry was followed by eighteen more hilly miles to Frederick. Here the hungry tourists indulged in one of the square meals for which the Maryland countryside is justly celebrated, and then resumed their journey homeward. Numerous punctures, the aftermath of riding the stony West Virginia roads, made their progress slow and compelled them to ride in the dark. But they refused to worry and continued to be happy, enlivening the night with song and jest, and now and then a few pistol shots in honor of the day. Baltimore was finally reached at 11 P. M., and despite all trials and tribulations all declared it the "best yet" in the touring line, and expressed their intention of again making it when the next "Glorious Fourth" rolls round.

This trip through the Shenandoah Valley is one of the Crescent classics which is enjoyed by the Baltimoreans every year. In addition to the Shenandoah tour, they participate in numerous other bicycle journeys to points of interest about their home town, staying away at times for more than a week. The individual members of the Crescent Bicycle Club often go out alone on their silent two-wheelers to take long vacation trips, covering hundreds of miles, into neighboring states. One of the wheelmen is at this writing happily pushing the pedals on a ten-day vacation trip. He takes but a light outfit with him and tramps about in the spirit of abandon that makes him the envy of his less fortunate fellow Crescents. When he completes his trip he will have an interesting story to tell, which will appear exclusively in these columns in the near future, together with snappy illustrations of the scenes he encountered along the route followed.

## ON ANNUAL "BATH" RUN

Quite a number of cyclists followed Captain Steppello, of the New York Division of the Century Road Club Association, on the Annual "Bath" run held on Sunday, August 1. This run is an annual fixture and it consists of a short bicycle ride, generally less than twenty-five miles, a baseball game, some bicycle races, and, after dinner, a bath in the surf.

Sunday's ride started at nine o'clock a. m., and proceeded to St. George, Staten Island. A scenic ride brought the cyclists to Woodland Beach, and, because of the intense heat, the baseball game and bicycle races were called off for the day, and swimming was in order. After dinner swimming was again enjoyed until five p. m., when a tour around the beach was tried, but was unfortunately soon broken off by sudden rain.

The bicycles were then taken under shelter, the piano at the shelter was immediately "a-going," while singing, dancing, and eating quickly whiled away the time, until at 10 p. m. the party broke up, some of the riders riding home on their wheels, braving the rain, while the rest took the trip on trolley cars. Among those on the run were: Captain George Steppello, Louis Sattler, A. R. Jacobson, Ernest Kuno, Peter Wollenschlager, Sylvain Segal, Lucien Wetzel, Ray Caldwell, Joseph Caldwell, Charles Piana, Miss E. McKaig, Miss B. Cole, Edward Fanning, Joseph Costa, Alexander Whytock, Charles Martin, Joseph Naphtal, Harry Glotzer, Harry Naphtal, Max Naphtal and Mrs. Joseph Naphtal.

## L. A. W. WILL CELEBRATE

Boston, Mass., August 2.—The members of the League of American Wheelmen are preparing for their annual banquet which will be held in this city on September 9. The banquet takes place at six o'clock in the evening at the Dreyfus restaurant, and there will be a business meeting at eight o'clock. On Friday, September 10, the famous wheel about the hub will start on its two day run. The official announcement states that members who attend on bicycles are just as welcome as the old veterans who ride in autos. Following is the "reminder" that has been issued by President Hale:

Just a word to remind delegates and members of the annual good time in September. The annual meeting and dinner should appeal to those who are eligible to act in the Assembly meeting and to those who are members with a live interest in our affairs. The dinner is open to both.

Delegates and league members should bear in mind that these coupled annual events are the great L. A. W. features of each succeeding year. There are three excellent reasons why delegates and members should make every effort to be present this year.

First.—We will meet and greet the friends of old, the friends of our active wheeling days, the friends who grow dearer to us as their numbers grow less.

Second.—We will have an old-time wheelmen's dinner, minus fuss, feathers and formality, and plus sociability, song and story.

Third.—We will participate in the "Wheel About the Hub," than which there is nothing nearer to a veteran wheelman's heart.

Write down the dates on your calendar, your engagement book, or the tablets of your memory, and let nothing interfere with your being in Boston on September 9, 10 and 11, 1915.

W. H. Hale, President.

## SAN ANGELO BICYCLE CLUB

San Angelo, Tex., August 2.—The San Angelo Bicycle Club has just been organized with officers elected as follows: Fred Roth, president; Joe Gresham, vice-president; Herbert Taylor, press correspondent and C. C. Cole, secretary and treasurer.

While the club is still an infant it is a live wire. Members are already planning a road race to which merchants of the city have offered to contribute liberally. Details will be announced within the next thirty days regarding the length of the race, entry fee, prizes, etc.

# The Bicycle's Great Need—Publicity

## What a Well Organized Central Bureau Could Do

By F. W. STARR

Publicity Manager, The Pope Mfg. Co.

THERE are thousands of bicycle prospects in the United States today who are not being properly cultivated by the manufacturer. It is largely because so much is taken for granted and no real effort is made to push the bicycle that a larger number of the silent steeds are not seen on the streets.

### Interesting Traffic Census

Recently a very interesting traffic census taken in England showed that out of a total of 10,118 vehicles, which daily passed a certain place, 7,779 were pedal driven, that is, bicycles. Take and compare these figures with those which might be obtained from ninety-nine out of a hundred cities in this country and you will find the proportion of bicycles far below the ratio given above.

If the bicycle is used extensively in England, it ought also to find favor in America where people earn more money and usually have more leisure on their hands.

Unfortunately many high-priced luxuries are being flaunted in their faces—luxuries which in themselves are not really worth while, but which make an appeal largely because people have been educated through the medium of forceful advertising to resort to them.

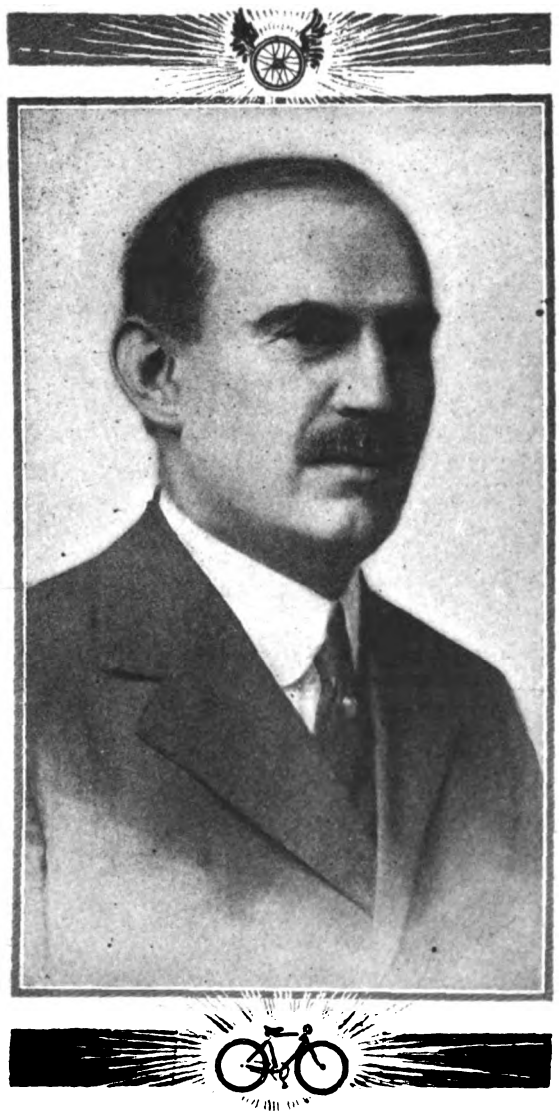
### The Bicycle's Substantial Value

No one who has studied the situation carefully will doubt for a moment the intrinsic value of the bicycle. It fulfills economically a utilitarian and pleasure purpose. The merchant who wishes to make quick deliveries inexpensively; the workman who desires to go to and from his place of employment in quick time; the children who must travel over some distance to get to the school house, and the many people who seek a healthful exercise that will take them to quiet and beautiful places, all find in the bicycle a vehicle that adequately suits their purposes.

The bicycle is to a certain extent now, and can be made even more so, a big factor in helping to keep down the high cost of living. A well-constructed bicycle, it has been shown in the past, can last as long as twenty-five years if it is properly taken care of. The cost of a real good bicycle today is ridiculously low as compared with its cost a few years ago, and the present-day cost of other types of vehicles. In view of these facts and also the varied and substantial uses that can be made of the silent two-wheeler, it is not putting it too strongly to say that each individual bicycle owner is actually saving money.

### A Big Field to Cultivate

At the beginning of this article I said that there were thousands of bicycle prospects who are not now being reached. There are thousands of merchants and workers who have not yet given the bicycle any serious thought; there are thousands of people, now lacking a means of recreation at a small outlay, who see only a few bicycles and therefore overlook them in casting about for ways of spending leisure time to good advantage.



F. W. Starr

How shall the manufacturer and the jobber get at and convince these people? My answer is: Through increased advertising and live-wire publicity.

The manufacturer and the jobber will have to spend more money in advertising bicycles than they have in the past, unless they are willing to jog along with a moderate bicycle business and with prices slashed to the lowest cost point. It will be necessary for all hands to forget for a time the dollar in the pocket and invest it for a thriving and increased future business.

As a rule it is a pretty slow growing plant that is not cultivated. Cultivation is necessary to bring a plant to a high stage of development worthy of a prize. And what applies in the field of botany holds true with even greater force in the sphere of industry. Judicious, consistent and continued advertising and publicity work are paramount to making the bicycle industry what it can and ought to be.

Let the manufacturers, jobbers and the dealers form a central bureau for educational advertising. Each member of such a bureau might make a voluntary contribution of a certain per cent. of his gross business. This general fund should be used to defray the expenses of employing capable writers who have the faculty of scratching that part of the human brain which causes people to determine, "I will buy." News matter, stories and plenty of good illustrations should be gotten up and sent to the principal papers throughout the country.

### Individual Advertising

This will not interfere at all with the individual advertising of the manufacturer, jobber and dealer. All of them will still continue, under this plan, to show their individuality and reap the proper reward for it.

Just stop to consider what publicity work from a central bureau will do. It will bring to the attention of thousands of people who are not bicycle users now the possibilities in business efficiency, economy and pleasure which the silent single tracker has in store. Once you get them to realize that bicycles are an investment and not an expense, you have put them in the right frame of mind for becoming actual bicycle users.

### The Value of Co-operation

The expense attached to a central bureau would be considerably less than if each manufacturer acted independent of the other. It would be more effective, for the suggestions of all the manufacturers and jobbers could be submitted to this bureau, co-related and forcefully played up. There are many strong points which should be called to the attention of the public and undoubtedly each manufacturer, jobber and dealer would have many original ideas to furnish the publicity bureau.

A well organized, central bureau, as well as the increased advertising of the individual manufacturer and jobber would, in my opinion, put the bicycle industry on as stable and steady a footing as some of the foremost industries of the country today. It would show that the bicycle is a big necessity in lowering the cost of living; and industries which produce necessities are stable.

# 87—And Still Pedalling Some

## Father Time Gets Winded Trying to Catch This Veteran

By FRED W. TUERK

IF you were to visit the city of Peoria, Ill., you might see slowly wheeling along the streets an old man on a side-by-side bicycle, accompanied by a younger man who supplies most of the energy. This veteran is Thomas W. Davis, eighty-seven years old, who is possibly the oldest and in some respects the most prominent cyclist in America. He has to his credit more than 142,000 miles, which is equivalent to traveling nearly six times around the earth.

The veteran graduated from the regular bicycle in 1912, when he took to the tricycle. Of late, because of his advancing years, he has found it necessary to ride the double wheel. But Father Time still finds it a mighty hard job to overtake the octogenarian and Mr. Davis expects to give the old scoundrel a hard race for some time to come.

### Has Kept Mileage Records

A complete record of his mileage has been kept by Mr. Davis and it is his boast that he has traveled more miles by his own exertion than any other man, living or dead. That he is not yet entirely satisfied with his record and intends to roll up some more centuries before he finally quits the game is evidenced by the fact that he is still traveling some.

On many occasions in the past he has covered a hundred miles and more a day and thought little of it; and during the month of August, 1896, he made sixty miles per day for every day in the month. Some of the younger cyclists may think little of this performance, but it certainly is remarkable in view of the fact that the Peorian did not begin riding a wheel until he was well past three score years.

### Many Prizes to His Credit

Mr. Davis joined the Century Road Club of America while it was still in its infancy and has won a large number of century bars both in England and America. He has also several medals to his credit. When he was sixty-one years old, he took his first ride and managed to cover twenty-three miles on an ordinary. Mr. Davis has a splendid mileage showing in the records of the C. R. C. of A., which were kept from 1894 until 1908. From 1889 to 1893 he kept his own record faithfully and did the likewise since 1908, when the C. R. C. of A. ceased to keep mileage standings. His showing according to the C. R. C. of A. books is as follows:

| | |
|---|---|
| 1894 | 6,509 miles |
| 1895 | 10,615 miles |
| 1896 | 12,465 miles |
| 1897 | 10,518 miles |
| 1898 | 12,016 miles |
| 1899 | 11,024 miles |
| 1900 | 7,501 miles |
| 1901 | 6,821 miles |
| 1902 | 8,030 miles |
| 1903 | 6,219 miles |
| 1904 | 8,242 miles |
| 1905 | 6,802 miles |
| 1906 | 5,503 miles |
| 1907 | 5,405 miles |
| 1908 | 5,133 miles |
| Total | 122,803 miles |

His trips previous to the organization of the cycling body and since it have ceased compiling mileage figures brings out the fact that during those periods he has pedalled 20,000 miles, which when added to the above gives a total of more than 142,000 miles.

Mr. Davis glories in the many victories he has won. The first century he rode was at Chicago in 1891. It was more like a race than a century ride, he says. There were over one hundred and sixty starters and he finished the thirty-ninth. In 1901, Mr. Davis again went to the Windy City to join a century ride. He was then seventy-three years old, and while some of the younger of the eighty starters dropped out, the veteran was well up among the first finishers. He has received a long string of Dyer bars which can be seen pinned to his coat in the accompanying illustrations. These bars are given for every thousand miles ridden in the course of a year.

It is interesting to note the sturdiness of the various bicycles which the old Peorian has ridden. On one bicycle he rode 34,441 miles and in the course of that

(Continued on page 70.)

# The Strong Appeal of the Bicycle

## Why the Two-Wheeler Has a Permanent Place Among Vehicles

By WILLIAM SCHACK

President, The Emblem Mfg. Co.

A BICYCLE MANUFACTURER has good reason to take a great deal of pride in his industry. It has served and still serves substantial purposes. As one of the old stagers in the game, I can look back to the time when all sorts of oddly shaped two-wheelers were to be seen on the roads; and I have watched and taken part in the progress of the wheel and seen it gradually assume the graceful lines that predominate in the modern machine. And I still see the bicycle taking its place among vehicles as a producer of health, strength and pleasure and as the most economical means of locomotion.

### What They Owe to the Bicycle

It is a rather regretable fact that not more of the young people in this country are taking advantage of the many fine things which the bicycle has to offer them. There are many among my friends who owe much to the two-wheeler for the good health which they are enjoying today, and there still are hundreds of thousands of people who find their chief source of recreation in the bicycle.

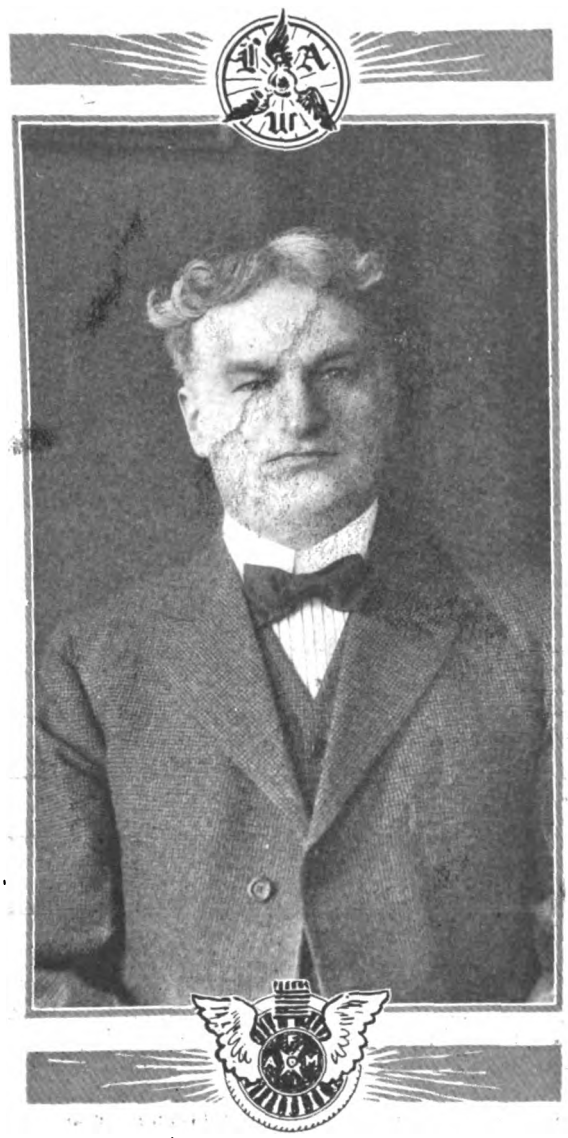
To me it is inspiring to look back over the history of cycling. When the ordinary made its first appearance in the late seventies there were very few riders, but the sport grew in popularity until thousands of the high wheels were in use during the period between 1880 and 1890. Each city, town and village boasted a bicycle club, and riders were to be seen in hordes on the various roads leading into the country. Whole families appeared pedalling on the roads with various sized wheels, ranging in height from the little bicycle for the youngsters to the tall wheel for the grown-ups. There seemed to be a sort of fascination about the old high wheel.

### Popularity on the Increase

About 1890 marked the introduction of the low wheel or the safety bicycle. The bicycles of the first five years of this period varied considerably in the style of the frame construction and all were quite heavy, weighing upwards of eighty pounds. The riding of the safety bicycle soon became very popular and sales rapidly increased. The roads saw more and more safeties until the high wheel was but a happy memory.

During the four years commencing with 1894 there were approximately a million bicycles manufactured in the United States every year. Some of the factories of that time averaged over one hundred thousand single trackers annually, while the manufacturing of bicycles was generally considered one of the greatest industries.

The cyclists then took a keen delight in riding fifty to two hundred miles in one day. They considered bicycling the best way of exercising. It brought them out in the fresh air, developed them physically and gave them no end of pleasure. Bicycling laid the foundation for thousands of strong physiques. Often when the old-time riders meet today they live again in the happy pleasure of the good old days and get reminiscent.



President William Schack

### Value Generally Recognized

Generally considered, the bicycle is now just as valuable as it ever was—in fact, it is even more valuable. For the great number of improvements and refinements, made in the average machines since the old days, have created a more comfortable vehicle. There are still the same benefits to be derived from cycling. Every man, woman and child is missing much, when they do not take advantage of the good things the bicycle has to offer.

In business the bicycle is now recognized as an important factor in making quick deliveries. Back in the old days the two-wheelers were used almost exclusively for pleasure purposes, but now we see hundreds of hard-headed merchants making use of this inexpensive means of covering ground.

The city business man who lives at any distance away from his store finds a ready means of travel by leisurely wheeling to his establishment on a bicycle. Almost all of the more progressive firms are giving bicycles to their collectors, salesmen and other outside men, so that they can increase their value as business getters. They recognize that in the case of the bicycle not only is the initial outlay small but the cost of maintenance is extremely low. The outside men can cut down their expenses by not using trolleys and save a great deal of time in being able to move from one place to another without the annoyance and delay of waiting for cars.

### More Machines Now Used

That an increased number of the younger generation is getting wise and again using the bicycle is evidenced by the fact that more young cyclists are to be seen in the streets now than at any time in the last decade. Go through almost any city and you will see that the silent two-wheeler is again getting into the favor of the younger people.

Even in the sporting end of the bicycle game there is to be seen a renewed activity. There are more bicycle velodromes today than there were at any time before. And in most instances, where the weather man has not been unkind, these velodromes are doing a good business. All of which goes to show that people are taking a greater interest in the sport of bicycling. It is not too much to say that in seeing the riders on the tracks the younger people are aroused to a pitch of enthusiasm that makes them splendid bicycle prospects.

The outlook for the bicycle is a good one. It is now founded on a substantial footing and its appeal to the public is based on recognized advantages.

To a bicycle maker of many years of experience these facts are certainly gratifying, for the reason that every manufacturer knows that the bicycle has admirably established its right to take a prominent place among vehicles.

---

### HALL CO. TO BUILD TRACK

Waco, Tex.—The Hall Cycle & Plating Company, local Smith Motor Wheel representative, is contemplating the erection of a ten-lap board cycle bowl. On this track will be conducted motor wheel as well as bicycle contests.

Digitized by Google

### NOVEL PIERCE STRIPER

After making considerable effort to obtain a mechanical striper for rims, and meeting with no success, the Pierce Cycle Company, of Buffalo, N. Y., were forced to use a device of home construction, but

one which proved itself to be a great success. It was necessary to have some sure and rapid device for so treating rims, if the finishing department was to keep pace with orders.

Superintendent Kaelin, who has been responsible for more than one of the ingenious devices used in the Pierce factory designed a piece of apparatus to fill the bill in a short time. It consists of three adjustable arms attached to a central disc, the latter revolving on roller bearings. The disc and arms are carried by a standard screwed to the floor and arranged at the proper working height.

The three arms are hollow and screw into the central disc. At their outer ends they have claws to embrace the outside of the rim in the groove. The two upper arms are fitted with set screws to hold the rim in place, while the third or lower arm is in two parts. The claw is stationary, but the two pieces are connected by an internal spring and the tension is regulated by a set-screw. The purpose of this arrangement is to make the rim fit snugly in the claw, yet not so as to cause an undue strain to warp or deform it. With the rim set in the claw it is spun around by hand as the striping brush is held to give a color in the desired position.

### BICYCLE DEMAND GROWING

Niagara Falls, N. Y., July 26.—B. L. Moone, the Harley-Davidson and Globe bicycle agent, reports that he has been selling a large number of bicycles since the Fourth of July.

### TIRE COMPANY INCORPORATES

Cincinnati, Ohio.—The Burgamy Tire Company has been incorporated by J. R. Burgamy and others, with a capital stock of $15,000, to handle automobile and motorcycle tires.

### CITY TAKES LEIGHTWEIGHTS

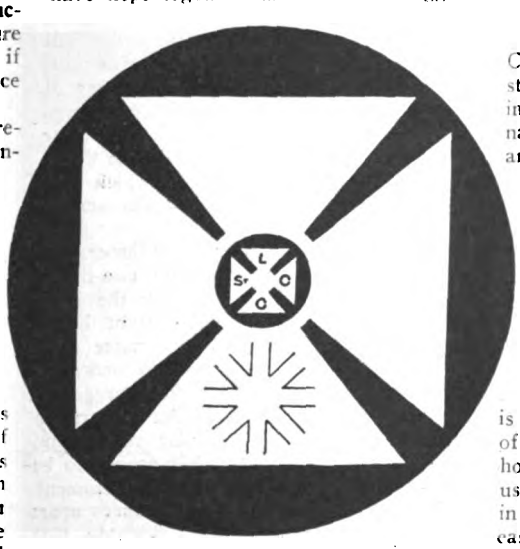
James L. Bickerstaff & Sons, of Richmond, Va., agents for the Miami Power Bicycle in that city, report that they have sold three of the lightweights to the City Water Department of Richmond.

### USEFUL "DIRECTION STICKERS"

For the purpose of keeping all the riders on a tour going in the right direction, the St. Louis Cycling Club makes use of a sticker, which is shown in the next column. A close examination of this illustration reveals a figure under the emblem of the club, the lines of which indicate every possible fork, crossing or turn of a road.

On long tours, particularly those in unfamiliar territories, these stickers are posted in conspicuous places at intersections along the route by a member of each division. He marks an arrow between any of the two parallel lines in the figure which correspond to the direction of the road about to be followed. In the other white spaces can be written the time the intersection was passed and the names of the members in the various "bunches."

Sometimes a half dozen stickers can be seen at one point, each bearing the same date, thus showing that six divisions have passed. It is, therefore, very easy for the men in the rear to tell whether the cyclists have kept together and for a straggler,



starting out from the city alone, to follow the right road and tell just what riders preceded him.

In wheeling over sections many miles from St. Louis, the country is "wild" and the system of roads becomes more and more intricate. The St. Louis Club has found these stickers very useful, and would be glad to see any bicycle organization make use of the idea it has originated.

### VALENTINE SUCCEEDS REFEREE ROSS

Newark, N. J., July 31.—Arthur Ross, the referee at the Newark Velodrome, resigned last Saturday and John Valentine, of New York, was immediately named as his successor. Valentine officiated in his first meet on Sunday and had a pretty hard time of it due to the mix-up in the running of the Criterion race. Ross, in handing in his resignation, stated that he was pleased to be relieved of the thankless task of trying to stop teaming and hoped that his successor would be more successful than he had been. Ross is a good friend of Frank Mihlon, president of the Cycle Racing Association; Inglis M. Uppercu and also Johnny Chapman, the local manager. All say Ross was "too good a fellow for the job."

Valentine has refereed bicycle races for many years and is said to be one of the most fearless fellows who ever held the job. Valentine officiated as referee at the local track four years ago and last season was the high mogul at the Brighton Beach Velodrome.

### DUPLEX HANGER BEARING

Announcement is made by the Girard Cycle Company, of 140 North Fourteenth street, Lincoln, Neb., of its Duplex bearing for bicycle crank-hangers. As the name implies, there are two ball-bearings, arranged concentrically on the sprocket side of the hanger, the outer one carrying the sprocket independent of the bearings for the crank itself. The object of this construction is to eliminate side draft and side pull on all bearings, thus effecting easier running of the transmission and the cycle itself.

The sprocket carrier has a race which carries the outer row of balls of the Duplex set. The inner race of this bearing is a ring which fits over the projecting end of the hanger shell. The crank bearing is housed inside the shell projection as is the usual practice. With the bearings arranged in this manner, mounting or dismounting is easily performed. To change sprockets it is merely necessary to remove five screws, releasing the sprocket from the carrier, and afterward substituting the new sprocket without affecting the set of the ball-bearings. Since the rows of balls remain in the carrier and in the hanger-shell extension respectively, there is no fear of losing the balls, or of getting them dirty through handling. The bearing is patented, the number being 921,100.

# DROBACH SPEEDY IN CHICAGO RACE

## Meet Run at Riverview After Three Postponements due to Bad Weather.

CHICAGO, August 1.—After being postponed three times the race meet originally scheduled for Sunday, July 25, was finally run on Saturday night, July 31. With a lapse of ten days in between the last meet run put the riders on edge and the races were hard fought and a bit rough.

The feature of the night would be hard to pick. Peter Drobach, the South Boston German, won his handicap motor-paced race from Norman Anderson, the Dane. Drobach gave Anderson two laps handicap in each of the three heats. In the first heat Anderson drew Whittler for a pacemaker and while Drobach gained back almost one of the laps, the Dane was a bit too fast for him. In the second and third heats Drobach drew Whittler and won each heat and in doing so shattered the record for the track, made by Eddie Root, in each heat. The old mark stood at 6:44 and Drobach rode the second heat in 6:43 and the third in 6:42⅘.

Iver Lawson won the three-mile open for the professionals in a hard ride. John Bedell trailed home second and Lloyd Thomas ran third. Big Frank Cavanagh just managed to get fourth, while Charles Piercey finished a few inches back of Cavanagh. Lap money made the race a fast one all the way and the going was pretty rough. In the weekly running of the Brassard race, which was added to the card, Eddie Madden, the Newarker who holds the meal-ticket armlet, successfully defended the same against Lloyd Thomas, the little Californian. The finish was one of the best seen here this season and Madden won by a scant six inches.

### Diefenbacher Wins

Most of the money in the half-mile handicap for the professionals fell to the lot of the long markers. Bob Diefenbacher won from the 65-yard mark and second place went to Lloyd Thomas, a 25-yard man. Floyd Krebs, from the 55-yard mark, ran third and Eddie Madden, a 30-yard starter, finished fourth.

The long-mark men copped most of the prizes in the third-mile repechage handicap for the amateurs, the back men being unplaced. C. DeCesare and Q. Chiostri, two members of the Italo-American Cycling Club, ran first and second from the 85-yard mark. Ernest Kockler and Charles Minnetti, two members of the Riverview Cycling Club, ran one-two in the "miss and out" race for the "simon pures." Willie Kell, a Chicago Cycling Club boy, ran third, and George Klasen, the Dane, fourth. Louis Kuehl won the lap prize. Summary:

One-Third-Mile Repechage Handicap (Amateur)—Won by C. De Cesare, Italo-American C. C. (85 yards); second, Q. Chiostri, Italo-American C. C. (85 yards); third, Howard Bigelow, Riverview C. C. (75 yards); fourth, Olaf Lodal, Danish-American A. C. (55 yards). Time, 37 seconds.

Miss-and-Out (Amateur)—Won by Ernest Kockler, Riverview C. C.; second, Charles Minnetti, Riverview C. C.; third, Willie Kell, Chicago C. C.; fourth, George Klasen, Danish-American A. C. Time, 5:55. Distance, 2¾ miles.

One-Mile Brassard Race (Professional)—Won by Eddie Madden, Newark; second, Lloyd Thomas, San Francisco. Time, 4:52.

One-Half-Mile Handicap (Professional)—Won by Bob Diefenbacher, San Jose (65 yards); second, Lloyd Thomas, San Francisco (25 yards); third, Floyd Krebs, Newark (55 yards); fourth, Eddie Madden, Newark (30 yards). Time, 54 seconds.

Three-Mile Open (Professional)—Won by Iver Lawson, Chicago; second, John Bedell, Long Island; third, Lloyd Thomas, San Francisco; fourth, Frank Cavanagh, Newark. Time, 5:59.

Five-Mile Handicap Motor-Paced Race—First heat won by Norman Anderson, Denmark (2 laps); second, Peter Drobach, South Boston (scratch). Time, 7:01. Second heat won by Drobach. Time, 6.43. Third heat won by Drobach. Time, 6:42⅘.

### Sunday Night Races

Chicago, Aug. 2.—Ernest Kockler, the Riverview Cycling Club star; Ned Young, the Newarker; Iver Lawson, the local Swede, and Peter Drobach, the South Boston German, were the bright stars at the Riverview Velodrome on Sunday night, August 1.

Kockler won the first event of a series of four to decide the amateur championship of Chicago, the event being at one-third mile. The race was divided into four heats, three semi-finals and a final, with four men in the final, the successful four being Kockler, E. Davini, George Klasen and Bert Nelson, and they finished in that order. The other events of the series will be a half mile, a one mile and a five mile, the rider scoring the greatest number of points in the series to be declared Chicago champion for 1915. Kockler also came home in front of a large field in the three-mile open for the amateurs in which Olaf Lodal took a spectacular but not serious spill.

Iver Lawson met Charles Piercey, the Australian, in a match race at two-thirds mile and the local Swede took the Australian into camp in two straight heats. This was Piercey's first appearance in a sprint match race and he performed in a creditable manner, making Lawson go all the way to defeat him. An Australian pursuit race was put on for the second class men at the track and it proved to be the real hit of the evening's entertainment. Nine men started at equal distances apart and to the surprise of everybody Gus Wohlrab, the Jersey City rider, who was the favorite, was put out first by Albert Crebs. The race was a hard one and in turn Floyd Krebs, Rudi-Ruase, Steve Senhouse, Albert Crebs, Bobby McLean and Bob Diefenbacher were put out until Joe Kopsky and Ned Young were left. Young passed Kopsky after riding four and two-third miles and received a great hand for his hard ride.

Eddie Madden, the slender Newarker, was the real surprise of the night, when he came home a winner in the two-third mile point race for the professionals. Nine men started in the final and Iver Lawson led for the first two laps with Madden in second place. Madden won the third sprint and Gordon Walker the last. Madden scored seven points to six each for Lawson and Walker and four each for Lloyd Thomas and Martin Ryan. Charlie Piercey, Eddie Root and Frank Cavanagh were lost in the shuffle in the numerous sprints and failed to score enough points to count for any money. Peter Drobach had a rather easy time of it in his motor-paced match against John Bedell, taking the event in straight heats.

# CENTURY RIDERS CAPTURE RELAY

## San Francisco Team Wins Annual C. A. C. Event After 54 Miles, Capturing Trophy

SAN FRANCISCO, July 31.—The New Century Wheelmen of this city won the annual relay pursuit race of the California Associated Cyclists on Sunday, July 25, at the Park Stadium. The race went fifty-four miles before the New Century team overtook the Garden City team, which finished second. The Acme Club, of Oakland, was third.

The time made by the winning team was one hour and thirty-three minutes. Walter Hammitt, Harry De Brie, Harry Spence, Pop Rhodes, Leslie Nelson and Albert Sangalli were the New Century riders.

After a steady grind of eight miles, Leslie Nelson, of the New Centurys, sprinted down the backstretch and caught Doc Prior, of the Acme team, which put the Oaklanders out of the going. Then the fight was on between the Garden City team and the New Century team.

Walter Hammitt, of the winning team, rode a splendid race. Every lap he sprinted down the backstretch and closed up a gap. When the fifty-fourth mile was reached Sangalli, of the New Century team, sprinted for a half a lap and caught H. Humburg, the last Garden City rider.

The Garden City team included: Nick Eisentrout, Ike Moon, L. Semondi, H. Humburg, H. Plummer and A. Ashman. The Acme Club riders were Walter Jones, Ray Girard, Doc Prior, M. Wiesman, E. Carroll and E. Anderson. The distance is a local record for a six-man relay pursuit race. The winners were awarded the Granat Brothers trophy which is a beautiful silver cup.

There were six men to a team, and each made two laps at top speed until picked up at the tape by his team mate. Each man had a twenty-minute rest between the heats, which made the race fast throughout. A large crowd saw the race and enjoyed it immensely.

### READING CYCLE INCREASES CAPITAL

Reading, Pa., August 3.—The Reading Cycle Company, recently incorporated by Keyser Fry and associates to manufacture bicycles and motorcycles, has given notice of an increase of capital stock from $5,000 to $50,000. Mr. Fry and those associated with him bought out the interests of William F. Remppis and C. W. Leinbach in the taking over of the original Reading Cycle Company. They have acquired some valuable patents and will do business on a considerable scale.

### THE HARPOON IS HARPOONED

Chicago, Aug. 1.—The *Harpoon*, the little weekly published by the Riverview Velodrome, has been discontinued by the management. The reason for the discontinuation of the weekly cycling magazine is economy. The *Harpoon* was well received by the local fans.

# Goullet Nails the "Criterion Revenge"

NEWARK, N. J., August 1.—Frank Kramer, the national champion, was beaten decisively here today in the "Criterion Revenge" by Alfred Goullet, the speedy Australian cyclist. Goullet has never before beaten the champion as decisively as he did today. Kramer was the winner of the first heat, but "Goullie" came back and took the next two. In the second heat he defeated Kramer by coming through with a driving finish in the home stretch, while in the final heat which gave him the race he rode around "Big Steve" on the back stretch and outpedaled the American right to the tape.

The defeat of Kramer stirs up the discussion once more as to who will be the American champion. There were thousands of fans who watched the races here today who thought that Kramer had about reached the end of his rope and Goullet would now go out and win the championship. Kramer, however, is not worried in the least at his performance. He takes it that the trip to Boston on Saturday and the return home on Sunday morning in a hot sleeper had its effect. Every year Kramer has slumped for a week or so, but has always braced up again and ridden as good as ever. The wise fans are expecting him to do the same thing this year.

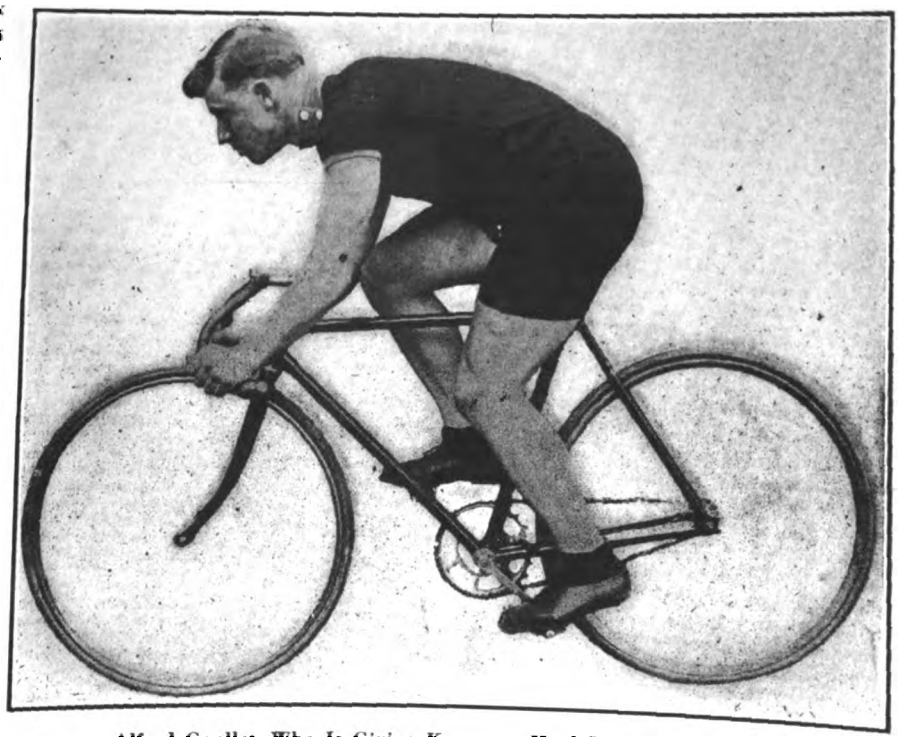
Goullet's victory was a popular one and he received a great outburst of applause from the fans as he rode around the track with the bouquet of flowers presented to him. He then went up to a box in the grandstand and gave away some of the flowers, and there was more applause.

Reggie McNamara, of Australia, won the Australian pursuit race from Alfred Grenda and Oscar Egg. Egg was eliminated at one mile by Grenda, while McNamara went by Grenda after three miles, one and one-quarters laps had been covered. This race was ridden while the rain was falling, and once or twice it looked as if the riders would slip to the track. The dope did not carry true in this race, as Grenda or Egg were looked upon as the likely winner.

Alfred Grenda won the Brassard title by defeating Cesar Moretti in a one mile match race. Moretti had just captured the title a week ago by leading Reggie McNamara over the tape. The finish of this race was a dandy, for Moretti did not seem to have a show until he came down the home stretch when he let out with a great burst of speed, almost nipping Grenda at the tape. To many it appeared as if the race was a dead heat, but the automatic judge awarded the race to Grenda.

Norman Hansen, of Denmark, won the two mile invitation affair for the professionals by nipping Donald McDougall at the tape. It looked like McDougall's race until the last five yards, when Hansen in his final kick shot by the Newark rider. Hansen had a handicap of 60 yards, while McDougall's allowance was 80 yards.

Arthur Spencer, of Toronto, Canada, came home first in the only amateur race run off. He copped the half-mile handicap race from the fifty-five yard mark. August Lang, of Irvington, with 25 yards finished second. Rain called off the three mile open for the amateurs, as well as the ten mile race for the professionals. The summaries:



**Alfred Goullet, Who Is Giving Kramer a Hard Battle for the Title**

Half Mile Novice (Amateur)—Won by Frank Scadutto, Newark; William Beck, Newark, second. Time, 1m. 10⅕s.

Half Mile Handicap (Professional)—Won by Harry Kaiser, New York (35 yards); Reginald McNamara, Australia (scratch), second; Marcel Dupuy, France (10 yards), third; Norman Hanson, Denmark (50 yards), fourth; William Hanley, San Francisco (20 yards), fifth. Time, 53⅕s.

The Criterion Revenge—Won by Alfred Goullet, Australia; Frank L. Kramer, East Orange, second; Cesar Moretti, Italy, third. First heat won by Kramer; Goullet, second; Moretti, third. Time, 2m. 46s. Last eighth mile, 12⅕s. Second heat won by Goullet; Kramer, second; Moretti, third. Time, 2m. 53⅕s. Last eighth mile, 11⅘s. Third heat won by Goullet; Kramer, second; Moretti, third. Time, 2m. 53⅕s. Last eighth mile, 11⅘s.

Half Mile Handicap (Amateur)—Won by Arthur Spencer, Toronto (55 yards); August Lang, Irvington (25 yards), second; Fred Taylor, Newark (scratch), third; Edward Kane, Newark (15 yards), fourth. Time, 56⅕s.

The Brassard Race at One Mile (Professional)—Cesar Moretti, Italy, vs. Alfred Grenda, Australia. Won by Grenda. Time, 2m. 44s. Last eighth mile, 12⅕s.

Two Mile Invitation Handicap (Professional)—Won by Norman Hansen, Denmark (60 yards); Donald McDougall, Newark (80 yards), second; William Hanley, San Francisco (scratch), third; Thomas Smith, Irvington (90 yards), fourth; Ernest Jokus, Newark (70 yards), fifth. Time, 3m. 45⅗s.

Australian Pursuit Race (Professional)—Won by Reginald McNamara, Australia; Alfred Grenda, Australia, second; Oscar Egg, Switzerland, third. Time, 6m. 50s. Distance, 3 miles 1⅕ laps.

## KRAMER BEATS MORETTI

Boston, Mass., August 1.—Weather interfered with the scheduled motor-paced events at Revere Cycle track, both last Saturday and Wednesday, July 28. The 25-mile on Saturday between Jimmie Moran, Bobby Walthour, Pinkie Turville and Harold Rollins was called off after a few laps. Moran blew out a tire, and it was decided that the going was too risky.

There was a sizzling special sprint match to rouse the fans, however, on Saturday between Frank Kramer, of East Orange, and Caesar Moretti, of Italy. Kramer won in straight heats, his game being the foxy one of forcing the Italian to take the lead until the last lap, at which time Kramer had the strength to jump his wheel and speed enough to win out.

Both the one and three-quarter mile professional handicap and the professional miss-and-out race were won by Willie Turville, of Revere, who was in great form. The five-mile open amateur event was a hummer, Fred Herbert, of Fall River, just out-jumping L. C. Rollins at the tape. Saturday's summary:

One-Half Mile Amateur Handicap Race—Won by Fred McKenzie, Revere (50 yards); William Cupit, Roxbury (105 yards), second; Michael Barber, Roxbury (110 yards), third; Patsy Antonucci, Boston (115 yards), fourth. Time, 57⅘s.

One and Three-Quarter-Mile Professional Handicap Race—Won by Willie Turville, Revere (45 yards); Hugh MacPartland, Boston (75 yards), second; Pat Logan, South Boston (15 yards), third; Saxon Williams, Buffalo (105 yards), fourth. Time, 3m. 34⅕s.

Special Sprint Match (Frank Kramer, of East Orange, N. J., American champion, vs. Caesar Moretti, Florence, Italy, Italian champion)—First heat (¾ mile), won by Kramer. Time, 2m. 6⅘s. Second heat (¼mile), won by Kramer. Time, 2m.

Professional Miss-and-Out Race—Won by Willie Turville, Revere; Alvin Loftus, Providence, second; Dennis Connolly, Everett, third; Warren Holbrook, South Boston, fourth. Distance, 1 mile 3 laps. Time, 2m. 39⅗s.

Five-Mile Amateur Open Race—Won by Fred Herbert, Fall River; L. C. Rollins, Everett, second; Tom Connolly, Everett, third; Ned Chandler, Boston, fourth. Time, 11m. 34⅘s. John Fardig, Orient Heights, winner of most laps.

Two-mile exhibition motor-paced by Leon Didier. 3m. 1⅕s.

## PIERCE IN NEW YORK

Percy Pierce, president of the Pierce Cycle Company, of Buffalo, N. Y., arrived in New York early this week to visit the local trade. He intends to make a short stay in the city before completing a short tour through the State.

Digitized by Google

# Bello Wins Two Amateur Races

SHEEPSHEAD BAY, N. Y., August 1.—Tom Bello won two races at the Sheepshead Bay Velodrome on Saturday night. His first success was in the three-fourth mile handicap. He made good use of his 50 yard allowance and held up with the distance men to the stretch. Here he opened up a sprint and came under the wire first by a half length. A. Desimone, of the Century Road Club Association, with 45 yards, was second, and Jerry Nunziata, third.

Bello won his second victory when he took the two-mile open amateur from a field of close to thirty riders. Fred Waisin, of the Acme Wheelmen, leading from the start until the bell lap, looked a sure winner, but on the last lap Bello showed his sprinting ability and won by a half length. His time for the distance was 4:22⅗.

Too much jockeying on the part of the stars robbed the alternance race of its interest. Three men contested in each of the four heats at a distance of one mile, but the heats were practically decided in one lap sprints. Alfred Goullett, of Australia, was the ultimate winner, scoring 15 points for his three starts; Harry Kaiser, of The Bronx, was second with a tally of 11, and Francisco Verri and Fred Hill were third and fourth with 7 and 3 points, respectively.

George Wiley, of Syracuse, won the one hour motor paced race from a field of four starters, covering a distance of 41 miles 6¼ laps. George Seres, of France, finished second, with 40 miles 3 laps, and Vstor Linar, of Belgium, third, with 39 miles 2 laps. Clarence Carmen dropped out at 39 miles owing to a sudden attack of illness.

### WILEY WINS AT REVERE

Boston, Mass, July 26.—Rain prevented the finish of the 50-mile motor-paced race for the American middle-distance championship at the Revere cycle track on Wednesday night, July 25, but George Wiley, of Syracuse, N. Y., who was in the lead at the twenty-fifth mile was awarded the diamond studded championship medal. When the riders were called from the track Wiley was leading Elmer Collins, of Lynn, by a quarter of a lap and Bobby Walthour was a poor third. Clarence Carman, of Jamaica, L. I., who defeated Wiley a year ago, was thrown from his wheel in the early stages of the grind and was rendered unconscious. A punctured tire caused the accident. Despite the downpour, all the other events on the program were completed. The summary:

Half-Mile Amateur Handicap—Final won by J. Barry, Cambridge (65 yds.); Fred McKenzie, Revere (35 yds.), second; J. B. Rollins, Everett (40 yds.), third; John Tardig, East Boston (55 yds), fourth. Time, 59⅕s.

One and One-Half Mile Professional Handicap—Won by Saxon Williams, Buffalo (150 yds.); Frank Drobach, South Boston (60 yds.), second; Dennis Connolly, Everett (90 yds.), third; Percy Cutter, Wakefield (120 yds.), fourth. Time, 3m. 32⅕s.

One Mile Invitation Amateur.—Won by F. Keenan, Revere; F. McKenna, South Boston, second; Kenneth Plumber, Revere, third. Time, 2m 14⅘s.

Three Mile Open Professional—Won by Pat Logan, South Boston; Frank Drobach, South Boston, second; Dennis Connolly, Revere, third; Hugh McPartland, South Boston, fourth. Time, 7m. 14⅘s.

Miss and Out Race, Amateur—Won by L. C. Rollins, Everett; Tom Connolly, Everett, second; Willie Turville, Revere, third; John Barry, Cambridge, fourth. Distance, 1 mile and 1 lap. Time, 2m. 46⅕s.

American Championship 50-Mile Motor-Pace Race—Won by George Wiley; Elmer Collins, second; Bobby Walthour, third. Distance, 23 miles and 6 laps. Time, 38m. 23s.

George Wiley

### MULTICYCLE FOR THE BLIND

This multicycle is in use at the Royal Normal College for the Blind, at Upper Norwood, England. It will carry a team of twelve cyclists. It is composed of six two-wheeled members, each adapted for two persons, coupled together, there being a connecting bar between each successive pair of wheels to form the complete train. The machine is constructed to carry either sex, and is 28 feet in length. Obviously the machine must be guided by a person with sight. This person is in the second seat. The slightest deviation of the front wheels to either side is transmitted through the coupling bar to the second pair of wheels, the driver of which can act in concert, thereby conveying the same intimation to the third unit, and so on to the end. The sharpest curves can easily be rounded. Often long excursions are taken into the country. On one occasion a round trip was taken to Brighton, 100 miles distant. This trip was made in 10¾ hours.

### LAWRENCE POINT BREEZE VICTOR

Philadelphia, Pa., August 1.—Percy Lawrence, the lanky Californian, showed the enthusiasts on Saturday night that he retains his speed by winning from Menus Bedell, of New York, and Norman Hansen, the Danish rider, in a 30-mile motor-paced race before 12,000 persons at Point Breeze Park velodrome. Hansen, the Danish rider, who was giving Lawrence a battle, met with hard luck in the ninth mile, when he got a puncture in his front tire and again in the fifteenth mile he had another mishap. These mishaps knocked him out of the running, so Lawrence came home an easy winner, with Bedell second.

The fans were treated to some thrills in the motorcycle events. In the three-mile professional event, Henri St. Yves, the little Frenchman, nosed out both Armstrong and Vanderberry in the fast time of 2 minutes and 9 seconds. He also won the five-mile event. In the two-mile event Armstrong won by a wheel's length. As he was about to start in the race for unknown distance Armstrong's machine caught fire, but he quickly dismounted and was slightly burned. The summaries:

Three-Mile Professional Motorcycle Race—Won by Henri St. Yves; second, Billy Armstrong; third, W. H. Vanderberry. Time, 2 minutes, 9 seconds.

Two-Mile Professional Motorcycle Match Race—Won by Billy Armstrong; second, Herman Veditz. Time, 1 minute, 27⅗ seconds.

Thirty-Mile Professional Motor-Paced Race, in One Heat.—Won by Percy Lawrence, San Francisco; second, Menus Bedell, Long Island; third, Norman Hansen. Time, 39 minutes, 16⅕ seconds.

Unknown Distance Professional Motorcycle Race, Distance One Mile.—Won by Herman Veditz; second, W. H. Vanderberry. Time, 44⅖ seconds.

Five-Mile Professional Motorcycle Race.—Won by Henri St. Yves; second, Herman Veditz; third, W. H. Vanderberry. Time, 3 minutes, 36 seconds.

### SHIRLEY HAS GOOD SEASON

Amos Shirley, the veteran New York cycle dealer, reports an excellent demand for bicycles during 1915. He is handling the Pope line, having sold that make for fifteen years.

### WILEY LOWERS A RECORD

Philadelphia, Pa., July 29.—George Wiley, of Syracuse, N. Y., gave a wonderful exhibition of motor-paced bicycle riding at the Point Breeze Motordrome on Thursday, July 29, winning the event in 1 hour, 2 minutes, 40 seconds, and lowering the former world's record made by Clarence Carman by fifty-five seconds. Bobby Walthour was second, George Seres, of France, third, and Vincent Madonna, of Italy, fourth.

Ten thousand spectators gathered at the track to see the races and they were given all the thrills they could desire. Wiley started off as though he was going to make a runaway race of it, but on the sixth mile he sustained a punctured tire and while he was changing his wheel his rivals secured a lead of nearly three laps on him. Nothing daunted, the plucky American went right after his field and was cheered to the echo as he gradually brought the other riders back to him. Soon after reeling off his twenty-eighth mile Wiley regained the lead and he held it then until the end, winning by a comfortable margin. But for the accident early in the race Wiley probably would have cut a much bigger slice off the record.

### LAWSON HAS COVERED 18,214 MILES

Los Angeles, Cal., August 1.—Bob Lawson is now working the towns around Los Angeles in the interests of the Atherton coaster brake, Goodrich tires and Iver Johnson bicycles. Lawson reports that during the year ending July 1, 1915, he has covered 18,214 miles on a bicycle equipped with the same Atherton brake.

### WILL STICK TO BIKE

Oakland, Cal.—James Aunie, who has been selling motorcycles at 1924 San Pablo avenue, Oakland, has decided to quit the motorcycle game, and will devote his entire time hereafter to selling bicycles. He will put in a complete line of Great Western wheels and will sell them for cash and on the installment basis.

### RECORD MOTOR WHEEL TRIP

Sacramento, Cal.—Robert Orpinella on a Smith Motor Wheel equipped bicycle, accompanied by Frank and Miss Gladys Chance on a motorcycle, made the round trip to Placerville, the total distance, including side trips, being about 115 miles. The trip was completed in a trifle over three hours, which is automobile time over the same roads. Only one gallon of gasoline was used on the trip, an economy scarcely believable to the automobile or motorcycle driver. Bad roads and mean hills were encountered, included in the latter being Sacramento Hill, a long grade of about 12 per cent and extremely difficult to negotiate on account of a thick coating of loose crushed rock. The motor wheel made this and all the other hills without a whimper.

Robert Orpinella

### C. R. C. A. MILEAGE STANDING

The Mileage and Century Standing compiled by the Century Road Club Association, shows that up to July 15 Fred M. Sanborn, of Baltimore, Md., is still in the lead, followed by William Winquist, of Brooklyn, N. Y., while Sylvain Segal, of New York, N. Y., is third. The new list shows that many changes have been made in the last 15 days, the most notable of these being the advance of Andrew N. Segal, of New York, N. Y., from 23rd place to 10th. The complete standing of the contestants up to July 15 is as follows:

1—Fred M. Sanborn, Baltimore, Md.
2—William Winquist, Brooklyn, N. Y.
3—Sylvain Segal, New York, N. Y.
4—George Steppello, Astoria, N. Y.
5—Joseph Caldwell, Brooklyn, N. Y.
6—Charles E. Hansen, Jersey City, N. J.
7—Duane W. Moore, Bayonne, N. J.
8—Ray Caldwell, Brooklyn, N. Y.
9—Adolph R. Jacobson, New York, N. Y.
10—Andrew N. Segal, New York, N. Y.
11—George H. Segal, New York, N. Y.
12—Adolph Weiner, New York, N. Y.
13—Carl Bonhardt, New York, N. Y.
14—Louis Zemo, Elberon, N. J.
15—Howard V. Carroll, New York, N. Y.
16—Robert Wolfson, New York, N. Y.
17—Ralph W. Zarr, New York, N. Y.
18—George Harvey, Brooklyn, N. Y.
19—Alfred Knipling, New York, N. Y.
20—John M. Mitchell, Greenwich, Conn.
21—William F. Thompson, New York, N. Y.
22—Alex Thomson, New York, N. Y.
23—Harry A. Whiteman, New York, N. Y.
24—Amiello Piantedosi, New York, N. Y.

### ACME CLUB ELECTS

Oakland, Cal.—The Acme Bicycle Club, of Oakland, has elected the following officers: President, E. Armberger; secretary, R. Girard; treasurer, E. J. Carroll, and road captain, O. B. Clark. Carroll is the star cyclist of the club and is considered one of the classiest riders in northern California.

### WHERE BICYCLES ARE PLENTIFUL

Hamilton, Ohio.—The speed and convenience of the bicycle as a vehicle upon which to ride to work led a bunch of local men into trouble last week, as they were caught transgressing upon the sidewalks, which is against local ordinance requirements. No less than eleven were haled to the municipal court on this charge, and they all pleaded guilty. They were let off with a warning to use the sidewalks for walking only. Hundreds of workmen in Hamilton, employed in the various manufacturing plants around the city, use bicycles in going to and from work, and there are undoubtedly more bicycles in use in the city now than ever before.

### ON BICYCLE VACATION TOUR

Racine, Wis., July 28.—Fifteen members of the Eagle Athletic Club left for a two weeks' bicycle vacation to Iron Mountain, Mich., and return, a round trip journey of 700 miles. The Eagles have a camp in the Michigan city. Orville Hanks and Edgar Johnson left several days ahead of the main party to get the camp in readiness. They had no difficulty in negotiating the sandy roads along the lake shore.

### 87—AND STILL PEDALLING SOME

(Continued from page 63.)

riding he used up sixteen tires, eleven on the rear and five on the front wheel. He used one saddle for more than 75,000 miles, and a pair of rubber pedals, without toe clips, for 25,202 miles. Since he began to ride, Mr. Davis has employed two ordinaries and eight safety bicycles all of which lasted long.

There are very few men living who at the age of eighty-seven still have enough vitality and strength to attempt riding through the streets on a silent single tracker. Mr. Davis frankly confesses that his tenacious hold on life is due almost entirely to the strong physique that he developed through his many years of constant cycling.

### BUILDING COMMITTEE BUSY

Dayton, Ohio.—The building committee of the Dayton Bicycle Club, which has the weighty duty of settling the numerous important details connected with the construction of the club's new home, is considering a number of propositions, including the offer of several handsome old residences in the down-town section which would be suitable for the purpose. The matter will not be settled at once, however, as the lease on the present quarters of the club does not expire until the first of October.

### INCORPORATE PNEUMATIC TIRE CO.

Cleveland, Ohio.—The National Pneumatic Tire Company, of this city, has been incorporated with a capital stock of $25,000 to manufacture and deal in automobile and motorcycle tires. The incorporators are: Peter Kelley, Wesley J. House, William Sylvia, George McLeod, Arthur G. Elliott and A. E. Swanson.

### MOTOR WHEEL A PREMIUM

Oakland, Cal.—The Meyer Bicycle Co., of 1908 San Pablo, Oakland, has taken a sub-agency for the Smith Motor Wheel, under Freel of San Francisco, and in order to bring the machine quickly before the riders of his territory will give one away as a premium. He has used premium plans extensively in his business, giving different premiums for various amounts purchased at his store.

### CLARKSON ON BUSINESS TRIP HERE

Wellington, N. Z.—Mr. J. B. Clarkson, managing director of Messrs. J. B. Clarkson & Co., Ltd., wholesale cycle, motorcycle and general merchants of Wellington and Christchurch, New Zealand, is now on another visit to the United States. After spending a few days at the Panama-Pacific Exposition and Los Angeles, he will arrive in Chicago on Tuesday, August 10. He will be located in the Blackstone Hotel. While in the United States it is authoritatively reported that Clarkson will make considerable purchases, being particularly interested in motorcycle, bicycle and automobile accessories.

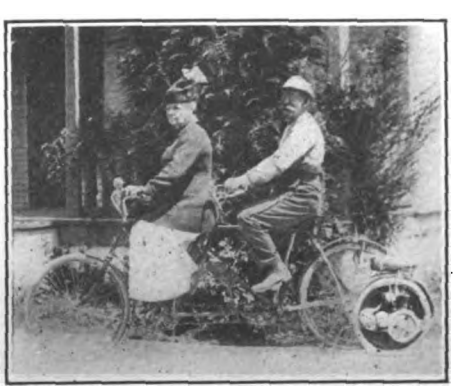
### NO SHEEPSHEAD RACES

Sheepshead, N. Y., Aug. 3.—Owing to the rainy weather there were no bicycle races held at the Sheepshead Bay Velodrome on Tuesday night, August 2. The same card will be run on Saturday.

### ST. LOUISANS ON RUN

St. Louis, Mo., Aug. 1.—Members of the St. Louis Bicycle Club held their weekly run on Sunday from Tower Grove Park to Bulltown. The Saturday run took them to De Soto.

### MOTOR WHEEL TANDEMITES



**L. R. and Mrs. Eldred, of Azuza, Cal., Who Use Smith Attachment for General Touring**

## LATE MOTORCYCLE NOTES

### SIXSMITH DOUBLES CAPACITY

T. J. Sixsmith, one of New York's pioneer motorcycle and bicycle agents, has completed the enlargement of his store at 203 West 100th street. He has now a 44-foot frontage, with a seven-foot entrance door at the center, amply wide enough for any sidecar outfit. Mr. Sixsmith has retained the annex which he opened about two years ago and which was the only place in which he could store sidecar combinations. His capacity for solo and tandem machines has been doubled by the enlargement and he has accommodation for at least eight additional sidecars, although a week's time may see the vacant places filled up, so great is the metropolitan demand for sidecar storage space.

### PARDON NEEDS MORE ROOM

Owensboro, Ky.—Henry F. Pardon, Indian agent for Daviess and surrounding territory, is making arrangements to move his place of business to a new storeroom which is only a half a block off the public square. The present location is about five squares from the busy center, and is slightly unhandy to reach. Mr. Pardon has already sold as many machines as he did during the whole of last year, and he states that the outlook for fall business is excellent. He recently added a line of bicycles and a complete line of accessories for the silent two-wheeler.

### IN HEALTH DEPARTMENT

Newark, N. J., July 30.—Walter Goerke has placed a single-speed 1915 Indian twin in the local Health Department. Charles F. Conrad, a special inspector of the department, is greatly enthused over the economical and prompt service obtained from a motorcycle. He finds that travel that constituted from half to three-quarters of his time formally has been reduced greatly and has been enabled to make 50 per cent. more inspections daily.

### NEW OHIO LICENSE SOON EFFECTIVE

Columbus, Ohio.—The new law passed by the Ohio legislature at the last session, reducing the fees for the registration of motorcycle dealers and manufacturers in the state from $10 to $5 becomes effective August 25. From that date on, all dealers will be permitted an unlimited number of tags by the payment of $5 fee and a smaller fee for each set of number plates taken out by them.

### NEW INNER TUBE COMPANY

Toledo, Ohio, August 3.—The Dreadnaught Inner Tube Armor Company, of this city, has been incorporated with a capital stock of $25,000 to deal in inner tubes for automobile and motorcycle tires. The incorporators are: H. C. Adams, John H. O'Leary, Fred A. Biehm, John A. Gaver and Blanche O'Brien.

### THREE CLUBS AFFILIATED

Three new clubs are on the F. A. M. affiliated list, as follows: Fremont M. C., Fremont, Neb., 12 members; Baltimore M. C., Baltimore, Md., 16 members; Corona M. C., Groton, N. Y., 18 members.

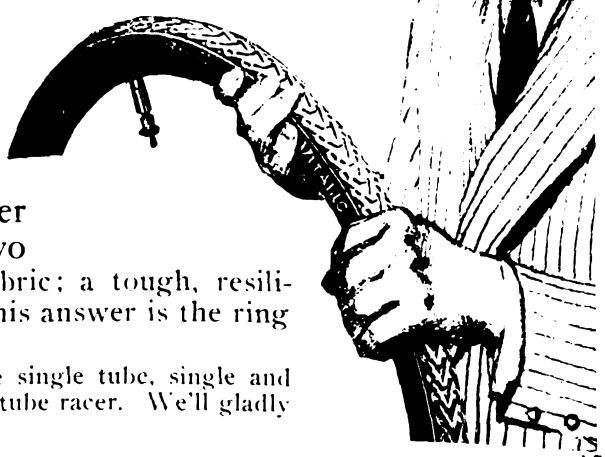
# Focusing His Attention

WHEN you hand your customer a VITALIC Tire, you immediately interest him, for he recognizes it has the touch of a better tire, the look of a better tire—in fact, that it is a better tire. Very likely he will ask you how it's made. The testing section tells the story—it proves that in

VITALIC TUBES
TRADE MARK
REG. U. S. PAT. OFF.



there is really an inner tube of pure rubber; two plies of unbreakable motorcycle fabric; a tough, resilient, heavy tread. He's convinced—his answer is the ring of your cash drawer.

VITALIC Bicycle Tires are made in the single tube, single and double clinch casings, and a special single tube racer. We'll gladly send you a sample section of either.

***Reading-Standard***

## Grasp the import of this price reduction—saving users one-third former prices.

Both the Goodyear-Akron 26-inch Non-Skid Tire and the 28-inch Smooth Tread now retail for *$4.50 per pair*. The 28-inch Non-Skid retails for *$5.00 per pair*.

These new prices are due to our output, to our efficiency and to our modest profit.

Goodyear-Akron Bicycle Tire sales increased *119 per cent* the last 12 months.

This cut manufacturing costs tremendously. And we are sharing this decreased cost with tire users, without ever skimping a tire.

All this means much to manufacturers and dealers. It means that thousands more will demand these Goodyear-Akrons.

It means quicker sales and larger volume for you. And it means satisfied tire users.

The bicycles listed here are now factory equipped with Goodyear-Akrons. The quality mark of the best bicycles must now bear a quality tire mark too. And that mark, as chosen by manufacturers, must be the Goodyear-Akron Tire.

This new price, this verdict of manufacturers, this utmost in tire quality, we are making known to every bicycle rider in America.

The largest advertising campaign ever run on bicycle tires is telling riders of Goodyear-Akron quality and price.

We seek your tire business. Your wants, we believe, we can best supply. Thousands have proved this already and you are bound to find it out.

Write us today for Manufacturers' or Dealers' Proposition. Address Dept. 227.

# Race Follower Offers Suggestions

EDITOR: For quite a number of years I have been following the automobile racing game, but of late have come to give more of my attention to motorcycle competition. There are a few points that have always puzzled me and in my appeals to the riders of various makes I receive only partisan replies.

My object in writing this is to stir up if possible a discussion of the two cases set forth herein.

The first thing is the practice which is becoming more frequent every day of one contestant using more than one complete machine in the same race. There is, of course, nothing in the F. A. M. Competition Rules which prohibits this, so it is being done. At a race meet the other day I saw this loophole strategically used and with telling effect. Why is this so? There has never been such a condition in the automobile game, and I cannot see a single good reason why such a condition should exist in motorcycle competition.

A race is a test of the endurance of a machine, and if, as in the case of automobiles, a contestant was forced to complete the race on the same machine on which he started, more durable and dependable machines and fewer freaks would be the outcome. Pitt Service would become decidedly more interesting. Accessibility would likewise be given a much needed and stronger impetus.

I do not see why the rule governing this condition in endurance runs could not very well be incorporated in the track competition rules also.

Another thing is the "stripped stock" machine. It seems that this rule should also be looked over. As it stands, there is nothing to prevent any factory from making up a sufficient number of freak racing motors to qualify that motor as a stock motor.

In a recent race meet I noticed three of the well-known makes competing in a stripped stock event. One of these makes (and the eventual winner) was to all outward appearances the same machine as the average rider uses. Valve construction (note I do not say action) was identical with the marketed product. To my knowledge no other changes outside of lightening of reciprocating parts had been made in this motor.

Another make employed a machine which was apparently the same as the marketed product, but close inspection showed that the cylinders had been cast with larger valve pockets to allow the use of abnormal exhaust valves.

The third make had practically nothing in common with its stock brother at all. The entire valve mechanism had been changed, even to the extent of using additional valves.

As the race proceeded the freaks had their troubles, but thanks to the previously mentioned condition the contestant was able to keep in the going by stopping at the pits for a new machine. The winner, riding a machine that was more nearly stock than any of his competitors, finished on the same machine he started out on.

If speed is the only thing desired, the above mentioned creations are very original and commendable, but they belong in a class by themselves and they should be kept there.

To my mind, from an advertising standpoint, the stripped stock machine should show the average rider what his machine will do. From the engineering side of the question it should show the designer the weaknesses of his salable product. From the sport standpoint the correction of both of these conditions gives the rider with some mechanical ingenuity more of a chance in competition with factory machines.

It seems to me that the "stripped stock" events represent a garden with great possibilities. Why not revise the rules so that the "weeds" may be removed from this garden? RACE FAN.

## LETTER FROM BROOKLYNITE

EDITOR, **Motor Cycle Illustrated.**—I cannot understand how the so-called National Convention at Sacramento, with only two or three delegates present from the New England district, and according to report with only about 50 delegates all told, can legally or according to the F. A. M. Constitution nullify the election of a district director, made at Saratoga, N. Y., with 106 members voting, all members coming from the New England district.

To put it in other words, why can members in California nullify the election of a New England director made by members of that district?

The excuse that not enough notice was given is not within the facts. I understand that on instructions from President Coffman, Secretary Gibson sent out 3,000 printed notices of the convention to members in New England and North Atlantic districts. Further than this, the convention and election were extensively advertised for several weeks, in the columns of the **Motor Cycle Illustrated.** Several thousand printed programs were sent out, as well as 25,000 postcards. No motorcycle convention has been as extensively advertised in the writer's opinion. Both Mr. Coffman and Secretary Gibson knew of these notices at Sacramento, and I cannot understand why they did not contradict the statement of insufficient notice.

I believe that the F. A. M. members in New York and the North Atlantic district will resent this action and will stand back of Mr. Hall. J. O. E. DIETRICH.

706 Halsey street, Brooklyn, N. Y.

## SMALL TURNOUT IN READING RUN

Reading, Pa., July 26.—Only a few of the local motorcyclists made the run on Sunday, July 25, to York, Pa., the distance one way being fully 78 miles. Those who made the trip were hospitably received by the York Club and taken on side trips to points of interest there.

## Well-Known Italian Racing Men in Motorcycle Corps

ITALIAN military authorities are now fully awake to the value of the motorcycle in war service and are providing hundreds of machines for use along the front, says The Motor Cycle, of Coventry, Eng. A great many of the better known Italian motorcycle speedmen have joined the various motor corps, among them being Baj Badino, a popular Douglas rider, Cerizza, Guzzi, Scotti and Monti. These men are now seeing active service behind the firing line with their motorcycles.

Since Italy entered the war the government has bought up all the motorcycles over 3 h.p. considered suitable for military service. Among the machines most frequently seen in the corps are the British-made Triumph, Rudge, Sunbeam and Lea-Francis models. Among the sidecars which are frequently used to transport officers are found the Motosacoche and the F. N. types.

Recent purchases of motorcycles by the government include many privately-owned mounts and the sale price in each case was fixed by a commission of motorcycle experts and officers.

October 11-16, New York, N. Y.—National motorcycle and bicycle show at the Madison Square Garden under the auspices of the Motorcycle Manufacturers' Association.

## WILL NOT SELL TO NEGROES

Louisville, Ky., July 26.—Negro riders have been making themselves rather objectionable in Louisville lately by grabbing jobs held by white men in the motorcycle delivery game. The consequence has been that the dealers are backing the white riders, and one dealer recently announced that he would not sell a machine of the make which he handled to a negro under any conditions. He stated that he did not figure it to be a good advertisement to have a negro riding one of his machines, whether it was new or second hand and that full cash purchase price would have no influence where has was concerned.

## LIGHTING LAW IS ENFORCED

Milwaukee, Wis., July 31.—The latest addition to the ranks of riders who have been at odds with the local police on account of lighting regulations are two Motor Wheelists of this city. A short time ago, the pair were overtaken by nightfall without having their bicycle lamps along. On getting ready to go homeward they discovered their predicament and so started off for a seven-mile walk, pushing their mounts along. They had hardly gone a mile before a policeman stopped them and inquired where they were going and why they had no lights.

On being told that their destination was six miles away, the officer said that the distance was too long to walk, and after an interchange of remarks, he took their license numbers and let them proceed. The result was a summons for each young man, and next morning the judge, after stating that the officer was stretching the statute referring to lighting rather too far, imposed a fine of $1 on each rider.

## MOTORCYCLIST IS ACQUITTED

Little Falls, N. Y.—Raymond S. Spears, a newspaper man and author not unknown to **Motor Cycle Illustrated's** readers, was arrested on the charge of cruelty to animals on complaint of Guy Patrick, local manager of the W. W. Woolworth ten-cent store. The charge was that Spears rode by Patrick's house on his motorcycle and shot a bull terrier owned by Patrick.

Spears was tried before Recorder Collins and a jury of six men. The evidence showed that Patrick, his wife and his neighbors had seen the brute chasing motorcyclists up and down the street on many occasions. Patrick and his own witnesses testified to this fact, and Mrs. Patrick admitted that Spears had warned her by legal oral notice that she must tie the dog up under penalty of having the animal killed.

It was shown that Spears went up Church street on his motorcycle on July 1, and that the dog chased him for upwards of a hundred yards, and tore the heel of his shoe. Spears went on home and returned a few minutes later with a pistol. He shot the brute as it stood on the curb, and the dog's interest in motorcycles ceased for the time being.

An attempt was made to show that Spears went after his gun and came back to shoot the dog, but Spears easily showed that he had taken his wife to another part of the city, and that because of rain he went after her, and that he got her, but that on the way to get her he shot the animal which was blockading the street.

Spears' attorney, W. S. Rhodes, brought out that the City Charter specifically states that "any person" may kill a dog that barks at, bites at, bites or otherwise attacks any person in a public place. This fact the dog owners of the town seemed not to have learned until the time of the trial. Many motorcyclers did not know it. It came apparently as a surprise to the prosecution.

The evidence was put in in about five hours, and the jury rendered a verdict for the defendant in less than one minute.

There are now in the State of Washington 1,998 privately owned motorcycles, while the dealers' demonstration machines total 33. Motorcycles exempt from paying the license fee are owned by the State and cities and number six.

**Canal and Sullivan Sts. New York**

# *Mr. Dealer*, Every rider in your town is a Prospect

**That's putting it mildly. Every rider who sees the WEED FOLDING SPRING BACKREST will—want—it. It's so obviously just what they need to make them ABSOLUTELY comfortable—always. Its back is roomy and soft. It measures 11 inches x 4¼ inches, with 1¼-inch thick, waterproofed leather upholstery.**

When you sell the WEED FOLDING SPRING BACKREST you're perfectly safe in giving a money-back guarantee with it. Once the rider sits on his saddle and feels the luxurious comfort of the heavily-leathered support just where he needs it most—he'll cling to the WEED! And, what's more, he'll sing its praises to his friends. This word-of-mouth boosting by riders is what makes the WEED the fastest selling fitment on the market.

Strongly built throughout. Flat spring supporting arms of the backrest take up all surplus jars not absorbed by the saddle and motorcycle springs and make the backrest easy and comfortable even on the roughest roads.

And, finally, the folding feature makes a big hit with the rider. A simple movement of a lever at the rear of saddle turns back, flat to saddle-level and permits rider to mount and dismount without interference.

*Guaranteed Satisfactory or Money Refunded*

YOU *MUST* STOCK THE WEED. It has become the standard in price, workmanship and popularity

**Weed Folding Backrest Co., Stamford, Conn.**

# GOING

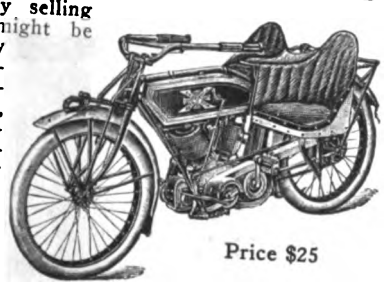
Many Bicycle Dealers are taking advantage of this extraordinary bargain in tires and buying them as an investment. Either to resell at a good profit or used for replacements, these tires will make money for you. They're going—so is your opportunity—ACT NOW.

By reason of our purchasing a huge quantity of Diamond-Goodrich Bicycle tires direct from the factory we were able to buy them at extremely low prices and so can afford to sell them at prices that you will probably never be able to duplicate. There are 14 different brands, all strictly first quality. You can re-sell them or use them for replacement and make a nice snug profit either way.

If you are a live dealer you will write us on your letter head, immediately, for our Tire Special. When you get it and see the prices, we will leave it to your own good judgment about ordering. Get Busy.

# The MILLER TRIPLEX SIDE SEAT

opens up so many selling schemes that it might be called an auxiliary salesman. You cannot beat it for demonstrating purposes, for it puts the prospect in the right position for hearing every argument and seeing every demonstration. It has a high-class appearance and attracts and holds the interest of prospective buyers. It is something entirely different and it is this "something different" that attracts every motorcycle rider and makes of the Triplex such an exceptional seller.



Price $25

If you have any doubts about the wonderful possibilities offered by the TRIPLEX you are not thoroughly acquainted with it, and so ought, at least, to find out about it just to convince yourself.

# PROTECTION

The most absolute protection against wind and dust is afforded by the

## Van Zile Air Deflector

*PATENTED*

The deflector is attached to the handle bars of a motorcycle or the front of a sidecar. The forward motion of the motorcycle creates a strong current of air which enters the passages at the front of the deflector and is discharged forwardly and upwardly from the top. This current acts as a shield, protecting the user from the air which would ordinarily strike his chest or head.

### The Advantages Obtained From Use of Deflector

1. A clear uninterrupted vision of the road at all times.
2. Absolute freedom from irritating wind and dust, in the eyes, nose, and on the chest and shoulders.
3. Elimination of goggles or windshield when riding.
4. Ability to light a cigar, pipe or cigarette while going at any speed.
5. Relief of strain on muscles, used ordinarily to brace against the wind.
6. Ability to ride in much colder weather than usual, as the face is not robbed of its natural heat by fast traveling.

### Construction and Attachment

This deflector is made of steel and is supported by brackets having a vertical adjustment of three inches. It is easily attached or removed. It is japanned to suit the color of the motorcycle. It can be used on a sidecar if additional brackets for same are purchased. Finished weight nine pounds. (See further account in editorial columns.)

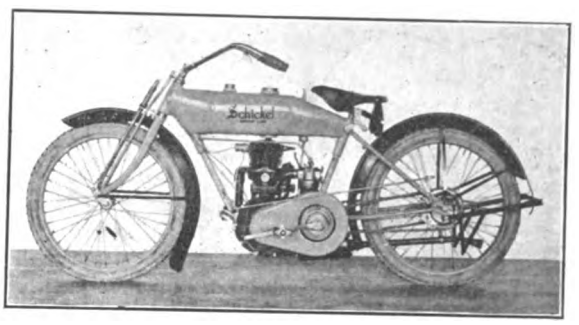
# A motorcycle that pulls a prairie schooner



THE power of the Schickel Big Six is proved by the fact that it is now pulling a prairie schooner containing the family of M. E. Gale, from the Atlantic to the Pacific. This is a load of a ton.

## *The* Schickel Big Six

is built for power and efficiency. It is a hill-climbing marvel—yet it is so simple that anyone can understand it. It is the smoothest running, most efficient motorcycle ever constructed. Two stroke, valveless, which means fewer parts, it is easier to control, easier to ride, easier to take care of.

Write now for information concerning this king of all motorcycles.

# After Long, Hard Service

After long, hard, continuous service for a year or more, it will be found by actual comparison and analysis that the chains showing the least signs of wear and whose efficiency is nearest maximum are

## DUCKWORTH CHAINS

There is a most excellent reason why "Duckworth" Chains are noted for their long wearing and service giving qualities: "Service" first, last and all the time is the supreme requirement of their manufacture. None of their great wearing quality is sacrificed for great tensile strength. They're strong enough; not too strong.

## PROVE THEIR MERIT

We need not recite all the winnings and records of endurance in which Duckworth Chains materially assisted. It is sufficient to just point to the fact of their being universally used by the leading motorcycle manufacturers and let you draw your own conclusion as to their merit.

*"There's But To Reason Why"*

**LEONARD'S PRESTO - BRACKET**

**Has Made Such a Big Hit Already**

1. Places your Presto Tank in front, where it belongs.
2. Takes away danger of striking tank, if thrown.
3. No long tubes to break or clog.
4. Betters appearance of your machine 100%.
5. Betters light by its direct connection.
6. Permits gas adjustment while lighting.
7. Makes riding easier, because of added weight over front wheel.
8. Tank is removed easier and quicker.
9. Removes all interference with filling gasoline tank and operating machine.
10. Because of its reasonable cost.
11. Because it is the best Presto-Lite Bracket you can buy.

Buy this Bracket. Try it on your machine. If not satisfied it is the best tank bracket made, return it and we will refund your money.

# FEDERAL MOTORCYCLE TIRES

"EXTRA SERVICE"

Federal Rubber Manufacturing Co. - Milwaukee

# Jones Valve Wings

are to take the place of the ordinary hexagonal nut furnished on the valve stem of motorcycle tires. The two wings make it easy for the rider to lock the valve stem firmly in place with his fingers, instead of using a monkey wrench or pliers. Should the nut become rounded the tools are practically useless.

## Time Savers

They aid in pulling or pushing the valve through the rim. A convenience that will not be overlooked by the veteran motorcyclist. Riders are always losing valve nuts. Are you prepared to furnish them with a real convenience, "The Jones Valve Wing"? They are fastened on cards (24 wings to the card) which are specially made for counter display.

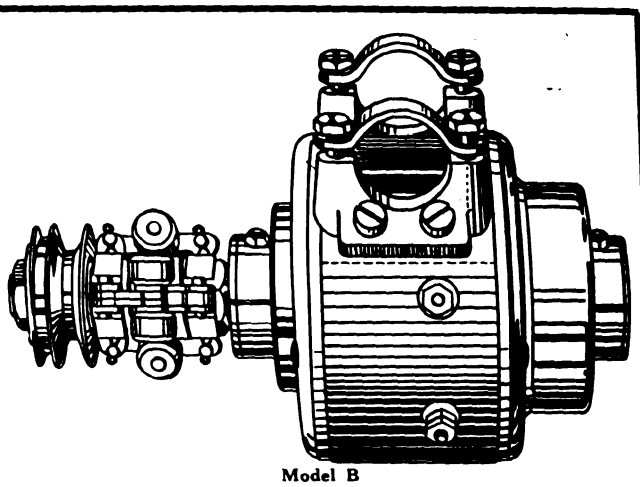
# Electric Lighting Generators
## FOR MOTOR CYCLES

MANUFACTURED BY

## The A. B. C. Generator Co.
LOS ANGELES, CAL.



Model B

**Model P** (Non Battery) Instrument. Operates at 6 volts, capacity from 2½ to 4½ amps., 25 c. p. Constant voltage maintained by a centrifugal governor of improved design. Gearing 1800 minimum R. P. M. Gives full voltage at 10 M. P. H. Weight 7½ lbs. Price, complete (less lamps)..... **$22.50**

**Model C.** (Battery) Instrument. Same as Model B, with the addition of our new "Automatic Mechanical Cut-in Switch" which is incorporated in and controlled by the rotation of the armature shaft. This switch automatically disconnects the charging current at the desired minimum R. P. M. easily adjusted. The speed of the armature is controlled by the governor. The current therefore maintained constant and uniform while the switch is in contact. Price, complete (less lamps and battery)..... **$27.50**

We prefer to deliver the A. B. C. complete with the Celebrated S. & M. 7½-inch Head Lamp, and our own tail lamp (the very best in lamps, value $10.00 and $2.00) for $10.00 additional, for much depends upon the lamps.

THE CONTROL of the A. B. C. Generators is entirely MECHANICAL. None of the usual delicate adjustments required as when controlled electrically.

MODEL C can be used as Model B if desired.

MODEL B cannot be used as Model C unless returned to the factory.

CHARGE for change of Model B to Model C. Difference in price, $5.00, labor, $2.00;—$7.00.

Please do not confuse the A. B. C. with other generators, for while it is necessarily similar in some respects, it is, generally speaking, very different indeed.

It is not, as you may suppose, a new instrument, for during the past year and a half hundreds of them have been put in use in Southern California. The city police of Los Angeles and many other cities and towns using them exclusively.

We know that we have either eliminated or corrected every troublesome generator or control feature, and that we can now claim that the A. B. C. is the only instrument on the market that is thoroughly practicable in connection with the fluctuating speeds of a motorcycle.

TERMS 10% with order. Balance, C. O. D., unless otherwise arranged.

| Total per insertion | 18,470,806 |

# Demand for Goodyear-Akron Bicycle Tires Doubled

Dealers—these facts are simply astonishing.

In the year just closed Goodyear-Akron Bicycle Tire sales increased 119 per cent. That's over twice our former yearly output.

Yet we thought last year we had about reached our limit.

But Goodyear-Akron quality, low price and dealer co-operation have made possible this unheard of gain.

Goodyear Fortified Automobile Tires and Goodyear Blue Streak Motorcycle Tires each predominate in their fields.

And now comes this Goodyear-Akron Bicycle Tire to smash all previous Bicycle Tire Records.

## The Dealer Behind the Tire

This tremendous tire sale is due largely to you dealers. You saw the force behind the tire, and you seized the opening offered.

No bicycle tire has ever had such a stupendous advertising campaign back of it. The trade stands amazed at its size and scope.

In the past year Goodyear-Akron Bicycle Tires established themselves all over the country. They have proved their extra value with thousands of riders and dealers.

Now, with this continued Goodyear advertising back of them, these matchless tires must sweep the country in sales.

Get your share of this new business. It's *quicker* business, too, than selling tires of unknown name and worth.

A postal from you brings our complete Dealers' Proposition. Write today before you forget.

Vol. 10 Thursday, August 12, 1915 No. 32

# Baker to Try for Three-Flag Record

SAN FRANCISCO, Cal., August 8.—Erwin G. Baker and his Indian are after another motorcycle record, this time international in scope. Late this month (the date has not been formally decided upon at this writing), Baker will start from Vancouver, B. C., and ride southward along the Pacific Coast to Tia Juana, Mexico, in an endeavor to lower the time for the trip. Baker figures the mileage to be something over 1,800, and the best record for the journey is about eight and a half days.

The trial will be made under the title of the International Three-Flag Record, and it is safe to say that no development in motorcycle circles on the coast of late will attract any more attention. Comparatively little has been said concerning the trial as yet, Baker having held up his formal announcement of the proposed attempt pending the approval of the Hendee Mfg. Co. The company has now given its O. K. and Baker is rushing his plans to completion.

Beginning at Vancouver, Baker will make the dash southward as follows: Through Blaine, Bellingham, Burlington, Mt. Vernon, Stanwood, Everett, Seattle, Kent, Auburn, Tacoma, Centralia, Chehalis, Castle Rock, Kelso and Vancouver, all these places being in Washington. He will then cross into Oregon and go through Portland, Oregon City, Woodburn, Salem, Albany, Harrisburg, Eugene, Oakland, Roseburg, Glendale, to Siskiyou.

His next jump will be across the line into California, and the remainder of his route will be as follows: Montague, Weed, Shasta Springs, Sisson, Dunsmuir, Castle Crags, Redding, Red Bluff, Tehama, Los Molinos, Chico, Gridley, Marysville, Lincoln, Roseville, Sacramento, Stockton, Modesto, Merced, Madera, Fresno, Selma, Goshen, Tulare, Pixley, Delano, Famosa, Bakersfield, Lebeck, Saugus, Fernando, San Fernando, Santa Ana, Capistrano, Oceanside and San Diego. From San Diego it will be a short run across the Mexican line to Tia Juana.

# M. M. A. Show Details Are Announced

CHICAGO, Ill., August 10.—Manager A. B. Coffman has just sent out the first announcements of the Chicago and the New York motorcycle, bicycle and accessory shows, to be held respectively September 4-25 in this city and October 11-16 in New York. The Coliseum will be the scene of the Chicago show, while the Madison Square Garden will house the New York exhibition.

In the concise and well-worded circular that relates to both exhibitions, Manager Coffman makes himself clear that both the Chicago and New York shows will be business shows, and that the hurrah of the automobile exhibitions will be conspicuous by its absence. The advantages of exhibiting or being represented at the National Exhibitions are pointed out, as well as the details which relate to the exhibits themselves. Thus, it is stated that the space rental will be 75 cents per square foot—a low figure—and that spaces run 12 feet square, as a rule, with some 12 by 10 feet. The facility with which an exhibitor can set up his stand on Monday, show for the full week and then dismantle and leave the building without waiting for a long line of exhibitors in different lines wishing to do the same thing, is clearly stated.

With regard to the Coliseum show, arrangements have been made to load all exhibits going to the New York show in special cars which will be rushed through fast freight. This will eliminate excessive express charges and place every exhibit in the Madison Square Garden ready to unpack and set up for the opening of the show on the evening of October 10. Each exhibitor will pay the management the cost of hauling his exhibit from freight depot to the Garden unless attended to personally.

In both the Chicago and the New York shows, the space will be allotted by the Motorcycle Manufacturers' Association Show Committee, consisting of Arthur Davidson, of the Harley-Davidson Motor Company; T. W. Henderson, of the Henderson Motorcycle Company; F. J. Weschler, of the Hendee Manufacturing Company, and Manager A. B. Coffman. Mr. Coffman's address is 414 Ohio Building, Toledo, O.

With regard to the New York show, this will be the first effort to stage an independent motorcycle and bicycle show in the Eastern metropolis. The show in the Garden will be conducted along similar lines to that of the Coliseum exhibition, the same dimensions in spacing and the same rental of 75 cents per square foot being allotted. Manager Coffman and the Show Committee, as well as the majority of motorcycle and bicycle makers and parts men have felt that the industry in the East has needed an independent exhibition, and that is it was high time that the three allied industries should no longer cease to be a secondary consideration to an automobile exhibition. The patronization at previous shows in New York under such circumstances was good, and it is thought that the week of October 11-16 will demonstrate to the full that the show independent of other industries will result in increased business all around.

## APPOINTED GENERAL SALES MANAGER

Harry C. Miller, Pacific Coast manager for the B. F. Goodrich Company during the last five years, has been appointed general manager of sales of the pneumatic tire division of the firm, with headquarters at Akron, O. C. E. Cook, who has been acting as joint manager of the Pacific division at the San Francisco headquarters, will take entire charge of the territory hereafter. Both Miller and Cook will assume their new duties about September 1.

## ANDERSON RETURNS

San Francisco, Cal.—B. Anderson, manager of the San Francisco branch of the Hendee Mfg. Company, has just returned from a two-weeks' trip to the big factory at Springfield, Mass.

Digitized by Google

# PERRY CAPTURES 100-MILE DASH

## Excelsiorite Makes Feature Event at Madison, Wis.; Stratton Second; Kenney, Third

MADISON, Wis., Aug. 8.—Bob Perry and his Excelsior repeated here today in the 100-mile feature event of the program staged on the Dane County fairgrounds track under the auspices of the Madison Motorcycle Racing Association. Bob was the victor in the time of 98:32. Stratton, riding an Indian, was second; Dave Kenney, Cyclone, third, and "Curly" Frederick, Harley-Davidson, fourth.

The chances of the Harley-Davidson team went aglimmering when Irving Janke took a spill on the east turn and broke his left arm. This puts three of the Harley-Davidson speed men on the shelf, Brier and Wolter having been rendered hors de combat in the last 100-mile event at Indianapolis.

### Montgomery Needed a Periscope

In the fifth lap of the long grind Montgomery went into the lead with his Excelsior and was rapidly eating up the pace between him and the rest of the field when in the forty-third lap he skidded on the west turn. The Madison track is devoid of fences on the turns, making it an ideal F. A. M. oval. The fences are replaced by big broad ditches filled with waterways devoted to cultivation of various species of water horticulture.

When Monty skidded he lost track of things and says that when he came to he looked up into the sky with about a foot of water between him and the air. They are still dragging for Monty's machine.

### Jinx Got Goudy

Montgomery's spill put Perry in the lead which position he retained in spite of a stop for oil and gas in the eightieth.

Carl Goudy inherited some of Perry's famous jinxes. In the second lap Carl blew the rear tire just after he passed the tape and rode almost a mile on the rim. A broken piston put Goudy out for good in the seventeenth.

The ditch digging operations started early on the program. Henry Brockman's Thor evinced an unquenchable thirst in the 10-mile local professional event which headed the program and put Hank out of the running in the second lap. Frank "Pat" Neu on an Excelsior was first and Herbert Grubb, Indian, second.

### "Monty" Copped 15-Mile Open

The 15-mile open saw Stratton and Carroll for the Indian, and Montgomery, Stokes and Perry, Excelsior, lined up for the start. Monty started out with a vengeance and was never headed.

H. E. Baldwin, Milwaukee, Wisconsin F. A. M. referee, officiated as starter. Arthur L. Johnson, Rockford, did the announcing.

### Summaries

10-Mile, Madison Club riders only.—First, Frank Neu, Excelsior; second, Herbert Grubb, Indian; third, Hubert Stevens, Harley-Davidson. Time, 9:55

15-Mile, Open.—First, Montgomery, Excelsior; second, Carroll, Indian; third, Stratton, Indian. Time, 13:14.

100-Mile, Non-Ports.—First, Perry, Excelsior; second, Stratton, Indian; third, Kenney, Cyclone; fourth, Frederick, Harley-Davidson; fifth, D. Heick, Excelsior. Time, 98:32.

### MATHEWS STARS AT RAVENNA

Ravenna, O.—Shorty Mathews, of Chicago, on an Indian, took the majority of the money in the meet of the Ravenna M. C. on July 31, at the local track. He won the five-mile open, the ten-mile open and the 25-mile race, and came first in the time trial. Arthur Rochow, Excelsior, captured the three-mile sidecar event and Roscoe Hawn, Indian, was victor in the three-mile match race. Following are the summaries:

Five-mile open—Shorty Mathews, Indian, first; T. O. Coffey, Indian, second; Rolly Blume, Excelsior, third. Time, 5:53¾.

Three-mile sidecar race—Arthur Rochow, Excelsior, first; E. Eckert, Indian, second. Time, 4:29½.

Ten-mile open—Mathews, Indian, first; Coffey, Indian, second; Blume, Excelsior, third. Time, 11:49.

Three-mile match—Roscoe Hawn, Indian, first; Blume, second; J. Naylor, Indian, third. Time, 3:46¼.

Time trial, one mile—Mathews, 1:09; Coffey, 1:10½; Hawn, 1:11½; Blume, 1:13¼.

Twenty-five-mile open—Mathews, first; Coffey, second; Blume, third. Time, 29:00⅕.

### ON INDIAN ADV. STAFF

John A. Priest, ("Jack" preferred, if you please) sat down to the new desk in the advertising department of the Hendee Mfg. Co. this week. He came from the advertising staff of the Worcester (Mass.) *Gazette*. His enrolment in the Indian camp is an advance move to build up an even stronger organization for the execution of the aggressive Indian advertising campaign which will be launched for 1916.

John A. Priest

Mr. Priest brings to his new field an all around training in the printing and advertising professions which render him unusually well fitted for his present work. His future activities will embrace all phases of Indian advertising work.

# FAT PURSE FOR TACOMA CONTEST

## Winner of 300-Mile Event Will Receive $500; Stellar List Assured for Long Grind

TACOMA, Wash.—Tacoma is due to land on the motorcycle map on August 15 when the 300 mile race is staged on the Tacoma Speedway. Prizes total $1,000. The promoters: T. W. Dunn, secretary and manager; George D. Dunn, treasurer; G. C. Marks, referee. Address all communications to T. W. Dunn, 224 Perkins building, Tacoma.

The course is a circuit of approximately two miles. Two days of automobile racing has taken all the rough spots out of the track and with such men as Creviston, Don Johns and Otto Walker already on the entry list, excellent sport is expected.

The rider covering the 300-miles in the shortest elapsed time will receive $500; second prize, $250; third, $150; fourth, $75; fifth, $25. The impressive purse for the winner assures the entry of all the top-notchers in this corner of the map. The course is now open for practice and some of the local speed merchants are hard at work.

The regular entry fee is $10, and post entries will be accepted at $20.

### INDIAN AWARDED GRAND PRIZE

San Francisco, Cal.—As a result of the motor vehicle reclassification, the Hendee Mfg. Co. has been awarded the Grand Prize for motorcycles at the Panama-Pacific International Exposition.

About a month ago, the Indian exhibit was awarded a Medal of Honor from the Jury of Awards of the Exposition, for superior mechanical excellence. In the original classification of motor vehicles, automobiles and motorcycles were grouped under one head and the Grand Prize went to an automobile concern. The incorrectness of this grouping was brought to the notice of the Jury and a reclassification was asked for, considering the motorcycles as distinct vehicles. This being adopted, the Indian was awarded the Grand Prize in the motorcycle class and thus entered the Grand Prize division at the Exposition.

### BRONX RALLY PLANS COMPLETED

Bronx, N. Y., August 11.—Final plans have been perfected for the Social Rally of the Bronx Motorcyclists' Association at Savin Rock, near New Haven, Conn., on August 22. The first stop will be at Bridgeport, where the participants will be the guests of the Excelsior M. C. at 266 State street. At Savin Rock, the riders will register at Moegling's Beach House, where parking accommodations will be provided for the machines.

A shore dinner will be served at the rock, tickets for the same being obtainable from the committee. At 2 o'clock the riders will assemble for a panorama photograph and then break up and spend the afternoon as they will. Return home will be made in the evening.

# Jones and Pineau Win 100-Mile Relay

TOLEDO, O., August 8.—Cutting loose at the crack of the starting gun and never easing up a notch from start to finish, the Flying Merkel team of Jones and Pineau won the 100-mile relay race conducted on the half-mile fair grounds track this afternoon by the Interstate Racing Association.

Second place was won by the team of L. S. Taylor and Fred Meyers, on Indians, two laps behind the leaders, and Amos and Carver, riding Merkels, took third money.

The Jones-Pineau combination not only grabbed off the big money at the finish, but made a clean sweep of all the intermediate-distance prizes for leading at 25, 50 and 75 miles. And they set a new world's record for the distance on half-mile tracks while they were at it, for they reeled off the 200 laps in 114:13⅗, or an average of about 34 seconds per lap.

The teams lined up to face the starter were: Taylor and Meyers, Indian; Jones and Pineau, Merkel; Temple and Burman, Excelsior; Wilkins and Mungen, Harley-Davidson; Bailey and Fox, Yale; Amos and Carver, Merkel; Verrill and Goudy, Indian.

Jones led in the 20th mile with no symptoms of a let-down, with Taylor and Wilkins next in order. Meyers relieved Taylor in the 22nd, but Jones didn't let that stop him and continued to slowly widen the gap. Amos had been advancing from the rear ranks and squeezed into third position here, but a stop for oil soon afterward let Wilkins back into that place.

Pineau took up the job from Jones in the 24th mile, and kept 'er rolling just the same. Goudy broke a valve in the 25th mile and dropped out, leaving the fortunes of his team all up to Verrill. And Verrill had motor trouble a few miles later, so that the team was done for.

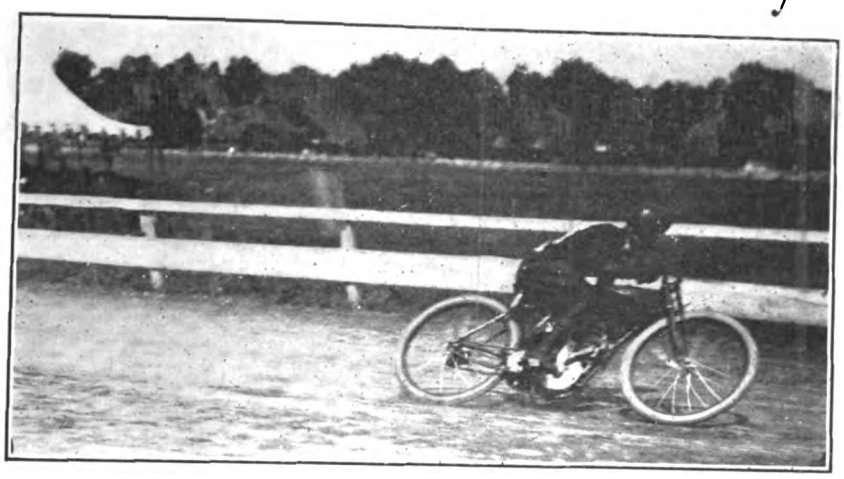
At the 50-mile station Jones led by a lap and a half, having covered the distance in 57:25. Taylor was second and Wilkins third. Amos moved up to third in the 52d mile, when Wilkins stopped for oil.

And these three teams, holding the pace so hot that it sizzled and allowing nothing to hold them back, carried the battle on over the miles in this order. Pineau relieved Jones in the 58th mile and gave the pace-maker responsibility back to him again in the 82d, from which point Jones pranced straight through to the finish. Jones' time for 75 miles was 85:50.

Meyers relieved Taylor in the 56th, and toward the finish they switched quickly several times, apparently striving to make up lost distance by alternate sprints, but Jones met them at the sprint game and refused to give back even a little of his big lead.

So Jones purred on across the final tape with victory clutched in both hands in the remarkable time of 114:13⅗, the fastest time ever made for the distance on a two-lap dirt track.

Before the start of the big race there were two preliminary heats and a final, as sort of an introductory for the real stuff. "Krazy Horse" Verrill took the first three-mile heat, in 3:20, with Pineau second and Amos third.



**Carl Goudy Making Lap of Toledo Track in 32 Seconds, a New Record**

The second heat, three miles, went to Taylor, with Jones second and Stohan third. Time, 3:22.

Then Verrill stormed away with the final heat, five miles, reeling it off in 5:33½.

Bill Goudy rode a time trial against the track record with his Cyclone, and that same record was irretrievably ruined thereby. Goudy tore off a lap in 32 seconds flat, lowering the record set by Ray Seymour last year.

# CREVISTON AND JOHNS CLEAN UP

## They Take Chief Honors at Fresno with Fabian Hot on Trail; Woods Scores

FRESNO, Cal., August 8.—Before a crowd of 5,000 Don Johns and Ray Creviston chipped seconds off several speed marks here in today's racemeet. George Woods, a Fresno dealer, climbed into the stellar division by winning the chief event of the day, the 25-mile free-for-all. Track was in good condition, but this did not keep Johns and several of the others from taking spills. No one was seriously hurt. The summaries:

Five miles, professional, stripped stock, 61 cu. ins.: Johns, Indian, first; Creviston, Indian, second; Fabian, Excelsior, third. Time, 4:18⅘.

Ten miles, free-for-all, 61 cu. ins.: Fabian, Cyclone, first; Creviston, Indian, second; Johns, Indian, third. Time, 8:44⅘. Crevvy had plug trouble, Johns changed machines in sixth lap because of stoppage in gas pipe and changed again in next lap because of plug trouble. Finished race on 1912 Indian belonging to Werner, pit helper from Chicago.

One-mile bicycle race: Peterson, first; Donlevy, second. Time, 2:35.

Five miles, motorcycle free-for-all, 61 cu. ins.: Johns, Indian, first; Fabian, Cyclone, second; Creviston, Indian, third. Time, 4:12. Creviston had more plug trouble.

Ten miles, professional stripped stock, 61 cu. ins.: Creviston, Indian, first; Johns, Indian, second; Werner, Indian, third. Time, 9:18⅘. Fabian, Cyclone, went out in eighth lap with broken exhaust spring.

Creviston was barred by the referee from competing in the 25-mile free-for-all under a charge of teaming with Johns in the third event against Fabian.

### 25-Mile Free-for-All

The 25-mile free-for-all was open to riders who had competed in either the second or third event, and the first prize was $100. Woods, a post entry, went in with Creviston's eight-valve Indian and cleaned up. Johns was second and Werner third. Time, 23:20⅕. Johns spilled in the twenty-third lap but escaped with bruises. He ran across the infield, grabbed another eight-valve from the Indian pits and finished second. Fabian's inside pedal struck the ground on one of the turns and he took a nasty spill; caved in his rear wheel. Mahling struck the fence, but also escaped serious injury.

Fifteen miles, professional, stripped stock, 61 cu. ins., for riders in California, residing north of and including Kern, was cut to ten miles by consent of the riders: Creviston, Indian, first; Johns, Indian, second; Fabian, Cyclone, third. Time, 9:36⅗.

### Fresno County Feature.

Ten miles, professional, stripped stock, 61 cu. ins., for Fresno County riders only, was cut to five miles: Woods, Indian, first; Gilmore, Indian, second; Bramblett, Thor, third. Time, 5:01. In addition to the first prize of $15 the winner received the cup donated by Fresno Motorcycle Dealers Association.

The time trial for riders breaking the one-mile Fresno track record of 51⅗ was won by Creviston in 49 seconds. Johns was second, in 49⅘ and Fabian was third in 50 seconds.

The races were promoted by L. H. Weilheimer, Indian dealer in Fresno. F. M. Woodson acted as referee; Walter Collins, starter; Gordon Slater, clerk of course; J. A. Rodda, assistant; J. F. Wise, B. N. Anderson and Burt Fuller, judges; J. A. Brogan, R. O. Leas and J. E. Carlson, scorers; E. B. Waterman, Ted Sheton and E. W. Johnson, timers.

## MAY REOPEN IVES PLANT, BUT NOT TO MANUFACTURE MOTORCYCLES

Owego, N. Y., August 9.—Negotiations are well under way for the reopening of the plant held by the Ives Motorcycle Corporation in this city by a new company which plans to operate under the title of Lackawanna Tube and Mfg. Co. It is stated that W. H. Ives, head of the old Ives Motorcycle Corporation, will be a heavy stockholder in the new concern. The output of the factory under the proposed plan will include screw machinery, metal stampings, drawn steel tubes, and similar products. No motorcycle articles will be manufactured.

## HENDEE CO. REDUCES HOURS

Springfield, Mass., August 7.—Notices are posted today in the plants of the Hendee Manufacturing Company, makers of motorcycles, employing 1,800 men, announcing that, commencing Monday, nine hours will constitute a working day, with a half day on Saturday. The weekly working schedule is correspondingly reduced to fifty hours. This schedule will be operative the year around and is adopted voluntarily by the company. The operating schedule heretofore has been ten hours per day and a fifty-four-hour week. Under the new working schedule the hourly rate is increased approximately ten per cent. Overtime will be paid for at time and a half.

## EMPLOYEES ENJOY BIG OUTING

Akron, O.—Over 15,000 employees of the Firestone Tire & Rubber Company, with their families, enjoyed the annual Firestone Outing at Silver Lake Park on July 31. There was an exceedingly interesting program run off, including a baseball game in the morning between the Factory and General office teams, a speed exhibition by Barney Oldfield on his 100 horsepower F. I. A. T. racer and novelty flights by De Loyd Thompson, an aviator. The noon dinner was enjoyed by all, and following this, came water sports, dancing, bowling and another baseball game, this time between the Rim Plant and Tire Plant teams. The Firestone officials distributed tickets to every woman and child who entered the grounds, these tickets entitling the bearer to an ice cream cone and rides on the figure-of-eight, miniature railroad and merry-go-round. The firm also furnished free transportation to and from the park and served lemonade and coffee to the picnickers.

## INDIAN QUARTETTE IN KENTUCKY METROPOLIS

**Left to Right, Secretary Frank Marshall, of Century Cycle Co., Local Agent; Harvey Bernard, Hendee Traveler; A. A. Ainsback and M. J. Murphy**

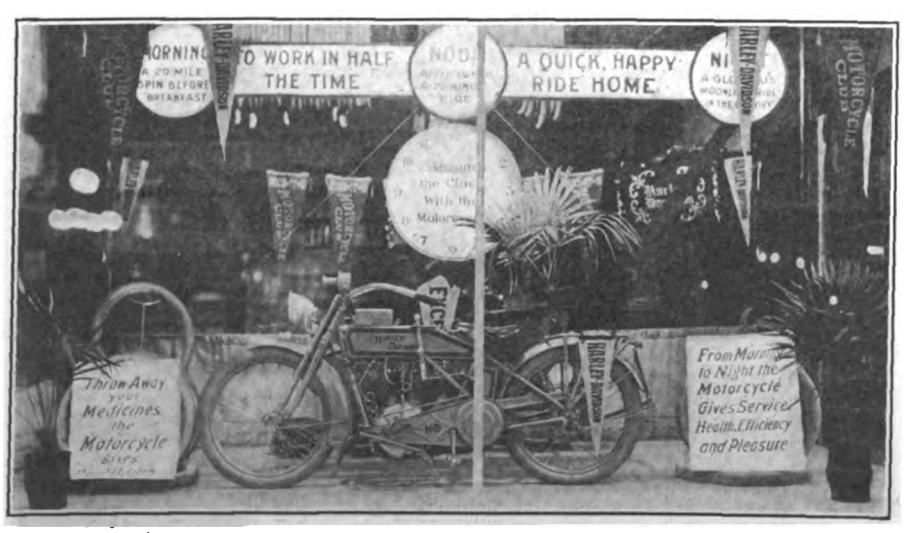
## CONTINENTAL SALES CONFERENCE

Erie, Pa., July 31.—The salesmen's conference at the Continental Rubber Works, in this city, came to an end today, after having lasted since July 27. The final celebration consisted in a picnic this afternoon, and tonight those attending the affair leave for home.

Sales Manager W. J. Surre, was of course in charge of the conference. The assembled salesmen, under his direction, made a tour of the plant on Tuesday, and had luncheon at the Erie Club. This was followed by a bicycle tire conference in the afternoon and dinner at the Country Club. On Wednesday, F. W. Fee, Chicago branch manager, held individual conferences, with a general conference on casings and tubes after a luncheon at the Hotel Lawrence. Manager Surre gave a stag supper in the evening.

Thursday was given over to conferences, with a chicken dinner to top off. Friday, other branch managers and representatives held individual meetings and a banquet at the Kahkwa Club was enjoyed by all in the evening. Those who attended were W. S. Tullis, San Francisco branch manager; E. H. Strickland, Central West representative; C. J. Zeffer, Southern representative; F. W. Fee, Chicago branch manager; B. W. Snowman, New York branch manager. Factory executives present were W. J. Surre, sales manager; T. R. Palmer, president and general manager; A. E. Caldwell, assistant sales manager; R. E. Sisson, of adjustment department, and J. C. Kemp, of the service department.

## THIS DISPLAY BROUGHT DEALER AURICH MANY SALES



**After Decorating His Window in This Manner the Harley-Davidson Representative in Billings, Mont., Was Kept Busy Giving Demonstrations and Booking Orders**

## DIVIDEND ON PREFERRED STOCK

Akron, O.—The B. F. Goodrich Company has declared a quarterly dividend of 1¾ per cent. on the $30,000,000 of preferred stock, payable to stockholders of record, September 20. No action has been taken in regard to a dividend on the common stock as yet.

## VICTOR RUBBER BUILDS

Springfield, Ohio.—The Victor Rubber Company, of Springfield, Ohio, will erect another building to be two stories and 30 x 108 feet. It will be erected on the ground between the two wings of the main factory building. The addition will be much like the one which was completed a smonth ago.

## IN BELGIAN DESPATCH SERVICE

From Le Havre, France, the present seat of the Belgian Government, has come a letter to the Hendee Mfg. Company, from Julien Vosch, a motorcycle volunteer in the Belgian Army. Vosch says that he has been using his Indian twin in headquarters despatch service since the beginning of the war, mostly covering the roads between Le Havre and the firing line, a distance of 200 miles. He makes the run in five hours as a rule.

## KLEIMENHAGEN ON HONEYMOON

Milwaukee, Wis.—Walter Kleimenhagen, Western sales correspondent at the Harley-Davidson Motor Company, is on a honeymoon vacation. Mrs. K. was a Miss Laura Giffert from Reedsburg, Wis., Walter's home town.

# WASHINGTONIANS AT HILL-CLIMB

## Capital City M. C. Entertains Speed Fans With Series of Spectacular Contests

WASHINGTON, August 9.—A hill-climb promoted by the National Capital Motorcycle Club attracted several hundred motor enthusiasts to Naylor's Hill, Anacostia, a suburb of Washington, last Saturday afternoon. This hill, which measures seven-tenths of a mile in length, has been the scene of numerous contests in the past, both automobile and motorcycle, and while not much of a hill as hills are known in mountainous parts of the country, it provides the steepest ascent to be found in the vicinity of Washington. For about 200 yards after crossing the starting line the grade is nearly 30 per cent., after which there is a gradual rise of 15 to 20 per cent. to the finish. Three rather sharp turns add to the difficulty of the riders in covering the course at speed, and a very soft, sandy stretch just before crossing the starting line helped to provide thrills for the spectators.

Raymond Lanigan, Excelsior, and E. W. Bliss, Harley-Davidson, furnished the only accidents of the afternoon. Lanigan attempted a turn at high speed during practice and in the spill which followed wrecked his machine, the rider receiving minor injuries. Bliss lost control of his machine in competing in the amateur class and fell just before crossing the starting line, the spill providing excitement for the crowd, but resulting only in a broken pedal.

The spectacular riding of August Zimmerman, Harley-Davidson, fairly took the spectators off their feet. Approaching the starting line at high speed, "Zimmy" cleared a small hummock in the road and machine and rider hurtled through the air a distance of 27 feet by actual measurement. William Denham, Excelsior, and Tommy Dedge, Indian, local riders of considerable reputation, helped to entertain the spectators by thrilling dashes through the sand and over the line. Consistent riding by A. O. Durham, Indian, in each of the three professional events earned him a place in the list of local riders known as "speed kings."

A tourist from Pittsburgh, riding a 76-inch Thor to which was attached a Flxible sidecar, furnished a competing attraction that was almost as interesting as the hill-climb itself. This being the first opportunity Washington riders have had of seeing the Flxible in action, they were interested spectators while the Pittsburgh tourist performed the ocean roll, fox trot, Gaby glide and various other steps that opened the eyes of the experienced sidecar operators.

A preliminary that provided a lot of amusement for the spectators was a contest between four riders mounted on bicycles equipped with Smith Motor Wheels. The contest incidentally showed that the little jiggers have a lot more "kick" in them than is usually supposed. The riders were permitted to pedal and otherwise assist the little motors in their strenuous task, and the fact that the distance was made in about three minutes speaks well for the "bicycle booster."

Entries were as follows: Zimmerman, Schenuit and Bliss, Harley-Davidson; Dedge, Seabrook, Mears, Durham, Lowenstein, McPherson and Ross, Indian; Denham, Dessez, Lanigan and May, Excelsior; Robison, and Gootch, Dayton; Caltrider, Cyclone. T. O. Wansleben, F. A. M. referee, took charge of the timekeepers' reports and has not rendered final decision as to the winners.

### FIGURES SHOWED INCREASED BRITISH DEMAND

That the demand for American-made motorcycles and parts in Great Britain has been one of steady increase is proved by the British Board of Trade Returns for the year 1914. Starting to import American motorcycles in 1910, British purchasers took 208 machines in that year, valued at $38,125, and 455 machines, valued at $72,960. In 1912 there were 670 motorcycles, valued at $110,360 imported, while 1913 closed with 1,131 machines figured at $195,435, imported. The 1914 figures give 2,188 machines imported, with a valuation of $392,575.

In 1913, motorcycle parts to the value of $31,260 were brought into the British Isles, while in 1914 the American parts imported were valued at $50,845.

### READVILLE "CHAMP" RACE

Readville, Mass., August 10.—The Readville Motor Park will stage another race-meet of the 1915 season on Labor Day, September 6, in which crack motorcycle riders have been invited to compete. The events for the professionals will be of the "open" variety and any motor of 61-inch displacement will be eligible, while a twenty-five-mile race will be staged for the 30:50 class.

A ten-mile amateur and a ten-mile professional race will be ridden for trophies in addition to the regular prizes. The fifty-mile event on the program will decide the Readville championship at that distance for the 1915 season; and championship medals will be awarded in addition to cash prizes. The entries, costing one dollar, for each event, will close on Wednesday, September 1, at 5 p. m.; they should be mailed to C. B. Johnson, Readville Park, Boston, Mass.

### ONE-DAY BERKSHIRE TOUR

Belmont, Mass.—Touring the Berkshires in a single day with an Indian sidecar combination has not been attempted as yet by anyone but W. C. Schulz, of this city, as far as is known here. Schulz took a passenger in his sidecar and made an oblong swing through four counties in Massachusetts between 7 a. m. and 9 p. m. on August 5, covering 235 miles in all.

Leaving Springfield, Schulz drove due north up the Connecticut Valley to Greenfield, then went over the Mohawk Trail into Western Massachusetts, fording swollen brooks and passing through washouts. The pair arrived in North Adams at noon and after lunch went on through Williamstown and into the Green Mountains of Vermont at Pownal and on to Hoosack Falls. They then returned to North Adams, going homeward via the Berkshires and over Jacob's Ladder to Springfield and Belmont.

### SPEEDWAY WORK HALTED

Detroit, Mich.—Financial difficulties have so entangled the Detroit Motor Speedway that the proposition has been indefinitely halted. The promoters have washed their hands of the enterprise and it is not likely that the speedway will be completed this year.

# C. P. A. Five Captures Bowling Team Trophy and Jobbers Wallop Manufacturers on the Diamond

ATLANTIC CITY.—Under the management of G. H. Hamilton, of the Federal Rubber Manufacturing Company, of Milwaukee, the bowling tournament in connection with the Cycle Parts program was conducted in clockwork fashion, most of the eliminations taking place Wednesday afternoon, so that there was no delay in bowling off at night.

There were four teams, representing the Cycle Parts Association, the Jobbers, the Bicycle and Motorcycle Manufacturers and the Traveling Men, respectively. The scores ran somewhat lower than usual, the Cycle Parts Association Five, with 758, capturing the team trophy. The Jobbers were second with 714. The highest score was made by William G. Schack, of the Emblem Manufacturing Company, who had 208 and who, with 168 in the roll-off, won the individual trophy. In so doing Mr. Schack lived up to the prediction made in last week's issue of **Motor Cycle Illustrated.** The scores.

Cycle Parts Association—Stokes 145; Cabana 145; Hamilton 150; Morehouse 193; Palmer 125. Total, 758.

Jobbers—Horton 123; Oliver 156; Willis 134; Wagner 162; Ball 130. Total, 714.

Bicycle and Motorcycle Manufacturers—Harden 129; Schack 208; Jackson 121; Cahn 85; Pierce 113. Total, 656.

Travelers—Sauer 134; Brown 104; Gaillard 104; Biddle 157; Wood 144. Total, 643.

Upward of thirty ladies competed for individual honors, first prize being won by Mrs. Kaufman, of New York, with 110; Mrs. Morehouse, of Torrington, Conn., was second with 101.

## Jobbers Win Ball Game From Manufacturers

FIFTEEN to Nine, with the Jobbers victorious, was the score of Thursday morning's baseball game, between the nine representing the Jobbers' Association and another representing the Manufacturers. The Jobbers took the lead in the first inning, and were never overtaken by their opponents.

The Manufacturers in the first inning chalked up three runs, but the Jobbers came back with four and added two in the second and five in the third, while Wigmore, pitching for the Jobbers, held the Manufacturers scoreless in the second, third and fourth.

Within a few minutes after play was started Horace Huffman, who was playing centerfield for the Jobbers, caught a line drive on one of the fingers of his right hand and sustained a compound fracture. The injury, though painful, did not have serious results, and Huffman was about as usual after the bones of the injured member had been set. Kellogg took his place and finished the game.

In the fifth inning, with the Jobbers leading by a score of 11-7, the Manufacturers sent Griffith, Southmayd, Briggs and Schwab across the plate, whereupon the Jobbers came back with three more. The Manufacturers tallied two in the seventh, which was the last inning, and the Jobbers one, making the score 15 to 9 in favor of the former.

**Jobbers**

Oliver, 1b., 2 runs; Grady ss., 3 runs; Kellogg, cf., 1 run; Cramer, rf.; Wagner, c., 2 runs; Ball, 3b., 1 run; Van Zante, 2b., 2 runs; Wigmore, p., 2 runs; Ash, lf., 1 run. Total 15.

**Manufacturers**

Griffith, 1b., 2 runs; Pierce, 2b.; Southmayd, c., 2 runs; Briggs, lf., 2 runs; Schwab, 3b., 3 runs; Brown, ss.; Jones, cf.; Lyman, rf.; Schack, p. Total 9.

Strickland took Jones' place, and Jones went into the box for Schack in the six inning. Score by innings:

| | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Jobbers | 4 | 2 | 5 | 0 | 3 | 0 | 1 | —15 |
| Manufacturers | 3 | 0 | 0 | 0 | 4 | 2 | 2 | — 9 |

## Parts Manufacturers Win at Water Polo

NO part of the program furnished keener delight to the spectators than did the water polo contests Wednesday afternoon. As announced in the last issue of **Motor Cycle Illustrated,** the finals were captured by the Parts Manufacturers' Five, Strickland scoring the winning goal after 8½ minutes of play.

The winning team consisted of E. H. Strickland, of the Continental Rubber Works; H. F. L. Funke, of the H. F. L. Funke Co., of New York; O. A. Jones, of the Majestic Manufacturing Company; Geo. Briggs, of Wheeler & Schebler; J. W. Spray, of the Diamond Chain & Manufacturing Co.

The first game was between the Parts Manufacturers and the Traveling men, the former winning. The Traveling Five was made up of J. G. Ledyard, J. I. Brandenberg, Geo. Maslen, Tom Hemingway, and M. R. Brown. Then the Motorcycle

Top, Manufacturers' Ball Team; Second Row, Left to Right, Ash, Southmayd, Qwen and Grover; Third Row, Oliver, Schwab, Pierce and Wagner; Bottom, Jobbers' Team

Manufacturers played the Jobbers, the Jobbers winning. The Jobbers' team included Howard French, Roy Bowen, J. L. Nicholson, L. N. Southmayd and J. W. Grady. The Motorcycle Manufacturers' team consisted of Percy Pierce, Norbert Schikel, Horace Huffman, W. J. Schack and Arthur Davidson.

## Big Program Has Snappy Finish

THURSDAY night witnessed the climax of the week's program with a theatre party at the Apollo, and dancing and entertainment at the Islesworth. The dramatic attraction was a play entitled "Common Play," featuring John Mason and Jane Cowl, by far the strongest and most interesting offering ever furnished by the Cycle Parts and Accessories Association to its guests. The character studies drawn by the playwright, the well-built-up situations and the perfect acting, kept the audience on its mettle from the beginning to the end. If the reception given the play at Atlantic City is any criterion, "Common Play" is destined for a long run in New York and other big cities.

After the show, the entire party either hiked or was "roller-chaired" to the Islesworth, that ever popular place with the Cycle Trades Conventionites. More than one-half the hall had been reserved by the Cycle Parts and Accessories Association and a jolly good time was had by everybody until the early hours of the morning.

The dancing contest created a lot of enthusiasm, with the various delegations boosting for their favorite spielers. Bill Surre and Mrs. Surre were declared the winners of the handsome silver cup presented by the Islesworth management. De Witt Page, of the New Departure Manufacturing Co., received honorable mention. An impromptu entertainment, all the funnier because it had not been pre-arranged, was furnished by Harry G. Jacobs, of **Motor Cycle Illustrated,** who had the crowd in conniptions all the time he held the floor. His clever imitations of one of the cabaret dancers were uproariously funny.

Among the souvenirs not mentioned in the last week's issue of **Motor Cycle Illustrated** were the cigar clippers distributed by John R. Cautley, of the Peter A. Frasse Co., importers of Renold chains. Pencils were distributed, as announced in last week's issue, by Jack Brandt, of the Troxel Manufacturing Co., and also by the Great Western Manufacturing Company; sterling silver blotting pads by Felix Van Cleef, of Van Cleef Brothers, of Chicago, and gold pins by the Firestone delegation, headed by Charles E. Speaks.

## M. M. A. Discusses Prices and Parts

BEFORE and after the dinner hour last Thursday, fully ninety per cent. of those attending the annual convention at Atlantic City, of the Cycle Parts and Accessories Association were reading in **Motor Cycle Illustrated** the first published account of the convention proceedings. The story was complete except for Thurs-

Digitized by Google

day's happenings, which occurred after our last week's issue had gone to press.

The business of Thursday included an adjourned meeting of the Motorcycle Manufacturers, as well as the adjourned session of the joint associations.

The Motorcycle Manufacturers' meeting was featured by an invitation to the tire manufacturers to participate in the motorcycle shows. The invitation was extended at the suggestion of Manager Coffman, after the sentiments of some of the tire manufacturers had been sounded and found to be favorable to participation.

President Henderson and Messrs. Weschler, Kirk, Mathis and Davidson were appointed a committee to act with S. A. M. Legal Committee Chairman Johnson to draft resolutions and to take whatever other action might be deemed advisable during the meeting of the Rural Free Letter Carriers at Detroit this week, in connection with the recent order of the Postal Department, prohibiting the use of motorcycles and bicycles by rural carriers.

Mr Weschler, of the Hendee Manufacturing Company, announced that his company had decided to quote to dealers their net prices, instead of their list prices, less discounts. As an illustration, instead of quoting a machine selling at $250, at $250 less 20 per cent., this particular model would be quoted to the dealer at $200 net. The idea is to show the dealer that on such a machine his profit is not 20 per cent. as many dealers imagine, but actually 25 per cent., as he pays $200 for the machine and sells it at a profit of $50, $50 being 25 per cent. of $200.

Numerous parts were informally discussed. Arthur Davidson made a suggestion which all present regarded as a very good one, namely, the practice of the Harley-Davidson Company of sending out its parts in marked and sealed pasteboard boxes. In this way not only are the parts preserved from rust, but the purchaser is assured of getting the parts made by the manufacturer, intsead of substitutes.

Sentiments favorable to supporting only S. A. M. sanctioned races were expressed, but an informal discussion, though without any definite action, was had of the question of manufacturers supporting only international races. The indications are that the manufacturers of machines will ultimately agree to stay off purely local events.

The next meeting of the association will be held on Friday, September 24, at the La Salle Southern Hotel, Chicago, during the progress of the Chicago show.

### Standardization Report

At the joint meeting on Thursday, after Mr. Henderson's address on "The Motorcycle and Mr. Coffman's dissertation on "The F. A. M." Chairman Keyser Fry, of the Committee on Standardization, read the committee's report, which was as follows:

The committee on standardization reported as follows:

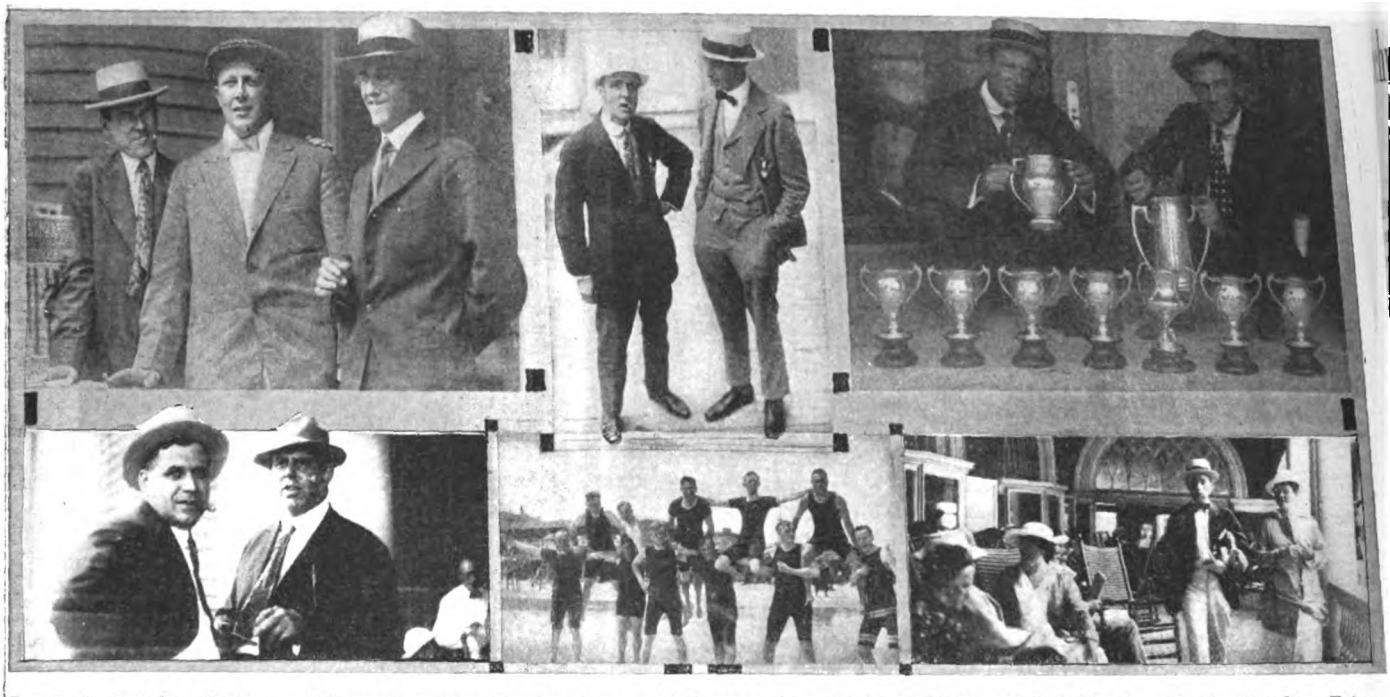
"Your committee appointed from the Motorcycle Parts Association, the Manufacturers and the Cycle Jobbers, beg leave to report:

"We have, in this report, deemed is only advisable to report on the standardization of the bicycle and make the following recommendation that thread standards for front fork, front and rear axles, be 24 threads to the inch; that cranks be drilled

## Atlantic City Polo Games Featured a Fine Program of Entertainment

**Top, The Polo Game; Second Row, Manufacturers' Polo Five; Third Row, Traveling Men's Polo Team; Fourth Row, Parts Manufacturers' Team; Bottom, "After the Ball"**

Digitized by Google



Top Left, Quinlan, Funke and Nearacher; Top Center, Jones and Sawyer; Top Right, Griffith and Strickland, with the Bowling Prizes; Bottom Left, Frank Weschler and Ben Snowman; Bottom Center, A Jolly Convention Crowd on the Beach; Bottom Right, Gus and Mrs. Rice.

to carry ½ 20 right and left threads; that sprockets be 26 x 9, 1-inch pitch, 3-1/16 width; that the standard for tires on 28-inch models be 1½ sectional diameter; for 26-inch, 1½; for 24-inch, 1½; for 20-inch, 1⅜; and that on 28-inch rims they be drilled to carry 36 spokes, both front and rear, and on Juvenile Models the rims be drilled 28 both front and rear and in all regular rims the drilling for valve stems to be 27/64, the tire maker to govern himself accordingly.

"We further recommend the colors for rims be natural aluminum, black, black and blue, black and red.

"We recommend that the motorcycle manufacturers set such standards as their manufacturing facilities will best permit with a view of adopting such standards.

"We further recommend that this committee be continued with instructions to forward these recommendations to the manufacturers and jobbers and to secure the opinions of those not present upon these subjects.

"The above to be the standards of equipment. A manufacturer may furnish other specifications as desired, but is earnestly requested to adopt and use the above standards as far as is possible."

Mr. Fry explained that the committee had confined itself to the first four questions suggested by him, with a view to taking up other subjects as rapidly as possible.

Mr. Fry announced, incidentally, that the question as to the next convention place had been answered by fully 95 per cent. in favor of the popular Jersey beach resort.

Messrs. Lovell, Tucker and Coffman all heartily approved of the rim standards suggested by the committee. Mr. Southmayd, of Schrader's Son, stated that his company had always favored standardization. Some of the jobbers, including Messrs. Grady and Henry, brought out the fact that it was often found necessary to ream out the rim valve holes in order to admit the tire valve stem. The Standardization Committee was accordingly instructed to take this matter up with the tire manufacturers.

### Many Favor Standardization

Messrs. Wainwright, Nock, Huffman, Leacock, Stokes, Quine and others all expressed themselves to the effect that the move to standardize parts was one in the right direction.

After the discussion had been closed, the recommendations of the committee were unanimously adopted and the committee instructed to continue this work.

A Line-up of Motorcycle Manufacturers—Standing, Left to Right, Jackson, Hurley, Schack, Coffman and Harden. Seated, Henderson, Huffman, Quinlan, Shaw, Weschler and Arthur Davidson.

### Hallock Reports on Motorcycle Publicity

Secretary Hallock, of the F. A. M. publicity bureau, reported that during the five weeks between June 27 and July 31 a total of 1,980 inches of clippings of motorcycle stories furnished by the bureau to the newspapers were received. Of this number 900 inches dealt directly with the Transcontinental Motor Dispatch Relay. At this rate in a year's time 41,600 inches of matter would be printed in the papers, or 2,080 columns of favorable motorcycle matter. This represents 40 columns of matter a week, or 5.7 columns of matter a day.

The service is now being sent to 680 papers regularly, and to an added 25 each week, in an endeavor to interest other papers.

## AFTER CRANDALL'S SCALP

Phoenix, Ariz., August 8.—The local Indian and Excelsior followers are "after Harry Crandall's scalp." Crandall having won an enviable reputation for himself by winning second money at the recent Dodge City race. Phoenix fans admit that the Harley-Davidson rider is one of the greatest in the game and they promise to put some very fast machines on the track when the August 15 races are held here. The program of races includes a five-mile for road-equipped machines; a fifteen-mile free-for-all; ten-mile stripped stock event; twenty-five mile free-for-all and a four-mile relay for teams.

# Schwab Asks for Effective Co-Operation

## *Inviting Frank Discussion, He Outlines What Combined Effort Would Accomplish for the Entire Trade*

FOLLOWING is the paper entitled "Co-operation," read by Louis Schwab, of the Stevens Company, New York, before the joint session, held on Tuesday afternoon of the Cycle Parts Convention:

The first intimation I had as to what topic was assigned to me was when I saw the programme. I shall speak on co-operation.

### The Convention's Opportunity

I was honored in receiving the urgent invitation of our genial general manager to address this meeting for ten minutes, even though his chief argument was an appeal to accept, because I knew how hard it was to get any one to do so. It should be easy. This gathering is made up of the principal workers of an important industry; in fact, the men who are the industry, and this, the only serious part of our convention programme including the entire industry, might be made the means to create a unity of purpose and understanding, through the fullest exchange of ideas on the problems of the time, and the failings and evident remedies for any lack of co-ordination and co-operation there may be between the various branches.

I am suggesting that each one of you throw whatever restraint you may feel to the winds and come here to these joint meetings purposely to give us, for the common good, your ideas of whatever questions are brought up or bring up some which are uppermost in your mind at the time. This is merely bringing in the same way to a common judgment seat the conclusions you arrive at for your own guidance in business. The information and discussions you hold with others—dealers, salesmen, your own men; perhaps even what a trade journal man will tell you—have their effect and influence in deciding your actions.

### A Big Melting Pot

These joint meetings can be made the melting pot where trade customs, methods, policies are refined; where by common effort with our fellows we hammer out—yes, perhaps even in a white heat of discussion—a trade character which will be traditional, molding it in the form it will hold in the years to come. I firmly believe that a proper interest and this calling more for conscious intent than labor by a relatively small number can so mold and shape the future of the industry as to continue it as a sound, safe, self-respecting business or permit it to gravitate to less substantial channels. This calls for an enlightened, unselfish co-operation which is the essence of profitable business and a spirit of mutual service which is being recognized as our modern method of business.

I realize that the natural conditions surrounding a business are the controlling influence and no amount of effort to change its natural course will have a permanent effect; but I do feel that much good can be done by our meeting here together and threshing out with each other what are the true fundamental conditions controlling, and by a definite, clear-cut understanding of what is best for the common interest, through the weight of our influence and action toward the best and against the temporary unhealthful conditions which may be permitted to grow, because of our indifference or a feeling of our inability to combat singly. I believe we can create a solidarity of feeling which will in a surprisingly short time throw its effect on our entire industry. I am suggesting a closer co-operation within each branch as well as a stronger sympathy with the purposes of each other. The condition I have in mind and shall do my best to make clear would entail no loss of individual initiative or any sacrifice of personal advantage; in fact, I believe it would have the reverse effect.

### Working Hand-in-Hand

It means to lessen the suspicion, distrust and jealousy of our fellow. We seem to have a mortal dread of disclosing information to a competitor, while it is probable if it would do him any good he already knows as much as he wants to. The business which is being conducted on sound principles need have no fear of what a competitor learns, more especially of that which may be of common interest. I think there is a great deal of truth in the remark the president of one of the big tobacco companies made the other day: "I have often thought that the worst thing a man could do to his competitor would be to send him a copy of his daily orders and let him look them over." The competitor probably would spend so much time looking over the orders that he would forget his own business." There are things worse than a good competitor. And the losses he suffers seldom do you any good, but may, in fact, carry a harmful result to you.

### Much Has Been Accomplished

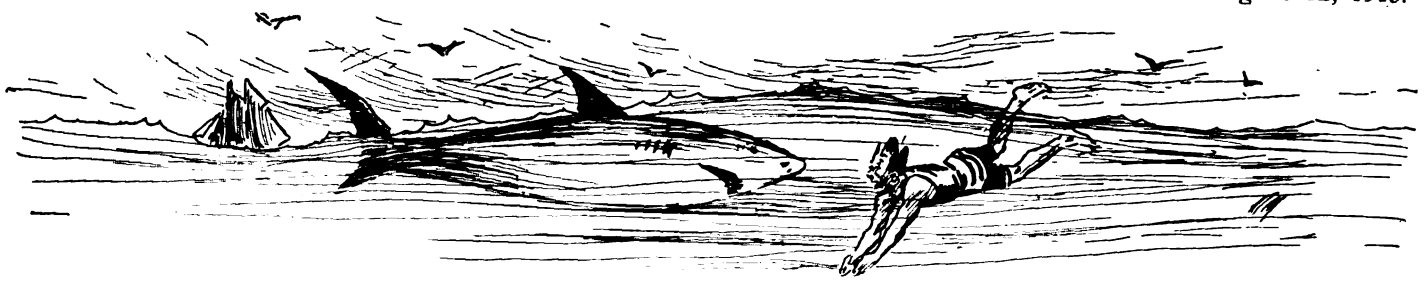
I feel that a very great deal has been accomplished in unifying the trade by our semi-annual gatherings. Your experience has probably been mine, when I was asked by a fellow parts maker, why he should join the C. P. A. A.? What good would he get out of it? My answer has had to be the good obtained by this chiefly social meeting of the craft. It seems unimportant to the other fellow, and yet you and I know it has been of immense benefit to all of us. It has laid the foundation for a mutual confidence and respect that requires years to build, and my appeal now is that we make more use of it during the year, day in and day out. Serve each other, depend upon each other, use each other.

Within my knowledge the best example is what the Jobbers' Association has accomplished for that branch, and perhaps because of my lack of knowledge of what they are trying to do I shall later suggest some common interests to which they might profitably direct their attention. I should like to see an effort made, while keeping our distinct organization and holding our separate class meeting, of making this joint meeting serve our common interest more fully. Beyond question, to a very great extent our interests are mutual, and where our interests merge the fullest discussion should be had that the conclusions arrived at be for the best interest of all. As a general proposition we are Siamese twins and, while I feel it true that in case of an operation it is the twin representing the manufacturing who will dwindle and die—you can't kill a jobber—that does not mean that we are wholly dependent upon them for existence or that our welfare or true interest is not wisely considered and respected by them. Though as chairman of the baseball committee I must say we can usually beat them at the national game.

### Discuss Matters Openly

I would suggest that at this joint meeting your representatives make reports to the Parts Makers' Association of any plans or efforts which you are making in which the parts makers are a factor or vice versa. Bring out the actions desired or emphasize the need of watching and correcting the errors or hamful tendencies that have developed, then having the pros and cons discussed, instead of meeting practically behind closed doors as though our entire interests were strongly antagonistic and only learning of each others actions individually and in a measure sub rosa. I realize that the conclusions reached at your meetings affecting the parts maker is brought to his atten-

Digitized by Google



tion by some of your members, but am I not right in feeling that that conclusion expressed by your association formally to the other with the general support or rejection which it would receive would exert an influence much greater than with our present method.

Were we working in such accord, I am confident there would have been no need of the resolution passed at the last parts makers' meeting condemning the practice of contributing to jobbers catalogs. Had we been working in accord that resolution would have been a joint one and not have had the appearance of an action taken against the jobber; and I believe, as a class, the bicycle jobbers' views are the same as ours. My own experience with the bicycle jobbers is that they have been too independent and too wise to adopt so fundamentally unsound a policy. It is really a boomerang and the bicycle jobber has had more sense than to sell his birthright—his business—for a mess of pottage.

It indicates the high grade of merchants that make up that branch and is to their lasting credit that they have not been tempted to follow in the evil ways of that gawky younger relation of our, the automobile industry, now rich and overgrown. This catalog baiting, which I have heard some manufacturers dignify by the word blackmail, has appealed even in our bewildered auto accessory business chiefly to that type of merchant whose greatest success is only achieved in a field of greenies—green buyers and green sellers. They make up part of the froth and false prophets which are thrown off with the other false profits at the advent of sound staple conditions. It is as well a commentary on the sound solid basis the bicycle business is on, where merit wins and not brag and bluster.

### Conditions to Be Considered

I have only time to sketch briefly a few of the conditions to which I feel we could profitably direct our attention. First, mainly to the parts maker—I have a suspicion that we have grown more lax in our protection to the jobber—a matter of as much importance to us as to him. In my own experience for some time past there has been a dearth of opportunities to tell a fellow manufacturer that in our opinion Bill Jones, of Kalamazoo, could not hope to successfully serve the trade as a jobber that that we refused to put him on our list or that we considered that conditions warranted our selling so and so as a jobber. I feel that we should consult more with each other and the jobber in each respective field than we do. There is no Federal Law against our exchanging information and there is very good business reason why we should do so.

In fact, I believe that whatever Federal Department now has supervision over the actions of our office boys rather approves of efforts to better conditions in our trade. I am not suggesting in the slightest degree any agreement or combination in restraint of trade, when I suggest that we might increase this interchange of information by having a form printed which could be conveniently sent out to twenty or thirty manufacturers and another one directed to the jobbers already serving that territory. This would furnish the manufacturers a fund of information for his guidance instead of a salesman's rosy story, a fairly good looking order and, if he is honest, a hope that he is not making a mistake.

### The Discount Evil

Then there is the ever present discount evil. It is too evident to me that there are too many manufacturers who feel they are putting one over on a competitor by overlooking violations of the term of sale. How do you equalize this to the customer who is always right on the mark? And if you do does the other fellow know it? And if it is persisted in, we all do it and what has been accomplished? We put our industry on a slow pay basis instead of a prompt pay basis. And it helps none, certainly not the debtor, as it makes no difference whether he pays in 60 days or 10 days, if he holds to the rule. The only one who is benefited is the one who is made an exception to the rule; who gets a greater privilege than his fellow. And what makes it worse is that it is not usually our best, in every sense, customer.

This naturally leads to the credit situation, on the evils of which I feel the interests of jobbers and manufacturers merge, for in a case of loose credits, the sound jobber has certainly every right to do more than talk to the manufacturer who is responsible for placing a tremendous handicap upon him and satisfactory conditions. You can all fill out this picture in all its details yourselves, I am sure. I am not attacking sound credits. I have used them myself both as debtor and creditor. In this matter of credits I would again suggest having a special form printed to tempt us to use them freely in exchanging information.

### Practice of Spring Dating

I should also like to hear a quotification of the practice of spring dating on September purchases by those manufacturers who make those terms. There is no need of my detailing the evils which result. This is again a condition, against which I feel the great majority of jobbers should throw the weight of their influence. I am making no plea for the general elimination of dating, as I consider it an absolutely necessary provision for the wise and reasonable handling of the seasonable conditions; and also that it is essentially fair and just that this burden be equally borne by the manufacturer and jobber. But I feel that it is a winter condition, that a September date is too early and does more harm than good and that it is not even a worth while help to those who use it or misuse it.

It is reasonable to expect that we could obtain practical results if we would consider ways and means to remind and stimulate the jobber, his salesmen and dealers, to encourage the sale of the better quality of merchandise, giving the rider sound values, rather than to give way to the easy temptations of price only. It is work we can do together and would help us all. There is also stimulating welfare work to be done for the dealer, making him a better and more successful merchant. I realize more or less of this is done all the while by the jobber and his salesmen, and probably most is done for them by our trade journals than in any other way. I have noticed many cases where their work was based upon a farsighted, broad-minded consideration of the welafre of the trade at large.

I do feel that this merely narrows down to the raising of a big fund and very easily turning it over to a publicity man. Rather, I feel that as much good can be accomplished in a more modest way, perhaps chiefly through the jobbers, but with the manufacturers lending a hand, for he certainly is most vitally interested in the dealer, even though there is no direct contact.

---

## THROWN UP BY THE SURF

Visitors to the Cycle Parts Convention were agreeably surprised by the attractive souvenirs which were presented to them by the Buffalo Specialty Company, of Buffalo, N. Y., and Van Cleef Brothers, of Chicago. The Chicago concern gave out beautiful and useful blotters, while the Buffalo company presented knives as mementos of the occasion.

---

A. J. Musselman, of the Cycle Mfg. & Supply Co., of Chicago, told of a great demand for their bicycle three-speeds, the daily output for some time exceeding two hundred.

---

The interests of the Persons and the Majestic companies were respectively represented by C. A. Sawyer and O. A. Jones. Neither Mr. Persons or Mr. Donley were able to attend, pressure of business at Worcester preventing.

---

A. H. Harrop and A. E. Griffith, the coaster brake boys, representing respectively the Corbin and New Departure companies, were as usual the first of their respective delegations.

---

Owens & Grover again did justice to their reputation as dispensers of peanuts, soft drinks, etc.

# Selling One Million Bicycles a Year

## *Further Standardization of Parts and Design Would Stimulate the Output of Cycles, Says Wainwright*

THE following address, on the "Standardization of Motorcycle and Bicycle Equipment," was delivered at the joint Tuesday session of the Cycle Parts Convention by L. N. Wainwright, of the Diamond Chain Company:

The greatest expense to the citizens of the United States of America in particular and to the world at large is the lack of standardization.

I would not argue for complete standardization, thereby making this beautiful country resemble a colony of ants or a hive of bees where standardization dominates and economy and scientific management are developed to the most supreme degree.

I would not standardize to the point where taste and environment would be eliminated and the sameness of things would bring about a lack of ambition and make us little more or better than a school of tadpoles—all alike and with no purpose in life, for we would degenerate and become savages.

### Growth Proportionate to Standardization

I would not standardize to the point of limiting the great achievements of science and invention. On the contrary, standardization for economy, comfort and convenience will encourage and broaden the field of science and invention and open the way for still greater achievement.

In physical affairs standardization has already broadened the use and application of many inventions resulting in the possible use by millions at a reasonable price. The bicycle is a splendid exhibit of what can be accomplished in this line.

I entered the bicycle business in 1879, and my observation of the growth of the business is that it grew in direct proportion as did the degree of standardization. Individual manufacturers undertook it on their own parts in the matter of design and manufacture. Then the specialist entered the field and, by his special effort and the combination of the different orders for similar parts from different manufacturers of bicycles, was able to produce many similar parts at a lower price than the individual makers could produce them.

### Some Concrete Examples

This specialist soon had his engineering department working on improvements with the result that by good design and special machinery he brought the makers to him as a unit for the use of his material. As an illustration, the forging concerns established a more or less uniform fork crown. The tubing makers established an almost uniform front fork. The pedal makers brought about the use of an almost universal ball-bearing pedal at a price undreamed of.

The handlebar maker fixed the standard in handlebars, and so on throughout the entire bicycle standardization went on with the result that the cost of bicycles to both maker and consumer tumbled like a block house. The result has been for the benefit of the bicycle maker, the jobber, the dealer and the consumer. The trade has increased to large proportions and the bicycle of today is a better article than when they were not so nearly uniform in design and construction, and millions of our people are riding every day.

This is what has been done in the past, and you may say it has been carried as far as it can be done.

### Limit Has Not Been Reached

I do not think that the economic limit of standardization has been reached. The parts maker and the maker of bicycles can get together and work out economies by the further standardization of parts and design and bring about still lower costs with, at the same time, an improved product.

In our own business and the allied parts a great saving could be effected for all the bicycle makers, the parts maker, the jobber, dealer and consumer.

If all makers could agree to use a 1-inch pitch chain, the saving in the cost of the chain would be of moment. The sprockets being uniform as to size and pitch would cost less, the manufacturer could eliminate a multiplicity of stock and machinery.

The jobber could market his product more easily and save the carrying of such a large variety of styles, many of which usually remain on hand for months as almost dead stock.

The dealer likewise could carry a smaller stock, turn his money quicker and thereby make a better and more staple profit.

### Consumer Would Benefit

The consumer would have the benefit of all these savings in the price of his mount and be able to buy a replacement that would replace at a nominal price in any cross-roads store in the United States. This one item would work wonders. Think what could be accomplished in the same line with other component parts.

Think of the increase in volume of sales and the number of bicycles used if real standardization could be worked out.

Do you realize that if the Ford Company can make and sell 350,000 automobiles in a year, that if you makers and we parts makers could get together we could make bicycles at a price which would enable us to sell 1,000,000 bicycles each year.

Do you realize that in peaceful times, continental Europe made and sold over four times as many bicycles as we make and sell?

Do you realize that it is far easier for us to make a bicycle that could be sold over the entire world at a trifling investment than for Ford to make and sell his universal car over the entire world?

### Field Would Be Broadened

Think this over, gentlemen. You are resting on your oars. Get busy. What I have said of the bicycle applies even more particularly to the motorcycle, and I predict that if standardization of the motorcycle parts is not brought about at once, the business in this line will cease to grow and that the low-priced automobile will take its place.

Individual invention and design are much to be admired, but the masses—the buying public—wants a thing of utility at a low price, and when he can get it he buys it by the million.

# Henderson Qualifies as a Diplomat

## *Pokes a Little Fun at Cycle Trades Men, Admits That the Motorcycle Is a Serious Subject and Puts It Up to Coffman*

PRESIDENT T. W. HENDERSON, of the Henderson Motorcycle Company, admitted that he could say a lot about the subject, "The Motorcycle," if he was in the mood, but the mood was not with him when he prepared his address, and after a few characteristically witty remarks he frankly stated that he was going to leave the heavy work to the next

Digitized by Google

speaker. A synopsis of Mr. Henderson's speech follows:

I have here in my hand something that a politician would perhaps describe as a "speech"; a business man might refer to it as an "address"; a high school boy might think he had an "oration"; a literary man might call it an "essay"; but after you hear it, I know there will be a unanimous verdict, and I will agree with you, that it is just plain "bunk." A year ago I was assigned the same subject, and for your sakes I should have passed the "buck" this time; but here I am, and here I go.

A few evenings ago I was having the time of my life playing "Kelly Pool" at the Detroit Athletic Club. Suddenly, all of the joy was taken out of life when I remembered that I was slated to address you on "The Motorcycle." There was no more fun pocketing the other fellow's ball after that, because I knew I ought to be at home racking my brains for instructive and interesting data for your edification on this occasion.

**A Serious Subject**

At that moment I was in no mood for a serious subject, and, "believe me," the Motorcycle is a serious subject for a great many of us.

I would much rather Mr. Surre had assigned some more cheerful subject to me —such as "The Ladies," or "Why Do Married Men Come to the Convention Without Their Wives?" I am quite confident that I could talk quite entertainingly on the latter subject especially, and could excite your risibilities by mentioning names and by mentioning certain exploits of some of the genial gentlement present. Some of you look worried, so I won't do it. I will talk on a safe subject, such as the "Motorcycle."

But is it not tough to come here to Atlantic City, a place where we come with the idea of having a whole lot of fun, and where the business of the Convention appeals to some of us as being a very secondary consideration, and then have to talk on a subject that I have talked about and written about for a whole year without any let-up?

**Putting It Up to A. B.**

But now I suppose I will have to affect a serious visage and explain to you that the motor-driven two-wheeler is a contrivance that is of great economic value; that it is used by police departments, fire departments, rural mail carriers, merchants and manufacturers; also that it is great fun to ride on one; that the sport of speeding over the country roads is bliss without alloy; especially if you have your wife or sweetheart on the tandem or in the sidecar. You all know that, don't you? Of course, you do. That is why most of you ride in an automobile.

Somehow I feel that I am imposing upon you by not getting down to brass tacks at once and giving you some real Motorcycle dope. Answering perhaps questions such as: Why is a Motorcycle? Or would it pay the industry to hire a comic to write anecdotes similar to the numerous Ford stories? or Is the Motorcycle conducive to longevity or does it really hasten senility? These are vital questions and worthy of a lengthy dissertation.

There are numerous phases of the Motorcycle that I know I ought to endeavor to elucidate on an occasion of this kind, but I feel unequal to the task. However, I feel convinced you will not hold it against me when you remember the speaker who is to follow me. I feel sure that when Mr. Coffman has a chance at the floor, that he will talk seriously to you, because he is a serious person, and he knows more about motorcycles and motorcycling than I do; so his address is to be on the F. A. M.; the many-sided question of the Motorcycle will be satisfactorily gone into by him.

## CONVENTION BREVITIES

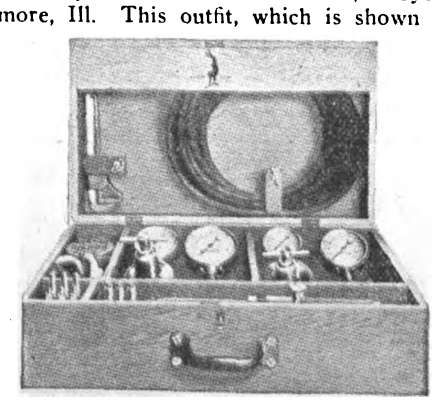
During the joint meeting on Tuesday, John Henry, of the Vim Cycle & Hardware Company, of Buffalo, brought out the fact that at the New York meeting, the Jobbers' Association had put itself on record as unanimously against the practice of soliciting manufacturers for any sort of payment for catalogue listings. Mr. Henry added that each one of the jobbers at the New York meeting had stated that none of them had been guilty of this practice, and that the association would be only too pleased to deal strenuously with any guilty parties.

H. S. Quine, of the Goodyear Company, took an active part in the discussion relative to the standardization of parts. He was of the opinion that arrangements should be made to carry on the work indefinitely, and that sub-committees should be appointed to handle the technical details of standardization.

Charles Speaks, of the Firestone Company, believes that the tire manufacturers should exhibit at the motorcycle shows in New York and Chicago. He is of the opinion that the tire exhibits at the shows should be used to teach dealers how to take care of tires, with the result that the saving effected on replacements would more than cover the cost of the show exhibits.

## TURNER OXY-ACETYLENE OUTFIT

Repairmen and others who do welding and cutting will be interested in the Turner oxy-acetylene outfit for these purposes, produced by the Turner Brass Works, of Sycamore, Ill. This outfit, which is shown in



**Turner Oxy-Acetylene Outfit**

the illustration, is complete in itself, and needs only the filled oxygen and acetylene bottle to be ready for any kind of work. The various pieces of the apparatus are so constructed as to enable wedding and cutting to be quickly and satisfactorily performed, with a minimum expenditure of both gases. Close and easy regulation of flame is a feature of the burners.

The use of gas-welding and cutting apparatus is a growing one and is becoming more and more indispensable in work on tubing and frames. The cost is much less than with the regular city or natural gas apparatus and the time consumed is much reduced. Those interested should address the makers for catalogue, or E. G. Jacobs, traveling representative, 1535 First National Bank Building, Chicago, Ill. Mr. Jacobs is a brother of Harry G. Jacobs, Western representative for **Motor Cycle Illustrated.**

## BIG MOTORCYCLE LIST

Trenton, August 7.—A report issued by the State Department of Motor Vehicles, covering the first seven months of the present year, shows that 10,159 motorcycles have been licensed to date. Last year's figures reached 10,029. With 5 months yet to go, New Jersey registrations will exceed 12,000. A total of $981,000 has been collected through fees on all types of motor vehicles.

## MACHINES WANTED IN NORWAY

An American consular officer in Norway reports a demand for the agency for American motorcycles in his district. Representation for Sweden and Norway would be desirable. Those interested should address the Bureau of Foreign & Domestic Commerce, in Washington, or any branch of the same, mentioning Opportunity No. 17725.

## INCREASED REGISTRATION

Columbus Ohio.—W. H. Walker, Ohio automobile registrar, who also has charge of the registration of motorcycles in the state, gave out a report covering the year up to July 30, showing that he had registered 40,680 motorcycles. That is in excess of the total register by the department for the whole of 1914. The number of motorcycle chauffeurs registered up to July 30 was 103.

## WHEELING EVENTS CALLED OFF

Wheeling, W. Va., Aug. 6.—The race meet of the Wheeling Motorcycle Club, which was to have been held on July 31, and the Sunday run to Zanesville were called off because of bad weather. The club will stage a race meet at Moundsville, W. Va., on August 22.

## HEADS MOTORCYCLE SQUAD

Wilmington, Del.—Sergeant Joseph A. Davis, stationed at Camp Miller, Delaware, has secured his release and is now in active charge of Wilmington's new motorcycle squad. The squad consists of four Indian mounts. Davis was formerly physical examiner of the police department here.

## GOOD TIME TO CHICAGO

Cincinnati, Ohio.—News from Steve Hennessy, the Excelsior shopman at Brendamour's, and William Greiner, who are making a vacation trip on their "X's," is to the effect that the pair made the trip to Chicago in fifteen hours, over splendid roads and without mishap. They visited the Excelsior factory, where Hennessy picked up some valuable points.

VOL. 10 THURSDAY NEW YORK AUGUST 12, 1915 No. 32

## A BIG OPPORTUNITY FOR AMERICAN CYCLE MAKERS

THE British Board of Trade's figures for July show an increase in imports of $80,858,315. British exports for July show a tremendous decrease, namely, of $173,607,555. Imports from the United States to England, during the six months ending July 30, amounted to approximately $620,000,000, as against $350,000,000 in the first six months of 1914, and $345,000,000 during the first six months of 1913.

### Tremendous American Exports

In other words, among the warring nations, England alone will buy from the United States about $600,000,000 more than in any previous year. On this basis, it is safe to estimate that the exports from the United States to all the countries in Europe will exceed by at least a billion dollars the figures of any previous year. By the same token, a billion and a half is a conservative figure for the excess exports for the year from this country to the rest of the world.

### 1914 and 1915 Exports

The American cycle trades are very much affected, and most favorably, by this condition. For example, figures prepared by the Department of Commerce show that during the month of May, 1914, exports of bicycles were valued at $47,673, and of motorcycles at $203,235. In May, 1915, American bicycles to the value of $57,299 were exported, and motorcycles valued at $256,334. This is a twenty per cent. increase for bicycles and a twenty-five per cent. increase for motorcycles. The ratio of increase is constantly becoming larger.

### Constantly Gaining on 1914

For the month of April, 1914, motorcycles to the value of $217,126 were exported, as against $244,485 this year. For July, 1914, motorcycles valued at $119,427 were exported. For July, 1915, exclusive of the port of New York, for which figures are not yet obtainable, a valuation on exported American motorcycles of $171,350 is given by the Commerce Department. In other words, when the New York figures are added to motorcycle exports for July, 1915, they will be found to be nearly double those of the same month of last year.

### Foreigners Want Our Goods

One need only refer to the manufacturers of motorcycles and bicycles to learn that the export business in American-made machines is increasing by leaps and bounds. As an illustration, we are constantly in receipt of letters from foreign dealers who say that they are in the market for American cycles, parts and accessories. They add by way of explanation that they have been accustomed to buy these from English and German manufacturers, but are unable to do so now. These foreign concerns are prepared to do a liberal volume of business with American manufacturers, not only during the continuance of European war, but for sometime thereafter, as it is generally anticipated that the foreign cycle and parts makers will require many months after the conclusion of the war, to resume factory operations along the lines which existed when the European conflagration was started.

### Our Greatest Opportunity

Export figures and all other indications point to a tremendous opportunity for American motorcycle and bicycle manufacturers in foreign fields. From a sentimental standpoint, it may seem rather heartless to take advantage of the misfortunes of foreign manufacturers, but the fact remains that the European war has had no serious effect upon the demand outside the warring countries. This demand must be supplied, and American manufacturers should supply it. Never again will they have so splendid an opportunity to introduce their lines in all parts of the civilized world.

# Yep! Indian Just Goes On Winnin' and Winnin'

You remember the recent Indian clean sweep at the Sacramento National F. A. M. meet, don't you?

Then followin' right on the heels o' that speed treat what does Indian go straight out and do? Huh? Lookit ——

## San Jose, Cal., August 1

Indian won 2 mile F. A. M. Championship, 5 mile stock, and the two big 10 mile events. Liggett, the National Amateur Champion, carried off both amateur races on an Indian.

## Fresno, Cal., August 8

The whole meet was an Indian parade. Indian won 5 mile stripped stock, 5 mile open, 10 mile stock, 25 mile open and 10 mile Fresno County Race. Indian also lowered the track record to 49 seconds flat.

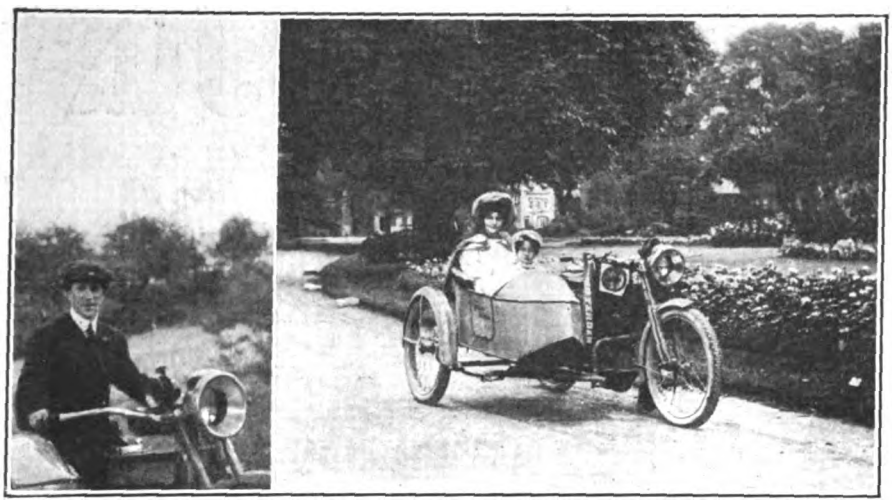
## Dealer's Wife Can Help, Says Mrs. Hamilton



MRS. S. C. HAMILTON, wife of the Harley-Davidson representative in Pittsburgh, Pa., who appears in the sidecar in one of the above photographs, believes that in many cases a dealer's helpmate can give him valuable assistance in the agency and proof of her argument is found in the fact that she is extremely popular with the motorcyclists of the Pennsylvania city. Mrs. Hamilton makes it a point to keep in touch with developments at her husband's place of business, drops in frequently to chat about motorcycle affairs with the patrons gathered there and demonstrates her own preference for the motorcycle by covering hundreds of miles each season in the Hamilton sidecar combination.

The smaller picture above shows Agent Hamilton with the smile which has proved to be a business-getter.

### RITZ TAKES TWO AT MOUNDSVILLE

Moundsville, W. Va.—Otto Ritz, Harley-Davidson, won the five-mile pro. and the five-mile novelty events at the Wheeling M. C. race meet on the half-mile track in this city on August 7. Ritz's time for the pro. race was 6:46 and for the novelty event 7:36. Emory Herrold, Indian, carried off the five-mile handicap in 6:02, after giving the remainder of the field 50 yards. A bicycle race and a three-mile novelty motorcycle race for Moundsville riders completed the program. About 2,000 attended the meet. Following are the summaries:

Bicycle race, 1½ miles.—Lou Grim, first; H. Ogle, second; A. Montgomery, third. Time, 4:43.

Three-mile motorcycle novelty race for Moundsville riders.—C. Sims, first; W. A. Stewart, second. Time, 5:57.

Five mile pro. race.—Otto Ritz, Harley-Davidson, first; D. H. Michaels, Thor, second; C. K. McKluskey, Excelsior, third. Time, 6:46.

Five-mile novelty race; riders to stop at end of first lap, run back 25 yards and get two cigars, return to machines and continue race.—Otto Ritz, Harley-Davidson, first; D. H. Michaels, Thor, second; C. K. McKluskey, Excelsior, third. Time, 7:36.

Five-mile handicap.—Emory Herrold, Indian (scratch), first; Otto Ritz, Harley-Davidson (50 yards), second; D. H. Michaels, Thor (50 yards), third. Time, 6:02.

### ORANGEBURGH RACE RESULTS

Orangeburg, N. Y., August 9.—Owing to the heavy rain which fell toward the middle of the afternoon yesterday, but three of the four races originally slated by the Century Road Club of America were run off in this city. These were a two-mile handicap, won by J. Caldwell, C. R. C. A., a one-tenth mile slow race, captured by H. Terhune, and a half-mile novelty race, won by J. Crowley. Caldwell's time in the long race was 6:00⅗, while Terhune covered the one-tenth mile in 4:20. The Century Road Club held a run from New York city to Orangeburgh, but most of the riders were forced to return by train owing to the nature of the roads after the rain.

### RYAN WINS TWO EVENTS

Rockford, Ill.—Howard Ryan, on a Harley-Davidson, carried off the single cylinder and sidecar events in the Kennedy's Hill climb in this city on August 1. Henning Johnson, also on a Harley-Davidson, won the climb for twins. Ryan's figure on the "one lunger" was 21½ seconds, and in the sidecar climb 22 seconds. Johnson reached the crest in 17⅖ seconds, bettering the time set by Ralph Olson, of 19 seconds, the record during 1914. A crowd of 6,000 witnessed the climb.

# BIG FIELD FOR CHICAGO RACE

## Many Factory Entrants Promised for 300 Mile Speedway Event on September 5

CHICAGO, Ill.—Practically all the motorcycle factories have promised to enter from ten to fifteen riders in the 300-mile Amateur Championship race to be held at Speedway Park on September 5. There will consequently be a strong showing of Harley-Davidson, Indian and Excelsior riders, with Cyclone, Merkel and entrants of the first class also.

The scoring system for the Speedway classic will be the same as that used at Dodge City on July 3. Timing will be by electricity, thus eliminating all errors inherent to stop-watch timing. To prevent errors in scoring, each rider will have two scorers, one of whom will call the rider, while the other checks him on the sheet. Two large score boards are being planned, each being double-faced, to permit of everyone seeing the status of each rider at all times. Telephone communication between the judges' stand and the boards will be maintained so as to get the standing of the riders as soon before the spectators as possible.

The Speedway Association considers the track to be four or five seconds faster to the mile than the old Playa del Rey, and point out to the automobile performances of June 26 as proof. The Speedway is stated to have cost $1,000,000.

### HAS SOLD FIFTY INDIANS

Battle Creek, Mich.—Ray Clark, local agent for the Indian, in two weeks has sold seven machines. So far this year he has disposed of more than 50 Indian machines.

# How Jimmy Sold Those Police Motorcycles

## He Would Not Cut the Price and Was Ready to Explain Why

By THE PATHFINDER

THE dealers in our city are a pretty good bunch of scouts.

It is true that like many other large and metropolitan towns the dealers have organized an association amongst themselves for their mutual benefit, especially in the maintenance of a credit bureau to give protection against the perpetual "dead beat." It also is true, as in the case of many other cities, that the dealers' organization, after about two meetings, largely and enthusiastically attended, dropped into lethargy and has never had a meeting since.

But that does not alter the fact that the dealers in our town are a bunch of good scouts. Many times the motorcycle club's treasury was so low that our treasurer forgot how to write out a check and one of the dealers would come across with enough money to keep things going until the next race meet, theater benefit or other money raising enterprise gave the bank teller a chance to look at the inside of the club's bank book.

IN fact, generosity seems to be the biggest fault of the dealers in this town. And that's just where we begin to get down to brass tacks. The particular occasion for this overabundance of charity came the other day when the police commissioners in our town asked for bids on two motorcycles for the traffic cop division.

By some strange sort of mutual consent, motorcycle dealers generally seem to feel that police sales always involve price cutting. They have never gotten wise to the fact that police sales, in the first place, are the costliest that can be made when it is taken into consideration the amount of service that the dealer is called upon to contribute practically free of charge on account of the hard service which this class of riders give motorcycles and the desire on the part of the dealer to have the police machines of his make always in the best of running order.

Police machines, even when sold at list price, involve numerous little odds and ends of expenditures that in the aggregate will eat more than the dealer's profit on the sale.

WELL, the police commissioners got their bids. One of the board happens to be a motorcycle rider. He took one look at the prices quoted by the various dealers and then demanded that the board call the dealers together to get more data regarding their bids.

"Why did you cut the price on your machine," was the question fired at Bill Saxe who handles one of the leading makes and is considered one of the most enterprising merchants in the city.

The query queered Bill. He never expected to have anything like that asked of him. He got confused right off the reel.

"Well—er, for the publicity there is in the sale," he stuttered.

The other fellows, taking Saxe's cue, made practically the same answer. All except Jimmy Alston.

The police commissioners got a jolt when Jim started to talk. His question to answer had been, not "Why did you cut the price?" but "Why didn't you cut the price on your machine?" Jim told 'em.

"IN the first place," he said, "you will pardon my frankness when I say that I really don't care whether I get this order or not. I am not crazy after it. These machines are going to be used nearly 24 hours a day in the roughest and hardest kind of work, far worse than what is ordinarily asked of a motorcycle.

"There are times when police officers, not entirely of their own volition, ask unreasonable things of the motorcycle they ride in the effort to make a record. You can't make a motorcycle strong enough to stand up under some of the abuse these machines are going to get. It's going to be up to me to keep the machines in the very best of shape all the time.

"If I cut my price unconsciously I will begrudge you people the best service on these machines because I have given away my legitimate profit before the sale is made and a great deal of the repairs and replacement expense is coming out of my own pocket. There may be publicity in selling these machines to you people, but I would much rather take the actual money and use it for newspaper advertising. In that way I have tangible evidence, at least to some extent, of the results of the money I paid out of the cash register."

THEN Alston wound up by giving the commissioners some concrete facts. He gave them some plain figures on cost of upkeep. He told them about departments that were using his machine at present. Jimmy was a real salesman and his competitors sitting in the room there began to realize the reason for the increasing sales of Jimmy's brand of motorcycle in their city.

"We will let you gentlemen know tomorrow," said the chairman of the board.

Next day Jimmy's mail man brought him a letter, an official looking document slid out of the envelope.

It was an order for two machines to be delivered to the police department.

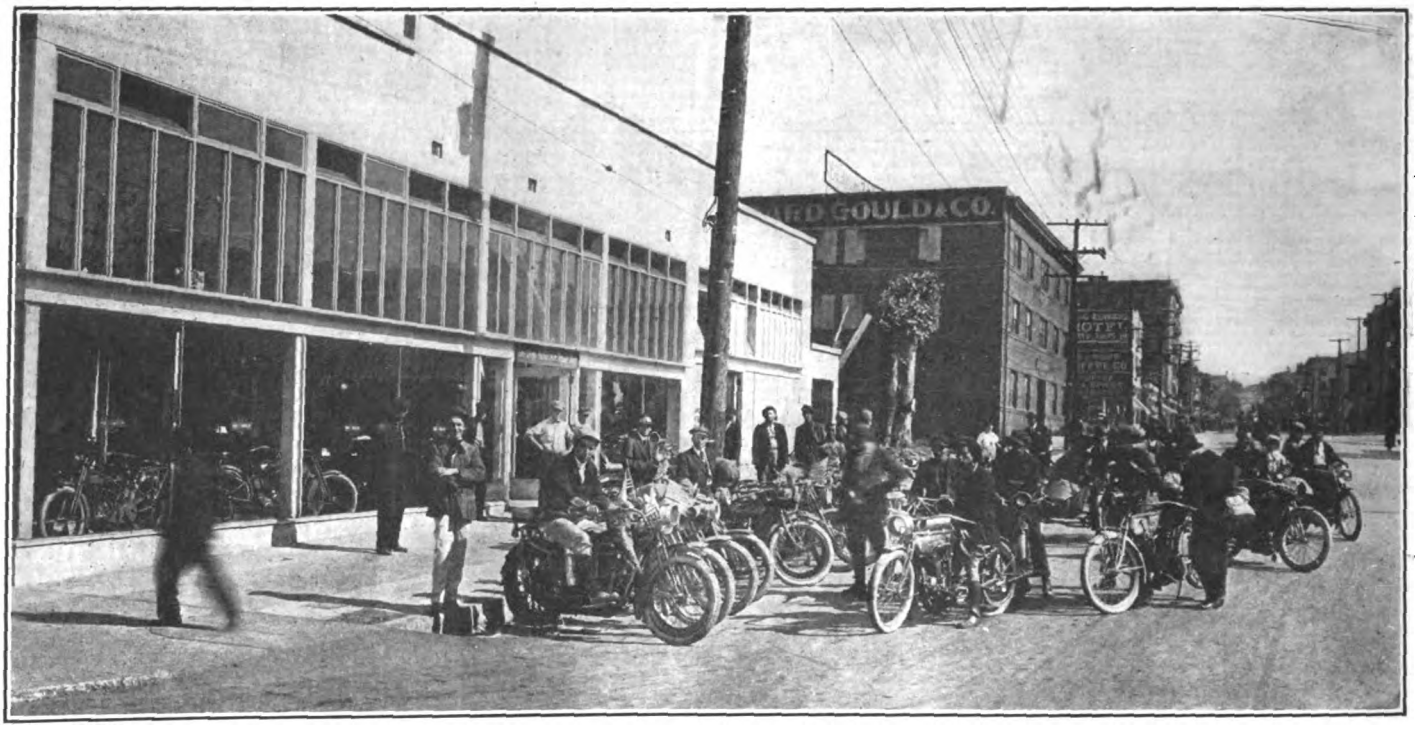
# DEALERS' SECTION



**Part of Squadron of Los Angeles, Cal., Riders Parked in Front of San Diego Motorcycle Shop, Local Harley-Davidson Representatives; All the Riders Arrived in Sacramento Eventually, in Time for the F. A. M. Convention**

## WHITING CAME IN AHEAD

Cheyenne, Wyo.—W. W. Whiting, riding a Harley-Davidson twin, made the best time between Denver and this city recently, beating out the nearest competitor, an automobile, by eleven minutes. The occasion was a race between a limited train and a number of motor vehicles, each to carry copies of the Denver *Times* to Cheyenne, and all entrants came to this city to attend the Frontier Day's celebration.

Whiting, who is connected with the Denver Harley-Davidson agency, left that city at the same time as the automobile driver, Brinker, a local champion. He trailed along with Brinker for about 50 miles and then decided to go ahead, passing the driver near Dover. Whiting covered the 112 miles in 2:10:30, while Brinker and his machine did the distance in 2:21:30. The automobilists say that Brinker's time constitutes a new record, but are not pleased at his having been beaten out by the Harley-Davidson.

## DAYTON DEALERS' PICNIC

Dayton, Ohio, July 31.—The motorcycle dealers of Dayton gave a picnic to their riders on Sunday, July 25. There were over one hundred and fifty motorcycles and sidecars in the parade that started in the morning down Main street, in single file. After the parade the motorcyclists marched to the picnic grounds where two big kettles of "skiliee"—something with chicken in it—awaited them. There were plenty of refreshments and good things to drink.

The picnic grounds were ideally located on the banks of the Miami River, so that the riders were able to go in swimming after participating in the various sports. The dealers who organized the picnic were Lill Tuebner, Louis Fluke, Harry Gross and O. E. Evans.

## WALKER TAKES ON ANOTHER STORE

Boston, Mass.—W. J. Walker, Boston agent for the Harley-Davidson, at 74 Huntington avenue, has taken over the New England motorcycle and bicycle store at 178 Columbus avenue. He will carry a full line of cycles and supplies in the latter establishment, and owing to there being a large repair room, the Columbus avenue premises will be used as a service station for motorcycles in addition to the present one on Huntington avenue.

## KNIGHT COMPANY GROWING

The Knight Motor Co. has just removed from 1131 Olive street, St. Louis, Mo., to 3325-29 Locust street. The firm handles the Excelsior, Henderson, Flying Merkel and Reading Standard motorcycles. The new location gives a much larger store, 50 by 125 feet, with three stories and basement, automatic fire protection system and steam heat throughout. There are freight lifts for the ready handling of motorcycles from floor to floor, as well as passenger elevators.

## BAKER IS OUT AGAIN

Frederick A. Baker, vice-president of the New York Sporting Goods Company, Indian distributors in the metropolis, is round again on crutches, after being confined to the house with a broken ankle acquired during a strenuous set of tennis a short time ago.

## SHORTENS WORKING HOUR

Indianapolis, Ind., Aug. 2.—The G. H. Westing Co., distributors for the Indian in central Indiana, in accordance with the early closing policy of the business firms in Indianapolis, are shutting their front door at five o'clock instead of six, the usual closing hours during the summer months. This extra hour of leisure Mr. Westing believes is well paid for in return by the extra efforts of the employes during working hours. The repair work on Sunday has been discontinued and only minor work, such as fixing a puncture is taken care of. The retail store is open on Sunday until noon only.

## GO BACK TO OLD JOBS

Buffalo, N. Y., Aug. 2.—Mr. L. J. Kellner, manager of the Cleveland Haverford Cycle Company's store, and A. Kellner, manager of the Buffalo Haverford Cycle Company's store, have each returned to their respective branches, after exchanging positions for a month, which proved to be very successful. Each has learned a few more wrinkles about selling Excelsior motorcycles.

## JONES DRUG TO BUILD

Louisville, Ky.—The Jones Drug Company, Louisville agents for the Harley-Davidson, is preparing to build a three-story structure to accommodate its drug and motorcycle departments in a proper manner. The two upper floors of the new building will be given over to lodge and club rooms, while the ground floor will be divided between the firm's two big lines.

# DEALERS' SECTION

### WISCONSIN COMPANY ENTERTAINS

MILWAUKEE, Wis., July 31.—Indian riders of the city were the guests of the Wisconsin Motocycle Company, 304 West Water street, in a picnic at the farm of Mr. and Mrs. John Chesak, Newberg, Wis. The Chesaks are the parents of William Chesak, head salesman for the Milwaukee Indian distributors, and the affair will be made an annual event hereafter.

It was expected to treat the party to a big fish dinner. In furtherance of this plan Alvin Drahos, treasurer of the Wisconsin Motocycle Company, and George Melcher, salesman, left the day before for one of the lakes near Newberg to catch the fish.

The guests did not eat any fish. As fishermen Drahos and Melcher are fine motorcycle salesmen, so the Indianites had to be content with a chicken dinner. A fine program of entertainment had been provided, but most of the afternoon's fun resulted in an extemporaneous event in which the leading actor was a two-year-old bull owned by Mr. Chesak. Drahos offered a stogie to the man that could stay on the bull's back the longest, but there wasn't anybody in the crowd that qualified as even being able to get a good seat before he found himself neatly seated on the turf.

Last year "Windy Bill" Leader and President Grier of the Milwaukee Motorcycle Club managed to keep astride this same bull long enough to get a look at all the corners of the pasture, but this year the added cares of another year of life made Mr. Bull determined to be more stern with "them motorcycle fellers."

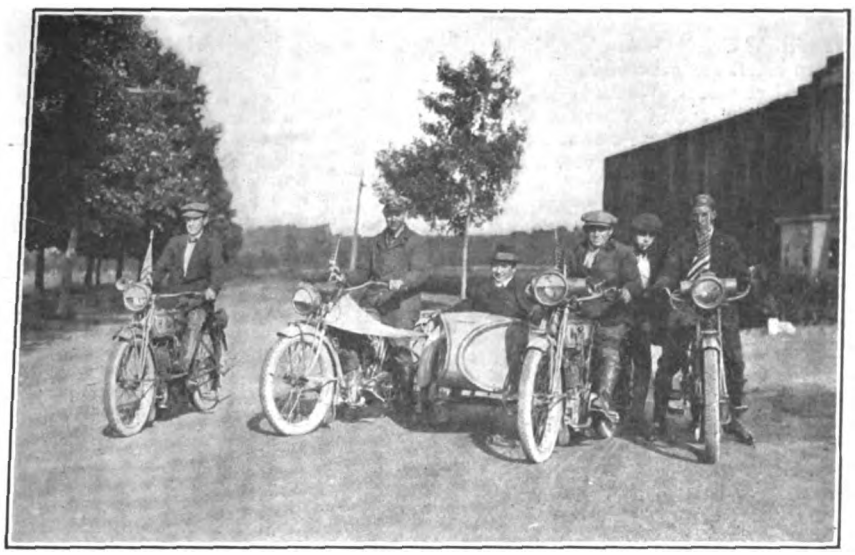
The boys, however, stated that they did not care for stogies anyway."

### GET BACK STOLEN MOTOR WHEEL

Chicago, Ill.—The Zinke Company, who handles the Smith Motor Wheel in this city, and from whom such an attachment with its attendant bicycle was recently stolen, reports the recovery of the machine. It had been brought by the thief to the store of William Gunkel at 1528 West Forty-seventh street, another Motor Wheel agency, and Proprietor Gunkel held it and phoned to Zinkie's about it. The thief was apprehended but he did not state what had become of the bicycle to which the motor wheel had been attached.

### TOOK ADVANTAGE OF RELAY

One of the dealers who saw the possibilities in the transcontinental dash and turned them to account for local purposes was Roy R. Baer, Indian representative at Sterling, Ill. Beginning with the start of the relay, he had telegraphic dispatches every day, giving the location of the message, so that as it drew nearer his town the public had become apprised through their papers of the event and were eagerly waiting for the relay to reach Sterling. He mapped the route on a bulletin and traced the dispatch riders from point to point, giving the time of arrival at each station. When it came to the night before the message was due to reach Sterling, Mr. Baer kept open house in his shop and entertained the local enthusiasts.



**Under the Leadership of Charles Krebs, Pope Agent in Newark, N. J., This Group of Enthusiasts Rode All the Way to the Pope Factory in Westfield, Mass., Recently**

### PLANNING LABOR DAY RACE

Milwaukee, Wis.—Motorcycle fans of this city will gather in large numbers at Maywood on Labor Day, when the $5,000 classic will be run off on the new Chicago speedway. J. G. Murray, local Harley-Davidson agent, is arranging a scheme to have the Milwaukeeites go over to the scene of action by a special train on the Chicago & Northwestern R. R. The fact that there are 2,000 employed in the Harley-Davidson motorcycle plant and that Chicago will offer the first opportunity to see one of the long distance races is a good indication that Murray will have no difficulty in filling every seat in the special.

Murray has extended an invitation to members of the Miiwaukee M. C. for the exclusive use of the club car on the special. There is rumor that there will be a 60-piece band as part of the affair, this band coming from Schuster's department store, in all probability. An effort is being made to reserve a solid section on the grandstand for the Milwaukee crowd. While on the way, stops will be made by the special at South Milwaukee, Kenosha, Racine and Waukegan to pick up riders, so that the Milwaukee special will be a big factor in swelling the attendance at the Labor Day classic.

### BUSH ON VACATION TRIP

Newark, N. J., July 26.—Carl W. Bush, Harley-Davidson agent, has just returned from a three weeks' trip to Saratoga Springs and Schroon Lake. With his wife he made many trips in his sidecar into the surrounding country. Counting the trip up and back alone he figures an $18 saving in transportation charges by using his combination.

### SWENSONS ON MAINE TRIP

Providence, R. I.—B. A. Swenson, the Indian man, accompanied by Mrs. Swenson in the sidecar, recently returned from a trip to Maine, taken to visit his son, Eddie, in camp near Harrison, Me. The Swensons covered the 222 miles from this city to the camp in the afternoon of the day they left Providence and started for Rhode Island about 10 a. m. the next morning, arriving in this city shortly after supper.

During his trip, Swenson visited various Indian agencies. He stopped in at the wigwams in Kennebunkport, Portland, Portsmouth, N. H., and Saco. He reports the trip up the New Hampshire coast to Portland as a fine one, with excellent roads to Saco, and from then on pretty good dirt roads.

### TAKES OVER MOTORDROME

Brooklyn, N. Y.—A. H. Patterson, the veteran Indian and Henderson representative, has taken over the Brighton Beach Motordrome for the 1915 season. He has formed the A. H. Patterson Amusement Company and taken the presidency of that organization. Mr Patterson has always been an advocate of clean racing, not only on road and dirt track, but on board track also, and intends to run the Motordrome on these lines. He was well pleased with the results of the first race of the season, held on July 31, at which everything went off smoothly and which over 2,500 people attended. At present, Edward Harvey is Mr. Patterson's representative at the track.

### PHILLIPS ATTENDED ENCAMPMENT

Harry A. "Hap" Phillips, general manager of the Southern Motorcycle Company, of Louisville, Ky., recently returned to the city after spending ten days at the annual encampment of the First Kentucky Regiment, of the National Guard.

Digitized by Google

# Believe 15 Perfect in Indiana Two-Day Run

INDIANAPOLIS, Ind., August 8.—Fifteen riders are believed to have finished with perfect scores in the two-day Indiana endurance run, out of a field of thirty-five starters. Seven of these entrants were sidecar drivers and passengers, both competing.

The Indian team, composed of Hodgin, Von Staden and Sargent, finished the run with perfect scores and won the United States tire trophy for the high team. Five teams were entered.

The riders who are believed to have completed the contest with their scores unimpaired are as follows: Hodgin, Von Staden, Sargent, Jacobs, Martin, Rheinhardt and McMillan on Indians; Catterson, on a Harley-Davidson; Capshaw, on a Dayton; Swearington and Byerly, Indians and Butterfield, Harley-Davidson. Butterfield was accompanied by his wife, the only woman on the run.

### Tire Trouble Delay "X" Team

Latest reports credited Ivan Jacobs, Indian, with winning the consistency prize, although there was nothing official about this belief. Aside from these named, eight riders finished but with broken scores.

Tire trouble put the Excelsior team out of the running and also put a crimp in the State Commissioner's team, composed of Jacobs, Drake and Carr. The second day's going was easier than the first, but the schedule was faster. Some mud was encountered going out of Marion, but it failed to stop any of the riders. The official car broke down on the course twice and only placed two secret checks. Referee Kinney tried to run the Ford without oil, with poor results.

Hughes and Davis were the hard luck champions, going out almost in sight of the finish. They had ignition trouble. Al Appel rode a 4 hp Indian and lost only four points on the whole course. The roads were marked with signs furnished by the Firestone Tire Company.

### Six Sidecars in Line

The party of 35 entrants left Indianapolis at 7:15 on the morning of August 7. Twenty-nine solo machines, representing four different makes, were in line, with six sidecars. All checked perfectly at Richmond, the first checking station, but the control at Winchester caught several of the riders short.

State F. A. M. Commissioner Jack Carr, of Indiana, and Commissioner Drake of Iowa, who were riding as a team with Ivan Jacobs the latter being Ohio Commissioner, lost 12 points at this station. Drake picked up a nail near Richmond and the patch failed to hold. Everett Chandler, driving an Indian sidecar, was one minute late, while Bill Lowry and Al Appel, the latter riding the only single in the run, lost four points also at this control.

### Consistent Checking on First Day

Paul Hegner picked up a nail near Richmond and later took a spill while making up time. He was late several minutes. The riders were all keeping watch for the secret controls on the first day with the result that they checked very consistently at all points.

John Merz, captain of the Excelsior team, claims the hard luck record for the run. He had five punctures between Ft. Wayne and Marion and in spite of desperate efforts he was unable to keep his tires inflated and also live up to the schedule.

### How the Contestants Lined Up

All the sidecar pilots found the 20 m.p.h. schedule quite easy.

Following is the list of participants:

Indian factory team: Nelson Hodgin, George Von Staden and Spick Sargent.

Indianapolis M. C. team, all Excelsiors: John Merz, Otto Somers and Don Gilchrist.

State Commissioners' team: J. C. Carr, Indiana; H. F. Drake, Iowa, and Ivan Jacobs, Ohio, all on Indians.

Consolidated M. C. team: Ray Denges, Indian; Paul Catterson, Harley-Davidson; Walter Wischmeyer, Indian.

Consolidated M. C. team, No. 2: Bill Lowry, Al Appel and Roy Martin, all on Indians.

Dayton squad: C. W. Waughop, of Dayton, O., and C. C. Capshaw, of Indianapolis.

Individual riders: A. C. Ferguson, Excelsior; V. R. McMillan, Excelsior; William Reinhardt, Indian; Dan Reinhardt, Excelsior.

Sidecars: George Evans and Thos. Miller, Excelsior combination; Ernest Hughes and H. Davis, Harley-Davidson combination; H. Speckman and F. Philips, Harley-Davidson combination; A. Swearington and D. Byerly, Indian combination; E. Chandler, Indian combination; C. A. Butterfield and wife, Harley-Davidson combination.

### HACKENSACK M. C. RUN

Hackensack, N. J., August 6.—The local motorcycle club, Hackensack M. C., F. A. M. No. 14, although an old organization, has never held a medal run. This year that fault will be rectified. October 3 will probably be the date, with the option of a rain date. A course with a morning loop of 80 to a hundred miles, with the noon stop in Hackensack, and a like distance away from town for the afternoon, is favored by the committee in charge. The schedule will probably be 20 m. p. h. for solo and tandem riders; 18 for sidecars. An attractive list of accessory prizes is being gathered, and with the two cups and the medals offered a large entry list is looked for. Keen competition for the club cup should develop between the Haledon, Avon, New Jersey, Yonkers, Crotona and other metropolitan district clubs. All queries regarding the run should be addressed to Wm. H. Nichols, Hackensack, N. J.

Indiana F. A. M. Medal

# SAVANNAH CLUB STILL FIGHTING

## Subscriptions Are Being Obtained to Combat the $5 Tax Before the Supreme Court

SAVANNAH, Ga., August 3.—The first motorcycle track races will be held here on Labor Day, on the half-mile dirt track, when three events will be run. Five, ten and twenty-five-mile races are scheduled.

The Savannah Motorcycle Club is promoting the events, and should these prove a success, others will be held. The events are for single cylinder motorcycles and will be sanctioned by the F. A. M.

Next Tuesday night members of the club will meet at the clubrooms and journey out to Winter's Garden, a popular summer resort, and there participate in a water melon slicing.

A popular subscription is being gotten up among the motorcycle riders of Savannah to fight the present injunction suit which they recently won, and which has been taken to the Supreme Court by the State.

The fight is based upon a $5 tax, which the club claims is unfair and upon which the judge in the Superior Court here recently granted an injunction. Because the present legislature has only proposed the new tax law, which calls for a $2 tax, and will hardly act upon it this year, the fight in the Supreme Court will be spirited.

# Motor Wheel Favored by Army Officers

Plattsburg, N. Y., August 9.—The use which Lieut. C. N. Sawyer, post athletic officer, stationed at the Plattsburg Barracks, is making in camp of the Smith Motor Wheel, has interested Lieut. Col. O'Neil, second in command at Plattsburg, as to the possibilities of the motor wheel for army purposes. Several of the officers have already suggested that two Smith motor wheels with bicycles be employed in each infantry company for messenger service to replace the present mounted orderlies.

Lieut. Sawyer is now preparing an article for three of the army service magazines, which will give a report of his experience with the Smith Motor Wheel.

# Bowker and Trahmer Take Chief Honors at the Cycle Parts Convention Races

## Former Captures Five-Mile Handicap While Latter is Victor in 10-Mile Handicap; Atlantic County Championship Goes to Joe La Rosa

Lined Up for the Starting Gun in the Ten-Mile Race. Mayor of Atlantic City Holds Pistol Amid Group of Officials

ATLANTIC CITY, August 8.—In spite of the threatening weather, a large and enthusiastic crowd assembled to witness the amateur bicycle races staged under the combined auspices of the Cycle Trades Industries on Friday afternoon. Early in the afternoon the crowd began to gather and by 3 o'clock, the time officially scheduled for the start, the sides of the course were lined four and five deep. Owing to some post entries and other causes, the races were delayed a half hour.

Some trouble was experienced at first in keeping the course clear, the spectators in their eagerness to see their favorites, crowding close to the center of the track. A motorcycle policeman, by means of riding close to the edges of the road, kept the crowd back at intervals, and when later the course was roped off the riders were afforded a clear open course continually. Much credit is due to the race officials and race committee, who through their indefatigable efforts pulled off one of the most successful and exciting road races of recent times. Unquestionably this annual race is the source of greatly increasing interest.

The races were run over a mile and a quarter course, the contestants riding for a quarter lap, turning about and riding in the opposite direction for one-half lap and turning about again and finishing at the starting point.

The first race, the five-mile handicap, was run in three heats, the first and second

**Officials at Convention Cycle Races: Left to Right, George W. Robb, Chief Judge; Richard Stroud, Referee; "Bernie" Munchweiler, Timer**

qualifying heats being run over a mile and a quarter course. The final heat of five miles was the fourth event on the program. Twelve were to qualify in each heat. A start was made at about 3:30 p. m., 27 starting in the first heat and 28 in the second. George Bowker, of Inwood, L. I., a scratch man, by strong and consistent riding, captured first place in the first heat, with E. Nelson, a Philadelphia rider, second, and Joe August, of Trenton, N. J., third. Time, 3 min. 30 sec.

The winner of the second heat was Lester Bowker, of Inwood, L. I., with 30 yards handicap. His time was 3:20⅗. F. J. Trahmer, of Irvington, N. J., was second, and George Hofman, of Inwood, L. I., third. Only 11 finished this heat the remaining eight places in order being won by Winfield Ireland, Atlantic City; Phil. Kelly, Philadelphia; George W. Harris (scratch), Philadelphia; Frank W. Harris, Philadelphia; Herman Day, Philadelphia; L. Howell, Washington, D. C.; Ed. Shoemaker, Atlantic City and A. Reis.

The final heat brought some good riding, and in the fourth lap it was nip and tuck between Anthony Macrie, an Atlantic City boy, and George Hofman, of Inwood, L. I., the latter finally nosing Macrie out, but being in turn vanquished by George Bowker. Bowker's time was 14:06⅘.

### Singer Takes Lead

John Singer, of Atlantic City, took the lead in the first lap, closely followed by Joe La Rosa, another Atlantic City rider, but both were passed before the second lap by Anthony Macrie, who held the lead almost up to the third lap. Then F. J. Trahmer passed him. Macrie, however, by a strong spurt regained his place but was nosed out near the end of the fourth lap by George Hofman. He was in turn succeeded by George Bowker (scratch), who won the race. The places went as follows: George Bowker (scratch), first; Hofman, second; George W. Harris (scratch), third; F. J. Trahmer, fourth; Anthony Macrie, fifth.

In the five-mile motor wheel race there were three contestants: Harry Levin, Ed. Shoemaker, and a substitute for F. E. Sullivan, originally entered. By a mechanical mishap Sullivan's substitute had to retire from the race. Ed. Shoemaker, an Atlantic City boy, finished first. His time was 13:49⅗. Much interest and excitement was caused by this race, as it was the first motor wheel race ever run in this section. The speed at which the strong little motors propelled the bikes was a surprise to all.

The one-mile Atlantic County championship was of course particularly interesting to the local crowd, as all the contestants hailed from their "old home town." Joe La Rosa was the victor, winning in 3:39⅕. W. E. Barrett was second; Ed. Shoemaker, third. There were nine starters.

### Thirty-four Starters

Thirty-four started in the ten-mile handicap, and 29 finished. The handicaps ranged from 30 seconds to 3 minutes 30 seconds.

The race furnished some thrilling evidences of good riding. John Singer, Atlantic City, led in the first lap, closely followed by James H. Keep, Atlantic City, who finally nosed him out and led in the second lap, with Singer closely pursuing. In the third lap Singer turned the tables and led, with Keep and Trahmer following. By a spurt Trahmer obtained the lead and was not passed again. He led in the fourth lap, with Herman Day second and Joe August third. In the fifth and sixth laps the same positions were held by the same riders, but in the seventh Joe August pulled up to and passed Day and finished second, with Day third. Trahmer's time was 35:14⅗. The first prize for best time was won by George Bowker (scratch); time, 36:11⅘.

The complete summary for the ten-mile handicap, as approved by W. R. Stroud, official referee and handicapper, is as follows:

| Name and Address | Handicap | Net Time |
|---|---|---|
| F. J. Trahmer, Irvington, N. J. | 2:30 | 34:14.6 |
| H. Day, Philadelphia, Pa. | 3:00 | 34:44.8 |
| Joe August, Trenton, N. J. | 2:30 | 34:15 |
| F. Agabiti, Trenton, N. J. | 2:00 | 33:51 |
| A. Macrie, Atlantic City, N. J. | 2:00 | 33:51.2 |
| M. Butler, Atlantic City, N. J. | 2:00 | 33:51.4 |
| George Hofman, Inwood, N. Y. | 2:00 | 33:51.6 |
| W. J. Browne, Philadelphia, Pa. | 2:30 | 34:30.8 |
| Sol. Zito, Trenton, N. J. | 3:00 | 35:01 |
| L. Layton, Atlantic City, N. J. | 3:00 | 35:01.2 |
| J. H. Keefe, Atlantic City, N. J. | 3:30 | 35:31.4 |
| B. Seltzer, Atlantic City, N. J. | 3:00 | 35:01.6 |
| G. Bowker, Inwood, N. Y. | Scr. | 32:41.8 |
| P. Kelly, Philadelphia, Pa. | 1:30 | 34:12 |
| J. Singer, Atlantic City, N. J. | 3:30 | 36:12.2 |
| H. Eastwood, Atlantic City, N. J. | 2:30 | 35:12.4 |
| W. Benson, Atlantic City, N. J. | 3:30 | 36:12.6 |
| C. J. H. Tonges, New York, N. Y. | 2:00 | 34:46 |
| F. W. Harris, Jr., Philadelphia, Pa. | :30 | 33:25.8 |
| G. W. Harris, Philadelphia, Pa. | Scr. | 33:56.2 |
| J. H. Stake, Trenton, N. J. | 2:30 | 36:31.2 |
| J. La Rosa, Atlantic City, N. J. | 3:00 | 37.02 |
| A. Reis, Atlantic City, N. J. | 1:30 | 35:33 |
| J. Bonacorsa, Philadelphia, Pa. | 2:30 | 36:35.2 |

Time prize winners—First, George Bowker, Inwood, N. Y. (Scr.), 32:41.8; second, F. W. Harris, Philadelphia, Pa. (30 sec.), 33:25.8; third, F. Agabiti, Trenton, N. J. (2 min.), 33:51.

# SHERMAN FIRST IN CHAMP. RACE

## Crescent Rider Is High Score Man After Winning Third Club Contest

BALTIMORE, Md.—Welby Sherman won the third club championship of the Crescent Bicycle Club on August 8, covering fifteen miles in 43 minutes. Sherman beat out William McAvoy by a wheel's length after a hard sprint. McAvoy was adjudged second and Fred Sanborn third, the latter trailing the leaders over the line. Langdon Sanborn, the club captain, came fourth.

The hot pace set at the beginning of the race practically eliminated all but the first four men. A hard sprint, started by Sherman, resulted in Langdon Sanborn being shaken off at the five-mile mark. Sherman, McAvoy and Fred Sanborn riding together to the finish. Sherman now holds undisputed possession of first place, as Langdon Sanborn did not place better than fourth. Following are the total points scored to date by the first five men: Welby Sherman, born, 9; W. H. McAvoy, 6; William T. 14; Langdon Sanborn, 11; Fred M. San-Wright, 4.

## Frank Kramer to Quit Racing Game

EAST Orange, N. J., August 9.—A report that appears to admit of no qualification states that Frank L. Kramer, professional cycle champion for fourteen years and the popular idol of thousands of fans all over the country, will retire from the racing game at the close of the present season. Widespread comment on this fact has been made in Newark and metropolitan cycling circles and the disappointment of many at the news has been extreme.

Kramer has not been in good form for some time and states that he does not expect to regain his real form during the warm weather. The result of this will be that he will undoubtedly lose his title this year to Alfred Goullet, the Australian pro. The latter is now leading in the contest for the American title and seems reasonably sure of winning it.

# Amateur Crown Now Graces Kockler's Brow

CHICAGO, August 9.—By taking the one-mile titular race at the Riverview Velodrome last night Ernest Kockler of the Riverview Cycling Club, clinched his right to the title of Chicago amateur champion for 1915. With three wins out of the series of four races to his credit, the fourth race need not be run for his benefit, but will be staged just the same for second and third places. Kockler defeated his clubmate Charles Minnetti and Egisto Davini, the fast Italian, in the final sprint, George Klasen finishing fourth. Kockler has 15 points to 8 points for Davini; 5 points for Minnetti; 3 for Klasen, and one each for Bert Nelson and Roy McWhirter.

**Wohlrabs in the Limelight**

The well-known Wohlrab family, hailing from Jersey City, were very much in the limelight last night. Gus, the professional, defeated Charles Piercey, the Australian, in a mixed match race, taking the sprint heat at two-third-mile by leading Piercey all the way. He also defeated the Australian in a pursuit heat at one mile, going the distance from a standing start in 1:59⅗. Brother Willie, the amateur, gained fame and an order for a suit of clothes by taking the one-mile handicap for that class in a pretty ride, defeating Roy McWhirter and Herman Hoffman to the tape by a good margin.

**Krebs Shows the Way Again**

Floyd Krebs, the Newark Dutchman, again came home in front in another third-mile handicap, this time leading Steve Senhouse, Lloyd Thomas and Bobby McLean home in a great rush. The great finish of the night came in the three-mile open for the professionals. Iver Lawson, the local Swede, supplied the said finish when it looked as though it was "curtains" for him on the back stretch of the last lap. Lawson came from sixth position and, riding high on the bank, spread-eagled the field and won by a length from Lloyd Thomas. Ned Young, of Salt Lake, ran third, and Eddie Root beat Gordon Walker for fourth place.

**Drobach Cracks Track Record**

Peter Drobach, the South Boston German, defeated Martin Ryan, the Newarker, in a fifteen-mile paced race and in doing so shattered the five-mile mark of 6:41 for the local track by doing 6:38. The ten miles were covered in 13:35, bettering the old mark of 15:14, and the fifteen miles were turned in 20:18, establishing a mark for that distance. Drobach took the lead at the start and kept it all the way, being about a half lap in the lead at the finish. Summary:

One-mile Chicago championship, amateur—Won by Ernest Kockler, Riverview C. C.; second, Charles Minnetti, Riverview C. C.; third, Egisto Davini, Italo-Am. C. C.; fourth, George Klasen, Danish-Am. A. C. Time, 2:29.

One-mile handicap, amateur—Won by Willie Wohlrab, Jersey City, 85 yards; second, Roy McWhirter, North West Skating Club, 90 yards; third, Herman Hoffman, Chicago C. C., 150 yards; fourth, C. Schroeder, unattached, 190 yards. Time, 1:54.

One-third-mile repechage handicap, professional—Won by Floyd Krebs, Newark, 40 yards; second, Steve Senhouse, Australia, 50 yards; third, Lloyd Thomas, San Francisco, 15 yards; fourth, Bobby McLean, Chicago, 50 yards. Time, 36 seconds.

Three-mile open, professional—Won by Iver Lawson, Chicago; second, Lloyd Thomas, San Francisco; third, Ned Young, Salt Lake City; fourth, Eddie Root, Boston. Time, 5:53.

Mixed match race, Charles Piercey, Australia, vs. Gus Wohlrab, Jersey City—First heat, two-third-mile sprint, won by Wohlrab. Time, 2:21. Second heat, one-mile pursuit race, won by Wohlrab. Time, 1:59⅗.

Fifteen-mile motor-paced race, professional—Won by Peter Drobach, South Boston; second, Martin Ryan, Newark. Time, 20:18.

# Rain Crimps Saturday Program

CHICAGO, August 8.—Although the races at the Riverview Velodrome were started last night under threatening skies and chances looked bad for the completion of the program, four events were finished before the rain caused a curtailment of the meet.

Ernest Kockler, the Riverview Cycling Club star, added five more points to his score in the contest for the amateur championship of the city by taking the half-mile titular event from Egisto Davini, Charles Minnetti and Roy McWhirter in the order named. The one-third-mile handicap for the professionals resulted in a win for Floyd Krebs, the Newarker, from the 60-yard mark, he defeating Rudolph Rudi-Russe, the Austrian "caboose," Lloyd Thomas and Ned Young in the order named.

**Two Match Races**

Two match races were also decided before the rain fell. In the first Frank Cavanagh, the Newarker, took Gordon Walker, the Australian, into camp in two straight heats of a two-third-mile match race, winning both heats in a handy manner. The second match was the Brassard match at one mile, which was taken by Charles Piercey, the Australian, who won the race from the holder, Eddie Madden, who hails from Newark. Summary:

Half-mile Chicago championship, amateur—Won by Ernest Kockler, Riverview C. C.; second, Egisto Davini, Italo-Am. C. C.; third, Charles Minnetti, Riverview C. C.; fourth, Roy McWhirter, N. W. S. C. Time, 1:11⅘.

One-third-mile handicap, professional—Won by Floyd Krebs, Newark, 60 yards; second, Rudolph Rudi-Russe, Austria, 65 yards; third, Lloyd Thomas, San Francisco, 15 yards; Ned Young, Salt Lake City, 35 yards. Time, 35⅗ seconds.

Two-third-mile match race, Frank Cavanagh, Newark, vs. Gordon Walker, Australia—Won by Cavanagh in straight heats. Times, 2:10⅘ and 2:00.

One-mile Brassard race, professional—Won by Charles Piercey, Australia; second Eddie Madden, Newark. Time, 3:40.

# RAIN SHORTENS NEWARK RACING

## Sport is Stopped Just as Kramer and Goullet Finish One Lap of Match Race

NEWARK, N. J., August 9.—A heavy downpour cut short the program at the Velodrome yesterday afternoon, just after Frank Kramer and Alfred Goullet had finished the first lap of the opening heat in their match race. However, before the rain came, the crowd of 8,000 saw Reggie McNamara run away with the two-thirds mile pro. handicap, by sprinting the full four laps of the track. He was off the 15-yard mark and successfully shook off Bob Spears, five yards further back. The unfinished program was postponed until Wednesday night, August 12. The summaries:

Half-mile novice.—Edward Nagel, Newark, first; Leonard Mazzei, Newark, second. Time, 1:07⅗.

Two-thirds mile professional handicap.—Reggie McNamara, Australia (15 yards), first; George Cameron, New York (45 yards), second; Freddy Hill, Boston (50 yards), third; Willie Coburn, Newark (65 yards), fourth; Robert Spears, Australia (10 yards), fifth. Time, 1:12⅖.

# Big Field Promised for C. R. C. A. Run

THE third annual Pleasure Run and Carnival of Sports being promoted by the Century Road Club Association, New York Division, promises to be the greatest event of its kind in the eastern part of the country for the past decade. Manufacturers all over the country are all alive to the fact that bicycling is again booming, and many have given their support to make this event the success that it should be. So great has the demand been for entry blanks that the committee in charge have had three issues circulated, with the result that entries are coming in at a fast clip. The entry list for the day will probably be nearer 500 than 250, as was at first expected.

The entry fee of fifty cents includes entry to all races in which the rider may desire to compete. Among these are a three-mile handicap race, a quarter-mile open race, a slow race, a novelty race and a one-mile open race.

A handsome souvenir will be given to all riders entering the Pleasure Run, which leaves Columbus Circle, New York City, at nine oclock, Sunday morning, August 22, proceeding north along Broadway to 110th street, to 7th avenue, and to the Central Bridge, to Jerome avenue and 167th street, and east to the Grand Boulevard and Concourse. At the latter place the judges will decide the winners of the three prizes for the best decorated bicycles and for the best appearing club.

After the judges have decided who are the winners of the trophies, the procession will continue along the Grand Boulevard and Concourse until Bronx Park is reached, where a turn will be made along Fordham Road to White Plains avenue, where the various races will be started.

The handicapping for the three-mile handicap bicycle race will be done by the handicapping committee from the Inter-Club Amateur Cycle Road Racing League, which is an affiliation of New York's ten leading bicycle clubs. By this system all entrants will be properly handicapped.

Harry Kaiser, the Bronx bicycle rider, who turned professional in order to ride in the last six-day race in New York, and who is a member of the Century Road Club Association, will be the honorary starter for the events, and will be assisted by Frederick E. Kirchner, an old-time bicycle rider, who is at present connected with the Evening Recreation Centre at P. S. 159, where he is principal. Daniel M. Adee, the president of the National Cycling Association, will act as referee for the races.

A list of prizes, with the names of donors thereof, follows:

Silver loving cup, Dieges & Clust, New York; silver loving cup, Pope Manufacturing Co., Westfield, Conn.; Palmer tires, B. F. Goodrich Co., New York; gas cycle lamp, Badger Brass Mfg. Co., New York; Renold block chains, P. A. Frasse & Co., New York; trip cyclometer, Veeder Manufacturing Co., Hartford, Conn.; road racing saddle, Persons Mfg. Co., Worcester, Mass.; pedals, Standard Company, Torrington, Conn.; gas lamp, Twentieth Century Mfg. Co., New York; motorcycle suit, Lamm Bros., Baltimore, Md.; bells, Bevin Bros. Mfg. Co., East Hampton, Conn.; Motobike bars, Chicago Handle Bar Co., Shelby, Ohio; subscriptions, *Bicycle News*, New York; racing rims, Ticker Wood Works Co., Sidney, Ohio; bicycle tires, Indiana Rubber & Insulated Wire Co., Jonesboro, Ind.; two-speed coaster brake, Corbin Screw Corporation, New York; racing handlebars, Kelly Handle Bar Co., Cleveland, Ohio; Kelly divided handlebar, Kelly Handle Bar Co., Cleveland, Ohio; repair materials, Van Cleef Bros., Chicago, Ill.; tire gauge, Twitchell Gauge Co., Chicago, Ill.; subscription, **Motor Cycle Illustrated,** New York; racing handlebar, M. J. Goldman, New York; Atherton coaster brake, Buffalo Metal Goods Co., Buffalo, N. Y.; bicycle chain, Diamond Chain & Mfg. Co., Indianapolis, Ind.; Morrow coaster brake, Eclipse Machine Co., Elmira, N. Y.; tire gauge, A. Schrader's Sons, Inc., Brooklyn, N. Y.; steel bicycle rims, Mott Wheel Works, Utica, N. Y.; bicycle baskets, Wald Mfg. Co., Sheboygan, Wis.; bicycle stands, Wald Mfg. Co., Sheboygan, Wis.; luggage carriers, Sheboygan, Wis.; repair tools, Wald Mfg. Co., Sheboygan, Wis.; Gotham bicycle tires, Gotham Sporting Goods Co., New York; Stag racing saddle, New York Sporting Goods Co., New York.

After the races are over, dinner will be eaten at the club house in Pelham Park, and bathing may be indulged in at Orchard Beach or Pelham Bay, both located nearby.

Entry blanks may be obtained from Andrew N. Segal, chairman of Carnival Committee, 1842 Seventh avenue, New York City. Those riders contemplating attending should have their entries turned in before Thursday night, August 19, at eight o'clock, as no post entries will be taken.

# PLEASURE RUN DESPITE RAIN

## Fifty-Four Bicyclists Braved Storm and Bad Roads on C. R. C. of A. Trip to Orangeburg, N. J.

THE pleasure run of the Century Road Club of America was held on Sunday, August 8, to Orangeburg, N. J., but was marred by bad roads and a rainstorm. Fifty-four bicyclists made up the groups that left Scheutzen Park, Union Hill, N. J., at 10 a. m. bound for Dan Kelly's Hill and Teaneck. The path led north beyond Englewood and Tappan, where a stop was called for refreshments and a view of Andre's prison of Revolutionary fame was enjoyed. A little farther on Orangeburg was reached and a two-mile handicap race was held with sixteen starters. The handicaps ranged from scratch to three-tenths of a mile, with the result that Joseph Caldwell, of the Century Road Club Association, who started with a two-tenths mile handicap, led with a good margin, being followed over the finish line by his brother, Ray Caldwell, from the one-tenth mile mark.

The tenth of a mile slow race proved to be an easy win for Henry Terhune, of the Century Road Club Association, who was able to make his bicycle go slower than any other contestant.

The half-mile novelty race and the slow race were contested on the track after the rain had fallen and made the going pretty poor.

The novelty race was composed of a one-eighth mile walk, one-eighth mile carrying the bicycle, and one-quarter mile ride on the bicycle, and was easily won by Jack Crowley, of Yonkers, N. Y.

It was found desirable on account of the rain and poor roads for the majority of the riders to finish the trip by train, but cheerful spirits were maintained in spite of this.

### SANBORN BACK IN BALTIMORE

. Baltimore, Md.—Fred M. Sanborn, the veteran century and mileage rider of the Crescent Bicycle Club, arrived in this city on August 2, after a successful trip through Maryland, Pennsylvania, West Virginia and Ohio. Sanborn's trip, though a difficult one by reason of many mountain roads in the Blue Ridge, Tuscarora and Allegheny ranges was a most interesting one, as it followed the Lincoln Highway from Pittsburgh.

On his ride, Sanborn halted numerous times in the Alleghenies to admire the magnificent scenery, and to study the historic places passed en route. He went to Steubenville and Lisbon, O., the latter being the farthest point west made on the ride. He reports that the Maryland State roads were by far the best he encountered, much of the National Highway west of Cumberland being very poor dirt surfaces.

### N. E. W. SUNDAY RACES OFF

Fourteen members of the New England Wheelmen of New York entered the weekly point race on Sunday, August 1, on the Eastern Boulevard Course, Bronx, N. Y. The course was found to be in splendid shape, but the hot weather came near knocking out some of the contestants. The distance of the race was five and one-half miles, and when the four-mile mark was reached the field was still well bunched. The sprint at the finish was one of the best contested battles that had been witnessed on the Boulevard in some time, the whole field going over the line as practically one man. Summary: first, Ben. Boyes (1:30); second, C. Sprauer (1:30); third, Wm. Maas (1:30); fourth, E. Aichelin (scratch); fifth, C. H. T. Tonjes (30). The time was 14:27⅘. Because of the warm weather, the New England Wheelmen will not hold any more Sunday events until September.

### GOING TO PACIFIC COAST

Buffalo, N. Y.—Fred. L. Brown, sales manager for the Pierce Cycle Company, has started on an extended business trip to the Pacific Coast. He is taking a northerly route on his way out and on his return trip will cover the South and South Western States.

Digitized by Google

### LOOK OUT FOR LOCAL ORDINANCES!

While going through a very muddy stretch of road near Fairview, N. J., on the pleasure run of the Century Road Club of America on Sunday last, four cyclists were held up and threatened with arrest by one of the councilmen for riding on the sidewalk, even though it was but a dirt-path. After parleying with the complainant, the constable was looked up and, giving vent to his dissatisfaction regarding a climb to the hill to the home of the justice of the peace, was influenced to have the councilman withdraw his charge, whereupon the interested parties went into a neighboring roadhouse, and all partook of the "pipe of peace."

Sylvain Segal, Lucien Wetzel, Ernest Lango and another cyclist were in the arrested party. Right here it would seem advisable to warn riders that the old laws of local boroughs are always remembered when it concerns a bicyclist, for it is not the few who find it necessary to ride the sidewalk but the many who have no regard for persons who may be walking thereon, that the officers and other citizens set against cycle riding on the sidewalks.

### WILL ASK FOR CINDER PATHS

Boise, Idaho, August 10.—Plans are being discussed here to have the city council install cinder paths for bicycle riders during the winter when the roads are muddy and revoke the ordinance providing a penalty for riding wheels on the sidewalk. Boise has upwards of 2,000 wheel riders and if they can unite in a club or association they will be able to secure results. The ordinances governing wheels here provide that all must be lighted after dark, forbid riding on the sidewalks and require a military turn at street intersections. While automobiles have increased wonderfully in the past few years in this section, wheels have increased in numbers also and many business men, who own automobiles still find the wheel the most convenient for business trips about the city.

### BIKE BUSINESS IMPROVING

Los Angeles, Cal.—J. M. Stewart, proprietor of "The Bike Hospital" at Phoenix, Arizona, while in Los Angeles recently told the correspondent of **Motor Cycle Illustrated** that conditions there are now improving after a slump of over a year and a half. The effect of prohibition has been felt. "Where we used to have accounts, we get money," said Mr. Stewart. Mining interests are coming up and copper stocks are coming to the front fast. Mr. Stewart bought out H. S. Griswold in January, so he is about the whole thing in the bike business in Phoenix. He does a factory repair business and handles principally the line of the Consolidated Mfg. Co. of Toledo.

### APPLETON SOCIAL RUNS

Appleton, Wis., August 10.—Members of the Appleton Bicycle Club are arranging a series of tours. The first ramble took the members to High Cliff and return, eight riders taking part. Dinner was served at Clifton and the party came back to Appleton through Sherwood and Dundas. Those who took part were Raymond Nehls, Lawrence Hoh, Alvin Falk, William Rosech, Ora Libben, Carl Bachmann.

# WALTHOUR WINS 25-MILE RACE

## Leads Nearest Competitor by More Than Three Laps in Motor-Paced Event at Revere Track.

BOSTON, Mass., August 8.—The veteran Bobbie Walthour showed that he was in tip-top form last night at the Revere bicycle track by winning the 25-mile motor-paced race, leaving in the rear Charles Turville, Jr., Jimmie Moran and Harold Rollins. The old-timer was three and a half laps ahead of Turville at the finish, and the others were trailing.

In the early part of the race the riders were spinning along well together, but after the five-mile mark was passed the duel between Bobbie, the vet., and Turville, representing the younger school, attracted all the attention. Taking advantage of a little slip of the youngster early in the race, Walthour played it safe and gave back no ground.

Leon Didier, the French champion, got the better of the argument in a motor-paced match with Clarence Carman, the American champ., winning in straight heats. The first 10-mile was easy, owing to the fact that Carman had trouble with his saddle. In the second heat, however, Didier, who got a lead by a quick sprint at the start, was hard-pressed all the way by Carman.

L. C. Rollins, of Everett, who has been racing at Revere as a scratch amateur, joined the professional ranks last night and gave a good account of himself, getting fourth in the half-mile professional handicap and second in the two-mile open. The latter was won by Pat Logan. McPartland, who considered that he had been fouled by Rollins, indulged in fisticuffs with the newcomer and will as a consequence have a week's vacation from the track. The summaries:

One Half-Mile Professional Handicap Race—Won by Dennis Connolly, Everett (50 yards); Ray Jones, Revere (110 yards), second; Hardy Jackson, Revere (95 yards), third; L. C. Rollins, Everett (25 yards), fourth. Time, 57s.

Special Motor-Paced Match, Leon Didier, Paris, vs. Clarence Carman, Jamaica, N. Y.; Best 2 in 3 Heats—First heat (10 miles), won by Didier; time, 13m. 47⅕s.; second heat (10 miles), won by Didier; time, 13m. 21⅘s.

Five-Mile Open Amateur Race—Won by Fred Herbert, Fall River; Tim Sullivan, New Haven, second; Ned Chandler, Boston, third; Tom Connolly, Everett, fourth. Time, 11m. 26⅕s. Lorimer Winslow, Providence, was the winner of the most laps.

Two-Mile Open Professional Race—Won by Pat Logan, South Boston; L. C. Rollins, Everett, second; Willie Turville, Revere, third; Dennis Connolly, Everett, fourth. Time, 4m. 23⅕s.

25-Mile Motor-Paced Race—Won by Bobbie Walthour, Atlanta; Charles Turville, Jr., Revere, second; James Moran, Chelsea, third; Harold Rollins, Everett, fourth. Time, 35m. 27⅕s.

### FAIR C. R. C. A. ROADSTER

Miss McKaig, Who Participates in Both Long and Short Distance Fixtures, on "Bath Run," August 1

### BICYCLE PARTS ARE WANTED

Christopher Hansen, representing the firm Cyclefabriken Sport, of Enghaveplads 14, Copenhagen, Denmark, is at present in this country looking for a number of bicycle parts and accessories. Mr. Hansen particularly wishes to get spokes, front hubs and mudguards suitable for European types of bicycles, as well as handlebars and bicycle tires of moderate price. Bells which sell at reasonable figures are also desired. After August 16, Mr. Hansen should be addressed at Copenhagen headquarters.

### RACES AROUSE INTEREST

Menasha, Wis., August 10.—Bicycle races are beginning to detract from the popularity of the band concerts here. Since the start of a series of bicycle race meets there have been large crowds in attendance. The meets here are attracting the best riders of the state, with the result that the spectators are being given hotly contested events that are making a hit and promise a revival of bicycling both as a sport and racing proposition.

### BIKE TOURISTS IN DETROIT

Detroit, Mich.—Hector A. McKenzie and G. H. Worley, messengers for the Postal Telegraph Co., at Pine Bluff, Ark., were in Detroit last week after a bicycle trip from their home town which has kept them on the road for over a month. The trip was made with the aid of E. B. Bloom, secretary of the Pine Bluff Chamber of Commerce, who interested himself in the boys. The boys left home June 22. The trip covered 5,000 miles. When unable to reach towns at night, they camped along the way. They said bad roads were encountered except in Michigan and Indiana. The young men will stay in Detroit for several weeks before returning to Pine Bluff.

# Motorcycles for Scout Service

## Camp Whitman Manoeuvers Throw New Light on the Power Two-Wheeler

*By C. Mack Sheridan*

A STARTLING revolution in the development of modern war munitions has been brought about by the war in Europe—a revolution so far-reaching as to greatly affect and influence the judgment of U. S. army officers, who are responsible for the "up-to-dateness" of America's equipment. Naturally, any change in style of equipment for our army is of tremendous importance to the manufacturers who make or who can supply munitions to the government. Present indications are that great development will be made along the lines of employing motor vehicles wherever possible.

It is this development and the interest it is bound to arouse among motorcycle manufacturers, that inspires this article, which is intended to show briefly the great value of motorcycles attached to an advance guard or screen of cavalry, used not only to mask the movements of troops, but to find out the position and strength of the enemy, as well as the character of the country between the hostile forces.

### Where the Motorcycle Fits In

For this information to be valuable, it must be carried back to the commanding officers with all possible speed—of course by like token such details must be gained as soon as possible by scouts and patrols sent along all roads flanking the advance of the main body, and by scouting expeditions into the adjacent fields, woods, or creek and river bottoms, that will afford cover for advance scouting.

Maneuvers around Camp Whitman in which more than a thousand horsemen and four thousand infantrymen took part, brought out some interesting facts. Cavalry troops acting as advance guards sent out patrols of four and five men on all roads to the right and left of the main advance. Naturally, it was not long before the small detachments of men saw or encountered similar groups of patrols screening the location of the Red army. It was then the duty of these patrols to get the exact details of their findings back to such officers as could properly employ the information gained. It was here that the great superiority of motorcycles could have been more fully demonstrated. Their greater speed would have insured a better and more rapid line of communication between cavalry squadrons and advancing infantry.

### Cycling Even in the Fields

Patrols mounted on well-built motorcycles could have covered roads in all directions in a fraction of the time required by mounted men—and a number of motor scouts did. It was actually found that many of the surrounding fields afforded perfect ground for fairly swift cycling. This condition would be true of almost any section of the East, and to a lesser degree of the whole country.

Motorcycle corps numbering, say, sixty men, attached to each regiment of cavalry, would greatly enhance the value of cavalry employment, which is, of course, extremely valuable, not alone for the safe advancing of troops, but for the prompt and accurate locating of the enemy.

Manufacturers of motorcycles of the lighter type will, in the writer's estimation, find it worth while to develop an especially constructed vehicle capable of fairly high speed, and of a design that will permit of the maximum amount of rough usage.

### What the Scout Must Carry

Such a motorcycle must provide means for easily carrying a rifle, the regulation blanket roll, which is about 43 inches long and 6 to 7 inches in diameter, and a waterproof slicker-roll of 28 inches by 3 inches, and a case for extra rifle and revolver ammunition should be a permanent fixture on the machine, as well as two small boxes, one for the regulation meat can, knife, fork, spoon and cup, and a very few personal articles. The other should contain quick repair parts and appliances of the very best material, and so designed as to get the quickest possible results in making repairs of even the simplest nature.

It has been hinted in some circles that the motorcycle industry needed a new impetus—the low-priced automobile having cut into the business somewhat, if such accounts are to be credited. Whether this state of affairs is true or not, do you not agree that here is an opportunity for the valuable "specializing" found so lucrative in many other manufacturing enterprises?

The development of a model machine would cost but little, and when properly demonstrated, it would easily gain the quick attention of the proper officials.

After studying the work and conditions developed in maneuvers around Camp Whitman, the writer is fully convinced that a new, broad, and extremely valuable use for the motorcycle has been pointed out.

## FROM DIRECTOR HOLTON

EDITOR, **Motor Cycle Illustrated:** In your August fifth issue a letter from Mr. J. O. E. Dieterich appeared, protesting against the action of the Sacramento Convention delegates in setting aside an election held at Saratoga during the rally.

Being an interested party I would like to express my views. In re being notified of the holding of a North Atlantic District Convention, I did receive a printed pamphlet that may have had this information on it. I did not read the booklet through as I did not consider it an official notice from the Secretary—Dr. G. B. Gibson.

At Sacramento all voting were properly accredited delegates and bona fide F. A. M. members. Can as much be said of all voting at Saratoga? Was every precaution taken to see if those who participated in the various conventions at Saratoga were entitled to do so? I don't know, for I was not at the Convention Hall on the night in question.

Furthermore, I was asked by Mr Wm. M. Johnson in May or June if I would take the North Atlantic District directorship and consented, with the idea that directors were appointed by the president each year at the Annual Convention.

E. B. HOLTON.

## TEFT WINS MEMPHIS RUN

Memphis, Tenn, August 2.—Only two of the dozen entrants in the endurance run of the Memphis M. C. finished the 200 miles of the course on August 1. They were Leon Teft and W. F. Beck, the former finishing in 13:20, while Beck took 14 hours 41 minutes to make his run. Both riders will receive handsome trophies from the club.

The course was from Memphis to Jackson and return, a distance of 200 miles in all. Heavy rains and vile roads encountered on the outward trip, cut the field down to six riders at Jackson, these being Teft, Beck, W. D. Archer, J. A. Credington, J. W. Phillips and D. Kuhlman. Teft arrived at 11 o'clock having covered the 100 miles in five hours. He left Jackson on time, but only Beck was left to follow him to Memphis. The worst part of the going was near Arlinton, where three to four inches of mud was met with for long stretches. Mudguards had to be removed as the wheels soon became clogged and refused to turn.

## SUCCESSFUL LAWN PARTY

Hamilton, Ohio, August 6.—The lawn fete of the Butler County Cycle Club, held last week, was one of the most successful affairs of the sort which the organization has ever pulled off, and interest in the proposed chicken dinner and dance, to be arranged for a date in October, is already warm. The committee in charge of the affair, consisting of Jack Dedrick, John Ruble and Edward Brannon, intends to make it one long to be remembered. Incidentally, a social session is to be held in connection with the coming regular meeting, to be held next week, to keep the boys interested.

## STOCKHOLM ON THE MAP

Stockholm, N. J., August 8.—The Sussex County M. C. will be the latest motorcycle club among Jersey's. The local club will begin with 19 members with Geo. W. Lewis' place as its headquarters. Already the boys have held one run, with Port Jervis, N. Y., as the destination. Plans are under way to hold a competitive run during the latter part of August or early part of September.

## PURCHASE CLUB FORMED

Paducah, Ky.—The Purchase M. C., composed of riders in the Purchase District, has been formed in this city, with the following officers: E. J. Sears, president; O. L. Holmes, secretary, and J. C. Hicks, treasurer. There are 12 members on the rolls so far, and the charter is being held open until this number has been increased to 20. The club is to be a 100 per cent F. A. M. body. Secretary Holmes' address is 1221 South Fifth street, Paducah.

# Motor Warriors of New York National Guard

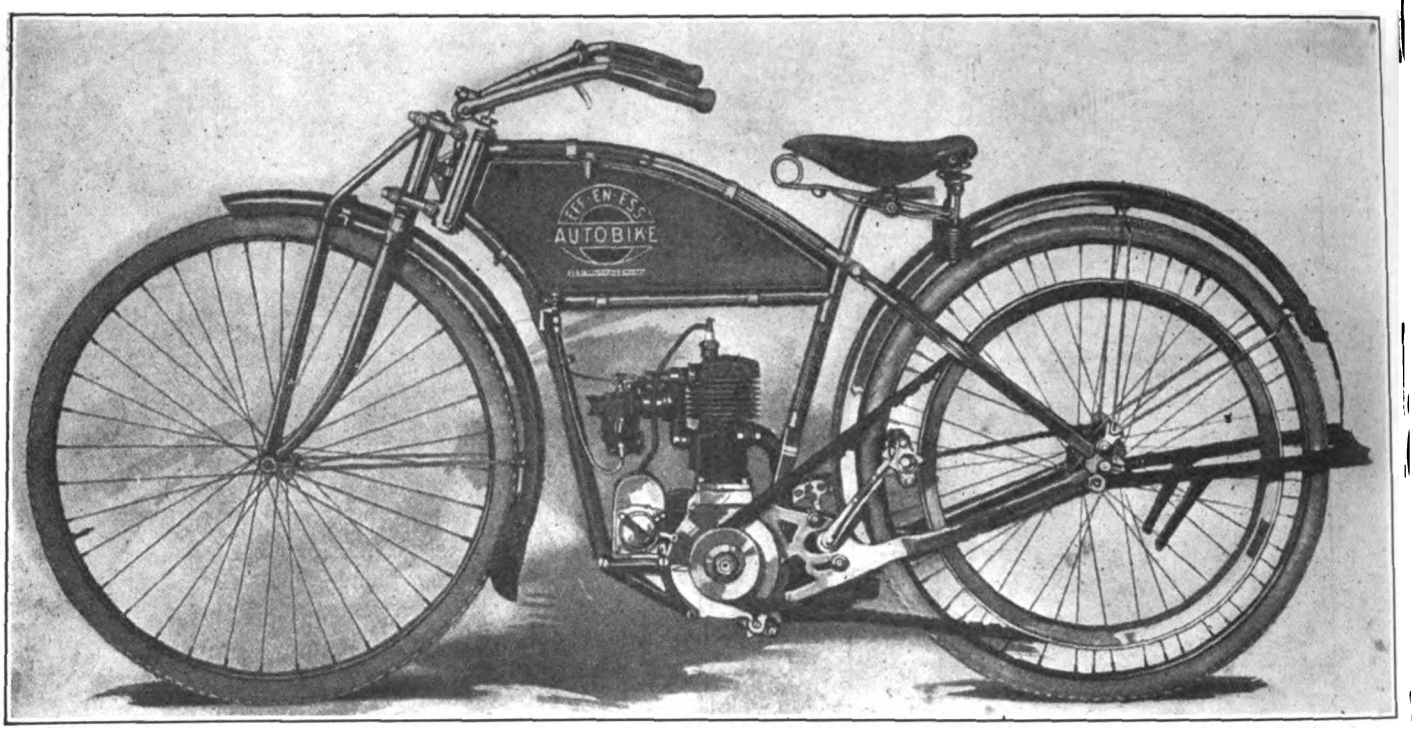
THE above photographs, taken at Camp Whitman during the annual encampment of the N. G. S. N. Y. which has just closed, show two adaptations of the motorcycle to military service. A number of other motorcycles figured in the maneuvers and contributed materially to the interest of an unusually active program. The remarkable mobility of the motorcycle scouts surprised the army officials and it is reported that they were required to do everything but climb trees. The value of the motorcycle as a means of rapid communication between headquarters and the field forces was demonstrated hourly.

It will be noted that the rider on the Emblem motorcycle is carrying considerable luggage in addition to his rifle and sidearm and still it is obvious that the load could be doubled or tripled without causing any discomfort to the rider or any strain upon the machine. It is also noteworthy that this is a single cylinder mount.

The Indian twin, with tandem passenger, gives proof of the ease with which two men fully armed can be whisked about from point to point at maximum speed.

Digitized by Google

# Novel Features in Two-Stroke Auto Bike



ONE of the most recent additions to the ranks of the lightweight motorcycle is the Auto Bike, the product of the Auto Bike Company, of 2231 Michigan avenue, Chicago, Ill. It is constructed along rather radical lines in several respects, especially as regards the motor bearers and fuel tank. The power plant is a two-stroke, single cylinder motor and the transmission is by V-belt. The weight, fully equipped, is given as 100 pounds.

The two-stroke single cylinder motor is of the three-port type, the bore being 2½ inches and the stroke 3 inches. The carbureter is a Kingston, located at the front of the cylinder. The spark plug is fitted into the cylinder head, and ignition current is furnished by a Bosch magneto, also located forward. Lubrication is by splash, the oil being mixed with the fuel in the tank and fed through the carbureter and inlet pipe into the crankcase.

**Novel Motor Mounting**

The motor is borne by two triangular side plates from the downcomer from the steering-head. These plates are attached to the crankcase by long bolts. At the rear, the crankcase is attached in a similar manner to two other pressed steel side plates, these carrying the pedal shaft and bracket and also the rear end of the seat mast. The latter forks at its lower end to allow of the passage of the exhaust pipe. The muffler fits between the rear bearer plates, below the pedal bracket.

Drive is by direct V-belt, with a ratio of 6:1. The rear pulley is a steel rim attached by short spokes to the wheel rim. A New Departure coaster brake is fitted, operated by back-pedaling in the usual manner. Wheels are 28 inches in diameter, with 2-inch tires. Mudguarding is well taken care of, light but well curved fenders being fitted. The wheelbase is 47 inches.

The frame is of the camel-back type, carrying a deep but thin tank, with a capacity of five quarts, below the curved top tube. This tank is but 2½ inches wide. The front fork is of the single-plunger type, with main members, of cantilever form, working on links. The main members act on the plunger directly. The cylinder pivots in a piece attached to the steering head. The general form of the frame is that of a keystone, with the motor and brackets forming the base.

Control is entirely from the handlebars, with the exception of the brake. A movable lever on the right bar, when lowered by the fingers, opens a decompressor or compression release and closes the throttle. When this lever is lifted, the compression release is closed and the throttle opened, the movements being regulated by the degree the lever is moved by the rider.

The Auto Bike Company, which manufactures this product, has C. E. Frederickson as its president. W. H. Stenger is vice-president and sales manager, while Leslie R. Acton, a well-known automobile trade man is secretatry-treasurer and general manager. Other members of the directorate are Fred K. Parke, an automobile man, and C. S. Beardsley. The Auto Bike Company is capitalized at $300,000.

## DAYTON FOREIGN SHIPMENTS

Dayton, Ohio.—The Davis Sewing Machine Company shipped another carload of Dayton motorcycles to Wellington, New Zealand, during the week of July 26. The shipment consisted of 24 motorcycles of Model C-7 with sidecars, this being the latest 1915 model with De Luxe 9 h. p. motor.

Other large Dayton shipments during the same period were sent to Holland and Denmark. These consisted of various models, both with Dayton and De Luxe twin motors.

## BUFFALONIANS HAD GOOD RUN

Westfield, Mass., August 3.—A party of Buffalo, N. Y., riders who visited the Pope factory here yesterday made a good run to this city, not only in point of time, but also as regards fuel consumption. Mounted on Pope twins, they left Buffalo on Saturday afternoon and reached Westfield on Sunday at 8:30 p. m., having covered 500 miles over good roads in less than 30 hours. The only trouble encountered was one puncture. The overage fuel consumption of the party was 50 miles to the gallon, so that all felt that the trip to be a very economical one.

## LINTON MEET RESULTS

Linton, Ind.—Fred Weaver, of Terre Haute, won the five-mile event and Glen Lozier won the ten-mile race at the meet here on August 1, on the local half-mile track. Both winners rode Excelsiors. The meet was well attended by members of the Terre Haute M. C. who came over 50 miles of roads for the purpose.

## RAIN AND MUD WERE NO BAR

Terre Haute, Ind.—Rain and muddy roads offered little trouble to the 35 members of the Indian M. C. of this city on August 1 on the way to the annual picnic. The riders made the trip to Hulman's Grove in good shape and carried out the program just as if the weather was of the best. The sport consisted of baseball and horseshoe games and a Dutch lunch was served all day.

# Our Canadian Letter

### NATIONAL SHOW EXHIBITORS

Toronto, Ont.—Exhibit space in the bicycle, motorcycle and accessories section of the Canadian National Exhibition, which will be held from August 28 to September 11, is almost all taken already. The companies which have already secured space include: Canada Cycle & Motor Company, Ltd; Planet Bicycle Company; Hyslop Bros., Ltd., bicycles and accessories; John T. Wilson Company, Ltd., makers of the Cyclemotor; K. & S.. Company, Ltd., representing the Standard Welding Company and several tires; Cutten & Foster, accessories; J. P. Holden Rubber Company, Pennsylvania and Diamond tires; Dunlop Tire & Rubber Goods Company, Ltd.; North British Rubber Company, Ltd.; Dominion Tire Company, Ltd., which is affiliated with the United States Tire Company; Marathon Tire and Rubber Company; Bosch Magneto Company; Splitdorf Electrical Company; S. F. Bowser & Company, and the Canadian National Carbon Company.

### STOLE BIKES TO JOIN ARMY

Orangeville, Ont.—Two respectable, but moneyless, young men of Orangeville became so anxious to enlist with the Canadian overseas forces that they broke into the bicycle store of Fred Doherty in order to secure two new bicycles. They rode to Toronto, 25 miles away, where they tried to join a new battalion, but were apprehended on suspicion. They confessed their guilt and returned the wheels. It is understood that they will be given permission by the authorities to enlist and that the theft charges will not be pressed. One of the lads has a brother at the front in the bicycle corps. The names of the youths are Roy Stinson and Guy Martin.

### POSTING MANITOBA ROADS

Winnipeg, Man.—The North American Manufacturing Company, 902 Somerset Block, Winnipeg, are introducing a new fuel-saving attachment for motorcycles which is known as the LesGass Device. The claim is made that the device will give from three to five miles additional per gallon of gasoline, Imperial measure being referred to.

Previous to this year not one road in Manitoba was sign-posted and many tourists found great difficulty in following their chosen route. There was not even an authentic route book or other reliable highway guide. Through the efforts of various municipalities and organizations, ten routes in Manitoba are now blazed and a fairly complete road guide has been prepared. Motorcycle touring through this province is now quite easily conducted and the roads are also in fairly good shape.

## BICYCLE RIDERS FORM BIG CLUB

### Sixty Torontoans Are on Charter List of New Association Which Promises Activity

TORONTO, Ont.—Sixty racing cyclists of Toronto gathered in the clubrooms of the Salem Bicycle Club, 421 College street, on Friday night, August 6, to organize the Toronto Bicycle Riders' Association, the prime purpose of which will be to encourage the bike sport and to enable the riders to engage in various campaigns to boost the pastime. The following officers were chosen: Honorary president, G. L. MacKay, chairman C. W. A. Racing Board; president, W. Marr, of the Classic Bicycle Club; first vice-president, Walter Andrews, of the Toronto Bicycle Club; second vice-president, H. Macdonald, of the H. M. Bicycle Club; third vice-president, A. E. Nichols, Salem Bicycle Club; secretary, W. M. Gladish, of the Beach Bicycle Club, and treasurer, Bert Bingley.

A prominent speaker was Robert Falconer, vice-president of the Canadian Wheelmen's Association, who declared that the association favorerd the organization of the riders. He promised co-operation.

Walter Andrews announced that the Toronto Bicycle and Motorcycle Dealers' Association would stage a 50-mile road race early in September, and word was also received that several manufacturers were planning to hold big bicycle events in the fall. The riders are also looking forward to the bicycle races to be held in connection with the Canadian National Exhibition at Toronto on September 11.

It was decided to include as members in the association the eleven riders who have enlisted in Canada's army. A resolution was also carried that the cycle racers were willing to participate in sanctioned races at the Toronto board track, providing a reasonable schedule of prizes were established. In the meantime there will be no bike races on the local saucer.

### ANOTHER RACER ENLISTS

Toronto, Ont.—The eleventh bicycle racer to enlist in the Canadian Expeditionary Force from Toronto is Andy Wilson. He has joined the 75th Battalion of Infantry. He is a brother of W. (Scotty) Wilson, a former bicycle star, who is already on the way to the front. Other racing cyclists who have enlisted from Toronto include Joe Golden, former quarter-mile champion; F. Shaw, L. Fry, H. Babcock, D. McGillicuddy, J. Parkins, W. Williams, C. Raymond and A. Lyddiatt.

It is also proposed to organize a volunteer cyclist corps in Toronto, similar to the organizations in Vancouver and Edmonton.

### ROAD SCOUTS DO GOOD WORK

Toronto, Ont.—Because of the many speed traps which have been established by county constables on the main highways near Toronto, the three motorcycle road scouts of the Ontario Motor League have had an especially busy time of it in this, their fourth, season. The three scouts are Dan Davis, E. J. Davis and Charles Spears. It is their duty to discover these traps and warn tourists of their presence while they also caution all automobilists whom they find driving in a reckless manner. They are on the road every Saturday, Sunday and holiday.

### WANTS HEADLIGHTS DIMMED

Montreal, Que.—Ald. Louis Rubenstein, president of the Canadian Wheelmen's Association for many years, moved, at a recent meeting of the City Council, that the Board of Control request the chief of police to enforce the Provincial law which prohibits the use of dazzling headlights on automobiles in the city.

Ald. Rubenstein has called an important session of the C. W. A. executive to be held in Toronto about August 21. This meeting will deal with several pressing matters concerning the situation at the Toronto motordrome and arrangements for several coming events will also be thoroughly discussed.

### MORE BOULEVARD CONSTRUCTION

Oshawa, Ont.—Another link in the transprovincial boulevard is to be provided through the plans of the municipalities along the present road between Toronto and Oshawa, a distance of over thirty miles. Representatives of these cities and towns decided, at a recent meeting, to go ahead with the construction of a new permanent highway to cost $239,000. The new road will be partly macadam and partly gravel with oil and tar maintenance. Debentures are to be issued by the various places to cover the cost and the work is to be commenced at once.

### TAKE ON MOTOR WHEEL

Woodstock, Ont.—Martin & Wilcox, Dundas street, the widely-known bicycle dealers, have secured the agency for the Smith Motor Wheel. Smith agencies are being arranged in many cities and towns in Ontario by T. F. Gaines, one of the Canadian travelers of the Milwaukee concern.

# Champion

"TOLEDO MADE FOR THE WHOLE WORLD'S TRADE"

## How We Developed Reliability

Champion Reliability didn't "just happen."

Test after test in motorcycle engines was made before we finally developed that unfailing, big, hot spark.

We tried out Champions at every speed and brake load. We made them endure every possible hardship in the motorcycle engines they were built to serve.

The result is evidenced by the lasting Champion popularity among motorcyclists.

Riders everywhere demand Champions.

Do not accept a substitute. Look for the name "Champion" on your spark plug porcelains. It stands for Reliability—Dependability—Endurance.

# Getting the President's Message Over This Stretch Was No Pink Tea Stunt

**Upper Left, Claflin Speeding on a Nevada Boulevard; Lower Left, Hotel in Cobre; Center, In This Six-Mile Stretch Low Gear Was Used All the Time; Upper Right, Claflin Needed No Stand at This Point; Lower Right, "Pink" Zimmerman Trying Her Out**

IN the accompanying pictorial layout are shown views along Relay 31, from Cobre, Nev., to Elko, in the recent transcontinental trip. This stretch was ridden by Lon Claflin, of Salt Lake City, Utah, and his escort was Cliff Zimmerman. The distance was 93 miles, and practically every variety of bad road known to tourists was encountered. For 17 miles the riders plugged sand, rode boulders and gullies and fought desperately to keep somewhere near the schedule which had been mapped for the relay. The 17-mile stretch consumed just one hour and was made on intermediate and low gear for the most part.

The riders had to open four railroad gates and also drag their machines across the rails at several points. After traversing the first 17 miles the dispatch carriers had to ride ten miles of railroad ties. As a construction gang had been at work along the line the riding was even rougher than would be expected.

From Wells to Deeth, Nev., there were fair roads with lots of short turns. Beyond Deeth were found more sand and ruts and a stretch of mountainside road which required very skillful riding.

## TIRE COMPANY TO HAVE SHOP

Louisville, Ky.—The Lee Tire Sales Co., with a capital stock of $10,000 has filed articles of incorporation at Frankfort. The firm, in addition to handling new tires, will do repair work and vulcanizing as well as operate a repair shop. The incorporators are William G. Stiglitz, Louis D. Stiglitz and Herbert Rudolph.

## BURGAMY FORMS OWN COMPANY

Cincinnati, Ohio.—"Burgamy the Tire Man" is a new figure in the local trade, as an independent dealer. As a salesman, however, J. R. Burgamy has for some years been a well-known figure among tire buyers in this city. He came here in 1900 as a free-lance tire salesman. At that time there were only three automobiles in Cincinnati, and, of course, no motorcycles. Since 1910 Mr. Burgamy has been with I. J. Cooper & Co. He has now formed his own company, and will handle an exclusive tire business at Eighth and Main street.

## DID TRIP ON TWO GALLONS OF GAS

Tacoma, Wash.—Tom Paulsen, who represents the Thor in this city, is credited with being one of the trade's best path-finders. His latest trip was on Sunday, August 1, when with seven others, he rode to Lake Cushman, a round trip of about 160 miles. Paulsen states that his mount did the distance on two gallons of gasoline. Some difficult riding was met with at Webb Hill, where half a dozen treacherous curves had to be negotiated, but the party made the trip in safety, after spending three hours at the lake.

## AT HACKENSACK CLUBHOUSE

**Members and Guests of Live New Jersey Body on Steps of Spacious Headquarters**

## MOTOR WHEELS IN LOUISVILLE

Louisville, Ky.—Billy Dieruff, manager of the bicycle and Smith Motor Wheel department of the Sutcliffe Company, sporting goods dealers in this city, reports over sixty of the little motor boosters in service in this district at present. He is having machines shipped by express only just now in order to fill rush orders. The Sutcliffe firm has just sent out its August bargain sheet, which lists bicycle supplies and motorcycle sundries.

## RENO HARLEY-DAVIDSON AGENT

Reno, Nev.—The Lincoln Highway Service Station at 25 West First street, has taken the agency for the Harley-Davidson. The station is managed by Chas. McQuerry and Lauitz Lund, the former having been Harley-Davidson agent at Warrensburg, Mo. The partners have disposed of six 1915 models so far as well as a large number of second-hand machines.

## HANDLES MIAMI POWER BIKE

Paterson, N. J.—Charles B. Vaughan, local Thor agent, has taken the representation for the Miami Power Bicycle and Smith Motor Wheel for Paterson and vicinity.

## PORTLAND CLUB IN NEW QUARTERS

Portland, Ore.—The Portland M. C. is now in its new headquarters, at 247 Holladay avenue, on the ground floor. An active membership campaign is now on, and the results so far are very promising. The officers at present are O. L. Day, president; W. R. Monroe, treasurer; A. C. Knight, vice-president; O. Paulsen, secretary; Jos. P. Schantin, road captain and C. Frank, sergeant-at-arms.

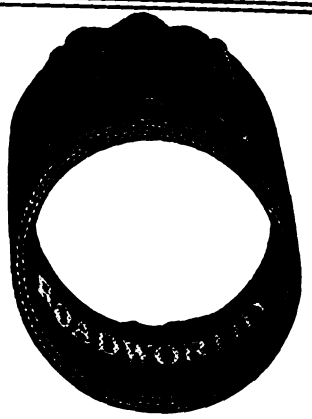
# GOING



Many Bicycle Dealers are taking advantage of this extraordinary bargain in tires and buying them as an investment. Either to resell at a good profit or used for replacements, these tires will make money for you. They're going—so is your opportunity—ACT NOW.

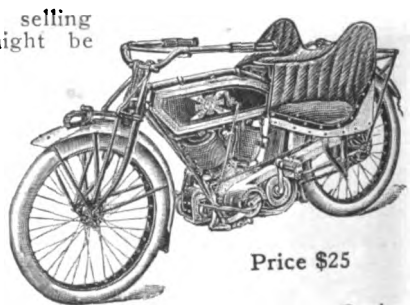
By reason of our purchasing a huge quantity of Diamond-Goodrich Bicycle tires direct from the factory we

were able to buy them at extremely low prices and so can afford to sell them at prices that you will probably never be able to duplicate. There are 14 different brands, all strictly first quality. You can re-sell them or use them for replacement and make a nice snug profit either way.

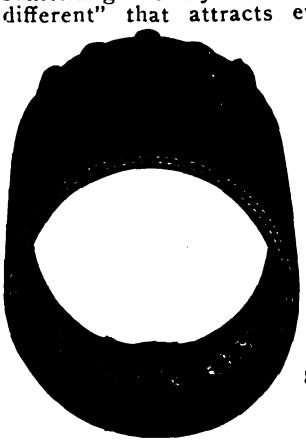
If you are a live dealer you will write us on your letter head, immediately, for our Tire Special. When you get it and see the prices, we will leave it to your own good judgment about ordering. Get Busy.

# The MILLER TRIPLEX SIDE SEAT

opens up so many selling schemes that it might be called an auxiliary salesman. You cannot beat it for demonstrating purposes, for it puts the prospect in the right position for hearing every argument and seeing every demonstration. It has a high-class appearance and attracts



and holds the interest of prospective buyers. It is something entirely different and it is this "something different" that attracts every motorcycle rider and makes of the Triplex such an exceptional seller.



If you have any doubts about the wonderful possibilities offered by the TRIPLEX you are not thoroughly acquainted with it, and so ought, at least, to find out about it just to convince yourself.

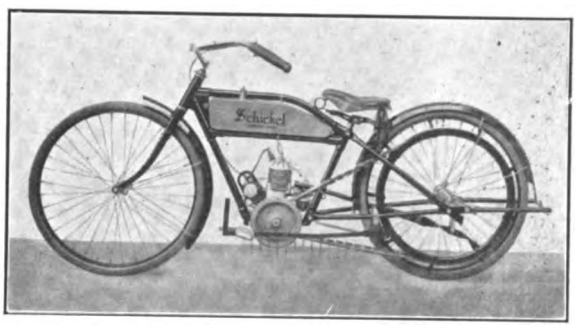
# Here it is —the $100 motorcycle



THERE'S been an army of people waiting for it—the efficient lightweight motorcycle at a price within the reach of all. And now it's here and that army wants it.

## *The* Schickel Lightweight

weighs but 95 pounds—can be stored anywhere. It goes more than 100 miles on a gallon of gasoline. It takes to hills and rough roads as if they weren't there. Noiseless, easy-running, comfortable riding and of a clean-cut, splendid appearance, it is a motorcycle worthy of any rider. And the Lightweight has the lowest price and the lowest upkeep cost of any efficient motorcycle ever made.

The 1916 model is ready. Write today for full particulars of the machine that is making motorcycling the sport of the multitudes.

**THE SCHICKEL MOTOR COMPANY**
**59 GARDEN STREET**
**STAMFORD, CONN.**

Makers of the Schickel Big Six Motorcycle that is making history by pulling M. E. Gale and his family in a prairie schooner (one ton load) across the continent.

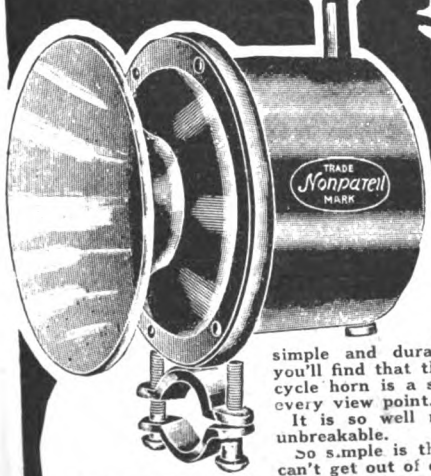
Majestic Mfg. Co. Worcester, Mass.

Think of the Price Last



Examine THIS horn, compare its efficient warning note with any other motorcycle signal—consider its lightness, compactness, appearance and simple and durable construction, and you'll find that the "BEE JAY" Motorcycle horn is a sound investment from every view point.

It is so well made as to be almost unbreakable.

So simple is the "BEE JAY" that it can't get out of order. A spring release friction rack presses a ratchet against an adjustable diaphragm, and presto—a harsh, growing roar is heard.

Now think of the price, $2.50, and you'll wonder how such a motorcycle horn can be procured for this low cost.

The "BEE JAY" is light, weighing only 21 ounces.

Dealers—get in touch with your jobber at once. Your horn sales will take a decided jump with "BEE JAY" in stock.

NONPAREIL HORN MFG. CO.
73-75 Wooster St., New York

$2.50

MESINGER
Air-Cushion Saddle

No saddle contains such remarkable quality features as does the Mesinger. Positively the lowest saddle position of any saddle made—by fully one inch. A centre compression that deflects saddle back an equal distance on each side—all sidesway eliminated.

Lowest Saddle Position
No Sidesway—Air Springing

And, finally, a springing system unique in its remarkable case and comfort. Powerful coil springs enclosed in a steel barrel, with air space at bottom, which effectively cushions all shocks.

# Compare the Rivets!

A comparison of the rivets of "The Coventry" Chain with those of others will instantly reveal a surprising difference in favor of

## "The Coventry"

***"The Motor's True Mate"***

The rivets on "The Coventry" are much heavier and larger than usual.

This means a greater resistance to strain and increased strength all around. That is one of the reasons why "The Coventry" is the strongest chain in the world.

$1 a foot retail. Write for our booklet, "The Motor's True Mate."

***The Most Popular Brake In The Field***

**CORBIN**

## DUPLEX COASTER BRAKE

The decided preference of bicyclists for the Corbin Duplex Coaster Brake is evidenced by the number now in use.

The majority of bicyclists have found out for themselves that for actual service the Corbin Duplex is the most reliable coaster brake equipment.

This popularity is the natural result of performance. The Corbin Duplex has won the bicyclists' preference by hard, steady work. It has proved its value on roads in all parts of the country. Bicyclists know that it is the strongest, most dependable, durable brake on the market—they know that it has no equal.

Equip your wheel with the Corbin Duplex—the brake of maximum service. Catalog on request.

## Comparison Tells the Story

## Check the Rogers

point for point with any other sidecar on the market.

Compare the Welded Steel Chassis of the ROGERS with the Cumbersome Connections and Brazed Joints.

The ROGERS All Steel Body, Test the Stiffness, Comfort and Stability.

Note the instantaneous Ball and Socket connections that relieve the motorcycle frame of all twisting strains.

Compare the Upholstering, Trimming and Finish.

In short, make any comparison you can think of, then you will buy a ROGERS.

The reasons are prominent and easily seen.

We invite the most exacting and critical examination and comparison, knowing that the farther you go the more strongly you will be convinced that whether you use or sell sidecars, you want the ROGERS.

**ROGERS MFG. CO.,** 328 West Madison Street CHICAGO

Irving Beck (Service Station) 1493 Fifth Ave., New York

# POINT OUT

To your customers that Neverleak Tire Fluid is the one RELIABLE TIME-TESTED puncture-healing preparation, the best for them to use. Tell them that

# NEVERLEAK

has been giving absolute satisfaction for 20 years.

It's so good that thousands of riders put it in their NEW tires to PREVENT leaks. Suggest that idea to your tire customers.

# FEDERAL MOTORCYCLE TIRES

"EXTRA SERVICE"

Federal Rubber Manufacturing Co. - Milwaukee

# Jones Valve Wings

are to take the place of the ordinary hexagonal nut furnished on the valve stem of motorcycle tires. The two wings make it easy for the rider to lock the valve stem firmly in place with his fingers, instead of using a monkey wrench or pliers. Should the nut become rounded the tools are practically useless.

## Time Savers

They aid in pulling or pushing the valve through the rim. A convenience that will not be overlooked by the veteran motorcyclist. Riders are always losing valve nuts. Are you prepared to furnish them with a real convenience. "The Jones Valve Wing"? They are fastened on cards (24 wings to the card) which are specially made for counter display.

# Firestone Cycle Tires SMASH World's Record!

In the 300 mile Motorcycle Marathon, Tacoma Speedway, August 15th, Firestone Motorcycle Tires smashed the World's Record three times. Sturdy and staunch, they withstood the terrific strain of the remarkable speed tabulated below:

HERE'S HOW THE WORLD'S RECORD WENT GLIMMERING

| Place | Rider | Time | Average Miles per hour. |
|---|---|---|---|
| 1st | Earl Armstrong | 3 hrs. 45 min. 29 9/10 sec. | 79 84/100 |
| 2nd | Otto Walker | 3 hrs. 51 min. 55 sec. | 77 61/100 |
| 3rd | Don Johns | 3 hrs. 54 min. 50 1/5 sec. | 76 65/100 |

**The first six riders to finish used Firestone Tires on *the rear wheel*—the wheel that gets all the gruelling grind, the tearing friction, the racking of swerve and twist mile after mile.**

Truly, a wonderful performance! And remember, Firestone Motorcycle Tires did all this in one race. They performed as they always do. They carried their riders swiftly and surely, and enabled three of them to smash the World's Record for 300 miles.

They did this because of their in-built Quality—the same Quality that is built into Firestone Automobile tires. Firestone Cycle tires have 4 plies of fabric. The ordinary cycle tire has three. The tread not only has more pure, live rubber than in others but also 30 per cent more angles against skid. Ask your Dealer about Firestone Motorcycle Tires—then order a set and enjoy

EMBLEM

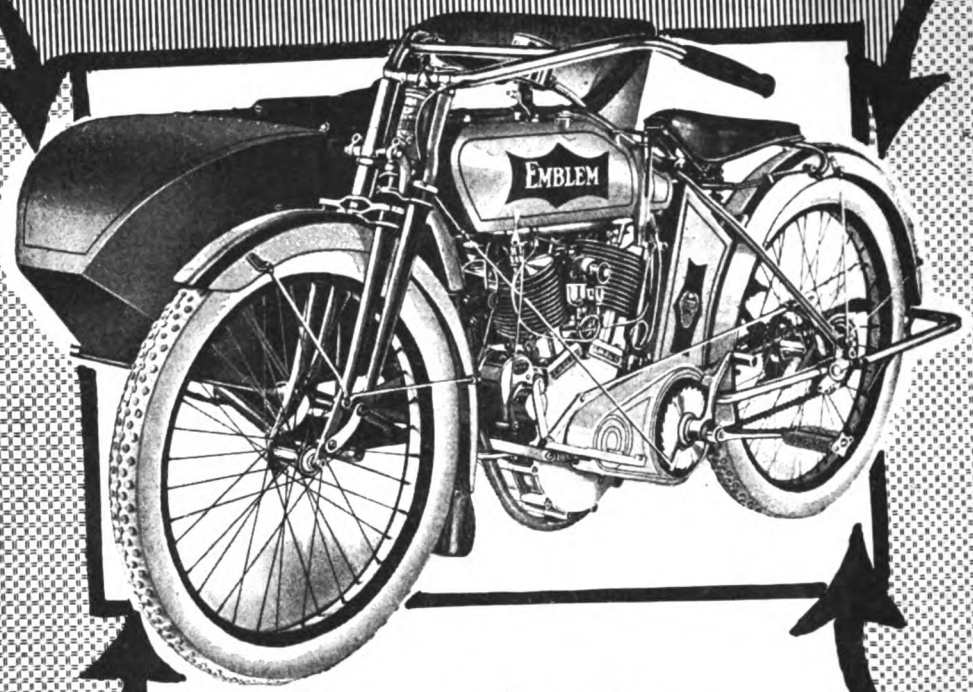
EMBLEM MFG. CO. ANGOLA N.Y.

## Speed

Every EMBLEM TWIN must make 70 miles an hour before it leaves the factory. This means that every EMBLEM rider has at his command practically more speed than he ever will need to use under ordinary circumstances.

## Power

A motor with 16 cubic inches more piston displacement than any other motorcycle motor. This accounts for the smooth, resilient, yet quickly accelerating power of the EMBLEM, which is much more than that officially accorded it in our catalog.



# The Emblem Fairly Radiates Quality

The dignified, yet classy appearance of the EMBLEM impresses the prospect at once. The lustrous enamel finish, the total absence of "loose ends," the long, smoothly curving handle bars, the big oversize tires, the husky, clean-cut motor, all tend to the impression of quality.

Dealers should investigate the EMBLEM agency proposition. The EMBLEM is a safe, solid representation to handle. Write us about it.

## EMBLEM MFG. CO.

ANGOLA, N. Y.

## Starting Ease

The EMBLEM Step-Starter is a marvel of simplicity and efficiency. It is so constructed that it can be fitted to any make or model motorcycle, easily and quickly. A quick-step downward and the motor is started.

## Reliability

EMBLEM records tell the story of EMBLEM reliability. Cross-country performances in mid-winter, over the worst possible roads — coast to coast trips, etc. for the past eleven years attest to EMBLEM service.

# Blue Streak Tires Bring Red-Hot Business

Dealers—put this big *spark* into your store *engine*.

Don't *lay down* on the hills and let the other fellow get the business.

Fill up your *stock tank* with Blue Streak Motorcycle Tires. Throw away your *crank* and be your own *self starter*. Shove your salesmanship into *high*.

Then watch your cash register speed by the *dollar posts*. Sell Blue Streak tires and you chalk your name among the winners on the Profit Scoreboard.

Hundreds of dealers already have Blue Ribbon sales records. But it took Blue Streak tires to capture them.

## Blue Streaks Pile Up Your Sales

The Blue Streak is the latest Goodyear tire creation. It is really the famous Goodyear Blue Streak racing tire, with vital new features added to make it a perfect road tire.

It has the famous All-Weather tread—like that on Goodyear Fortified Automobile Tires. The blocks are tough and extra thick—so they multiply mileage and cut the risk of punctures. They are flat and sharp-edged—so they grip the road firmly. Blue Streaks have the widest tread known—so they do not skid on turns.

These are the reasons Blue Streaks make eager buyers.

## Get This Service Station Offer

We have combined with this great tire a Service Station Offer that insures our claims that this tire is a sales-getter.

Don't linger by the wayside of old-time selling methods. Become a prosperous link in the Goodyear selling chain.

And remember there is no obligation in writing for this offer. For we consider our duty only half done in building the best in this Blue Streak.

We must aid you in selling them also, to prove our faith in their merit.

A postcard brings this high-powered selling plan. Write us now, else you may forget. Address Dept. 301

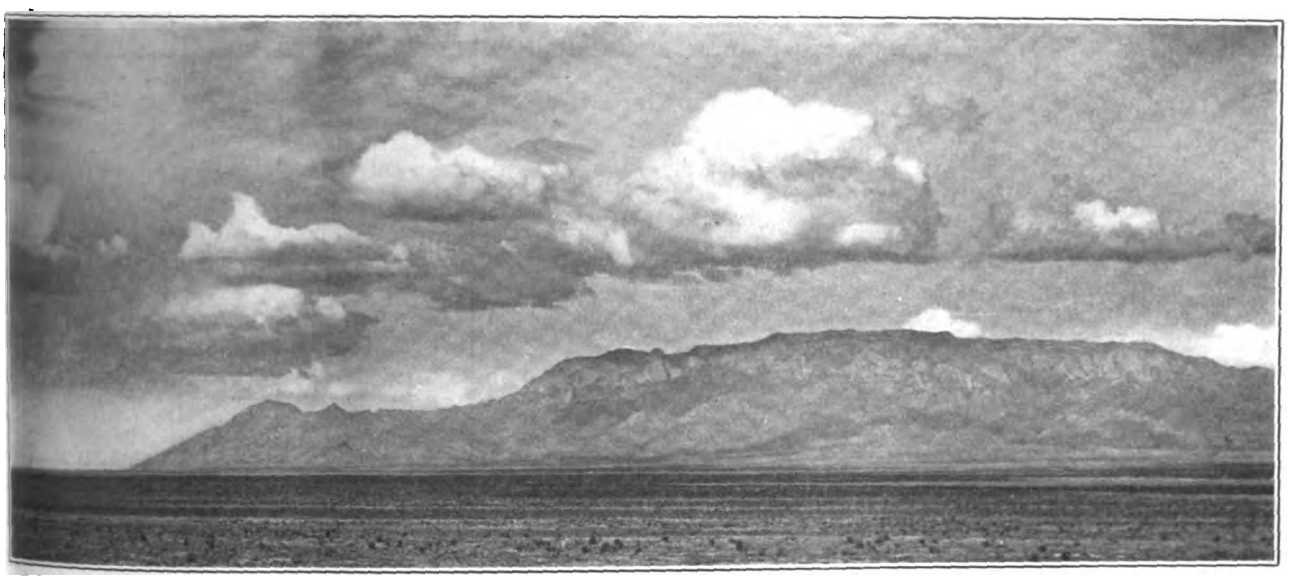
# How It Feels to Travel Above the Clouds by Motorcycle

*By John Strumquist, Jr.*

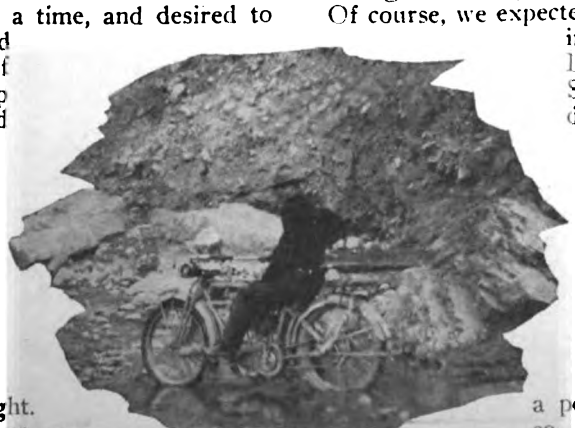


**The Sandia Mountains Which Were Scaled by the Author and His Companion on Motorcycles**

HAVING heard the motorcycle squad and automobile sports declare it could *not* be done, Kenneth Baldridge and I decided to do it. It was said that no motorcycle could make the climb up the rugged mountain-side to the Ellis ranch at the top of the Sandias. But Kenneth and I both lived in Missouri once upon a time, and desired to be shown a thing or two. We had heard much of the wild beauty of the scenery and the fine fishing up there on the rim of the range, and wanted to go anyway. If the effort to establish a motorcycle record should bring mishap, we didn't care. We had read what the great theatrical magnate, Charles Frohman, said just before he went down with the Lusitania: "Death," he said "is the most exquisite adventure of life," and we were impressed with the bigness of the thought.

But we had faith in our machines, and felt certain that life would not terminate in the "exquisite adventure" that befell those who ventured into waters infested by submarines. Perils of either minor or major nature would only add zest to the expedition. And because we were positive the single-trackers could do it, we didn't mean to be stopped by the croaking of auto sports.

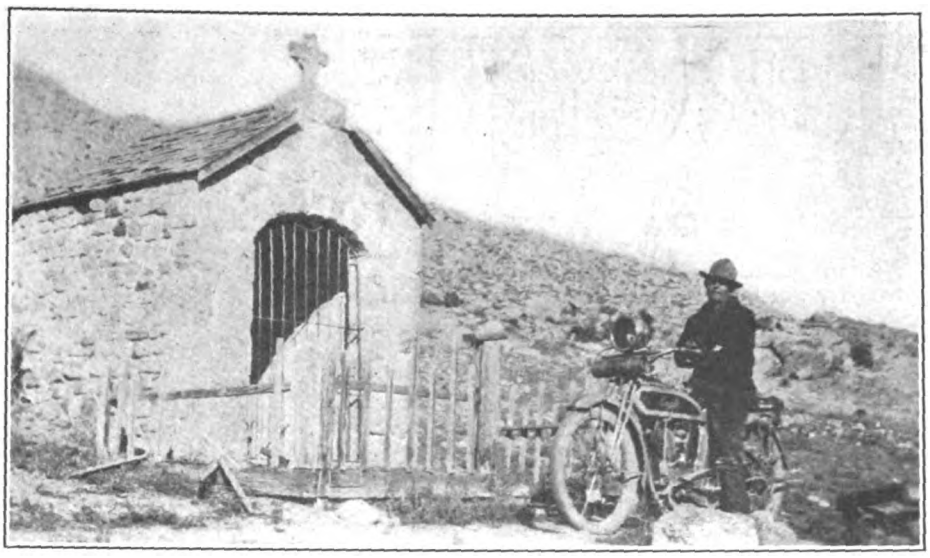
Of course, we expected our wives to object to trail-blazing up the mountains to the crest. But happily, Kenneth's wife was in Santa Fe, and he trilled the little ditty about "Where ignorance is bliss," etc., as he oiled up his machine and looked over his tires and tool-kit in preparation for the trip.



**Baldridge and His Mount**

Instead of protesting, my wife wanted to go along. She has the motorcycle craze worse than I have, and is always ready to explore new places on the single-tracker. But the tandem had lost a pedal, and was out of commission, so she could not go. I knew the hilly jaunt was too hazardous for a

Digitized by Google



A Picturesque Wayside Shrine

tandem pull, anyway. At 6 o'clock on a Sunday morning we were in the saddles of our motorcycles. Kenneth rode a 1914 Indian, equipped with a two-speed, and my mount was a 1914 Eagle without a two-speed.

Through Old Albuquerque, where early worshippers were leaving the ancient cathedral in which their ancestors worshipped for more than three hundred years, over the new convict-made boulevard, and through the sand patch that is the terror of local motorists we wriggled a crooked path to the little Mexican village of Placitas. From Placitas we started to "go straight up" and blazed a trail through the virgin wilds of a canyon towards the top of the Sandia (Watermelon) range.

The shadowy depths of the canyon, flanked with a dense undergrowth of pine and quaking aspen trees, presented a picture of jungle weirdness. A crystal stream, averaging a width of ten feet and a depth of two feet, worms its way back and forth across the canyon in such confusing manner that we were obliged to cross it twenty-two times in making the ascent, and as many times on the return trip, making our creek-crossing stunts count up to forty-four times on that memorable day.

Of course, we were wet to our necks but we didn't mind that. When we faced the stream to ford it, we would each time open up and make a grand run for it. Sometimes we landed right-side-up on the other bank, but oftener we collided with a boulder and found ourselves wrong-side-up some distance from the water. Thus, looping the loops of the tortuous canyon and pushing our way through mud, stones and undergrowth up a steep grade that rises twenty-five hundred feet in less than four miles, we leaned backwards, opened the mufflers and made the hillsides echo with the snorts of our gasoline steeds—spurred to the limit of their power.

In the Foothills of the Sandias

Now and then beauty spots of limpid pools, dimpling with speckled trout, lured us from the machines for a breathing spell. Then we hung ourselves across a ready-made cedar clothes-line to dry out. When we were quiet, the startled rabbits, quail, squirrels and chipmonks that had scampered away from us, would "mosey" out from their nooks in the underbrush to size up the doings of the queer beings that desecrated their haunts.

Bear tracks were thick all about us, but we were not prepared to meet Mr. Bruin. Neither Kenneth nor I had a firearm. But we knew that our machines could give the whole bruin family the fight of their lives in case we chanced to meet them, and, of course we knew we could out-distance any of them in a race.

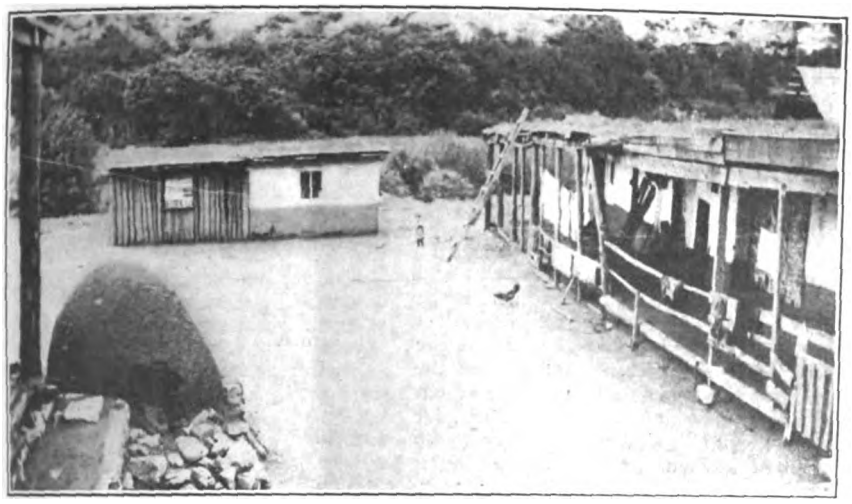
After a tremendous pull on the last leg of the climb, we arrived with hot clutches on the mountain crest at 10 o'clock. Breathless, wet, muddy and perspiring, we were in perfect condition to appreciate the exhilarating breeze, the tang of the pines and the picturesque scene as we threw ourselves down on the broad porch of the Ellis ranchhouse to exult in the conquest of the mountain.

The great, rustic house, built for hospitality by Mr. Ellis and his sturdy sons forty years ago when white settlers were few, told a story of pioneer heroism. The logs were all hand-hewn and had been brought up the steep cliffs on hand-made sleds, drawn by burro-power. The building is now the headquarters for the U. S. Forestry men who patrol this district of choice timberland. After a futile effort to enter the house (in order to use the telephone and talk to the motorcycle bunch in town) we wrote a card telling the foresters that they had missed "a call from distinguished motorcycle visitors," and shoved it under the door.

Then we strolled up and down, through the pine grove to the rim of the Sandias and looked out on a magnificent view for

Where the Convict Road-Builders Camp

Digitized by Google



**A Typical Mexican Patio or Courtyard**

two hundred miles on each side of the range. We were ten thousand feet above the sea level and five thousand or more feet above our homes in Albuquerque. Looking down on the mists in a half dozen canyons below us, we realized we were actually above the clouds! In Pino canyon to the left, an angry-looking cloud was spitting rain into the slopes, while we enjoyed the sun above the cloud. We stood at the top of the world and revelled in a vista for hundreds of miles, a vista tinted in the delicate shades that only a rarefied atmosphere and long distances can give. On one side the Estancia valley merged into the Great Staked Plains of Texas. On the other, a silvery ribbon, edged with green, outlined the fertile Rio Grande valley.

The trio of extinct volcanoes to the west, that form the sky-line in Albuquerque, had now shrunk to pigmies, and were outdone by the white San Mateos behind them. Northward loomed the heights of the Jemez summits. We had a feeling that we were not of the earth and the present era, but were superhuman creatures permitted to watch the operation of clouds in the canyons below us. An hour later we started on the homeward trip and proceeded to scoot down the slope, bombarding the solitude with our exhausts in a way calculated to terrify small game and cinnamon bear of that vicinity. I reckon we did. We glimpsed small game scattering but did not see Mr. Bruin.

Again we splashed across the stream twenty-two times, making forty-four crossings all told. Not a house or person was passed till we neared Placitas. Hungry as savages, we stopped at Placitas and bribed a Mexican *hombre* to give us a square meal for *doce reales* (twelve bits, or $1.50). The menu consisted of *queso de cavra* (cheese of goat milk), *tortillas, frijoles,* eight eggs and the Mexican's favorite beverage—coffee.

After this repast and a brief siesta I began to feel that I was about one hundred years old. Kenneth declared that he would break into a thousand pieces if he moved. However, he tried it without noticeable breakage. Then we shook off our desire to loaf and headed for home.

A quaint little rockhouse, open in the front, claimed our attention. It was one of the wayside shrines, or prayer stations, with a miniature altar of treasures, that have remained in this three-sided houselet for nobody knows how many years, sacred and unmolested by passersby. With our hip-pockets full of water, with the speedometers registering seventy-five miles and the machines and ourselves plastered with mud, we made a sensational arrival in Albuquerque at 3 o'clock in the afternoon.

The Indian had a rear mud-guard swinging in the air and the Eagle showed the effects of tussles with unruly boulders, by a broken front spring. Otherwise there were no damages. And a happier pair of gasoline pilgrims was never seen. Our motorcycles had out-motored the predictions of the autoists and had scaled the Sandias as far as the Ellis ranch—and somewhat beyond!

But that is nothing. Now that we have reached the high places of the Rockies, we plan to travel on our motorcycles in the other direction. We expect to start a motorcycle jitney service on the celebrated "Bright Angel Trail" of the Grand Canyon of the Colorado, and take passengers on our trusty two-wheelers down into (as Irvin Cobb calls the Grand Canyon) "the gizzard of the world" and explore the bowels of the earth. But some of these plans are a little vague as yet.

# Costuming the Lady Rider

## Some Well-Founded Criticisms and a Batch of Helpful Suggestions

***By the Wife of a Dealer***

MUCH has been said about the dress of men motorcyclists, and every article in the trade journals seems to make the same appeal for neatness and cleanliness. But little or nothing seems to have been said about the attire of women motorcyclists, an omission occurring probably through the courtesy of the editors, who, fearing to appear over-critical, have hesitated to touch upon a delicate but necessary subject. Being a woman, one interested in the trade, and one of keen athletic enthusiasms, I am taking the liberty of making some suggestions and expressing a few opinions gleaned from passing comment and observations while sitting on the Hotel Worden veranda at Saratoga Springs.

Why a woman's expressions of self in her choice of a mount and her choice of costume should be so antipodal is hard to fathom. What she can discover in the way of feminine appeal or womanly attractiveness in partially buttoned shoes, greasy, oily divided skirts, skimpy, wrinkled riding skirts, or men's clothes, is beyond the ability of the writer to imagine.

### The Matter of Changing

Why she should think only one costume is necessary for a three to six day jaunt is likewise a puzzle. The girl at the seashore has her bathing suit made in the latest fashion and her shore clothes; the girl who plays basketball has her gymnasium suit and her street suit; the girl who is a guest for a dance has her dancing frock and her afternoon clothes, and so on through the entire list of feminine activities, including golf, tennis and horseback riding. But in motorcycling it seems to be a case of "any old thing" all the time. From the fellows I heard frequently enough "There goes a good rider"; but the ardent exclamation of "Gee, fellows, there goes a peach," was reserved for girls prettily gowned.

In answering all these "whys" one instinctively knows that there is nothing about the sport that makes unattractiveness necessary; nor is the desire to appear unattractive a feminine attribute. Quite the contrary. It would seem then that it is the rider's inability to conceive of a desirable riding costume.

### Some Suggestions

These remarks apply to both the tandem and individual rider. For the sidecar devotee the problem is already solved by her automobile sisters, and very excellently have they solved it.

In choosing a material one fundamental law should be remembered—only goods which will show dirt have the power of looking clean. Goods which do not show dirt look like dirt and necessarily appear dirty. Only upon one condition would I ever choose Khaki, that being that I was willing to take the time and energy to apply liberal quantities of soap and water after every trip. Fine black and white checks are good, certain grays, in fact, any material which in itself has the quality of appearing "natty."

The style of making comes last but not least, and in this I'm going to advocate the type of costume being planned by the wife of a representative of a prominent machine, namely that worn by horseback enthusiasts. As every one knows, every mode of dress has been tried out for horseback riding and the present day combination of full breeches buttoning into puttees, shoes and three-quarters length

**(Continued on page 46)**

# Sidecar and Passenger in Endurance Runs

## What Each Should Have to Obtain Best Results

*By Courier*

THERE seems to be a general impression that anyone who can ride for a certain length of time in a sidecar is all right as a passenger in an endurance contest; and that any sidecar, with perhaps a few tools and spare inner tubes, is good enough for such contests. However, this impression will suffer considerable alteration after the first real endurance contest has been gone through and the driver will have his score, as a pretty good proof that he was wrong in taking a "scratch" passenger and a sidehack fitted for boulevarding only.

I won't go so far as to say that the sidecar competition passenger is "born and not made," but I will say that the most desirable one needs certain qualifications. The first of these is that he should be thoroughly posted in sidecar work. This means that he should know when to lean out to keep the car down on a right-hand corner or steeply-cambered road, and when to lean in or take to the luggage carrier on left-hand turns. He must know when to get on the carrier or back connection in order to assist traction, for no driver knows when he will get into slime that no motorcycle motor ever built could get a combination through with the passenger in his seat.

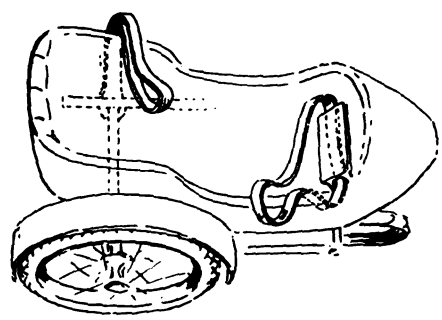
### Co-operating With Driver

The passenger should have further accomplishments. He should be able to make carbureter adjustments from his seat, with the combination running on any decent road or climbing a long hill. In schedule runs he should be an accurate timekeeper and have a sharp lookout for turns in the course. He must be able to shift with the driver in case of necessity, taking up the latter's duties at any minute.

Having pondered over the above qualifications for a competition passenger, the reader will not wonder that I feel that lady passengers and males who are not of active and hardy constitutions should not occupy the upholstered seat of a sidecar in a real endurance run.

### Desirable Sidecar Fittings

But in spite of all good intentions and ability on the part of the passenger, if the sidecar is not fitted with suitable devices for the work, his efforts will not have the desired effect. There are times when the passenger may have to lean pretty far out to keep the machine from overturning, for example, and he will not be eager to do this if he has but the insecure grip of his hands on a body panel to keep him from being left by the wayside. However, if a pair of straps are rigged to the car, he can put his weight way out, with the assurance



Sidecar with Straps in Place

of being safe and of getting into the car again when the time comes. Such a pair of straps are shown in the first illustration. The Harley-Davidson or Rogers sidecar is used as an example of one nicely adapted to such competition.

There are two straps, one attached to the sidecar foot-board and the other to the frame where the axle is attached to the long side-member. These straps should be of *real* leather and should be long enough to allow the passenger to lie out with only his feet in the car. The front strap should pass under the foot-board from right to left and should form a loop, this being easier for the passenger to grasp. The rear strap, also looped, can be carried over the passenger's shoulder without inconvenience during the time he is seated. The rear strap comes in handy when the passenger has to take to the carrier or back connection to assist traction.

### Carrying Spare Oil

The reason for running the front strap under the foot-board from one side to the other, is to keep the board clear for an extra can of oil or of fuel. This should be mounted on a stuffed burlap "saddle" before being strapped in place, otherwise, the passenger's ankles will suffer, and his shoes get soaked with leaking oil or gasoline. Again, leather straps should be used for holding the cans, as webbing will stretch and the can damage itself and the passenger.

I have found that two fine preventers of spring-breakages are tire-tape and braided cord, the latter about ⅛ of an inch in diameter. There are to be wound on the spring leaves from butt to shackle or end. They act as rebound reducers, as the same time reinforcing the leaves. Probably, the tire-tape will answer just as well as the cord, and will be easier to apply.

### Keep Weight to Rear

Apart from the spare oil and fuel cans, keep all weight as far as possible toward the rear of the car. The combination rides better all around with the weight over the axle or close to it. Lastly, have the car and motorcycle lined up absolutely true, vertically and horizontally, if you don't want to be let down with broken connections or a motorcycle frame that has gone bad.

If the passenger is photographically-inclined, let him choose a camera that he can carry on his back or in his pocket, for the instrument will get plenty of hammering in even a hundred-mile ride.

# Extra Air Valve Has Many Uses

## Little Inlet Pipe Fitment Enables Fuel to Be Saved and Prevents Carbon Deposit

*By Stanley Rosebery*

IF you live in the country where the roads are deep in dust and hills are as scarce as teeth in a canary's beak, this won't interest you at all, so don't read any further. If you ride, on the other hand, where all kinds of roads, with steep grades and occasional fine surfaces are met with you may or may not think as I do, about the value of a little device fitting into the inlet pipe of a motorcycle motor. At any rate, if you have never used one, read this short article about the extra air valve and what it will do, and I think that you will agree with me.

Briefly, the extra air valve is an air shutter or some sort of valve designed to admit air into the inlet pipe and cylinders. It can be used to good effect for coasting or as a brake, as well as for increasing speed on the level. In the first and last cases, it saves considerable fuel; in coasting by preventing the cylinders from taking in gas and wasting it going down hill, while in speeding, where the motor is not doing much work, it reduces the amount of fuel taken in at each admission stroke. In both cases, it tends to keep the motor cool by giving it fresh air, a very valuable thing in mountain work where warm motors are the rule.

### Use as a Brake

The extra air valve can be used as a brake whose effect can be varied at the will of the rider or sidecar driver. It is better to use the valve in connection with a short-circuit button or switch, as the holding-back power of the motor can then be regulated by the air admitted without running the chances of having the motor burst forth into song and get out of hand. I have found such a device very valuable in three years of sidecaring through the mountains of Pennsylvania and New York, and at present would not be without one, although I do not always use it.

With the extra air valve in the inlet pipe a more intimate mixture can frequently be secured. The mixture as it comes from the carbureter is often full of little bubbles of almost pure gasoline, and as these are simply burned in the cylinder without doing any work, the sooner they are broken up and made to give power the better for the

Digitized by Google

motor and the rider's pocketbook. The extra air, coming into the pipe, assists in breaking up these bubbles and giving the much-desired fine spray of air and gas which spells power and fuel economy. That's why I mount it in the inlet pipe. When it is opened wide or nearly so, it breaks the suction of the motor and thus saves fuel by not drawing on the carbureter.

**Prevents Carbon Deposit**

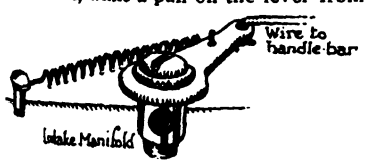
There's another way in which the air valve saves. It prevents carbon deposit from oil sucked past the piston rings and burned in the combustion chamber. If there is no suction there will be no drawing of the oil past the rings, and the lubricant will go on doing nothing but its proper work—that of making the parts run easy.

But to get the best results from an extra air valve it ought to be easy to handle, and by this I mean it should be right at hand. So the controlling lever should be on the handlebar, right close to the throttle grip where the thumb or forefinger can move it to open or close the valve in quick time. If it is on the other grip, the rider may be caught with his hand off the clutch or gear-shift sometime when it ought to be there, in operating the extra air. If you have to move your hand off the bar to open this or that, you may stall on a hill or drive into something, so keep the operating lever close to the grip.

**Where To Fit It**

The best place to fit the extra air-valve on twins is at the center of the inlet pipe, at equal distances from each cylinder. On a single cylinder, fit it close up to the inlet valve, and on a four-cylinder motor fit it close to the throttle, or just where the manifold starts to branch for the different cylinders.

The illustration shows an easy adaptation of one of the revolving cover valves used on many motors to give extra air. The cover is operated by a flat piece, bored at the enlarged end to fit it and pierced in two places near the other. The holes are for the end of the operating wire and for the pull-back spring. The latter, shown fitted to the "lever" and to a screw set in the inlet pipe, should be arranged to keep the cover closed, while a pull on the lever from



Lever on Extra Air Valve

the handlebar should open it. The spring could be anchored to some part of the motor as well as to the screw. The arm of the lever need not be more than 1½ to 2 inches long and the lever itself can be made of iron or steel about ⅛ or 3/16-inch thick. The lever is fitted to the cover by soldering, and can be worked to shape with a file or ground down on an emery wheel.

### MOSQUITO HUNTERS USE THOR

Paterson, N. J.—The Passaic County Mosquito Extermination Commission is now using a Thor to aid in its work. The machine was bought from the local agent, Charles B. Vaughan.

# MILWAUKEE M. C. HAS HILL-CLIMB

## Becker's Hill Near Menomine Falls Is Scene of Some Spectacular Work by Clubsters

MILWAUKEE, Wis., Aug. 15.—One of the most successful hill-climbing contests ever conducted in these parts was staged today by the Milwaukee Motorcycle Club on the famous Meeker's hill at Meeker, Wis., about four miles beyond the village of Menomimee Falls. The hill, sometimes called Becker's hill, is about half a mile long with a steady grade, which, while it is not very steep, has a rough rocky surface and a bad S turn near the top.

Oscar, "Reckless" Becker, on a Harley-Davidson, made the fastest time in the professional class, 13⅗ seconds. Royal Luther, Harley-Davidson, was clocked in 14⅖ seconds for second place in a single trial. In his second attempt he miscalculated the twist in the hill and slid almost all the rest of the way up on his ear and one toe, the machine preceding him by several yards.

Third place went to L. Deswert, on a gray boy also, in 15 seconds flat. Lewis "Red" Hadfield, the club's own little mile track racing demon, brought his Harley-Davidson racer with rigid forks and small tires, both of which speed enhancers on the dirt only served to deter him from making fast time on old Becker.

**Grier Wins in Amateur Class**

Charles Grier, the club's president, demonstrated that he could put it all over the rest of the gang, when he shot his Excelsior up the hill for first place in the amateur class, thereby winning the Firestone casing offered by Louis Petrick, new manager of the Mueller Cycle & Supply Company, the local Harley-Davidson dealer, which casing Charlie avers is going to come in handy for his contemplated Eastern ramble in company with C. J. Andrae.

Elmer Owen, the club's Beau Brummel, shot his immaculate Indian and still more immaculate self, into second place, thereby winning Louis' $5 lamp. The prize for making the hill most gracefully is a tie between President Grier and Owen, for both rode the treacherous hill and bad turn without the slightest evidence of a fluster.

Milton Kadau on an Excelsior took third prize, an inner tube. Kadau's riding was the most spectacular in the amateur class, and demonstrated that his motorcycle riding ability was as great as his talent for sign writing.

H. E. Baldwin, state F. A. M. referee, superintended the running of the meet. William Chesak, E. J. Mueller and Lacy Crolius did the timing, while T. A. Miller was clerk of the course. George Melcher started the riders away. Despite the fact that the hill is nearly 20 miles away from the city and that the best roads were blocked for repairs, there was a large delegation of speed fans on hand to witness the climb.

### SCHACK'S ANNUAL TRIP

Angola, N. Y., Aug. 14.—William G. Schack, president and general manager of the Emblem Manufacturing Company, reports that they are doing a very brisk business, particularly in bicycles. He also informed the "M. I." correspondent that he will leave on his annual business trip to the coast August 21, stopping at Chicago, St. Louis, Kansas City, Denver, Salt Lake City, Los Angeles, San Francisco, Portland, Seattle, St. Paul, Minneapolis and other points.

### ON NATIONAL ADVISORY BOARD

Ralph H. Upson, of The Goodyear Tire & Rubber Co., winner of the International Balloon trophy in the race that started at Paris in October, 1913, has been selected a member of the special committee to cooperate with the Naval Advisory Board in its consideration of the application of aircraft to warfare. President F. A. Seiberling, of The Goodyear Tire & Rubber Company, also, has been made a director of the American Society of Aeronautic Engineers, organized at the suggestion of Thomas A. Edison to act with the Naval Advisory Board, of which Mr. Edison is chairman.

### MIAMI LIGHTWEIGHTS FOR POLICE

The New York Police Department has purchased twenty Miami Power Bicycles for use by the traffic squad. The machines will be delivered in a few days. The sale was made through H. A. Gliesman, president of the Miami-Merkel Company and also Eastern representative of the Miami Cycle & Mfg. Co.

### CALL FOR MOTORCYCLE BIDS

Owensboro, Ky.—J. H. Hickman, mayor of Owensboro, Ky., has advertised for sealed bids for two motorcycles which will be purchased for the use of the police department. Several of the local dealers have placed bids already with the mayor's office.

### APPLETON DEALERS GAVE PICNIC

Appleton, Wis., Aug. 15.—Albert Deltgen and William Groth, motorcycle dealers in the city, were the hosts to about thirty-five riders at Sunny Slope. After a big dinner a program of games was started, but rain interfered and drove the party indoors. The return trip was made early in the evening.

### LEXINGTON, NOT LOUISVILLE

Louisville, Ky.—In the August 12 issue of **Motor Cycle Illustrated** it was stated that the Jones Drug Company, Harley-Davidson dealers, were about to build a new home in Louisville. The Jones Drug Company is at Lexington, Ky., and has the Lexington agency. The Louisville agency is held by Kline Brothers.

### KOPPERMAN IN CHILE

A. Kopperman, who is travelling South America in the interests of the Smith Motor Wheel and Dayton motorcycles and bicycles, is now in Chile. He will go to Argentina and Peru after covering the principal Spanish-speaking South American republic.

Digitized by Google

### DEMONSTRATED WITH A TRAILER

In the accompanying photograph is shown a Reading Standard motorcycle which made motorcyclists of Erie, Pa., sit up and take notice by the manner in which it whisked the attached trailer through the streets of the city recently. The machine, which was demonstrated by the Erie Motor Sales Co., local R-S agents, pulled the 600-lb trailer and its 175-lb. passenger and carried the 165-lb. rider without the slightest difficulty.

### HOLDS MOONLIGHT RUN

Jamaica, N. Y.—The Jamaica M. C. of this city held its first moonlight run on August 7, the course being from the clubhouse to Massapequa and return. The start was made at 9:30 p. m. and the Hollis Arms Hotel was reached at Massapequa at midnight in time for a big dinner. Dancing followed the "eats," and an impromptu vaudeville was gotten up before the start for home. The committee in charge of the affair consisted of Road Captain F. Frenger, S. Bedell, President W. Geiser and H. H. Walker. A midnight endurance run is now being planned, the course of which will be on Long Island.

### OFF FOR PACIFIC COAST

Columbus, Ohio.—R. F. and Walter Geis, brothers, living at 807 East Main street, Columbus, Ohio, left last week for a trip to the San Francisco exposition, in a motorcycle and sidecar. They expect to take thirty days for the trip and will probably be on the coast for six months. They took camping equipment along and will camp at night along the roadside. The machine is a Pope and a Flxible sidecar is used.

### COST TWELVE CENTS A DAY

Reno, Nev.—George Aeberhart, rural route carrier out of the local post office, has been using a Thor for the past three years, having covered a total of 20,000 miles on it. He has figured that the cost of his machine for that time and mileage was 12 cents per day, all told, while the figures for a horse and wagon showed a cost of at least 99 cents per day. There are four rural route carriers in the whole State of Nevada, but Aeberhart is the only one using a motorcycle.

### SETTING GOOD EXAMPLE

Newark, N. J., August 16.—The local Board of Education, unlike the Post Office Department, has seen light and has equipped Joseph D'Agnola, Physical Director, with a Harley-Davidson sidecar outfit.

Mr. D'Agnola's duties require visits to all of the city's playgrounds and much traveling time has been saved since the installation of the sidecar outfit. The sale was made by Carl W. Bush, Harley-Davidson agent for this section.

### RACINE BREVITIES

Racine, Wis.—The number of accidents on the concrete roads north and south of the city on the Rapids roads has prompted the county board to make an appropriation of $250 for the services of a motorcycle deputy, De Grove Lutter having been appointed for the job. He is to be attached to the sheriff's force but will come under the supervision of the district attorney. Lutter rides a Harley-Davidson.

About fifty members of the local club attended the second race meet at Milwaukee, headed by Thorwald Peterson, captain.

Robert Wingate and H. P. Clark of Boston stopped in this city on their way from Milwaukee. The complete wireless equipment, capable of sending waves four or five miles, created quite a sensation when the people came through. Wingates and Clark carry 1,872 pounds of luggage on their sidecar outfit.

### THE NEW MICHIGAN LAW

Detroit, Mich.—The Secretary of State has compiled the new motor vehicle law in pamphlet form. It becomes effective January 1, 1916. Under this law all motorcycles will be taxed 25 cents a horse-power and 25 cents a hundred weight. The right of civil action in case of accidents is changed so that the owner shall not be liable after January 1 unless his machine is being driven by his express or implied consent.

### MOTOR WHEELS 2,008 MILES

Jamestown, N. Y., August 16.—L. W. Collins, of this city, reports another remarkable performance of the Smith Motor Wheel. He has ridden his Motor Wheel 2,008 miles, according to his cyclometer, and the motor wheel has not even missed an explosion. Half the 2,008 miles has been over rough country roads in this section of the state.

### LOOK OUT FOR HIM!

Passaic, N. J.—A motorcycle policeman has been placed on Paterson avenue, which separates the Boroughs of Wallington and East Rutherford, to prevent speeding. This is one of the main arteries between New York, Passaic and Paterson. Because the road divides two municipalities, the officer has been appointed a deputy sheriff with power to make an arrest in either borough.

### NOVEL SIDECAR FOR SPEED WORK

G. B. Brown, the crack Canterbury (New Zealand) motorcyclist, and W. Hollobon, on the former's 4 h. p. Triumph and sidecar, in which he made the fastest time from scratch in an 8-mile sidecar race, at New Brighton beach, Christchurch, recently. Out of ten starts this season, Mr. Brown has secured five firsts, and nine fastest times. The sidecar is interesting to American motorcyclists as showing the distinctive type used for speed work by the New Zealanders.

# Plans Complete For Big Rally of Bronx Ass'n At Savin Rock

*Albert Freyberg, Acting President*

*Wallace Stuart Secretary-Treasurer*

BRONX, N. Y., August 17.—Entries for the social run of the Bronx Motorcyclists' Association to Savin Rock on Sunday, August 22, are coming into headquarters thick and fast, and final arrangements have been made with various motorcycling organizations in other cities to join the main body en route. The start will be made from Columbus Circle by the main division, the way out of New York City being taken over Broadway, Jerome avenue and the Concourse to Fordham and Pelham Roads. On the latter highway, the run will continue to New Rochelle, then onward through Port Chester, Greenwich, Stamford and Norwalk to Bridgeport, Conn., where a halt will be made. At Bridgeport, the entrants will be guests of the Excelsior M. C. at 266 State street, and refreshments will be served there. The final leg of the run will be to Savin Rock, near New Haven, the terminus being at Moegling's Beach House. Ample parking space is there provided.

The middle division of the run will leave Worcester, Mass., at 7 a. m. on Sunday, passing through Springfield, Hartford and Meriden to Savin Rock and New Haven. The western division will leave Poughkeepsie at the same hour, coming across through Stormville, Pawling and Danbury, joining the main body at Bridgeport. There are a number of clubs or individual riders who will also meet the whole tour at the Rock, or who will join at any place en route they desire. The association extends an invitation to all riders in New England or the Middle States to participate in the excursion. There is no entry fee.

At Savin Rock a shore dinner will be served, tickets for which can be had from the committee of the association or at the Beach House. A panorama picture will be taken at 2 p. m., after which the riders can do as they wish. Savin Rock is an amusement place of the first order, with excellent bathing facilities. Those desiring to enter the run should communicate with Wallace Stuart, the Association secretary, at 1010 Washington avenue, Bronx, N. Y.

## UNCLE SAM BUYS MOTORCYCLES

Washington, Aug. 16.—Two electrically-equipped two-speed Indian motorcycles, fitted with sidevans, were this week delivered to the Government printing office by Osborn & Leishear, Indian agents. These outfits have been added to the large fleet of motor vehicles by the big printery, and will be used in delivering parcels and small packages to the various Government departments and to the Capitol building.

Early in the season Osborn & Leishear delivered two three-speed, electric equipped Indians, fitted with tandem and extra heavy tires, to the Engineer Corps, stationed at Washington Barracks, this city. These machines have been in use several months in messenger service and other work of the Engineer Corps.

During the present season eleven Indian motorcycles have been delivered to the Washington police, seven coming from Osborn & Leishear, and four from H. A. French & Co.

## FABIAN ON CYCLONE TEAM

San Francisco, Cal.—"Dutch" Fabian, the Excelsior speedster from this city, has joined the Cyclone racing forces. He succeeds Don Johns, who recently joined the Indian racing ranks.

# Show Applications Are Piling In

"REQUESTS for space before application blanks were sent out were gratifying in the extreme, and the way applications are coming in (although only a few days have elapsed since they were mailed) point to a larger number of exhibitors than at any previous show," writes Manager A. B. Coffman in referring to the preliminary arrangements for the Chicago and New York motorcycle, bicycle and accessory shows. As already announced, the Chicago show will be held at the Coliseum September 20-25, and the New York display will be staged at Madison Square Garden, October 11-16.

Manager Coffman calls attention to the opportuneness of the Chicago show and points out that the jobber who exhibits will have a chance to see the visiting trade before his travelers start out. Motorcycle, bicycle and accessory manufacturers will also be enabled to give the jobber and dealer samples and prices of their new goods in time for the 1916 catalogs, thus placing them in a position to get an early start on new business.

Ten thousand circulars concerning the shows have been sent to dealers all over the country, and 100,000 stickers are being sent out by the trade on letters, in addition to which ample advertising space will be used in the trade journals. It is stated that the Pacific Coast will be unusually well represented at this year's shows, the coast tradesmen with very few exceptions having expressed their intention to be present.

Applications for space in either show, or for information concerning any phase of the big exhibits, should be addressed to Manager Coffman, 414 Ohio Building, Toledo, Ohio.

### WEILAND AND WEBB RETURN

Newark, N. J., Aug. 14.—Chas. Weiland, Jr., who left town three weeks ago with Chester Webb for a sidecar trip to Cleveland, O., returned yesterday with his left arm in a sling. After encountering much rainy weather, washed-out roads, just escaping the Erie, Pa., disaster, and sleeping in hay stacks and barns, Weiland's motorcycle frame broke, throwing him to the ground and spraining his shoulder. This occurred near Syracuse, N. Y., on the homeward trip. He returned via railroad, while Webb gathered up the remains of the machine and sent it on by freight. Webb came on to Newark by sidecar and arrived safely. Both boys look well and have great tales of their 1,500 mile trip through New York, Pennsylvania and Central Ohio.

### BIG MILEAGE FOR MINISTER

Omaha, Neb.—Eight motorcycle tours totalling over 16,000 miles is the record of the Reverend Mr. R. W. Taylor, pastor of the Parkdale Presbyterian church in this city. Each of these tours have been taken during a summer vacation of one month and each has been through a different section of the country.

Pastor Taylor recently rode from Omaha to Boise, Idaho, in twelve days, after which he left for further motorcycle explorations in Idaho. He will return to this city in a few weeks.

# BIG DOINGS ON FERNANDO TRIP

## Sexton & Berry's Genial Crowd Pulled Off Some New Stunts After a Pleasant Run

LOS ANGELES, Cal.—"We'll never forget the day ....." is the song they sang as the Los Angeles Merkel riders separated Sunday night after the big stunt picnic, the third annual San Fernando Valley trip led by Sexton and Berry. Joaquin Vissus, as usual, opened the fun. He has been "Gasless" Vissus since the Arrowhead event, but now his joy name is "Goshgimmeapin." Sounds like Indian, and Joaquin was doing an Indian dance when he said it. It was just after he had met a Buick running wild at the corner of Ninth and Broadway. The Buick hit him below the belt, and pillaged his khaki trousers, impelling Harry Sexton to tell Joaquin quickly that this was no B. V. D. picnic.

All was happy and according to routine through the events at Micheltorena Hill, where Roy Du Granute won the climb. Then everybody rolled out to the San Fernando hundred-mile speedway and there the stunt events were pulled off for prizes of the best accessories, donated by Sexton & Berry. A Streed won the 100-yard foot race, pushed hard by Brenner. Mrs. Albert Helms showed the real footwork in the 50-yard event for ladies, but Mrs. Adams did the classiest thing by fainting at the finish and sliding over the tape to second prize unconscious. Brenner got the horn for first with an 11-foot standing broad jump, and Newton More won the motorcycle slow race on a belt-drive Merkel.

Then came the circus event of the day, the trouble race. Berry had the riders set their machines up in line, and go off out of sight, and then he got busy with each machine and his pliers and monkey wrench, and "dinged" 'em good. At a signal they all rushed to their mounts and hunted trouble, and some of them found it and made the race, while others stayed right at the line and perspired and said what they thought. Harry Sexton got off, but stuck in the middle of the race, while Walter Ulm, whose valve had been turned off, developed a leak that let the gas through and he came in to claim the prize and turn the laugh on Berry.

The next was a plug race, where everybody rode a distance, turned, and 100 yards from home dismounted, took out both hot spark plugs, laid them on the saddle and finished with a sprint. This was a surprise to the foxy boys who loosened their plugs on the Q. T. before the start, because the starter went over the machines and Mr. Wise Boy with the loose plugs got them put in nice and tight while the crowd chuckled. When they got to the dismounting line they all thought Newton More was chasing hornets. He had slipped his pliers in his pocket that had a hole in it, and they slid down his leg, and Newt sure did some fancy diving.

K. B. Keats won the Merkel three-mile, Roy Du Granute the tandem, and the 100-yards from standing start, motorcycle against man afoot, was a cinch for the wheels. Al Roades had come along on his Harley and Sammy Hamilton on his Indian, and Overstreet on his special Indian, to make the free-for-all a real race. Harry Sexton won it on his Merkel, and then cleaned Overstreet in a consolation race he asked for, and then someone said Harry was the only one that could ride the machine and Hamilton got aboard and cleaned the bunch with it. The day was marked by two more collisions with reckless automobilists, but no rider was seriously hurt.

## THREE RECORDS FALL AT TACOMA

### Armstrong (Indian) Wins 300-Mile Race; Walker (Harley-Davidson) Second; Johns (Indian) Third.

TACOMA, Wash., Aug. 16.—Three motorcycle world's records were torpedoed without warning at the Mountain View speedway yesterday in the 300-mile race when Earl Armstrong, astride an Indian, finished the triple-century in 3:45:27 9/10.

Otto Walker, Harley-Davidson, finished second and also lowered the world's record for the distance, his time being 3:55:55. Don Johns, Indian, was in third position, in 3:54:50 ⅕, which also puts a crimp in the old mark for 300 miles. Armstrong's average speed was 79.84 miles an hour. His time for 100 miles was 1:13:41 ⅘, and he covered the 200-mile distance in 2:16 flat.

H. Cogburn, Harley-Davidson, finished fourth; E. Berreth, Harley-Davidson, came home in fifth place, and E. Filmore, Harley-Davidson, was sixth.

Don Johns led the field in spectacular style for fifty laps, at ten miles an hour faster than any previous record for the distance, but finally developed chain trouble and fell back to third place.

Ray Day, a Merkel entry, had ill luck from the start. His front tire went out in the first lap, causing him a short delay, and in the eighth lap he was retired for keeps by a cracked gas tank.

Carl Bruce, on a 1912 stock Excelsior, made 94 laps in good style, only to be forced out by mechanical trouble.

Ray Creviston, from whom much was expected, rode a pretty race till the 104th lap, when he was retired with a broken countershaft.

J. Bergstadt, a Thor entrant, failed to finish.

One of the notable features of the race was the manner in which the tires held up on the lattice track under the long grind. All the riders to finish used Firestone tires, and aside from the blow-out experienced by Ray Day no tire trouble worthy of the name was recorded. Armstrong, the winner, made only one change; Walker did not make a change, and Johns made two tire stops, both due, however, to loose wheels.

G. C. Marks represented the F. A. M. as referee, and the judges were J. Quinlan, H. H. Whiteside and E. Q. Reynolds.

Ideal weather and the stellar lineup for the big race brought out an enthusiastic crowd that filled the stands and rails.

Excellent team work in the pits had a great deal to do with the work of both Armstrong and Walker. Armstrong's pit men changed tire and put in oil and gas in the record time of 2 mins. 15 secs.

## SARGENT LANDS KOKOMO CENTURY

### Indian Rider Wins 100-Mile Event After Hard Tussle With a Lively Field.

KOKOMO, Ind., August 16.—Clarence Sargent, of Indianapolis, riding a stock Indian, won the 100-mile race at Kokomo on Sunday from a field of the fastest half-milers in the state. Sargent's time for the century was 2:12:45. The winner made one stop for fuel. Considering the fact that the track was little more than a cow pasture a month ago, his performance is regarded as particularly creditable. Suddeth, on a Thor, gave Sargent something to worry about throughout the race, pushing him closely, but he was unable to negotiate the difficult turns at the same speed that the victor maintained.

Amos, on his Merkel, and Grell, riding an Excelsior, rode neck and neck for the first 25 miles, until Amos dropped out with mechanical trouble. Grell then held the lead for 20 miles. Later he developed trouble which cost him several laps. At this juncture Sargent took the lead and was never again headed.

Shaffer and Meyers, on Indians, were in the race at all times and gave the leaders a hard tussle at certain stages of the contest. Meyers, while riding in third place, took the only spill of the meet. He went down in the 90th mile, and Grell, who had got back in the running, then took third place. Suddeth, riding very consistently, finished two laps behind Sargent.

This was Kokomo's first 100-mile motorcycle race and a big crowd expressed satisfaction over the work of the speedsters and the general handling of the program.

### TWO RACES ON LABOR DAY CARD

East Palestine, Ohio, August 14.—The Trades and Labor Council of this city will stage a race meet under F. A. M. sanction on Labor Day, two events being slated: 20 miles and 10 miles, with prizes of $50, $25 and $15 for the former and awards of $25, a pair of motorcycle tires and one motorcycle tire for the latter. Applications for blanks should be made to Bert Witacre, 190 W. Clark street, East Palestine.

## FATAL CRASH IN PHOENIX RACE

### Four Riders Hitting Top Speed Go Down When Crandall's Wheel Collapses

PHOENIX, Ariz., August 15.—Four of the five riders who figured in the 15-mile free-for-all race at the State Fairgrounds track this afternoon piled up on the north turn in one of the most spectacular tangles that has ever featured a motorcycle contest in the Southwest. Gergig, an Excelsior rider, died in the hospital two hours later from concussion of the brain; Brian, another contestant, has internal injuries, and Ellie Wilson is in the hospital in a precarious condition. Harry Crandall and Lorenzo Boido escaped with minor injuries.

Crandall took the lead from Joe O'Connell on the back-stretch in the third lap and went into the turn wide open. He was riding at a 50-second clip when the back wheel of his Harley-Davidson mount was "dished" and the machine swung directly across the track. O'Connell swept past on his Indian at terrific speed, brushing Crandall's hand but escaping a fall.

Then came Gergig's Excelsior at top speed. It struck Crandall's Harley-Davidson and Gergig was thrown head foremost into the fence. He did not regain consciousness. Wilson and Boido, coming up behind at a 50-second pace, crashed into the fallen machines and went down in a heap. Boido's machine burned and the others were completely wrecked. Gergig's magneto was hurled 50 feet through the air. Two sections of fence were torn down in the melee.

Gergig was rated as a "comer" and had achieved a reputation as a spectacular trackster. Motorcyclists of Phoenix turned out in a body at his funeral.

Prior to the accident O'Connell won the 10-mile stripped stock race in 8:38, with Crandall second, and Boido captured the 5-mile fully-equipped event in 4:49⅗. O'Connell and Boido, riding Indians, won the four-mile relay race.

### PROMOTING SPEEDWAY MEET

Tacoma, Wash.—The Amusement Company of Tacoma is promoting a race meet to be held on the Speedway either the 15th or the 22d of August. At least $1,000 in prizes is being offered, and many of the prominent riders of the country have entered so far. There will be one long race and several short ones.

Digitized by Google

## BIG PURSE OFFERED FOR MOTORDROME OPENING

Providence, R. I., August 17.—A purse totaling $1,000 will be awarded at the inaugural speed-tournament at the Narragansett Motordrome, in this city, on Saturday, September 18. This purse will be split as follows: $500 to the winner, $250 to the second man, $100 to the third, $75 to the fourth, and $50 and $25 to the fifth and sixth men respectively. The race will be for one hour.

The motordrome has just been completed by the Narragansett Speedway, Inc., and is one of the most complete installations in the country. It is a one-lap track, 50 feet wide and banked 5 degrees on the straightways and 31 on the turns. It has been designed to hold any speed possible for either motorcycle or automobile. Drainage is such that the surface will be dry an hour after the heaviest rain.

Elimination trials will be held on the morning of the race to select the field of starters. This will be limited to the 20 riders making the fastest time of the trials. The entry fee will be $10 per machine, and blanks and other information can be had from B. A. Swenson, the referee, 520 Broad street, this city. The motorcycle race will be followed by an automobile event for 100 miles.

## BIG RELAY RACE FOR COLUMBUS

Columbus, O.—The first race of the kind ever held in this city will be the 200-mile relay race that the Interstate Racing Association will conduct at the Columbus mile track on August 29. Big cash prizes are put up for the winners and additional awards in coin of the realm are hung up for the leaders at the intermediate distances.

The leaders of the city are giving their hearty support to the event, as they say an unusual amount of interest is being taken.

Entries from combinations of the best long-distance race riders in this slice of the universe have begun to come into headquarters, and there is every indication of a classy bunch of starters to face the man with the gun on the 29th of the month.

## PENNSYLVANIA F. A. M. RACES

Philadelphia, Pa.—The Pennsylvania State F. A. M. Championship races are slated for Saturday, August 28, at the Belmont Park mile dirt track near this city. The card includes a mile pro. race, a ten-mile pro. race, five and ten-mile amateur events, a five-mile novice and a three-mile amateur for 35 cubic inch motors. Gold, silver and bronze medals of F. A. M. style will be offered in each event. For entry blanks application should be made to Dr. C. G. Mueller, 1001 Franklin Building, Philadelphia, or to F. S. Craddock, care of Firestone Tire & Rubber Co., 304 North Broad street, this city.

## DEDGE WINS MATCH RACE

Washington, Aug. 16.—An argument on the question of speed that started at a hill-climb in this city on August 6 was settled on a straight stretch of road near Washington later in the afternoon, when Tommy Dedge, Indian, and A. Zimmerman, Harley-Davidson, took part in an impromptu and friendly speed contest. Posting riders along the route to clear the road of automobiles and pedestrians, the two machines tore along the smooth roadway practically neck and neck for a distance of nearly two miles, Dedge finally crossing the finish line about 30 feet ahead of his competitor.

## NEW FEATURES IN CHICAGO RACE

Chicago, Ill., Aug. 16.—Interest is rapidly growing in the three hundred mile motorcycle race which is to be staged on Labor Day, September 6, on the new Chicago two-mile speedway. All the factories, with the exception of one, have signalized their intention of entering large teams.

The Dodge City scoring method will obtain, but the race will be electrically timed. By this new means of timing there can be no possibility of errors. There will be two scorers for each rider, starting off the number of the rider and another checking the rider. Since there will be at least forty contestants, there will be eighty checkers at the speedway. Another feature will be two enormous score boards, each double faced. As was previously announced, the winner of this race will receive $1,000 and a purse of $1,500 will be divided among the other placers.

## CHAMPIONSHIP RACE FOR DETROIT

Detroit, Mich.—Chairman J. L. Donovan, of the F. A. M. Competition Committee, has awarded the 100-mile F. A. M. professional national championship to the Interstate Racing Association, to be run at the Detroit mile track on September 19. The sanction has been sent forward and preparations are being shaped up rapidly for the event.

If a good track and the best riders and machines in the game will do it, there is strong hope that a new dirt-track record for the distance will be established. The course is being groomed with care and thoroughness and is expected to be in tip-top condition so that the riders can use all they have in stock.

## SILVER LAKE PARK RESULTS

Akron, O.—Maldwyn Jones, Flying Merkel, captured the 10-mile open and 15-mile pro. race at the meet at Silver Lake Park on August 6. Lee Taylor, Indian, won a 3-mile match with Pineau, Flying Merkel, and tied with Marks, Thor, in the 10-mile pursuit race. Bertelle, Flying Merkel, captured the three-mile sidecar event, and Don Barclay, Indian, won the 5-mile for 30½ cubic inch mounts. The summaries:

Five mile, 30½ cubic inches—Barclay, Indian, first; Taylor, Indian, second; Jones, Flying Merkel, third. Time, 6:07⅗.

Ten mile open—Jones, first; Amos, Flying Merkel, second. Time, 12:27.

Three mile sidecar race—Bertelle, Flying Merkel, first; Myers, Harley-Davidson, second; G. Schroeder, Harley-Davidson, third. Time, 4:26⅘.

Three mile match between Taylor and Pineau, Flying Merkel—Taylor won in 3:44⅗.

Limited pursuit race, ten miles—Taylor tied with Marks, Thor, at limit.

Fifteen mile pro. race—Jones, first; Marks, second; Pineau, third. Time, 18:21.

## BIG PURSE PROMISED

San Angelo, Tex.—A 50-mile motorcycle road race has been announced as one of the attractions of the annual fair and carnival which is to be held during the first part of November. One thousand dollars will be awarded the winner. Purses will be offered for a number of other motorcycle and bicycle races, the details of which have not yet been arranged.

## PORTLAND MEET FOR AUGUST 22

Portland, Ore., August 11.—The Portland M. C. is to stage a motorcycle and aviation meet on the Rose City Speedway on Sunday, August 22. A large field of star speedsters is expected, as the meet will come just one week after the big 300-mile race. Ray Creviston, Don Johns, Otto Walker are expected to enter as well as Harry Brandt, Ed. Berreth, Dustin Farnham and Red Cogburn, local champions. The program includes a number of flights, as well as a race between a monoplane and a racing motorcycle.

## ELLIS IS N. Y. STATE COMMISSIONER

President A. B. Coffman, of the F. A. M., announces that he has appointed George A. Ellis, of Yonkers, as State commissioner for New York as a result of the unsatisfactory conditions attending the selection of a commissioner at the recent Saratoga convention. President Coffman explains that none of the delegates at the Saratoga convention were compelled to show their F. A. M. cards, or other credentials, and that the balloting under the circumstances could not be regarded as a formal expression of the sentiment of the State F. A. M.

## PUYALLUP RACE MEET

Puyallup, Wash.—Motorcycle races are scheduled at Puyallup during the week of September 28 to October 3, at the annual Western Washington Fair. The officers of the club are trying to get F. A. M. sanction for the event on the ⅓-mile track.

## F. A. M. MEMBERSHIP FIGURES

F. A. M. membership statistics for the month of July, as issued by Secretary-Treasurer G. B. Gibson, show that 242 new members were obtained in the affiliated class, that 152 new Federation boosters are unattached and that the renewals footed up to 279.

## APPOINTS COMMITTEE CHAIRMEN

F. A. M. President Coffman has appointed J. Leo Sauer, of New York city, to be chairman of the F. A. M. Membership Committee and E. F. Hallock, of New York city, to be chairman of the F. A. M. Publicity Committee.

## BLAIR COUNTY MEET

Altoona, Pa.—The Blair County M. C. will hold a race meet at the Altoona Driving Park on August 21. A 50-mile race will be the feature event, and the remainder of the program will consist of three short-distance races.

## LOCAL N. J. COMMISSIONERS

New Jersey State Commissioner E. B. Holton has appointed Lincoln Holland, Jr., to be Commissioner for Newark and Essex County and George H. Lewis to act in a similar capacity for Stockholm and Sussex County.

Digitized by Google

# News of the Clubs

### RUN PRIZES ARE AWARDED

Newark, N. J., Aug. 12.—Prizes won by the contestants in the recent Double Century run of the New Jersey M. C., were distributed at the club headquarters on August 10. The awards were as follows:

Percy Hagaman, 7 h.p. Indian motorcycle; Karl Segelbach, Fisk casing, 28 x 3; F. W. Cordes, Empire 28 x 3 casing; Frank Gross, Weed backrest; Walter Goerke, Coventry chain; Orrie Steele, Diamond chain; Fred E. Fine, Wald tandem; W. H. Bergfels, 28 x 3 tube; Al. Spanner, Maxo electric horn; John Steele, Eclipse brake; Jos. B. Werner, kit of Sampson plugs; Stanley Beach, New Departure brake; A. W. Herrington, gold-plated Schrader tire gauge. Clarence Eckhardt, Charles Dombach, Frank Megatty, Walter Kerr, Charles Busch, W. C. Lawrence, Howard E. Hill, Lincoln Holland, Jr., W. N. James, Chas. Fleissner, C. F. Arnold, E. B. Holton and William Williams, each received some accessory. After the prizes were distributed, refreshments were served.

### HILL CLIMB TO BE RECONTESTED

Washington, Aug. 16.—Owing to the defective condition of an electrical timing apparatus used by the National Capital Motorcycle Club in its hill-climb on August 6, Referee T. O. Wansleben has declared it no contest and ordered the climb be repeated on Saturday, September 4. The referee stated at a club meeting last week that the figures turned in by the timekeepers were so conflicting as to cause their rejection by the F. A. M. competition committee, the results showing that faster time was made in an event for strictly-stock machines from a standing start than was made in the open event with flying start. This confusion resulted from a misunderstanding of instructions on the part of the operators of an electrical timing apparatus, which was used on a former occasion with satisfactory results. Members of the club who took part in the contest on August 6 have expressed their willingness to compete on September 4.

### POPE CLUB FOR NEWARK

Newark, N. J., Aug. 15.—The Pope Social and Motorcycle Club was organized this week under the leadership of Chas. Eckert, with Chas. Kreb's store as its headquarters. The club is the outcome of a pleasant trip to Asbury Park, enjoyed by about 14 Pope riders with their fair tandemites. A run to Delaware Water Gap is on the board for this Sunday. Membership is open to both men and women, the men handling the road end and the women the social side of the club's activities.

## BIG ROAD CLUB FOR INDIANA

### F. A. M. Riders of the State Meet at Kokomo and Launch a Promising Organization

KOKOMO, Ind., August 16.—The Motorcycle Road Club of Indiana came into being at Kokomo on Sunday, August 15, at a meeting of most of the F. A. M. members of the state. The object of the new organization is to promote good fellowship among the riders, conduct tours to interesting points and generally to boost for the F. A. M.

George Evans, traveler for the Excelsior Motor Mfg. & Supply Co., who originated the idea of forming the club, was chosen as its first president, while Ray Stanfield, Indian agent at Kokomo, was elected to the office of vice-president. Kory Harwood, Indian agent at Marion, was installed as secretary, with A. C. Ferguson, Excelsior agent at Terre Haute, as treasurer.

John Merz, of Indianapolis, one of the best-known riders in the state and a veteran in both trade and road work, was chosen as road captain for the first year. To Merz will fall the important duty of supervising all the club runs. He will appoint lieutenants from all sections of the state. Merz was toastmaster of the Indiana delegation to the F. A. M. national convention at Denver two years ago, and it is doubtful if there is a more capable man in the state for the post he has now assumed.

Jack Carr, F. A. M. state commissioner, and Harry Dipple, Indianapolis distributor for the Harley-Davidson, were chosen as directors.

The first tour of the new organization will be to the 300-mile race at Chicago on Labor Day. It is planned to have at least 300 riders, all wearing the F. A. M. emblem, in line when the party reaches Chicago, arrangements being made to pick up delegations at various points along the route.

It is the aim of the promoters to develop the club somewhat along the lines of the famous Short Grass Club of Kansas, and to make it truly representative of the state F. A. M. body in Indiana.

### HAMILTON CLUB RUN

Hamilton, Mont.—The Bitter Root Valley was the scene of the recent run taken by the Hamilton M. C. of this city. Fifteen machines were ridden through the picturesque mountain country.

### ANNUAL PICNIC OF RACINE M. C.

Racine, Wis., Aug. 15.—Fifty members of the Racine Motorcycle Club journeyed to Petrified Springs for the annual picnic of the club. At the Springs the members were met by an equal number of the fair ones who had been transported to the grounds in a big sightseeing truck. The ladies also brought a fifteen-piece band.

One of the principal events on the program was a baseball game between the Carburetors and Magnetos, which was won by the Carburetors to the score of 4 to 1. Presidents Wadewitz and Albright composed the winning battery, while Secretaries Naleid and Peterson worked for the losers.

Still smarting from the sting of the defeat in the baseball game the Magnetos came back strong in the tug of war and managed to down the ball players.

### ENJOY AUGUST RUN

Haledon, N. J.—Over 60 members and guests of the Haledon M. C. participated in the August run of the club to Winding Brook Farm, some 47 miles out of this city. The run, both outward and homeward, was one of the most successful held by the club this year, there being only three punctures and one fouled spark plug experienced during the whole of the 94 miles.

After roaming over the farm, which is the property of William Hoffman, a former club member, the riders had a baseball game, followed by a pie-eating contest, with six entrants. The victory in the latter event went to Paris Giannone, who was awarded a silk handkerchief as prize.

### TWO-DAY SOCIABILITY RUN

Washington, Aug. 16.—The National Capital Motorcycle Club is planning a two-day sociability run to Rock Point, Md., to be held on Saturday and Sunday, August 21-22. The run is to be for members of the club and specially invited guests, and will be made up largely of sidecar and side-seat outfits. One of the features will be a launch ride to the encampment of the District of Columbia National Guard.

### PASSAIC CLUB OUTING

Passaic, N. J.—Members of the Passaic M. C. held their annual outing at Echo Lake, N. J., during the week of August 1. Thirty-eight solo mounts, three sidecars and one automobile participated in the run. The feature event of the day was a ten-mile road race against time. It was won by Frank Greenwood, Jefferson, in 17:32⅕. Charles Gempp, Harley-Davidson, took a tandem passenger over the course in 18:10⅘.

# On the Pacific Coast

### BAKER OUTDISTANCED TRAIN

Tacoma, Wash.—Another record has been broken by Erwin G. Baker, this time between Portland, Ore., and Tacoma, Wash. He left the Rose City at 7 a. m., August 9, and made fast time until he struck the Columbia river at Goble, where he suffered a delay of ten minutes waiting for the ferry. This was soon made up, however, when the Washington side was reached, and over roads that were in only fair condition he let out the Indian to the top-notch, arriving in Tacoma at 1 p. m., making the 168 miles in exactly six hours flat. Incidentally he beat the crack Shasta Limited train and so far as known any previous motorcycle record for the trip.

### MOTORCYCLISTS ON PARADE

Seattle, Wash.—Upwards of two hundred of Seattle's motorcyclists turned out for a monster parade through the principal thoroughfares of the city on Saturday, August 14, to advertise the Tacoma races, which brought over a nice crowd from the Queen City.

### TREMPER TO RETIRE

Seattle, Wash.—Theo. P. Tremper, popular Thor representative with headquarters in Seattle, announces that he will shortly dispose of his business on East Pike street, and retire to his farm near Shelton, Wash.

### BILL FINISHES SPECIAL SALE

Los Angeles, Cal.—John T. Bill & Co., Los Angeles representatives for the Reading-Standard and Emblem motorcycles, have just finished a closing-out sale of automobile sundries and accessories and will concentrate on the selling of motorcycles, bicycles and accessories for both once more. They are agents for the Peerless, Reading-Standard and Pierce bicycles in addition to the motorcycle line.

### SOLD EIGHT TO DATE

Modesto, Cal.—E. Howard Bartlett, who took the Smith Motor Wheel agency in Modesto three months ago, has disposed of eight of the little attachments so far. Several Modesto business men are considering taking one or more of the wheels for delivery work in the near future. Bartlett is proprietor of the Modesto Vulcanizing Works, in connection with which the agency is run.

### HEDIN SELLS OUT TO PARTNER

Turlock, Cal.—A. G. Hedin, of the West Side Cyclery, Harley-Davidson agent for this city, has sold out his interest in the firm to his partner, A. W. Swanson. Mr. Swanson, in connection with his brother, E C. Swanson, will run the establishment at 125 North Broadway, as Swanson Brothers hereafter. The agency for the Milwaukee-made motorcycles is, of course, retained. The Pierce and Miami models of bicycles are also sold.

### CARTER NOW WITH FINK

Sacramento, Cal.—R. H. Carter, captain of the Capital City M. C., has resigned from the Cameron Hardware Company, Indian distributors for this territory, and has affiliated himself with Fink's Harley-Davidson agency at 1104 J street, Sacramento.

### WHEN A SIDECAR PUT SNAP INTO A SHORE LEAVE

**Upper Picture, Mrs. Al. Swainson, Wife of Lieut. Swainson, U. S. N., Who with Her Husband Is Vacation-Touring the Country on a Sidecar, at Crater Lake, Ore. Lower Picture, Throwing Snowballs Atop of Mountain Nearby.**

### LANGLEY IS HENDERSON AGENT

Sacramento, Cal.—William A. Langley, formerly Excelsior agent in this city, has taken the Henderson agency for Sacramento and vicinity. He has opened a shop at 910 L street. One of Langley's "wrinkles" consists in a business card on the back of which the driving law and ordinances of the city of Sacramento are printed.

### WORKS VISITS THE EXPOSITION

San Francisco, Cal.—President B. G. Works, of the B. F. Goodrich Company, of Akron, O., was in this city recently for a few days' visit to the Exposition. He came to this city by the *Kroonland* from New York. Mr. Works expressed himself as well pleased with the business outlook in the entire West.

### NEUSTADT LEAVES INDIAN BRANCH

San Francisco, Cal.—B. Neustadt, who has been with the local Wigwam for the past two years, has resigned to join his father in the latter's export business in the Hawaiian Islands.

### COMMERCIAL SALES IN SAN JOSE

San Jose, Cal.—House & Showalter, Indian dealers in this city, have sold a three-speed twin to the local branch of the Kelly-Springfield Tire Co., a three-speed single to the Chase Oil Co. and a single-geared twin to the Rucker Realty Co. The Post Office recently purchased a sidevan outfit from the firm, in addition.

### COTELLI AND PADLINA OPEN

Stockton, Cal.—Joe Cotelli and M. Padlina have taken the agency for the Dayton and Thor models and have opened a shop at 410 South Center street, this city. The shop is on the main route for tourists coming over the Lincoln Highway. Both partners are experienced repairmen.

### NOW BUCK'S CYCLERY

Lodi, Cal.—Herbert Buck has bought out the interest of G. R. Lease in the firm of Buck & Lease and will conduct the business as Buck's Cyclery hereafter. The Indian is handled exclusively in this establishment. The old firm was entering its third year as Wigwam representative in Lodi, when Buck arranged matters with his partner.

### RODGER VISITS AGENTS

Los Angeles, Cal.—Frank B. Rodger, Harley-Davidson publicity man, has been visiting California dealers since the F. A. M. convention, and is an enthusiast over the roads, scenery, business prospects and the way the hustling dealers get into the game.

### THREE-SPEED CYCLONE ASSURED

San Francisco, Aug. 6.—The three-speed Cyclone is an assured fact. Ludenclose & Henry, local distributors of Cyclones in Northern California, have been apprised by the factory that a three-speed Cyclone model will be ready for exhibition at the Chicago show.

# With the Manufacturers

### HENDERSON MISSIONARIES

Detroit, Mich.—Two new recruits to the Henderson squad of travellers are Harry D. Immel, the road rider and hustling dealer, of Pittsburgh, and Arthur O. Lemon, the livewire of Youngstown, O. Both have arranged for the conducting of their stores while they are away, and will go on the trail for the factory for an aggressive campaign this fall. Immel's brother, who is his partner in the Pittsburgh store, will be in charge during this period. At present both are putting in their time at the Henderson factory in this city, getting thoroughly acquainted with all the details of the new models.

### A SPEEDY COMBINATION

Friends of C. F. Pineau and Maldwyn Jones, who won the 100-mile relay race at Toledo, Ohio, on August 8, are calling attention to the fact that the Merkel speedsters cracked up practically all the records for a half-mile dirt track. It is known specifically that they lowered the half-mile track records for 25, 50, 75 and 100 miles, the times being as follows: Twenty-five miles, 28:20; 50 miles, 57:25; 75 miles, 1:25:50; 100 miles, 1:54:13⅗.

The Jones-Pineau combination averaged 34⅖ seconds to the lap, thus traveling at the rate of a mile in 1 minute 8⅘ seconds. The former official record for the 100 miles was 2 hours 9 minutes, made by Dave Kinney at Pasadena, Cal., in 1913.

### CLOSED 231 AGENCIES IN JULY

Milwaukee, Wis.—Motor Wheel agencies to the number of 231 were closed by the A. O. Smith Company, during the month of July. The sales during that month showed a substantial increase over those of June, which was considered the banner month by the Smith people. The July sales almost doubled those of May and more than tripled those of April.

The July increase is stated to have been due in a large measure to the adoption of the Motor Wheel to commercial service in all parts of the country and in Canada. The percentage of increase in repeat orders was greater in July than in any previous month. From this showing, the Motor Wheel Division of the Smith company looks forward to a bigger increase in August as well as in September and October.

### INNER TUBE ARMOR

Toledo, O.—The Dreadnaught Inner Tube Armor Company, of this city, was recently incorporated with a capital of $25,000 to manufacture puncture-proof inner tubes for motorcycles and automobiles. The firm will soon start a factory in Toledo, but no details are as yet to hand.

### THE GOODYEAR GOAT

**This Animal is Sent to Factory Branch Making Highest Sales Record Each Month and Consequently Has Done Some Traveling Since Rivalry Between Local Stations is Keen**

### ADJUSTABLE VALVE TOOLS

Garage and repair shop foremen, as well as mechanically-inclined riders will be interested in the American adjustable valve-seating tools, the product of the American Valve Tool Company, 589 Hudson street, New York. This tool, which is quickly adjustable to any size valve cage or chamber up to 1¾ inches, consists of a series of adjustable cutters mounted on a shaft or stem, both cutters and stem being actuated by turning a cross-bar at the top. To keep the valve tool in correct line, a tail is attached to fit in the guide and thus guarantee that the valve will fit truly on the seat.

The cutters are held in a fixture, and their position with reference to the stem is controlled by an adjusting washer. This washer in turn is prevented from moving by a locking nut. Both this nut and the washer are milled to allow of close and positive movement. Cutters for 30, 45, 60 or 90 degree seats can be had. The price is $6.00 each.

Another useful tool made by the same firm is a valve facer. In this the valve is mounted rotatably in a frame, being turned by a handle attached to a shaft fitting into the nicked head of the valve. As the valve is rotated, a cutter fitted in a side piece forms the facing at the desired angle. There are of course means for adapting the tool to any length and size of valve. The tool can be clamped to a bench vise, screwed to the bench or to a wall. It lists at $6.

### INDIANS IN IRISH TRIAL

Details of the performances of the Indian entrants in the Irish classic, the "End-to-End-Run," starting July 12, have just been received by the Hendee Manufacturing Company, of Springfield, Mass. Freeman, 7 h. p. Indian, won the Palmer trophy, while C. B. Franklin, Indian sidecar, was adjudged to have made the best performance in that class and won a gold medal. The third Indian rider, V. J. Farrell, was awarded a silver medal.

The Irish reliability trial, for such it was, covered the roads from Rock Island in the south to Fortwilliam Park Gates in the north, passing through Cork, Killarney, Dublin and Limerick. Two hills, at Iscar and Dan Nancy, were considered even harder than the celebrated Glengesh with its hair-pin turns and steep grades. They had to be ascended for 45 yards at low speed and then for 100 yards at high speed. There were several secret checks in the two-day trial, and it was considered a fine showing that 18 out of 19 entrants finished.

### BLUE STREAKS AT IT AGAIN

"The weather is a trifle warm for working out track statistics," writes the Goodyear Tire & Rubber Co., "but it did not require much research to discover that Jones and Pineau, the 100-mile relay winners at Toledo; Bill Goudy, who set a new track record at the same meet; Ray Creviston, who clipped three seconds from the track record at Fresno and 'Shorty' Matthews, who won the five, ten and 25-mile events and the time trial at Ravenna, Ohio, all had their mounts shod with Goodyear Blue Streak tires." The races referred to were bunched on two days, August 7-8.

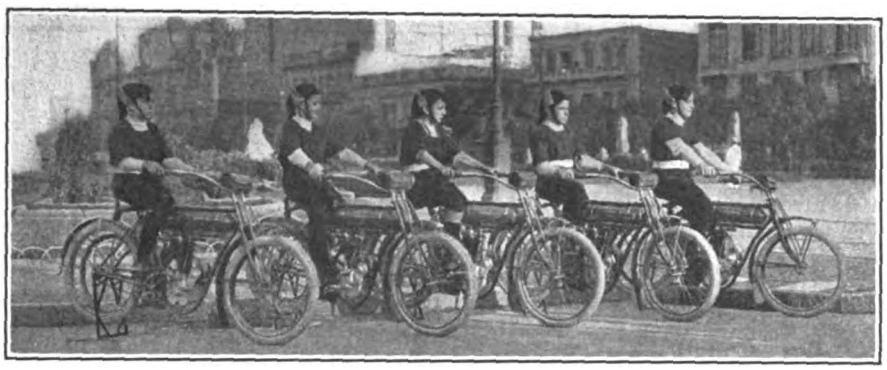
### BURD PISTON RINGS

In order to eliminate leakage of exploding gases past the piston ring-slots the Burd High Compression Ring Company, of Rockford, Ill., is producing the Burd piston rings. These rings, which form a continuous metallic packing around the cylinder, have their ends tongued in a special manner, and a metallic guard which fits around these tongue-ends closes the opening perfectly. The tongue-ends of the ring produce a light soft contact of the guard against the cylinder wall.

Not only does this leak-proof feature extend to the space above the rings, but also to that below. The oil cannot be sucked past these rings when running on the compression of the motor, as when going down

Digitized by Google

MESSENGER BOYS OF BUENOS AIRES, ARGENTINA



**Mounted on Pope Lightweights and Wearing Novel Head Dress These Boys Do Their Work with Great Rapidity and Thoroughness**

hill. Carbonization from burned oil is thus also eliminated.

The Burd rings are warranted for 30 days actual service. They may be obtained in sizes up to 2½ inches at $1 each, from 2½ to 3½ inches at $1.25, and from 3½ inches to 4½ inches at $1.50 each.

## Pioneer Company Offers New Starter

MILWAUKEE, Wis., Aug. 15.—One of the motorcycle parts industries rapidly coming to the front in this city is the Pioneer Manufacturing Company, 487 Sixty-fourth avenue, J. L. Christensen, president. The Pioneer company made its debut in the motorcycle industry with an adjustable stand adaptable to all machines, the application of which enables the rider to set up his motorcycle wherever he happens to stop regardless of the slope of the road. A lever operating a ratchet arrangement allows the stand to shift so that the machine attains the proper equilibrium automatically.

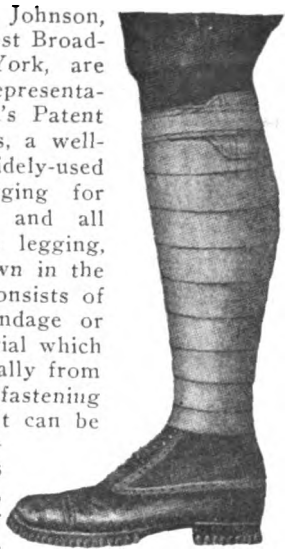
The Indian-Pioneer starter is the newest product of the Milwaukee concern. It is adaptable to 1913 and 1914 models. First glance shows a similarity between the Pioneer starter and the regular Hendee equipment, but a close examination reveals several original details in construction.

To a ring shrunk onto the chain sprocket is connected a new front plate which carries the Pioneer starter ratchet plate and pinion. The kick-starter crank is connected to crankcase by an anchor plate. Releasing the clutch is effected through the clutch release rod and disk engaged with the old front plate and by the old clutch release spiral which is removed to the right-hand side of the clutch. Thus when the spiral lever is turned to the right by the clutch hand-operating lever the clutch is released as usual, the only operation necessary preparatory to cranking the motor.

The clutch release rod is supported by a new back plate nut and ball bearing. When the clutch is released and the motor being cranked, the clutch release rod affords a firm support for the front plate and pinion and insures perfect stability in the starting mechanism.

When the machine is in motion the clutch release rod follows the movement of the clutch, eliminating friction and wear except in the ball bearing where the strain is almost unnoticeable when the clutch is engaged.

### FOX'S SPIRAL PUTTEES



Manley & Johnson, of 260-266 West Broadway, New York, are American representatives for Fox's Patent Spiral Puttees, a well-tried and widely-used form of legging for motorcycling and all sports. This legging, which is shown in the illustration, consists of a sort of bandage or strip of material which is wound spirally from ankle to knee, fastening at the top. It can be had in a variety of colors and materials, and with or without spats. It will fit anyone. A patent process prevents the edges from fraying.

The puttee was originally a leg-wrapping employed in the Indian field forces of the British Army, its name being derived from the Hindustani word meaning a wrapping. It was adopted by all troops in the British service and was found so desirable that it has been widely used by sportsmen all over the world for at least ten years. It is being used in the Allied services in the present war. The makers of the Fox puttee supply the various governments with their product.

The Fox puttee is easily adjusted or removed. Its form is such that any desired tension can be put on the leg in case of weariness of the wearer.

### INDIAN MADE BEST TIME IN AUSTRALIAN ROAD CLASSIC

According to a report recently received by the Hendee Mfg. Co. at Springfield, Mass., William Ousley on an Indian made the fastest time in the Australian Grand Prize Race, held last month, near Melbourne. The course was one of 16 miles, having to be covered 6 times, and Ousley's figures were 1:59:24. His best lap was made in 18:34. Jack Booth, also on an Indian, finished in good season, being with Ousley the only two Indian entrants.

The Grand Prize course is among the mountains, some 5,000 feet above sea level. No part of it has more than a quarter-mile of straightaway. When the race was run the ground was covered with snow and ice, and the conditions proved too much for half the 50 entrants, some of their mounts failing altogether.

### CHANGE IN NAME

Milwaukee, Wis., Aug. 17.—The name of the Pirate Motor Manufacturing Company has been changed to the Andrew Motor Manufacturing Company, for the reason that this company ceased making motorcycles several years ago and has devoted itself since exclusively to the making of farm engines. The Pirate motorcycle manufactory was taken over by the Pirate Motorcycle Company, which is making the Pirate motorcycle at the present time.

### USED WINNER'S PHOTO ON COVER

So gratified were the officials of the Club Motociclista Nacional, of Buenos Aires, Argentina, at the performance of the Flying Merkel entrant in the annual Buenos Aires road race this year, that they used his picture on the front cover of a recent issue of their club organ *Motociclismo*. The Flying Merkelite came in winner over a large field of entrants on machines from different countries.

# Kimball-Upson Co. Has Model Agency

SACRAMENTO, CAL.—One of the most complete and up-to-date agencies on the Pacific Coast is that of the Kimball-Upson Company, representing the Pope line of motorcycles and bicycles and the Smith Motor Wheel at 608 K street and 608-615 Oak avenue. The building in which the agency is located is very ample, giving great storage space for stock, a thing which is most desirable, as the company conducts a large jobbing business in cycle and automobile accessories and sporting goods as well as the retail business inherent in maintaining a motorcycle and bicycle agency.

The two main floors of the Kimball-Upson building are exceptionally well lighted. The ground floor, in addition to sales departments, has a large shop in the rear, with spare parts carefully distributed in drawers and boxes on a gallery. The machine tools in the shop are driven by belting from electric motors, all installations being overhead to give the maximum of clear floor area. Cleanliness and neatness in this department are insisted on, as well as in the stores and sales sections.

The wholesale department is located on the fourth floor, with an ample light-well to the third and also above. Standard sizes of packages and drawers are used throughout and careful sorting and arrangement of stock is made, so that the filling of orders is quickly accomplished. It is the object of the firm to be able to fill any reasonable order for any of its goods direct from stock. The pictures show the motorcycle repair shop, the wholesale supply department and a general view of the wholesale stock shelves on the fourth floor.

### DRAWING THE COLOR LINE

Kline Brothers, Louisville, Ky., Harley-Davidson dealers, are strongly supporting white riders in their attempt to hold down negro riding. Kline Brothers will not sell a Harley-Davidson, either new or second-hand to any negro, nor will they repair or supply parts for any machine owned by a negro. The boys are perfectly protected in their attitude as the company will not supply any parts excepting through the local agency, and the local men know just where every part supplied goes.

**Upper Left, Harley-Davidson Agent W. L. Hayes, of Hartford, Conn., with Machines Used by Local Police Department; Upper Right, Indian Agency of "Lucky" Horne and Bicycle Store of H. E. Collins at Greeley, Colo.; Lower Left, Frank Hazelton and His Shop at 901 Ninth Street, Washington, D. C.; Center, a Smith Motor Wheel Depot in Los Angeles; Right, Racine Cycle Company, Handling Harley-Davidson in Racine, Wis.**

### SOLD 95 SIDECARS SO FAR

George E. Wood, proprietor of the Harley-Davidson Sales Company of New York, is sure that 1915 is a record season for sidecars. His deliveries of these vehicles to August 1 totalled 95, of which 73 were of Harley-Davidson manufacture and 12 of Rogers make. "This is not counting the second-hand cars that have been sold from 533 West 110th street, our New York headquarters, but does include sidecars sold to sub-agents, from our White Plains branch, and to private owners direct. The company has frequently been confronted with orders for 10 to 12 cars in one week, and has been just about able to get them in time to satisfy the clamor of the purchasers. The season isn't over yet, for sidecars, by any means."

### A. G. MUELLER RETIRES

Milwaukee, Wis.—A. G. (Goodie) Mueller, one of Milwaukee's pioneer bicycle and motorcycle dealers has retired from the motorcycle field. The Mueller Cycle Company, founded by A. G. Mueller, will be reorganized as the Mueller Cycle & Supply Company and will continue the Harley-Davidson agency held by the old firm. The new company has been incorporated for $25,000. Louis J. Peterik, Mueller's chief salesman, will manage the new enterprise with J. F. Strachota as partner. Alterations to the present structure are being planned.

### SOLD TWELVE MOTOR WHEELS

Fresno, Cal.—Chubbic & Ruffell, bicycle and Motor Wheel agents, at 1306 Eye street, have sold twelve Smith Motor Wheels during the period of July 24-August 7. They took the agency late in July and ordered the dozen as a first lot. Two of the Motor Wheels went to the Metropolitan Life Insurance Company for collectors' service, while a third was delivered to the Radin Kamp Company for quick delivery. Orders for six more have been sent to the Milwaukee factory. The partners are exclusive agents for the Reading-Standard and Regal bicycles and find the biggest demand for a $40 wheel.

### DISPOSED OF 32 NEW ONES

Lexington, Ky.—C. D. Calloway & Co., Indian agents, have placed thirty-two new machines this year and report that the outlook for fall business is excellent at this time. The company has also done nicely with its new Smith Motor Wheel agency.

### SELLS ONE TO GRAPHOPHONE FIRM

Louisville, Ky.—The Dow Wire & Iron Works, Miami Power Bicycle agent, has just sold one of the lightweights to the Columbia Graphophone Company for use of its repairman. The latter has to cover much territory in caring for dictaphones, phonographs, and other Columbia products, and finds the machine exceedingly useful in consequence.

### BECRAFT HAS MOTOR WHEEL

Ogden, Utah.—L. H. Becraft has taken the Smith Motor Wheel agency for Ogden, in addition to his representation for the Indian motorcycle. Becraft also handles the Crescent and Becraft Special bicycles.

### POPULAR MODEL GOING FAST

Paterson, N. J.—John Steele, who keeps the Indian tepee at 91 Broadway, has already disposed of 25 of the popular model of Indians, as well as selling over 100 of the regular types. The majority of the popular model mounts were sold to employees of the Du Pont powder works at Haskell, who live in this city. The owners figure that they save $6 a week travelling expenses by using the motorcycles.

# DEALERS' SECTION

## KUPFER ESTABLISHES SERVICE DAY

Los Angeles, Cal., Aug. 13.—An innovation for the A. M. Kupfer Corporation, and possibly something entirely new among motorcycle dealers, is the inauguration of "Service Day," which gives each Henderson rider an opportunity to have his motorcycle inspected free of charge on Wednesday afternoon once a month. In carrying out this plan Kupfer has set aside Wednesday of each week as "Service Day" and has one of the skilled mechanics in his shop go over any machine brought in and point out any mechanical adjustment or trouble that needs attention.

In a circular issued on this matter it is pointed out that a skilled mechanic can more easily discern any mechanical trouble which may be in the early stages of development than the average rider, and this "Service Day" inspection prevents unnecessary expense which would arise through neglect of any such matter. The rider may, on request, have access to the parts catalogue showing the exact cost of any parts needed and an estimate on any necessary shop time. The rider can either have the work done in the shop or do it with the tools provided.

## HENDERSON SALES CO. FORMED

Boston, Mass.—The Henderson Motorcycle Sales Company has been incorporated in this city, with a capital stock of $15,000. Charles A. Hubbard is president, Ben C. Straube is treasurer and general manager. These two, with Charles A. Waterman, form the board of directors. The company will distribute Henderson motorcycles in Massachusetts, Maine, New Hampshire, Vermont and Rhode Island.

Mr. Hubbard, the president, has never been connected with the motorcycle business before, but is a well-known official in the United Fruit Co. Mr. Straube has been in the motorcycle trade for the past nine years, having been recently general manager for the Hub Cycle Co., distributing the Henderson in New England. Mr. Waterman is an expert motorcycle mechanic, with ten years of experience. He will have charge of the repair department of the new concern.

The Henderson Motorcycle Sales Company, Inc., has bought out the store, stock and equipment of the Reading-Standard Sales Co., at 141-145 Columbus avenue and is making extensive alterations preparatory to the opening on September 1.

## LEAVES MILWAUKEE TEPEE

Milwaukee, Wis.—C. A. Carpenter has tendered his resignation as manager of the Wisconsin Motorcycle Company, Indian distributor for Wisconsin and Upper Michigan. He has not yet made his future plans known, but states that he will take a little vacation before getting back into harness. William Chesak has been made temporary manager of the company.

## NEARLY 70 INDIANS SOLD

Louisville, Ky.—Frank Marshall, secretary-treasurer and general manager of the Century Cycle Company, local Indian agents, is now well along toward selling the seventieth 1915 Indian. The second-hand market in Louisville has been good and the Century firm has profited accordingly, while sales of supplies and accessories have been large.

## ARMSTRONG IS MERKEL AGENT

Paterson, N. J.—Frank Armstrong has taken the Flying Merkel agency for Paterson and vicinity. He has opened a shop at Crooks avenue and Main street, where he will conduct a general motorcycle repair business in addition to the Flying Merkel representation.

The Flying Merkel has not been represented in this city for over a year. The former representative, Norman Heil, is manufacturing brake linings in Paterson at present, but still retains his motorcycle shop in Totowa Borough.

## BABB FORMS CLUB

Paterson, N. J.—Walter Babb, Pope agent in this city, has formed a club among his patrons. There are seventeen members at present. Babb's store at 322 Market street is being utilized as club headquarters until desirable accommodations can be obtained.

### ARMY OFFICER RIDES INDIAN FROM SAN FRANCISCO

Boston, Mass.—Lieutenant E. L. Hoffman, Second Infantry, U. S. A., rode into Army Headquarters in this city on August 10, after having traveled from San Francisco most of the way on an Indian three-speed twin. He made the trip to obtain data for the War Department as to the all-around practicability of the motorcycle from military service.

Lieutenant Hoffman rode from the Pacific Coast city to Salt Lake City on the Indian, but ran into flooded country at Arapahoe, Wyo., so shipped the mount to Omaha, Neb., and later to Chicago. He remounted at Chicago and came on to Boston. He reports having deserted the Lincoln Highway after being on it for some distance, partly because of heavy traffic and stiff prices charged for everything. The officer reported many automobiles stalled in the flooded sections of the West where it had been raining for months. "When I read of Baker's ride," said the lieutenant, "I didn't have so much respect for his ability as I have now. I've bumped the ties, wallowed in gumbo, spilled in ditches and floundered in the desert and now my opinion has changed."

Hoffman covered close to 3,500 miles. His best day's ride was 320 miles and his average close to 200 per day. He reported no motor or carbureter trouble and did not change a spark plug. His ignition equipment was a Splitdorf Mag-Dynamo. He will ride back to San Francisco later and there ship for Honolulu.

## Still Another Field for Motorcycle

JANESVILLE, Wis.—Prof. Allen B. West, supervisor of agricultural activities in the schools of this city, is an enthusiastic motorcycle rider. His motorcycle plays a large part in Prof. Allen's work, as most of the agricultural teaching of the Janesville schools is worked out on the home project plan, making it necessary for the supervisor to personally inspect hundreds of plats in and around the city.

Prof. Allen has fifty boys under his care in the high school. Each of these is caring for a home garden for credit in his work, the amount of credit depending on the amount and quality of work done, the projects being along the lines of milking and recording milk, also testing, raising an acre of corn, an acre of potatoes, a half acre of pop corn, raising tobacco, onions and truck gardening generally.

"With the motorcycle I am able to visit each of the boys two or three times during the season for inspection, instruction and advice, and the fathers and mothers usually are on hand for various kinds of advice too. In addition to this I have 55 grade boys and girls who have gardens varying in size from a small flower garden to a truck garden.

"Some of my boys live ten or twelve miles away from town and this makes considerable riding."

## FACTS AND FIGURES ON THE EXPORT SITUATION

WE are just in receipt of a report, prepared at the request of **Motor Cycle Illustrated** by the Bureau of Foreign and Domestic Commerce, of the Department of Commerce, giving the valuations of cycle exports from France, Great Britain and Germany during the first six months of 1915, as compared with similar exports during the first six months of 1914.

### Government Figures Tell the Story

We procured these figures because we were of the impression that the difference between the 1915 exports and those of 1914 would be rather large, on account of the war. Not only do the figures establish the correctness of this impression, but they prove that there is a tremendous opportunity for American manufacturers of motorcycles, bicycles, parts and accessories to build up a large business in countries which have hitherto purchased most of their cycles from Great Britain, France and Germany. The figures show that these three countries will do approximately $12,000,000 less business in motorcycles, bicycles, parts and accessories, with foreign countries, than they did in the year 1914.

### Falling Off in French Exports

During the five months ending May, 1914, French manufacturers of cycles and accessories exported 1,967 motorcycles. During the five months ending May, 1915, exports of motorcycles total only 377, a difference of 1,590. Assuming the valuation per machine to be $250, it will be seen that France has exported $397,500 less of motorcycles during the five months of this year than during the first five months of 1914. The loss sustained in the export of bicycles is in the same proportion.

### British Loss About 50 Per Cent.

During the six months ending June, 1914, Great Britain exported motorcycles, bicycles, parts and accessories totalling in value approximately $8,500,000. During the first six months of this year, English exports in these lines dropped down to a valuation of about $4,750,000. In other words, England's export business in cycles is something like $3,750,000 less for the first six months of 1915 than it was for the same six months in 1914.

### No Cycle Exports from Germany

During the first six months of 1914, Germany exported motorcycles and bicycles to the value of $1,450,000. Germany's exports during the first six months of 1915 have been practically nil.

### An Eleven Million Dollar Market

To sum up, these three countries show an export loss, for six months, of $5,597,500. Assuming that the same proportion will hold good for the balance of the year, $11,000,000 may be regarded as a fairly accurate estimate of the 1915 loss sustained by France, Germany and Great Britain in the export of cycles and parts.

### Buyers Look to This Country

Buyers in all parts of the world who have been looking to English, German and French manufacturers for their cycles now have no alternative but to buy from American manufacturers. A market valued at more than

October 2, Wheeling, W. Va.—Race meet under the auspices of the Wheeling M. C.

October 11-16, New York, N. Y.—National motorcycle and bicycle show at Madison Square Garden under the auspices of the Motorcycle Manufacturers' Association.

October 12, Boston, Mass.—Race meet at Readville Park track.

November 20, Phoenix, Ariz.—Race meet at local track.

November 25, Wheeling, W. Va.—Hill climb under the auspices of the Wheeling M. C.

## FIND MACHINES VERY MARKETABLE

Louisville, Ky.—The Krausgill Piano Company, of Louisville, has found that a motorcycle taken in part payment for a piano is by no means a commodity that is hard to dispose of. Last year a Yale rider got married and decided that he needed a piano worse than a motorcycle, so Arthur Krausgill, the president of the firm, allowed him $125 for it on a new upright.

## FACTS AND FIGURES ON THE EXPORT SITUATION

**(Continued from previous page.)**

$10,000,000 a year is certainly worth going after. Moreover, these figures have nothing to do with the business that can be done in England and France and, later on, in Germany. The manufacturers in those countries who were making motorcycles and bicycles a year or so ago are now making shells and other war necessities.

### Our Greatest Opportunity

Never before have American manufacturers been favored with such an opportunity. It is one of so much promise that the publishers of this paper have decided to do all in their power to put our manufacturers in touch with this big and valuable market. Our plan is a simple but effective one, and those interested are invited to write us for full particulars.

## THREE MORE ATTORNEYS

Legal Action Chairman Johnson announces the following additions to the list of F. A. M. attorneys: A. B. Clark, Pittsfield, Mass.; McNary Brothers, Salem, Ore., and O. B. Hughes, Brattleboro, Vt.

## GRAND RAPIDS RUN CORRECTIONS

H. C. Scherer, Michigan F. A. M. commissioner and a member of the Contest Committee for the recent Grand Rapids run, calls attention to misleading statements which appeared in the story of the run in these columns. In the first place, the run was a state F. A. M. affair and was merely under the auspices of the Grand Rapids M. C., says the commissioner. The finish of the run was at the Grand Rapids *Herald* building, not at the Livingston Hotel.

The *Herald* gave splendid co-operation in connection with the affair, and Commissioner Scherer is anxious that the newspaper be given the credit it deserves. Scherer further objects to the statement that he was retired because of a broken frame, and explains that he went out on account of magneto trouble near Cranberry Creek, not because of the water, but through the magnets dying. Blakeslee, who was referred to in the story as being retired, went through to the finish, according to Commissioner Scherer.

## AN ECHO OF THE RELAY

John L. Donovan, chairman of the F. A. M. Competition Committee and manager of the recent transcontinental motorcycle relay, has been asked to consider a protest from C. McQuerry, of Reno, Nev., concerning the transportation of President Wilson's message on Relay 35, from Fernley to Reno. McQuerry, who handles the Harley-Davidson in Reno, states that he had made arrangements to have the message carried from Fernley to Reno by Vernon D. Summerfield, on a Harley-Davidson, but that his plans were upset when Erwin G. Baker, the Indian veteran, failed to turn the message over at Fernley and went on with it to Reno. McQuerry asserts that Baker followed a back road through Fernley instead of adhering to the prescribed route, which would have brought him in touch with McQuerry and Summerfield.

When the matter was later called to Baker's attention in Reno he stated that he had heard the back road referred to was unusually bad and that he simply wished to try his prowess on it.
